#90296p8196 10/23/1990 ~PR Newswire

TROY, MI (OCT. 23) PR NEWSWIRE - Kelly Services, Inc. (NASDAQ: KELYA, KELYB), the nation's largest temporary help company, today announced sales and earnings for the third quarter of 1990.

Kelly Services President and Chief Executive Officer Terence E. Adderley announced that sales for the quarter ended Sept. 30, 1990, reached $386 million, an increase of 7.6 percent over the $359 million reported for the corresponding period in 1989.

Net earnings of $20.9 million were up 1.5 percent from the $20.6 million reported for the third quarter of 1989. Earnings per share amounted to 70 cents per share versus 69 cents per share in 1989.

"We are pleased with this quarter's results, particularly in view of the weakening economy," Adderley said. "Competitive pricing pressures continued, but were partially offset by additional efficiencies in our operations."

Comparative sales and earnings for the third quarter and nine month periods of 1990 and 1989 were:

KELLY SERVICES, INC.
(In 000s except per-share data)

	Third Quarter(a)		Nine Months(a)	
	1990	1989	1990	1989
Sale of services	$386,067	$358,799	$1,108,707	$1,025,775
Costs and expenses	352,879	325,984	1,021,294	939,177
Earnings before income taxes	33,188	32,815	87,413	86,598
Income taxes	12,250	12,185	32,470	32,325
Net earnings	20,938	20,630	54,943	54,273
Earnings per share	0.70	0.69	1.83	1.81
Average number of Class A and B common shares outstanding	30,072	30,043	30,064	30,034

(a) -- The 13- and 39-week periods for 1990 ended Sept. 30 and, for 1989, ended Oct. 1.

#90296p8198 10/23/1990 ~PR Newswire

HOUSTON (OCT. 23) PR NEWSWIRE - The GNI Group, Inc. (NASDAQ: GNUC) announced today that revenues for the first quarter ended Sept. 30, 1990 were the highest in the company's operating history. Revenues for the period this year were $4,712,123 compared to $3,167,392 a year ago. However, the 49 percent increase in revenues was offset by a 62 percent increase in costs and expenses which resulted in net income of $87,748 or $.02 per share for the most recent three months compared to net income of $271,736 or $.06 per share for the same period last year.

GNI continued to experience strong increases in demand for its processing, treatment and disposal services. The company's new chemical processing plant, which went on-line on July 1, 1990, contributed to revenues during the quarter but below budgeted levels.

Operating costs were impacted by the increased level of business and by new environmental compliance requirements that regulate the manner in which hazardous wastes must be divided and segregated. These regulations have increased the company's handling costs, including additional costs for labor, treatment supplies and off-site disposal. The company is also being faced with new and additional taxes at certain landfill facilities. The management of these costs is being aggressively employed and these efforts should be reflected in second quarter financial results.

Depreciation and amortization expenses for the three months ended Sept. 30, 1990 were slightly more than double those of the comparable period in 1989. They reflect the $8.8 million invested in fixed assets during fiscal 1990, including the $6.5 million invested in construction of the chemical processing plant.

The GNI Group, headquartered in Deer Park, Texas, provides a broad range of integrated hazardous waste management services for over 300 major industrial customers across the United States. The company's "single source" services include transportation, treatment, processing, recycling and disposal.

THE GNI GROUP INCORPORATED CONSOLIDATED STATEMENTS OF OPERATIONS
(Unaudited)

Three months ended	9/30/90	9/30/89
Net revenues	$4,712,123	$3,167,392
Operating income	417,577	511,597
Income before tax	151,351	438,059
Net income	87,748	271,736
Net income per share	$ .02	$ .06
Weighted average shares	4,593,435	4,520,262

#90296p8199 10/23/1990 ~PR Newswire

PARSIPPANY, N.J. (OCT. 23) PR NEWSWIRE - Net sales and earnings from continuing operations before provision for income taxes for the third quarter of 1990 were ahead of the comparable 1989 period, Athlone Industries Inc. (NYSE: ATH) reported today. Net sales for the third quarter of 1990 amounted to $60,572,000, compared to net sales of $58,170,000 in 1989. Earnings from continuing operations before provision for income taxes for the third quarter of 1990 amounted to $2,809,000, compared to $716,000 in 1989.

Net earnings for the third quarter of 1990 amounted to $1,663,000, or $.26 per common share, which was higher than the $1,447,000, or $.20 per common share, for the comparable 1989 period. The 1989 earnings included a net benefit for income taxes, due to the utilization of operating loss carry-forwards. No carry-forwards were available for 1990.

The company reported net sales of $194,460,000 for the nine months of 1990, compared to $217,719,000 for the 1989 period. Net earnings for the nine months of 1990 amounted to $5,319,000, or $.82 per common share, compared to $14,202,000, or $2.41 per common share, in 1989.

The company presently expects operating results for the second half of 1990 to be ahead of the second half of 1989, due in part to lower interest costs and to increased shipments of specialty steels.

As previously announced, the company is continuing to review its diversified operations with the overall objectives of concentrating on its core business, specialty metals, and to be positioned to consider other opportunities to enhance the value of the company's common stock.

Commencing in 1989 to date, the company has retired $50,000,000 of its $75,000,000, 15 5/8 percent notes. The sources of funds for this retirement program were internally generated cash, including the proceeds of the sale of the Dudley Division. The company is presently negotiating to arrange financing at current market rates to refund the remainder of these notes. The retirement of these notes will result in substantial interest savings to the company.

On Oct. 19, 1990, the board of directors declared the regular quarterly dividend of $.25 per common share payable Nov. 16, 1990, to stockholders of record Nov. 2, 1990.

#90296p8202 10/23/1990 ~PR Newswire

FAIRFIELD, Conn. (OCT. 23) PR NEWSWIRE - Acme United Corporation (AMEX: ACU) today reported net income of $211,798, or 6 cents per share, for the 13-week period ended Sept. 29, 1990. This compares to net income of $33,872, or 1 cent per share, for the 13 weeks ended Sept. 30, 1989.

Net sales for the third quarter of 1990 were $11,240,667, a 15 percent increase over net sales of $9,717,964 in the similar period of 1989.

Net income for the 39-week period ended Sept. 29, 1990, was $1,212,848, or 37 cents per share. This represents an increase of 720 percent over net income of $147,762, or 5 cents per share, in the comparable period of 1989.

Net sales for the 39-week period of 1990 were $34,251,248, an increase of 17 percent over net sales of $29,321,410 in the similar period of 1989.

"The third quarter earnings were good in view of plant closings in July for paid vacations, which lasted two weeks in the United States, three weeks in England and the full month in Germany," said Henry C. Wheeler, chairman and chief executive officer. "In addition, added expenses for annual plant maintenance and repairs were realized during the closings, while relatively fewer shipments were made during this period.

"The increase in earnings for the third consecutive quarter resulted from a sharp increase in sales and profits from our foreign subsidiaries, especially our new acquisitions in Germany and England. In addition, we continue to realize economic benefits from domestic cost-cutting moves implemented in late 1989.

"We look for continued improvement in sales and profits for the remainder of 1990 and throughout 1991," Wheeler said. "Our European operations enjoy a leadership position, while our consumer and medical product businesses in the United States are doing well in spite of the downturn in the national economy."

Acme United is a leading producer of metal disposable surgical instruments, sterile procedure trays, germicidal products and wound-care packs for hospitals and the after-care market as well as the country's largest producer of household shears, scissors, wooden rulers and yardsticks for the consumer.

#90296p8203 10/23/1990 ~PR Newswire

NEW YORK (OCT. 23) PR NEWSWIRE - Motorola Inc.'s (NYSE: MOT) Radio-Telephone Systems Group (RTSG) announced today that it has developed a new Wireless

In-Building Network (WIN) technology to provide high-speed communications among personal computers and other electronic equipment inside a building. The technology makes possible a whole family of high-speed wireless communications systems and components to be introduced by the company over the next decade.

The first product to embody WIN technology, scheduled for introduction during the first quarter of 1991, will enable wireless local area network (LAN) communications between personal computers at speeds of 15 million bits per second (Mbps).

Unlike existing wireless alternatives that use much lower frequencies, Motorola's WIN technology uses 18 gigahertz (GHz) radio frequencies which have both the capacity and technical properties to carry large amounts of information at very high speeds within buildings or parts of buildings.

Compatible with today's cable-based data communications speeds, standards, and protocols, the technology can complement, extend, or replace current hard-wired networks such as Ethernet or Token Ring. The technology is a high-speed transmission medium that replaces wiring and cabling and is transparent to existing communications standards and protocols.

At a technology briefing in New York, Bernard R. Smedley, senior vice president and general manager of the Radio-Telephone Systems Group, explained, "Given the physical, logistical, and financial problems associated with wire and cable-based communications in buildings, our goal was to develop a practical, high-performance technology to replace 'the last 100 feet of wiring' to office desks and equipment. Besides being easy to deploy, reliable and secure, the technology would have to equal or exceed data transmission speeds provided by today's hard-wired solutions. It would also have to be economical and completely transparent to users' current investment in network operating systems, applications, and hardware. The WIN technology achieves these goals.

"Wireless communications products currently on the market provide only very limited speed, performance, and network compatibility. Now," Smedley continued, "WIN technology makes high-speed data communications in the office or other in-building environments truly practical, cost effective, and achievable."

James Bills, executive vice president of Novell Inc. (NASDAQ: NOVL) added. "We're very enthusiastic about Motorola's new wireless technology. At Novell, our mission is to move the network computing industry forward. We believe that the Motorola technology will make a significant contribution to the evolution of the network computing market and will result in overall industry growth."

Novell Inc. develops NetWare systems software products that manage and control

the sharing of data across a variety of network computing environments, including computer workgroups, departmental newtorks and business-wide information systems.

The system technology is based on a microcellular communications newtork architecture using very low power 18-GHz radio as the data transmission medium. Motorola's use of this licensed frequency is made possible by the Federal Communications Commission's (FCC) April 1990 rulemaking changes that allow the application of low power radio communictions inside buildings using the 18-GHz Digital Termination Service band.

This largely unused portion of the electromagnetic spectrum is ideal for networked communications within buildings. This frequency offers clear, interference-free, and uncrowded spectrum, enough bandwidth (or data carrying capacity) to handle higher data speeds expected of future systems, sufficient signal separation to ensure reliable performance and data integrity, and propagation characteristics well suited to low-power, in-building networks where high spectrum reuse is a critical issue. (Spectrum reuse refers to reuse of the same frequencies by multiple sets of different users who, by definition, are near each other, e.g., on different floors, or parts of floors of an office building.)

Although the FCC's rulemaking changes provided the spectrum needed to, ultimately, use WIN technology, Motorola still had to overcome significant technical hurdles associated with equipment size, expense, and complexity of traditional 18-GHz radio systems. Motorola has developed solutions to the fundamental technical challenges facing a workable 18-GHz in-building communications network technology. Four key technologies are at the heart of the system. No single technology solved one specific barrier, but rather, each patented Motorola solution overcame a combination of technical problems.

Motorola's new WIN initiative is yet another logical step in the company's long-term vision of a wireless world. "Over the next 20 years, we will witness a 'wireless evolution' in professional and personal communications," according to Edward F. Staiano, president of Motorola's General Systems Sector. "Advances in technology will drive this evolution and free us from the 'bonds' of wire that today restrict our movements and interaction," Staiano continued. "As the world's largest supplier of wireless communications devices, Motorola is uniquely positioned to shape this vision. The WIN technology is but our first step towards wireless communications inside buildings."

Motorola is the world's leading designer, manufacturer, and supplier of cellular systems, infrastructure equipment, and subscriber products. It is also a leading provider of electronic equipment, systems, components and services for worldwide markets, including two-way automotive and industrial electronic equipment, computers, data communications, and information processing and handling equipment. Motorola was a winner of the first annual

Malcolm Baldrige National Quality Award in 1988, in recognition of its superior company-wide management of quality processes.

Technical White Paper, Radio Primer, and Group Backgrounder available upon request. Motorola is a registered trademark of Motorola Inc.

#90296p8207 10/23/1990 ~PR Newswire

NEW YORK (OCT. 23) PR NEWSWIRE - Forest Laboratories, Inc. (AMEX: FRX), an international pharmaceutical manufacturer and marketer, today reported record revenues and earnings for its second fiscal quarter ended Sept. 30, 1990.

Net income for the quarter increased 21 percent to $9,078,000 from the $7,509,000 reported in the second quarter of the prior year. Fully diluted net income per share equalled $.44 in the current year as compared to $.36 in last year's second fiscal quarter.

For the quarter, net revenues increased 16 percent to $42,421,000 from $36,483,000 based on an increase of 17 percent in net sales and a reduction in research revenues.

For the six months ended Sept. 30, 1990, income before taxes increased 38 percent to $25,065,000 from the $18,147,000 reported in the first six months of the prior year. After allowing for the $1,875,000 of non-recurring merger related costs reported in last year's six months, income before taxes would have increased 25 percent. Net income increased 33 percent to $17,348,000 from $13,080,000 reported in the six months of the prior year. Fully diluted net income per share equalled $.83 in the current year's first six months as compared to $.64 in last year's six months.

For the first six months of the current year, net revenues increased 18 percent to $83,712,000 from $70,755,000.

Howard Solomon, president of Forest, said, "The second quarter increases in revenues and income resulted from continued demand for the company's principal promoted branded products." Solomon noted that "Sales of AeroBid (R) and Aerochamber (R) were particularly strong as the trend toward the use of metered dose inhaled steroids as first line therapy in the treatment of asthma continues to gain momentum."

#90296p8208 10/23/1990 ~PR Newswire

DETROIT (OCT. 23) PR NEWSWIRE - The Detroit Edison Board of Directors today elected Robert J. Buckler, 41, vice president - Divisions, effective Dec. 1. Buckler currently is manager of the utility's Executive Council Staff.

John M. Wisniewski, 46, manager of the company's Wayne-Monroe Division since 1986, has been named to replace Buckler as manager of the Executive Council Staff.

The vice president - Divisions position has not existed since the company's Division Organization and Marketing department were consolidated to become Energy Marketing and Distribution in 1988.

In his new position, Buckler will oversee operation of the company's six geographic divisions and have responsibility for energy sales, customer service, line construction and maintenance, and distribution system engineering and planning. He will report to Willard R. Holland, senior vice president - Energy Marketing and Distribution.

Buckler joined Detroit Edison in 1974 as an engineer in the company's Generation Engineering special projects group. He progressed through a variety of management positions in the utility's operations, including Fuel Supply, Fermi 2 construction, Production, Division Organization and Planning. He was named director, Executive Council Staff in 1988 and manager of the group the following year.

Buckler received a bachelor of science degree in mechanical engineering in 1971 and a master's of science degree in mechanical engineering in 1973, both from the University of Michigan. A registered professional engineer, he is a member of the American Society of Mechanical Engineers and the Engineering Society of Detroit. He also is active in numerous community activities.

Buckler, his wife Victoria, and their two children live in Grosse Pointe.

In his new position, Wisniewski will be responsible for management of the Executive Council Staff and the coordination of major studies and policy development for senior management. Wisniewski will report to John E. Lobbia, chairman and chief executive officer.

Wisniewski joined Detroit Edison in 1967 as an assistant engineer in Engineering Design and Services. He has held management positions in the company's Technical Systems, Administrative Systems, Division Organization, Nuclear Operations, Corporate Planning and Production areas.

Wisniewski received a bachelor's degree in architecture from the University of Michigan in 1967 and a master's degree in business administration from the University of Detroit in 1971. He is a member of the Engineering Society of

Detroit and is active in many community organizations.

Wisniewski, his wife Cynthia, and daughter live in Plymouth.

#90296p8213 10/23/1990 ~PR Newswire

WHITE PLAINS, NY (OCT. 23) PR NEWSWIRE - Texaco Inc. (NYSE: TX) announced today consolidated worldwide net income of $381 million, or $1.38 per share, for the third quarter of 1990 versus third quarter 1989 net income of $305 million, or $1.10 per share. Net income for the first nine months of 1990 was $1,062 million, or $3.78 per share, representing a $126 million, or 13-percent increase, over 1989 net income after excluding the first quarter 1989 restructuring gain of $1,190 million, which resulted primarily from the sale of Texaco Canada Inc. Net income for the first nine months of 1989 including this gain was $2,126 million or $8.19 per share.

	($ Millions)			
	Third Quarter		Nine Months	
	1990	1989	1990	1989
Net income excluding restructuring	$381	$305	$1,062	$ 936
Net restructuring gain	-	-	-	1,190
Total net income	$381	$305	$1,062	$2,126

James W. Kinnear, Texaco's President and Chief Executive Officer, stated: "Events in the Middle East caused an uncertain and volatile world oil market and the price of crude oil rose about $23 per barrel, or some 54 cents per gallon during the quarter. While this increase benefitted the company's upstream results, downstream refined product margins declined significantly since July due to the inability of the competitive marketplace to absorb higher crude and product acquisition costs. In the quarter, Texaco's U.S. wholesale gasoline prices increased by less than half of the rise in crude prices. Product-price increases in other key markets also failed to fully reflect increased raw material costs. Texaco's petrochemical results were also impacted by increased raw material costs as well as lower prices and plant downtime."

Texaco's revenues for the third quarter of 1990 were $11.0 billion versus $8.4 billion for the same period of 1989. The 1990 third-quarter revenues reflected higher crude oil and product prices as well as increased sales volumes. Revenues for the first nine months of 1990, reflecting higher sales volumes and prices, totalled $28.8 billion as compared to $26.4 billion for the comparative period in 1989, which included a first-quarter before tax gain of $2.1 billion from the sale of Texaco Canada.

LAKEWOOD, COLO. (OCT. 23) PR NEWSWIRE - A notable increase in oil production attributable to recent acquisitions and development drilling, combined with higher oil prices, resulted in increased earnings for Plains Petroleum Company (NYSE: PLP). Higher oil revenues more than offset the impact of lower gas volumes sold in the third quarter.

The company announced today third-quarter earnings of $2.9 million or 31 cents per share, up 7 percent from last year's $2.7 million (29 cents per share). Oil volumes doubled to 136,000 barrels, but gas volumes were down 20 percent to 3.9 billion cubic feet due to reduced purchases by the company's major customer. A return to more normal levels for natural gas volumes is expected to occur during the fourth quarter 1990 and for the full year 1991. Plains' revenues increased 8 percent to $10.3 million for the quarter.

For the nine months, results of $10.7 million, or $1.13 per share, were 10 percent ahead of last year's $9.8 million ($1.03 per share). Revenues rose 5 percent to $32 million and cash flow from operations grew 17 percent to $16.8 million for the nine months.

Plains, a Colorado-based company, produces, develops and explores for oil and gas in the midcontinent, Permian Basin, Gulf Coast and Rocky Mountain regions of the United States. The company also maintains offices in Lakin, Kan., and Midland, Texas.

PLAINS PETROLEUM COMPANY

#90296p8216 10/23/1990 ~PR Newswire

NORTH BRUNSWICK, NJ (OCT. 23) PR NEWSWIRE - Guest Supply, Inc. (NASDAQ: GEST) announced today the sale of Guest International Australia to the division's managing director. Guest International Australia designs, markets, and distributes amenity programs to individual hotels and hotel chains in Australia. The closing took place on Oct. 1, 1990. Terms of the transaction were not disclosed.

Cliff Stanley, president and chief executive officer of Guest Supply, stated, "The Australian division represented a very small portion of Guest Supply's business. Its sale is consistent with our strategy of focusing our resources on penetrating the $2.5 billion U.S. lodging supply market. This transaction will not have any material affect on the financial statements of the company."

Guest Supply's 13 distribution centers in the United States provide customers with one-stop shopping services and rapid delivery of products.

Guest Supply is the leading manufacturer and marketer of toiletries, personal care products, and other amenities, as well as housekeeping and accessory products, to the lodging industry in the United States.

#90296p8218 10/23/1990 ~PR Newswire

BOSTON (OCT. 23) PR NEWSWIRE - Houghton Mifflin Company (NYSE: HTN) today reported gains in revenue and income for the third quarter, ended Sept. 30, 1990. Net sales were $178.8 million, a 6.7 percent increase over last year's $167.5 million. Net income rose 7.8 percent to $26.8 million, or $1.88 per share, compared with $24.9 million, or $1.75 per share, in 1989.

For the nine months ended Sept. 30, 1990, net sales were $345.0 million, a 7.3 percent increase over the $321.5 million recorded in 1989. Net income for the nine months rose 8.9 percent to $26.3 million, or $1.84 per share, from $24.1 million, or $1.70 per share, a year ago. The 1990 nine-month results included a nonrecurring net gain of $4.0 million, or 17 cents per share after taxes.

Nader F. Darehshori, chairman and chief executive officer, said, "Educational publishing segment sales rose 6 percent in the third quarter led by the School Division where sales grew at a higher rate. Sales of elementary and secondary school publications both achieved solid gains over last year's third quarter. General publishing segment sales increased 12 percent primarily from sales by international operations including Gollancz, which was purchased in the fourth quarter of last year. Trade & Reference Division sales equaled last year's strong third-quarter performance and Software Division sales were above 1989's third quarter.

Darehshori said, "Earnings for the third quarter were affected by lower than planned college textbook sales and increased editorial and plate expenses associated with the development of new publications for the school and college markets. School and college marketing costs also increased during the quarter. As expected, the company's foreign subsidiaries continued to have a dilutive effect in the third quarter.

"The results for 1990 reflect the major investment the company is making in new publications to address fortune opportunities. The company is introducing for 1991 new elementary school reading and social studies programs as well as expanded lists of secondary school and college publications which will have a positive impact in 1991 and future years."

Darehshori said, "The Trade & Reference Division is expected to achieve good fourth-quarter 1990 sales results, but the continuing high level of college and school publication development and selling costs related to 1991 textbook adoption opportunities is expected to contribute to a fourth-quarter seasonal loss that exceeds historical levels."

LAS COLINAS, TEXAS (OCT. 23) PR NEWSWIRE - M/A/R/C Inc. (NASDAQ: MARC), a leading provider of marketing services, today reported earnings of $761,000 or $0.28 per share for the quarter ended Sept. 30, 1990. The company's net income increased 20.7 percent over the $631,000 or $0.21 per share recorded in the same period last year. Revenues reached a quarterly record of $18,304,000 for the recent three months, up 20.5 percent from $15,188,000 in the year-ago period.

For the six months ended Sept. 30, 1990, M/A/R/C's net income was $1,329,000 or $0.49 per share on revenues of $35,428,000. In the first half of last fiscal year, earnings were $1,403,000 or $0.47 per share on revenues of $30,417,000. Per share amounts for the recent three-and six-month periods reflected a reduction in common shares outstanding as a result of stock repurchases.

M/A/R/C also announced a plan to reorganize as a holding company, effective Jan. 1, 1991. The firm will be renamed The M/A/R/C Group, and each of its four primary businesses will become a separate, wholly owned subsidiary of the new holding company. These subsidiaries will engage in custom marketing research, market modeling and forecasting, database marketing, and customer satisfaction measurement.

One subsidiary will comprise M/A/R/C's original custom marketing research business. The unit will produce studies that assist customers in developing new products or repositioning existing items, managing marketing information, and creating effective marketing strategies. Peter B. Bogda, currently executive vice president of the parent company, will become president of the subsidiary.

Another new unit will assume responsibility for M/A/R/C's market modeling groups in Dallas, Boston and Chicago. Using the company's proprietary models, the unit will simulate the markets and accurately forecast sales for both new and existing products. The president of this subsidiary will be Gregory J. Totterdale, presently a senior vice president at M/A/R/C.

The third subsidiary will encompass M/A/R/C's database marketing operations. This business will help customers to focus their marketing efforts on the most receptive audiences by assembling databases of the most likely potential consumers for a given product. Senior vice president Jack D. Wolf will become president of this unit.

The final newly created unit will design customer satisfaction programs to identify customers' standards for quality, measure the extent to which a client's products or services meet these standards, and create employee education and training programs to foster quality. Corinne Maginnis, presently a senior vice president, will be named president of the subsidiary.

The reorganization does not require stockholder approval, and is not expected to have an immediate material financial impact on M/A/R/C.

In connection with the corporate restructuring, M/A/R/C said it will change to a fiscal year ending on Dec. 31. The company currently ends its fiscal year on March 31. The change will take effect on Dec. 31, 1990, and results for the prior three years will be restated to conform to the new fiscal year.

NOVI, MI (OCT. 23) PR NEWSWIRE - Johnson Controls, Inc. (NYSE: JCI) today unveiled and started up its Plastic Container Recovery Center, the first plastics recycling plant in the U.S. to be operated by a plastic soft drink bottle manufacturer. The new $4 million facility, located in Novi, features a unique, state-of-the-art plastics recycling system that will process more than 140 million used soft drink bottles annually, at full capacity.

"The opening of this plant is an important step forward for Johnson Controls," said James H. Keyes, president and chief executive officer of Johnson Controls. "This facility reaffirms our company's position as a leader in our industry's work to address important environmental concerns. By providing a steady market for used plastic soft drink bottles, we will help support recycling efforts both here in Michigan and in the Midwest."

Johnson Controls also announced its first sale of plastic containers made directly from used plastic bottles processed in the new plant. Amway Corp.,

one of the world's largest network marketing companies, will purchase non-food containers made from recycled plastic recovered at the Johnson Controls Plastic Container Recovery Center. Amway, winner of the United Nations Environment Programme's 1989 Environmental Achievement Award, is one of a growing number of companies nationwide that use recycled materials for packaging non-food items.

The new plant processes polyethylene terephthalate (P.E.T.), the primary material used in making soft drink containers. P.E.T. recovered from used containers is made into yarn for carpets, fiber-fill for clothing, non-food containers, automobile parts, and industrial strapping. The facility also recycles H.D.P.E. plastic soft drink bottle base cups and turns them into new base cups.

"Johnson Controls is the leading supplier of plastic soft drink bottles in the United States and Europe," said Robert D. Gustine, vice president of the Plastic Container Division of Johnson Controls. "With this background of leadership, and the top-grade recycled plastic being produced by this plant, we aim to eventually close the loop on P.E.T. recycling -- making new soft drink bottles from old soft drink bottles."

The equipment in use at the Novi facility is some of the most advanced plastic reclamation technology available. It produces a cleaner recycled plastic flake. The technology was developed by Reko, the recycling subsidiary of DSM, a Dutch resin company, and modified by Johnson Controls for high-volume operations. In addition to operating the recycling facility, Johnson Controls is supporting development work to improve plastics reclamation technology.

Johnson Controls, Inc., headquartered in Milwaukee, is a leader in facility management and control systems, automobile seating, batteries and plastics.

SOUTHFIELD, MICH. (OCT. 23) PR NEWSWIRE - The Bendix Automotive Systems Group (BASG) of Allied-Signal Inc. (NYSE: ALD) today unveiled a long-range plan designed to dramatically improve the firm's ability to compete as a world class leader in the global automotive industry.

Major elements of the plan call for building a new facility on a 177-acre site in Roanoke County, Va., dedicated to producing disc brakes for passenger cars and light trucks, and focusing all future Bendix AntiLock Braking System (ABS) production in an ABS facility opened earlier this year in Clarksville, Tenn.

The new Roanoke Valley facility eventually will supply all of the firm's disc brakes for the North American passenger car/light truck market, according to

William C. King, vice president and group executive of Bendix, the world's leading supplier of brake systems for cars and trucks.

The initial $21 million phase of the facility is scheduled for completion next summer, he said. Construction is scheduled to begin immediately.

The first phase will contain 175,000 square feet, including over 100,000 square feet of production space for four manufacturing cells.

That production space is expected to more than double within the next three to five years, said King, as more and more disc brake programs come on stream.

The plant will begin operations with 30 to 40 employees, increasing to some 300 employees at full production levels, King predicted.

Current Bendix North American disc brake requirements for passenger cars and light trucks are being met by a multi-product manufacturing complex in St. Joseph, Mich., while ABS is produced at both Clarksville and the St. Joseph plant. Those programs will be phased out at St. Joseph over time.

Allied-Signal Inc. is an advanced technology company with businesses in automotive, aerospace and engineered materials.

NEW YORK (OCT. 23) PR NEWSWIRE - Digital Equipment Corporation (NYSE: DEC) today announced that it will provide an early binary version of OSF/1 software in the first quarter of calendar year 1991. Digital is providing this advanced development kit in response to the growing interest of end users, software vendors, and academic institutions in early access to OSF/1 technology on the DECstation platform.

Earlier this year, Digital announced that the next major version of its ULTRIX operating system would be based on the OSF/1 technology. According to Domenic J. LaCava, vice president of Digital's UNIX-based Software and Systems Group, "Our customers and partners have enthusiastically endorsed our plans to fully integrate OSF/1 into our ULTRIX product line during 1991. Increasing numbers of customers also have asked for early access to OSF/1 code so they can begin to align their own investments with this exciting technology. The addition of an advanced development kit reinforces Digital's commitment to OSF our customers, and our partners, and establishes us as the leading systems integrator of OSF technology. Digital is clearly committed to providing the entire range of OSF technology, which includes the OSF/1 base operating system the OSF/Motif graphical user interface, the Distributed Computing Environment and the future Distributed Management Environment."

LaCava added that "OSF's announcement of the general availability of OSF/1 is a major milestone for open systems. With OSF/1, OSF/Motif, and the Distributed Computing Environment, OSF has clearly demonstrated the strength of their technology and the strength of the open process. OSF has kept the promise they made to the industry at their founding. They have accelerated the pace of open systems and ensured that open systems are built on the very best technology available in the industry."

Digital Equipment Corporation, headquartered in Maynard, Mass., is the leading worldwide supplier of networked computer systems and services. Digital offers a full range of computing solutions and systems integration for the entire enterprise -- from the desktop to the data center.

NEW YORK (OCT. 23) PR NEWSWIRE - Morgan Stanley Group Inc. (NYSE: MS) today announced net income of $71.9 million, or $1.82 per common share, for the quarter ended Sept. 30, 1990, compared to $101.1 million, or $2.54 per common share, in the same period of 1989. Net revenues (gross revenues less interest expense) for the period were $588.0 million vs. $582.4 million in the third quarter of 1989. Revenues during the 1989 period included a pre-tax gain of $56.2 million from the restructuring of Burlington Holdings Inc.

The company also announced the declaration by its board of directors of a regular quarterly dividend of 37-1/2 cents per share. The dividend is payable Nov. 20, 1990, to holders of record Nov. 2, 1990.

Consolidated net income for the nine months ended Sept. 30, 1990, was $212.1 million, or $5.33 per share. Net revenues for the nine-month period were $1,670.4 million. Comparable 1989 period results were net income of $294.4 million, earnings per share of $7.40 and net revenues of $1,748.1 million. In addition to the Burlington investment gain, revenues for the nine-month period in 1989 also include a pre-tax gain of $51.5 million, principally from the restructurings of the firm's investments in Essex Group Inc. and the Silgan Corporation.

S. Parker Gilbert, chairman, Richard B. Fisher, president, and Robert F. Greenhill, vice chairman, said in a joint statement:

"Morgan Stanley's performance in the third quarter reflects an absence of merchant banking investment revenues as well as a decline in investment banking activity. Revenues from global sales and trading of fixed income products were significantly higher, while our financial results also benefitted from strong performances in foreign exchange, commodities and equity trading."

Total capital (stockholders' equity and long-term debt) at Sept. 30, 1990, was $3.1 billion, including $1.9 billion of common stockholders' equity. Book value per common share was $50.71, based on quarter-end shares and share equivalents of 36,593,936.

Morgan Stanley Group Inc. is a major international securities firm with offices in New York, London, Tokyo and other principal financial centers.

DALLAS (OCT. 23) PR NEWSWIRE - The Southland Corporation announced today that its previously announced exchange offers have been extended until noon New York time today. The extension is necessary to allow the company's exchange agent additional time to tabulate votes pertaining to the company's solicitation of acceptances for a prepackaged reorganization plan. Preliminary results indicate necessary approvals of that plan by each affected class. The exchange offers may be further extended if necessary to continue the tabulation. Southland expects to announce the results of that solicitation later today.

As of midnight on Oct. 22, the following securities had been tendered: 13-1/2 percent Senior Extendible Reset Notes -- approximately 94 percent; 15-3/4 percent Senior Subordinated Notes -- approximately 94 percent; 16-1/2 percent Senior Subordinated Discount Notes -- approximately 80 percent; 16-3/4 percent Subordinated Debentures -- approximately 61 percent; 18 percent Junior Subordinated Discount Debentures -- approximately 52 percent; and 15 percent Cumulative Exchangeable Preferred Stock -- approximately 95 percent.

In addition, Southland and its long-time business partners, Ito- Yokado Co., Ltd. and Seven-Eleven Japan Co., Ltd., announced today that they have entered into a new stock purchase agreement that would permit Southland to file and seek confirmation of its prepackaged reorganization plan under Chapter 11 of the U.S. Bankruptcy Code. Among other things, the stock purchase agreement provides for the purchase of 70 percent of Southland's common stock for $430 million. The stock purchase agreement is contingent upon, among other things consummation of Southland's restructuring on or before March 15, 1991.

DALLAS (OCT. 23) PR NEWSWIRE - Peerless Manufacturing Co. (NASDAQ: PMFG), Dallas, manufacturer of separators and filters used in the petroleum and chemical processing industries, and environmental protection equipment, today announced sales and earnings for its fiscal 1991 first quarter.

Earnings for the period were $346,758, or $.24 per share, compared to earnings

of $43,533, or $.03 per share, in the first quarter of fiscal 1990. However, the majority of the latest quarters earnings were due to the cumulative effect of-an accounting change (see notes). Incoming orders for the quarter approximated $5,241,000. Backlog of orders grew from $12.7 million to $13,470,000 during the first quarter of fiscal 1991.

Peerless had declared its regular cash quarterly dividend of $0.125 per share to shareholders of record Nov. 16, 1990, and payable on Nov. 30, 1990.

#90296p8251 10/23/1990 ~PR Newswire

CLUTE, TX (OCT. 23) PR NEWSWIRE - Benchmark Electronics, Inc. (AMEX: BHE) today reported earnings for the nine months and three months ended Sept. 30, 1990. Earnings for the nine months increased 49 percent and sales were up 22 percent over the same period last year.

For the nine months, Benchmark earned $1,549,000, or 63 cents per share, on net sales of $16,309,000. For the comparable period last year, the company reported net earnings of $1,041,000, or 50 cents per share, on net sales of $13,413,000.

For the three months ended Sept. 30, 1990, Benchmark earned $512,000, or 16 cents per share, on net sales of $5,108,000. Earnings for the third quarter last year totaled $485,000, or 23 cents per share, on sales of $5,240,000.

"We have a very healthy backlog, with bookings from many new customers as well as from existing customers. Also, we are seeing especially strong interest from the oil and gas industry," reported president Don Nigbor. "The slight decrease in sales reported for the quarter resulted strictly from the timing of product shipments to customers."

The company has changed its common stock trading symbol on the American Stock Exchange to BHE from BEI, effective Oct. 23, 1990. The change should eliminate the confusion resulting from an unrelated company whose name was similar to Benchmark's symbol.

Benchmark Electronics, Inc., provides manufacturing services to original equipment manufacturers (OEMs) in the electronics industry, including manufacturers of communications equipment, business computers, testing equipment, medical devices and industrial instruments. The company's initial public offering of 1,100,000 shares of common stock was completed in July 1990.

#90296p8258 10/23/1990 ~PR Newswire

NEW YORK (OCT. 23) PR NEWSWIRE - The General Motors Cancer Research Foundation will sponsor its second annual International Biomedical Science Journalism competition to award three $10,000 prizes for excellence in print and electronic coverage of cancer and cancer research during 1990.

Entry requirements and forms may be obtained by writing to the General Motors Cancer Research Foundation, 26th floor, 767 Fifth Ave., New York, N.Y., 10153, or by calling 212-418-3568.

"The GM awards aim to encourage quality in science reporting and heighten public awareness and understanding of cancer," said General Motors CEO Robert C. Stempel.

Dr. Joseph G. Fortner the foundation's president, added, "The public needs to be alerted to important advances in cancer research, better preventive and diagnostic methods and new treatments."

Award winners are selected in three categories: newspapers and wire services periodicals and broadcast. Entries must be about cancer or cancer research (including basic science of relevance to cancer) and must have appeared in a national or local mass-communication medium oriented to a lay, non-technical audience. The awards will be presented at a special ceremony in April 1991.

Awards committee members include Walter L. Cronkite, CBS TV; Bill D. Moyers, Public Affairs Television; Tom Johnson, Cable News Network; Joan Konner, Columbia University School of Journalism; and Fortner. Entries will be judged by their significance and value in promoting public knowledge and understanding of cancer, their scientific accuracy, originality, clarity of presentation and initiative.

Winners of the 1989 journalism awards were Donald C. Drake of the Philadelphia Inquirer, Shannon Mililani Brownlee of U.S. News & World Report, Michael Skoler of National Public Radio, and a team from Nippon Hoso Kyokai (NHK), Japan Broadcasting Corporation.

For more than a decade, the General Motors Cancer Research Foundation has honored distinguished scientists working to understand and conquer cancer. The journalism awards extend the foundation's work to those who play a critical role in public awareness.

#90296p8263 10/23/1990 ~PR Newswire

WOODCLIFF LAKE, N.J. (OCT. 23) PR NEWSWIRE - Ingersoll-Rand Company (NYSE: IR) today reported 1990 third-quarter net earnings of $40.2 million, or 78 cents per share, compared to 1989 third-quarter net earnings of $44.3 million, or 82 cents per share. Net earnings for the quarter include $3.6 million, or seven cents per share, of currency transaction losses versus a $3 million loss or one cent per share, in last year's third quarter.

Sales for the quarter were $936.6 million, an 11 percent increase over last year's third quarter. Operating income was $77.6 million, or $2.6 million higher than the $75 million reported for the three months ended Sept. 30, 1989. Operating income margins were affected by a softening in domestic demand in construction-related businesses. Worldwide, incoming orders totaled $934 million, almost 12 percent above the $837 million in new orders booked in the prior year's third quarter.

For the first nine months of the year, the New Jersey-based manufacturer posted net earnings of $139.6 million, or $2.67 per share, on sales of $2.8 billion. This compares to last year's nine-month net income from operations of $137.4 million or $2.56 per share, on sales of $2.6 billion. During the first quarter of 1989, the company reported an extraordinary tax benefit of approximately $8.5 million, or 17 cents per share, due to a reduction of income taxes through the utilization of a capital loss carryforward associated with the sale of the company's finance subsidiary.

Theodore H. Black, chairman and chief executive officer of the company, stated that while the 11-percent sales increase for the quarter was broad based, decreases of less than 10 percent were reported by the company's Door Hardware and Industrial Process Machinery groups.

Black noted that quarterly sales increased by seven percent in the Standard Machinery segment, but pressure on margins in the Construction Equipment Group lowered the segment's operating income to $26.8 million, 17 percent below 1989's third-quarter performance.

Engineered Equipment segment sales for the quarter were about equal to the prior year, with softness in industrial process machinery products being offset by increased pump shipments. Both groups reported quarterly operating income improvements.

In the company's Bearings, Locks and Tools segment, sales were approximately 17 percent higher than in last year's third quarter. Acquisitions accounted for roughly half of the increase. Operating income for the quarter increased slightly more than 10 percent. The February 1990 Aro acquisition, together with improved operations in the Production Equipment Group and continued improvements in the Fafnir Bearings division more than offset the effects of a

lower domestic automotive production schedule and a poor housing market.

Results for the third quarter were favorably affected the operations of the Dresser-Rand joint venture, which contributed over $3 million of additional pretax income to the company's quarter-to-quarter comparison.

FORT WORTH, TEXAS (OCT. 23) PR NEWSWIRE - Tandy Corporation (NYSE: TAN) announced today that consolidated sales and operating revenues for the first quarter of fiscal 1991 were $1,090,286,000, an increase of 11 percent over the year earlier sales and operating revenues of $985,977,000. Net income per average common share for the first quarter of fiscal 1991 was $.65 compared to $.73 reported for the year earlier period. Net income for the three months ended Sept. 30, 1990 was $52,243,000 compared to $62,754,000 in the same quarter of the prior year.

John V. Roach, chairman and CEO commented, "Given the uncertain retail environment in the wake of the Middle East crisis, we began to clear Radio Shack's inventories of certain discontinued consumer items and computer models prior to the holiday selling season. Clearance sales of these discontinued items were strong and negatively influenced gross margin and earnings in the period."

NEW YORK (OCT. 23) PR NEWSWIRE - Pizza Hut(R) and King World Productions Inc. (NYSE: KWP) today announced an agreement in principle to launch a $25 million promotional tie-in for King World's new production of "Candid Camera." "Candid Camera," hosted by Dom DeLuise, will premiere in September 1991. The announcement was made today by Michael King, president and chief executive officer of King World, and Stephen H. Davis, vice president of marketing for Pizza Hut.

"We firmly believe that 'Candid Camera' is the blockbuster hit of the 90s. This show will delight people of all ages and is a perfect fit for a tie-in with Pizza Hut," Davis stated. "We are thrilled to be partners with King World -- the undisputed leading syndicator in the industry today," he added.

King commented, "Pizza Hut is the largest pizza restaurant and delivery system in the world today with 7,500 units in all 50 states and 60 foreign countries. The depth and reach of Pizza Hut's promotional tie-in with 'Candid Camera,' which will include national spots on our client television stations, national promotional support on radio and in print, and in-store promotion, will be astonishing. We have a sensational show and a hugely powerful sponsor -- surely a winning combination."

"Candid Camera," a King World production in association with Vin Di Bona Productions, will debut in September 1991. The show will run Monday through Friday. Multitalented, internationally acclaimed actor/comedian Dom DeLuise will host "Candid Camera." Vin Di Bona, renowned executive producer of "America's Funniest Home Videos" and a four-time Emmy winner, is executive producer.

King World is the leading distributor of first-run programming, including "Wheel of Fortune," "Jeopardy!" and "The Oprah Winfrey Show," the three highest rated series in first-run syndication, and "Inside Edition," the sixth-highest rated syndicated strip, and "Instant Recall," both produced by the company. King World also distributes its own library of 68 feature films and 210 television programs, and through its barter subsidiary, Camelot Entertainment Sales Inc., sells national advertising for King World and The Disney Company television programming. In addition, King World is the owner of WIVB-TV, the CBS affiliate in Buffalo, N.Y.

Montana Naturals is a Montana corporation engaged in the manufacturing and marketing of nutritional supplements for domestic and international distribution. The company became a public corporation through a successful public offering in September 1987, and was approved for listing on the NASDAQ system on Aug. 31, 1988.

According to company President and Chief Executive Officer Ronald O. Hauge, the profitability increase is a result of decreased payroll and increased efficiency throughout the company. Hauge expects the company to finish the year with a healthy increase in revenues and respectable profits.

FENTON, MO (OCT. 23) PR NEWSWIRE - The 2.5 millionth Chrysler-built minivan rolled off the company's St. Louis Assembly Plant II line in Fenton today during a ceremony attended by company and union officials.

Mrs. Montserrat Lau, a first-time buyer of Chrysler Corporation products, accepted the keys to the 1991 Dodge Grand Caravan LE from Robert Boling, president of UAW Local 110, and Robert A. Lutz, president of Chrysler Motors. Mrs. Lau ordered the two-tone platinum silver/dark quartz long wheelbase minivan from Greg Nelson Chrysler-Plymouth-Dodge in Marysville, Ohio.

The 2.5 millionth minivan features 3.3-liter multi-point fuel injected engine, electronic speed control, four-speed automatic transmission, air conditioning, power windows, door locks and driver seat, and P205/70R15 WSW tires.

St. Louis II has produced about 700,000 long wheelbase minivans since it first started production in March 1987. Its sister plant in Windsor, Ontario, has produced over 1.8 million short wheelbase minivans since October 1983 when Chrysler introduced its first minivans and created a whole new market segment. Chrysler continues to dominate the segment with 45 percent of the total minivan sales in the 1990 model year.

In addition to the Dodge Grand Caravan, St. Louis II produces the Plymouth

Grand Voyager, Chrysler Town & Country and extended Dodge Caravan C/V vans. St. Louis II completed a $62 million, four-week model changeover in September.

#90296p8284 10/23/1990 ~PR Newswire

WASHINGTON (OCT. 23) PR NEWSWIRE - The Washington Post Company (NYSE: WPO) today reported net income of $37.5 million for the third quarter of 1990, a decrease of 16.2 percent from net income of $44.8 million in the third quarter of 1989.

Earnings per share declined 10.3 percent to $3.14, from $3.50 in the 1989 third quarter, with a smaller number of shares outstanding this year.

Revenue for the third quarter of 1990 was $348.7 million, up almost 1 percent from $346.3 million in the comparable 1989 period.

Operating income declined 12.6 percent to $62.6 million, from $71.7 million in the third quarter of 1989.

For the first nine months of 1990, the company's net income was $132.5 million ($10.90 per share), compared with net income of $146.8 million ($11.44 per share) in the same period of 1989. Net income and earnings per share for the first three quarters of 1990 declined 9.7 percent and 4.7 percent, respectively, from the comparable period last year.

Revenue for the first three quarters of 1990 was $1,069.2 million, a 1 percent gain over revenue of $1,062.7 million in the first nine months of 1989.

Reflecting growing weakness in the local Washington advertising environment, newspaper division revenue decreased 7.1 percent in the third quarter of 1990 (3 percent in the first nine months) from the comparable period last year. Advertising volume at The Washington Post totaled 957,600 inches in the third quarter of 1990, down 14.7 percent from 1,122,800 inches in the third quarter of 1989. Post linage declined 10.1 percent in the first nine months of 1990 to 3,139,100 inches, from 3,490,100 inches in the first nine months of 1989.

Revenue at the broadcast division was essentially even with the third quarter last year and down 3.9 percent in the first nine months of 1990.

Newsweek revenue increased 7.4 percent in the third quarter of 1990 and 2.8 percent in the first nine months, with the publication of one additional issue in the third quarter (two additional issues in the first nine months) compared with the 1989 third quarter.

Cable division revenue increased 14.1 percent in the third quarter and 12.2

percent in the first nine months of 1990.

Revenue from other businesses (Stanley H. Kaplan Educational Center and Legi-Slate) rose 20.2 percent in the third quarter and 17.6 percent in the first three quarters of 1990.

During the third quarter of 1990, the company's equity in earnings of affiliates declined to $0.1 million ($5.7 million in the first nine months), compared with $1.9 million ($7.4 million in the first nine months) last year. Substantially lower earnings at the company's newsprint affiliates, partially offset by higher earnings at Cowles Media Company (which included gains on the sales of two small newspapers), were the major contributors to the change during the first nine months of 1990.

BURBANK, CALIF. (OCT. 23) PR NEWSWIRE - The Walt Disney Studios announced today it has formed Touchwood Pacific Partners I to provide $600 million for its upcoming motion picture production.

Touchwood Pacific Partners I will take the form of a U.S. limited partnership to finance live action films of the Walt Disney Studios, including its Disney, Touchstone and Hollywood Pictures units.

The $600 million financing will be based on $180 million of equity proceeds from the sale of limited partnership interests by Yamaichi General Finance Company, an affiliate of Yamaichi Securities, one of the leading Japanese securities firms.

In addition a $420 million non-recourse credit facility has been underwritten by a group of international banks including The Fuji Bank, Ltd., The Long-Term Credit Bank Of Japan Ltd., and Manufacturers Hanover Trust Company, led by Citibank N.A. as agent.

Touchwood Pacific Partners I will be the primary financier for all of Disney's live action films once Silver Screen IV funds are utilized.

It is The Walt Disney Company's (NYSE: DIS) first major film financing in Japan.

OKLAHOMA CITY, OK (OCT. 23) PR NEWSWIRE - Kerr-McGee Corp.'s (NYSE: KMG) net income for the third quarter of 1990 was $43.1 million, or 86 cents per share, compared with net income from continuing operations of $18.9 million, or 39 cents per share, in the 1989 third quarter.

For the first nine months, net income was $100.3 million, or $2 per share, compared with net income from continuing operations of $87.9 million, or $1.81 per share, for the 1989 period.

Sales for the third quarter were $986 million, a 32 percent increase from $750 million for the 1989 third quarter. For the first nine months, sales were $2.644 billion, up from $2.288 billion in the like period last year.

Higher prices for Kerr-McGee's crude oil, improved refining and marketing wholesale margins, and higher refined product sales volumes were major contributors to increased operating profit for the third quarter, compared with the like 1989 period, said Frank A. McPherson, chairman and chief executive officer.

Refining and marketing margins, which had improved significantly in the second quarter of 1990, rose again in the third quarter, McPherson noted. Margins began to deteriorate toward the end of the quarter, however, as the cost of crude oil increased faster than sales prices of refined products. For the nine months, refining and marketing operating profit was down slightly from the like 1989 period.

Operating profit decreased for coal due primarily to lower average sales prices. Chemical operations reported decreased operating profit due to an environmental charge.

Kerr-McGee's production of crude oil averaged 47,100 barrels per day in the third quarter, compared with 48,900 barrels per day in the 1989 third quarter. Crude oil prices averaged $22.64 per barrel in the third quarter, up 34 percent from $16.85 in the 1989 third quarter.

Natural gas deliveries in the third quarter were 239 million cubic feet per

day, approximately the same as in the third quarter last year. The company's average natural gas sales price was $1.34 per thousand cubic feet, down from $1.51 in the 1989 third quarter.

Cash flow from operations was $134 million in the third quarter, compared with $97 million in the 1989 period. Capital expenditures in the third quarter were $146 million, compared with $93 million in the like 1989 quarter.

#90296p8315 10/23/1990 ~PR Newswire

PAOLI, PA. (OCT. 23) PR NEWSWIRE - Ametek Inc. (NYSE: AME) today reported the highest third quarter sales in the company's history, 13 percent above last year's third quarter totals, while net income was slightly ahead of 1989 results.

Ametek's sales for the three months ended Sept. 30 were $165.2 million, producing net income of $8.85 million or 20 cents per share, compared to the $8.78 million earned in last year's third quarter, which also equaled 20 cents per share.

"Net figures obscure the fact that our manufacturing divisions were 15 percent more profitable in this year's third quarter," Ametek's President and Chief Executive Officer Walter E. Blankley noted. "The Precision Instruments and Electro-mechanical groups, strengthened by our recent acquisitions of aircraft and process instrument businesses and a major European electric motor manufacturer, produced all of the gains in sales and operating income. Net income this year was reduced by higher interest costs, while the 1989 third quarter net included a $1.2 million pretax gain on the sale of a plastics compounding plant," Blankley said.

The first nine months of 1990 show sales reaching an all-time record for the diversified manufacturer at $491.7 million, up 13 percent from the previous year's $435.8 million total for the nine months. The 1990 sales total was increased by additional volume from the several businesses acquired in the past year and reduced somewhat by Ametek's sale of a computer graphics business early in the second quarter of this year.

Net income in the current nine months, reduced by a less profitable first quarter than in 1989, totaled $29.1 million or 66 cents per share, compared to $31 million or 70 cents per share earned in the first three quarters of 1989.

Profits have lagged this year due to slower demand in automotive markets for the company's instruments as well as its engineering plastics, Blankley noted. "We've also incurred substantial costs stemming from the move of one of the aircraft instruments businesses purchased last year, from New Jersey to our major instrument plant in Pennsylvania, and from a recently imposed tax on the use of certain materials in our plastics packaging business. Those cost problems are being resolved at our instrument plant," Blankley said, "and we're in the process of converting the plastics packaging plant to use other materials."

Early in the third quarter of this year, Ametek completed the purchase of a leading European appliance motor manufacturer, Ciaramella/OEP, with two highly automated manufacturing plants near Milan, Italy. These motor businesses generate approximately $70 million in sales annually and the addition of these facilities and resources makes Ametek one of the most technologically advanced electric motor producers worldwide for vacuum cleaners and small appliances, according to Blankley.

#90296p8316 10/23/1990 ~PR Newswire

CHICAGO (OCT. 23) PR NEWSWIRE - USG Corp. (NYSE: USG) announced third-quarter 1990 operating profit of $64 million, down 24 percent from operating profit of $84 million for the same period in 1989. The decline was primarily the result of lower gypsum wallboard prices, which were down 7 percent compared to

the third quarter of last year. This reflects adverse economic conditions within the building industry coupled with excess capacity in the gypsum industry. Due to the adverse economic conditions within the building industry, a net loss of $11 million was incurred during the third quarter compared with net earnings of $9 million in 1989's third quarter.

Third-quarter 1990 net sales were $538 million, down 4 percent from $560 million for the same period in 1989. This sales decline is due mainly to lower gypsum wallboard prices in the third quarter of 1990 as compared to the third quarter of 1989. For the first nine months of 1990, USG reported an operating profit of $195 million, a decrease of 14 percent from operating profit of $228 million for the same period last year. Nine months 1990 net sales were $1.601 billion, down 4 percent from sales of $1.668 billion for the same period a year ago. A net loss of $2 million was incurred for the first nine months of 1990 compared with net earnings of $21 million during the same period in 1989. The first nine months of 1990 showed a net loss of $0.04 per common share vs. net earnings of $0.38 for the same period in 1989.

USG Chairman Eugene B. Connolly said that despite the economic downturn, two USG subsidiaries -- USG Interiors and DAP Inc. -- continue to perform ahead of 1989's pace for operating profit.

Connolly pointed out that both 1990 industry wallboard shipments and U.S. Gypsum's market share are unchanged from the same period in 1989. U.S. Gypsum plants also continue to operate at about 96 percent of capacity -- by far the highest in the industry. While the corporation remained in compliance with its financial obligations through the third quarter, it is presently discussing with its senior lender banks adjustments to certain term loan financial covenants in order to allow for future compliance under continuing adverse economic conditions. These adjustments will include amended covenant coverage levels for the period through June 30, 1991. The present discussions are part of a broader effort by the corporation to develop a longer term plan, in conjunction with its senior lenders, which will deal with its future cash flow needs and present capital structure. USG also announced plans for additional restructuring to be implemented in the next several weeks.

USG is a Fortune 200 corporation with operating subsidiaries that are leading manufacturers and distributors of building materials such as gypsum wallboard and related products, home improvement products and ceiling, wall and floor systems.

#90296p8317 10/23/1990 ~PR Newswire

HOUSTON (OCT. 23) PR NEWSWIRE - Garnet Resources Corporation (NASDAQ: GARN)

today announced initial test results of the Linda No. 2 well in the Putumayo area of Colombia.

Garnet said that the Linda No. 2 well, a confirmation test three quarters of a mile east of the Linda No. 1 discovery well, flowed at rates of 89 to 102 barrels of 20.6 degrees gravity oil per day using 3/8 inch and 1/4 inch chokes. The 32-hour drill stem test produced oil from perforated intervals in the Villeta "N" sand between 8,328 - 8,332 feet and 8,339 - 8,345 feet. The company plans further testing of this new sand with pumping equipment to determine its productive capability. The Villeta "U" sand at 8,930 feet tested water, and deeper sands were evaluated as water-bearing without testing.

The "N" sand is also present, but untested, in the Toroyaco No. 2 well suspended last July, and the rig is currently being moved back to evaluate this zone based on the initial results obtained from Linda No. 2.

The Mary No. 1, an exploration well about 6.5 miles northeast of the Linda No. 1, is presently drilling at 6,400 feet towards a projected total depth of 8,100 feet.

Garnet is engaged primarily in international oil and gas exploration activities. Its exploration and production operations in Colombia are conducted through its subsidiary Argosy Energy International.

#90296p8329 10/23/1990 ~PR Newswire

NEW YORK (OCT. 23) PR NEWSWIRE - Ratners Group plc (NASDAQ: RATNY), the world's largest jewelry retailer, announced that shareholders of Kay Jewelers, Inc. (NYSE: KJI) approved the merger today under which Kay will become a wholly owned subsidiary of Ratners. It is anticipated that the merger will become effective on Oct. 26, 1990, at which time Ratners will become the second largest specialty retailer of fine jewelry in the U.S.

Under the terms of the transaction, Kay shareholders will receive a new Convertible Preferred American Depositary Share of Ratners for each Kay common share held. The new Ratners preferred shares will pay cash dividends in U.S. dollars at an annual rate of $1.06, plus a $.14 tax treaty payment generally available to U.S. tax paying residents. The new Convertible Preferred Depositary Shares are convertible at any time into Ratners American Depositary Shares traded on NASDAQ. Each American Depositary Share represents three Ordinary Shares of Ratners. The new Ratners Convertible Preferred American Depositary Shares are expected to begin trading on NASDAQ on or about Oct. 29, 1990 under the symbol RATNZ.

Gerald I. Ratner, chairman and managing director of the Ratners Group, said, "The Kay acquisition strengthens our position in the attractive U.S. retail jewelry market and provides the opportunity to capitalize on Kay's well known trade names, including Kay Jewelers and J.B. Robinson, prime real estate locations and existing customer loyalty. The long-term growth rate of the specialty retail jewelry market in the U.S. has exceeded other sectors of the retail market, just as it has in the U.K. This superior performance has been driven by increased purchases by women, particularly working women, and the increased number of two-income households, which have more disposable income."

The Kay acquisition, Ratners' largest ever, follows a series of strategic acquisitions undertaken in the U.S. to exploit the fragmented nature of the specialty retail jewelry market by acquiring jewelry chains with a dominant presence in regional markets, including Sterling Inc., the company's primary operating unit in the U.S. When Ratners purchased Sterling in 1987, it was one of the largest specialty retail jewelry chains in the U.S., operating 117 stores in 15 primarily Midwestern and Western states. Since then Ratners has grown in the U.S. both through the opening of new stores and through the acquisition of other specialty retail jewelry chains. Ratners now operates 495

stores in 39 states and, upon completion of the merger, will be the second largest specialty retailer of fine jewelry in the U.S., operating approximately 970 jewelry stores in 43 states and 49 leased jewelry departments.

#90296p8330 10/23/1990 ~PR Newswire

NORCROSS, Ga. (OCT. 23) PR NEWSWIRE - CytRx Corp. (NASDAQ: CYTR) today released its third quarter earnings, shown below with comparative prior-year amounts:

	Qtr. ended		9 mos. ended	
	9/30/90	9/30/89	9/30/90	9/30/89
Revenues	$ 275,890	$ 20,458	$ 817,619	$ 818,628
Net loss	(156,639)	(595,655)	(752,151)	(3,239,191)
Per share	(.01)	(.04)	(.04)	(.19)

Jack J. Luchese, president and CEO, said: "The loss this quarter is the result of a delay in a $250,000 milestone payment from Burroughs Wellcome under the RheothRx(R) license agreement that management originally expected in September and which is now expected in late December. It should also be noted that the quarterly diligence payment for the fourth quarter, although received in September, will be recognized as revenue in the fourth quarter along with the modest up front fee from the recently completed Agri-Bio (American Home Products) agreement for our growth promoter technology for food animals such as poultry and swine."

CytRx Corp. is engaged in the research and development of therapeutics incorporating synthetic copolymers. The company's products are intended for use in the treatment of vascular, immune system and infectious diseases, and for use as growth promotants in food animals.

#90296p8335 10/23/1990 ~PR Newswire

BETHESDA, Md. (OCT. 23) PR NEWSWIRE - Martin Marietta Corporation (NYSE: ML) today reported third quarter net income of $108.8 million, a 25 percent increase from year-earlier net of $87.3 million. Per share income rose 31 percent, to $2.16 from $1.65 in the corresponding 1989 quarter.

Sales for the quarter rose 5 percent, to $1.49 billion from $1.42 billion a year earlier. Backlog at Sept. 30 was $11.7 billion, compared with $11.6

billion a year ago.

Third quarter earnings include a non-recurring gain on the sale of Florida real estate including a shopping center, as well as the positive effect of a favorable ruling in a legal dispute related to the 1989 sale of a cement plant. Together, these items added 25 cents per share to results. Operating income in the quarter trailed year-ago figures principally due to an $11 million provision for improvements to the Air Defense Anti-Tank System (ADATS). Prior to that charge, operating earnings were up about 5 percent over the third quarter of 1989.

Third quarter sales and earnings were higher in all operating groups except Electronics & Missiles, where a small decline reflected completion of the Copperhead anti-tank projectile program and the tapering off of production of the Hellfire anti-armor missile in anticipation of completion of that program next year.

"During the third quarter, we made two acquisitions that expand Martin Marietta's presence in growing markets within our Electronics & Missiles Group " commented Norman R. Augustine, chairman and chief executive officer. "These include Perry Technologies, a leader in undersea work vehicles, and the purchase of a program from Control Data Corporation which will result in the establishment of a product area for Advanced Tactical Airborne Reconnaissance Systems."

During the third quarter, the corporation received contracts totaling nearly $500 million to produce jet engine thrust reversers for both General Electric and Pratt & Whitney and won a U.S. Postal Service contract for $138 million, with a potential value of $600 million, to produce automated mail-sorting machines using high-speed bar coding technology.

Nine-month net income rose 16 percent for 1990, to $270.4 million, or $5.33 per share, from year-earlier net of $233.4 million, or $4.41 per share. Year-to-date sales increased to $4.6 billion, a gain of more than 9 percent from $4.2 billion a year ago.

Third quarter per-share earnings also reflect a year-to-year reduction of 2.7 million in average shares outstanding as a result of the corporation's stock repurchase program.

"The diversity of our space and electronics activities, coupled with such new initiatives as the Postal Service contract, bode well for the future," Augustine said. "These latest results, together with a recent 11 percent increase in the dividend to an annualized rate of $1.50 per share, reflect the financial soundness and strong strategic position of the corporation.'

#90296p8336 10/23/1990 ~PR Newswire
PHILADELPHIA (OCT. 23) PR NEWSWIRE - Sun Distributors L.P. (NYSE: SDP, SDPB) had net income of $6.3 million for the third quarter of 1990, up nearly 13 percent from the $5.6 million earned in the third quarter of 1989, it was announced today by Donald T. Marshall, chief executive officer. Third quarter income per limited partnership unit (combined A and B interests) was $.57, compared to $.50 in 1989. Sales for the third quarter of 1990 were $151 million, up nearly five percent from $144 million in the comparable 1989 period.

During the second quarter this year, the Class A and Class B interests began trading separately on the New York Stock Exchange under the symbols of SDP and SDPB, respectively.

Income per A interest in the third quarter was $.27 and income per B interest was $.15. (The difference between total income per limited partnership unit of $.57 and the sum of income for the A and B interests of $.42 is due to an additional 11 million B interests owned by the General Partner, making a total of 22 million B interests.)

Sales for the nine months ended Sept. 30, 1990, were $452 million, up more than seven percent from $422 million in the same period in 1989. Net income for the nine months was $17.5 million, up more than 32 percent from $13.2 million in the same period in 1989. Income per limited partnership unit (combined A and B interests) was $1.56 for the nine months compared with $1.18 for the first nine months of 1989.

Marshall noted, "We are seeing further erosion in our markets as the year proceeds. We continue to respond rapidly and aggressively with expense and asset control measures. As our performance this quarter demonstrates, these actions are allowing us to sustain our income growth and to maintain our cash flow."

Sun Distributors continued its policy of monthly cash distributions to holders of Class A interests with a total payment of $.275 per interest in the third quarter.

CLEVELAND (OCT. 23) PR NEWSWIRE - James S. Bingay Jr. has been elected executive vice president of Society Corporation (NASDAQ: SOCI) and named group executive of its commercial center, Robert W. Gillespie, chairman and chief executive officer, announced today.

Society's commercial center is responsible for planning and developing commercial and investment banking strategies and programs for the corporation and its five regional banks.

Bingay, who will report to Gillespie, has served as a division executive for Citicorp in Cleveland since 1985.

"In this era of increasingly intense competition for banks and their clients, we are indeed fortunate to have someone of Jim Bingay's talent and experience " said Gillespie. "Jim and I will be working closely together over the next

several months in developing a comprehensive approach to better coordinate our corporatewide activities in strategic commercial and investment banking as well as focused specialty commercial lending."

Bingay joined Citibank in New York City in 1970 as an account officer. In 1978 he was named vice president and area manager of Citicorp's North American finance group based in Cleveland. He was named a division executive in 1985.

During his 12 years in Cleveland, Bingay has been active in a number of significant community organizations including the Cleveland Orchestra, Cleveland Play House and The Achievement Center for Children.

Bingay received his B.A. in economics in 1965 at Brown University and his M.B.A. in finance in 1967 at the graduate business division of The Wharton School at the University of Pennsylvania.

Society Corporation is one of the largest bank holding companies in the Midwest with assets of $15.6 billion at Sept. 30. The corporation has 370 offices in Ohio, Michigan, Indiana and Florida. Through its affiliates, Society engages in commercial banking, consumer banking, mortgage banking and leasing, and provides trust and investment banking services.

CHAPEL HILL, NC (OCT. 23) PR NEWSWIRE - In response to motions for dismissal of claims made in the lawsuits between Investors Title Insurance Company (NASDAQ-NMS: ITIC) and its competitors, Jefferson-Pilot Title Insurance Company, Jefferson-Pilot Corporation (NYSE: JP), Lawyers Title of North Carolina and Lawyers Title Insurance Corporation of Richmond, Virginia, United States District Court Judge Richard C. Erwin has ruled that Investors Title Insurance Company is entitled to a jury trial on its counterclaims against these competitors as to alleged damages occurring after April 8, 1984.

The counterclaims by Investors Title Insurance Company accuses these competitors of conspiring to unfairly injure Investors Title and attempt to drive it out of business.

The counterclaims further assert that the unjust actions of these competitors over the years have had a chilling effect on the ability of lender-owned agents to sell title insurance for Investors Title, as well as to discourage additional lender-owned companies from becoming title insurance agents.

On the same Order, the Judge dismissed charges by Jefferson-Pilot Title and Lawyers of North Carolina that Investors Title had commited any "per se" violations of antitrust statutes. Other claims in the case were not affected

by the Judge's ruling.

J. Allen Fine, President of Investors Title expressed great satisfaction with the decision. "We look forward to an early trial," Fine said, "which will resolve the controversy and enable our agents to compete more effectively in the marketplace."

CUPERTINO, CA (OCT. 23) PR NEWSWIRE - Horn Venture Partners, the managing partner of Grace Ventures Partnership II, and Grace Ventures Corp. announced today that the partnership has increased its investment in InterFax, Inc. of Menlo Park, Calif., by an additional $500,000, bringing the total investment to $1 million. InterFax is an interactive facsimile company that sells services and systems that deliver information quickly, conveniently and economically via fax machine throughout the world.

Since InterFax was founded 18 months ago, the company has introduced FaxTex(TM) and received a fundamental patent on this advanced technology. FaxTex enables a customer to communicate via a touch-tone telephone or facsimile machine and retrieve data from a computer automatically. InterFax now provides customers with daily newsletter delivery by facsimile, early looks at financial performance summaries and Reader Service Card fulfillment by facsimile.

According to Vice Admiral (retired) William D. Houser, chief executive officer and president of InterFax, "The development of interactive facsimile and the explosive growth of facsimile machines have combined to provide new, easy-to-use, rapid and economical tools for business communications worldwide."

Christian F. Horn, managing partner of Horn Venture Partners, commented, "InterFax is one of those rare companies whose technologies and products are leading new categories of business. InterFax's proprietary technology gives anyone with a facsimile machine instantaneous access to electronically stored information."

Grace Ventures Corp., a wholly owned subsidiary of W. R. Grace & Co., and Horn Venture Partners, a partnership of the officers of Grace Ventures, manage 48 high technology, emerging growth company investments through three venture capital funds, including Grace Ventures Partnerships One and II.

NEWARK, N.J. (OCT. 23) PR NEWSWIRE - The Mutual Benefit Life Insurance Company announced today that its subsidiary, MBL Variable, Inc., has merged with The Golden Financial Group, Inc. Jerome "Jerry" S. Golden, chief executive officer of Golden Financial, was named president and CEO of the merged companies, to be based in New York City and known as MBL Variable, Inc. Terms of the merger were not disclosed.

MBL Variable, Inc. is now responsible for all the variable products offered by Mutual Benefit. Prior to the merger, Mutual Benefit worked with Golden Financial on the design of corporate-owned and corporate- sponsored variable life insurance products, as well as variable annuities for the broker/dealer market.

Henry E. Kates, Mutual Benefit CEO and president said, "We see a strategic fit for Golden Financial in Mutual Benefit and an increasing role for variable products, particularly variable annuities and variable life. The combined companies will heighten our position as a premier provider of corporate-owned and corporate-sponsored insurance products."

Said Kates, "Combining our financial strength and industry recognition with Golden Financial's successful record for product innovation will work to diversify and strengthen our company's product mix."

Jerome S. Golden, 46, is one of the leading figures in variable product design pricing and distribution. He created and successfully marketed the first single premium variable life policy in the United States, and was the first to successfully enlist Wall Street firms in the distribution of variable life insurance. Prior to founding Golden Financial, Golden was president and chief executive of Monarch Resources, Inc., a subsidiary of Monarch Capital.

Founded in 1987, Golden Financial specializes in providing insurance products and services to financial services firms entering or expanding their presence in the variable insurance product field.

Mutual Benefit Life, based in Newark, N.J., is the 18th largest life insurance company in the United States.

NEW YORK (OCT. 23) PR NEWSWIRE - The American Stock Exchange announced that

American Reliance Group, Inc. of Lawrenceville, N.J., began trading 2,549,420 common shares today. American Reliance Group is the regional insurance holding company for American Reliance Casualty Company, which together with American Reliance Group's parent, American Reliance Insurance Company, offer property and casualty insurance primarily in New Jersey and Florida. American Reliance Group previously traded in the NASDAQ National Market System under the symbol ARIG.

Trading under ticker symbol ARI, the common stock opened on 100 shares at 9 1/2.

American Reliance Insurance and American Reliance Casualty together specialize in providing a range of commercial and personal property and casualty insurance products including commercial multiple peril, farmowner, workers' compensation, automobile, fire and allied lines, inland marine, homeowner, tenant, condominium, automobile and general and excess liability insurance.

Together, American Reliance Insurance and American Reliance Casualty market insurance coverage through independent insurance agencies for small to medium-sized businesses and individuals in New Jersey, Florida, Pennsylvania, Delaware, Indiana, Maryland and Virginia.

American Reliance Group reported net income of $5,099,000, or $2.00 per share, on revenues of $62,608,000 for the nine months ended Sept. 30, 1990, compared with net income of $4,581,000, or $1.80 per share, on revenues of $52,536,000 for the comparable period in 1989.

TULSA, OK (OCT. 23) PR NEWSWIRE - C.I.S. Technologies, Inc. (NASDAQ: CISI) announced today results of operations for the third quarter 1990. CIS reported third quarter 1990 sales of $2,593,000, which represents a 157 percent increase over third quarter 1989 sales of $1,010,000 and a 19 percent increase over second quarter 1990 sales of $2,174,000.

The company's sales growth for the third quarter is the result of additional claim processing clients and new contracts for Prime Services. "Prime Services plays a major role in our revenue growth strategy and accounts for 29 percent of our third quarter revenue," said Philip D. Kurtz, president and chief executive officer.

Third quarter results of operations are detailed as follows:

#90296p8363 10/23/1990 ~PR Newswire

DENVER (OCT. 23) PR NEWSWIRE - Key Production Co. Inc. (NASDAQ: KPCI) today reported third quarter 1990 net income of $666,000, or 6 cents per share. This compared to net income a year ago of $560,000, or 5 cents per share. Higher oil prices and a 39 percent decrease in interest costs, reflecting Key's accelerated debt repayment, contributed to the quarter's improvement.

For the nine months ended Sept. 30, 1990, earnings totaled $2.2 million, or 19 cents per share, on revenues of $22.3 million. Key reported earnings of $1.9 million, or 16 cents per share, on revenues of $23.9 million for the first nine months of 1989.

Cash from operations increased 15 percent to $3.8 million and was allocated primarily to eliminating debt during the quarter. As of Sept. 30, 1990, Key had reduced debt 35 percent since year-end 1989 to $18.5 million.

Production for the quarter totaled 116,000 barrels of oil and 2.8 billion cubic feet (Bcf) of natural gas, versus 131,000 barrels and 3.0 Bcf during the like period in 1989.

Higher oil prices partially offset the impact of lower production with conflict in the Persian Gulf driving domestic oil prices to record levels during the quarter. Key received an average $22.33 per barrel of oil during the quarter, a 32 percent increase over prices received in 1989's third quarter. During the quarter Key averaged $1.61 per thousand cubic feet (Mcf) of gas, in contrast to $1.57 per Mcf a year ago.

Key Production is an independent oil and gas production company. Common stock shares of Key trade on the NASDAQ system (symbol KPCI).

#90296p8365 10/23/1990 ~PR Newswire

NASHVILLE, TN (OCT. 23) PR NEWSWIRE - Northern Telecom (NYSE: NT) today reported record earnings, revenues and orders for the third quarter and first nine months of 1990.

Earnings per common share for the third quarter were $.38, up 23 percent over the $.31 per common share earned in the third quarter of 1989. Net earnings applicable to common shares in the quarter were $91 million, as compared with $75 million last year.

Third quarter revenues of $1.62 billion increased 14 percent over the $1.41 billion reported for the same quarter last year.

The earnings and revenue figures were released in Toronto by Northern Telecom Limited, parent company of Nashville-based Northern Telecom Inc.

Order input for the quarter was $1.83 billion, an increase of 20 percent over the $1.52 billion recorded in the third quarter of 1989. Order backlog at September 30 stood at $2.08 billion, an increase of 14 percent from $1.82 billion at the end of the third quarter last year.

For the first nine months of 1990, Northern Telecom's revenues were $4.89 billion, up 13 percent from the $4.32 billion reported in the first nine months of 1989. Earnings per common share were $1.05, up 31 percent from $.80 in the year earlier period. Net earnings applicable to common shares were $254 million for the first nine months, compared with $192 million in 1989.

Dr. Paul G. Stern, chairman, president and chief executive officer of Northern Telecom, said, "The company's strength is encouraging considering the extremely competitive worldwide market situation. Demand for our products remained strong in all geographic areas, with order input running at exceptional levels in the third quarter."

Revenues from all geographic areas (United States, Canada and international) increased in both the quarter and the first nine months, with international revenues continuing to lead in year-over-year percentage gains.

Central office switching, Northern Telecom's principal product line, once again posted the largest revenue increase for both the quarter and the first nine months compared to last year. Revenues from transmission products showed the largest percentage increase overall in both periods. Business communications systems and terminals revenues also showed strong gains. Cable and outside plant sales continued slightly below last year.

Selling, general and administrative expenses for the quarter increased to $311 million, compared with $273 million a year earlier, but declined slightly as a percentage of sales to 19.2 percent from 19.3 percent in the third quarter last year. This increase was principally due to selling expenses in support of worldwide marketing thrusts. Expenses for the first nine months increased from $827 million to $927 million, and also declined slightly as a percentage of sales to 19.0 percent from 19.1 percent in 1989.

Spending on research and development in the quarter rose to $195 million from

$169 million last year and increased slightly as a percentage of revenue to 12.1 percent versus 12.0 percent in 1989. For the first nine months, spending increased to $562 million from $541 million, but decreased to 11.5 percent from 12.5 percent as a percentage of revenue.

Commenting on the outlook for the remainder of the year, Stern said, "The strong results for the third quarter and first nine months lead us to remain optimistic that 1990 will be a year of record performance for Northern Telecom."

Northern Telecom is the leading global supplier of fully digital telecommunications switching systems, providing products and services to telephone operating companies, corporations, governments, universities, and other institutions worldwide. Northern Telecom, with 1989 revenues of $6.1 billion, employs more than 49,000 people worldwide. Its common shares are listed on the New York, Toronto, Montreal, Vancouver, London, and Tokyo stock exchanges.

#90296p8367 10/23/1990 ~PR Newswire

PEAPACK, N.J. (OCT. 23) PR NEWSWIRE - Fedders Corporation (NYSE: FJQ), the manufacturer of room air conditioners, today reported that sales in the quarter ended Sept. 30, 1990 declined 66 percent to $20.9 million from $60.5 million in the third quarter of 1989. The company reported a net loss for the quarter of $5.2 million, or 28 cents per share, compared with net income of $2.4 million, or 13 cents per share, in the prior-year quarter.

For the nine months of 1990, sales decreased 19 percent to $236.8 million from $293.2 million a year earlier. Net income in the nine months ended Sept. 30, 1990 declined 40 percent to $10.3 million, or 56 cents per share, from $17.2 million, or 90 cents per share, in the prior year.

Chief Executive Officer Sal Giordano, Jr. attributed the sales declines and the third quarter loss to the absence of sustained summer heat in the key room air conditioner markets of the Northeast and upper Midwest. "The abnormal weather in those major markets has left excess inventory backed-up in the industry's distribution system. Fedders is continuing to sell from its inventory against reduced market demand during the seasonally slow second half of the year."

COSTA MESA, CA (OCT. 23) PR NEWSWIRE - Parker Automotive Corp. (NASDAQ: PKRA) announced today that it has agreed to buy the fuel injector cleaning equipment product line of Triangle Corp. (AMEX: TRG) of Stamford, Conn. In exchange for $2,250,000 in cash and $500,000 in the company's common stock, Parker Automotive will acquire the technology and all patents currently held by Triangle relating to fuel injector cleaning, both internationally and domestically.

Triangle Corp. supplies the fuel injection cleaning products currently used by Ford Motor Co. and Chrysler Corp. Timothy L. Strader, president and chief operating officer of Parker Automotive, said, "The Triangle products and patents will compliment our existing line of CarbonClean products, and we are confident that the acquisition will assist our entry into the two leading auto makers' equipment programs, as well as solidify our market leadership in this environmental product area. By acquiring the only patents in the world that we did not already have, we are protecting the integrity of the CarbonClean process worldwide," continued Strader.

Parker Automotive's CarbonClean products are approved by, and in some cases marketed by Nissan, Hyundai, Toyota Gulf States, Sunoco, Chevron, Arco and Exxon. As well, the emission-reducing CarbonClean products are distributed in over 60 nations worldwide. In studies of an independent nature, CarbonClean has reduced exhaust emissions by up to 80 percent, while increasing fuel economy and restoring engine performance.

Parker Automotive Corp. is headquartered in Costa Mesa. Manufacturing facilities are in nearby Fountain Valley, Calif., and sales offices are maintained worldwide.

WASHINGTON (OCT. 23) PR NEWSWIRE - Danaher Corporation (NYSE: DHR) announced today that net earnings for its third quarter ending Sept. 28, 1990, were $11.8 million, 11 percent higher than earnings of $10.7 million for the comparable 1989 period. Earnings per share, which reflected the issuance of 5.8 million shares for the acquisition of Easco Hand Tools, Inc., were $.40, compared to $.45 for the comparable 1989 period. Net revenues for the 1990 third quarter were $229.9 million, 25 percent higher than the $184.2 million for the quarter ending Sept. 29, 1989. The net revenues on a comparable basis were 2.5 percent lower for 1990 adjusted for Easco and business lines divested during 1989.

For the nine months ended Sept. 28, 1990, earnings were $34.0 million or $1.31 per share, compared to $34.6 million or $1.45 per share for the nine months

ended Sept. 29, 1989. Net revenues for the 1990 nine month period were $613.5 million, 6 percent higher than the $577.8 million reported in the comparable 1989 period. Net revenues on a comparable company basis were approximately 2 percent lower in 1990.

George M. Sherman, president and chief executive officer, stated: "We are pleased with our recent performance given the weak economic conditions in the United States and the United Kingdom. The assimilation of Easco Hand Tools, Inc. into our organization is proceeding well and slightly ahead of plan. We have substantially strengthened our management team and are continuing aggressive cost reduction actions so that we can improve earnings levels within a sluggish economic environment. Longer term, we believe that each of our business segments is well positioned for above average growth opportunities."

Danaher Corporation is a leading manufacturer of tools, process/environmental controls, and transportation products.

#90296p8373 10/23/1990 ~PR Newswire

ST. LOUIS (OCT. 23) PR NEWSWIRE - McDonnell Douglas Corp. (NYSE: MD) had net earnings of $248 million, or $6.46 per share, in the third quarter of 1990, compared with $38 million, or 98 cents a share, in the third quarter of 1989.

Excluding an after tax gain of $234 million, or $6.11 per share, from the

settlement of certain pension fund obligations through the purchase of an annuity contract, McDonnell Douglas had net earnings of $72 million, or $1.87 per share, before an earnings reversal on the C-17 program.

It was considered prudent to reverse the earnings previously recorded in the C-17 program because cost at completion could be at or near contract break-even. Therefore, the third quarter results include the reversal of $93 million in pretax earnings (equal to $58 million, or $1.52 per share, after tax). This resulted in net earnings of $14 million, or 35 cents per share, not including the after tax gain on the settlement of the pension fund obligation. McDonnell Douglas expects to complete the $6 billion-plus contract for full-scale development and production of the first six aircraft without incurring a loss.

Net earnings for the three quarters ended September 30, 1990 were $307 million, including the $234 million gain from the pension settlement, compared with net earnings of $159 million at this point in 1989, which included a positive adjustment of $179 million, or $4.68 per share, from the adoption of a new accounting standard for income tax.

Along with the C-17, McDonnell Douglas is booking two other fixed price development programs, the A-12 and the T45TS, at break-even. In all three programs, this reflects the anticipated effect of cost reduction efforts as well as expected reimbursement for certain costs that are the subject of claims made or being made to the government. Significant uncertainties continue to exist in these programs.

Revenues rose 18 percent -- from $10.292 billion in the first three quarters of 1989 to $12.123 billion in the first three quarters of 1990 -- mainly as a result of increased MD-80 deliveries and increased work on several government programs, including C-17, Tomahawk Cruise Missile, and Space Station Freedom.

McDonnell Douglas delivered a record 40 MD-80 twin jets in the third quarter and a record total of 99 for the first three quarters. This compares with 30 MD-80 deliveries in 1989Us third quarter and 81 for the first three quarters.

With increased production and the benefits of cost reduction efforts, operating earnings for the MD-80 program in the third quarter were $46 million compared with a loss of $1 million in 1989Us third quarter. The MD-11 trijet continued on track toward initial certification by the U.S. Federal Aviation Administration and first deliveries prior to the end of this year.

#90296p8374 10/23/1990 ~PR Newswire

BELLEVILLE, IL (OCT. 23) PR NEWSWIRE - Magna Group Inc. (NASDAQ: MAGI) and

Landmark Bancshares Corporation (NYSE: LBC) today announced the signing of a definitive agreement under which the two organizations will merge and Landmark will become a wholly owned subsidiary of Magna. The joint announcement was made by S. Lee Kling, chairman of Landmark, and William S. Badgley, chairman and chief executive officer of Magna. The terms of the agreement call for the exchange of .855 share of Magna common stock plus $.50 in cash for each share of Landmark common stock on a tax-free basis for the stock. Magna will authorize and issue approximately 6.2 million shares of common stock to be exchanged in the merger.

Pending approval by Magna and Landmark shareholders and regulatory authorities the companies anticipate completion of the merger by mid 1991.

Management expects that the transaction would enhance Magna's earnings per share in 1991 and further benefit earnings in future years. The transaction will be accounted for under the purchase accounting method resulting in substantially lower goodwill and a corresponding reduction of goodwill amortization expense. It is anticipated that there will be other significant advantages to pro forma earnings resulting from a purchase transaction. Initial analysis indicates that the synergies and intramarket consolidations of the combined organization could save in excess of $10 million annually. Magna recently announced third quarter results of $5.0 million or $.39 per share, as compared with $4.9 million or $.40 per share for the third quarter of 1989. Landmark, having built its loan loss reserve substantially through 1990, is positioned to return to more normal earnings in 1991.

Upon completion of the merger, the organization will have approximately 19 million shares outstanding and approximately 9,000 shareholders. Directors, officers and employees of the company will own more than 25 percent of the outstanding shares. The stock will be traded on the NASDAQ national market system. Magna's current indicated annual dividend rate is $.68 per common share. Market capitalization of the combined company would be in excess of $200 million, based on Magna's closing price of $11.00 per share on Monday, Oct. 22, 1990. The company will have combined capital of approximately $250 million.

Commenting on the affiliation, Badgley said, ''Our combination with Landmark will create a two-state organization with a large presence in central and southern Illinois and St. Louis, St. Charles, Kansas City and the Springfield area in Missouri. The combined organization will have approximately 100 banking locations and 2,700 employees. Landmark, like Magna, is a network of banks with long-standing customer relationships and deep roots in their communities.''

Kling noted, ''This merger would create an unequaled interstate franchise in the greater St. Louis market which spans the Mississippi River to include communities in both Missouri and Illinois. Our customers stand to benefit significantly from our combined strengths and expanded product and service

capabilities. This is an excellent opportunity to enhance the inherent value of this franchise and of our shareholders' investment.''

Badgley said, ''Over the past eight years, Magna has acquired 24 banks. By reducing that number to eight through various regional consolidations and achieving economies of scale, we have been able to reduce overhead expense and will continue to seek other opportunities to enhance the return to shareholders. Although many of our previous acquisitions initially reduced earnings per share, we believe that this merger will be anti-dilutive in the first year.

''As a network of community banks serving a large, diversified retail base of customers, we are firmly positioned as a retail banking leader, and we intend to direct the marketing efforts of the new, larger organization further into retail banking,'' Badgley continued. ''We view this merger with Landmark as a once-in-a lifetime opportunity to combine these two franchises into a distribution system of 100 retail bank offices in many diverse communities,'' Badgley explained. ''That competitive strength, in conjunction with opportunities for cost reductions and economies of scale, set the stage for significant competitive and performance opportunities.''

The management structure will include Badgley as chairman and chief executive officer; G. Thomas Andes as president and chief operating officer; James A. Saitz and Michael E. Thaman as executive vice presidents. Other corporate positions will be filled by senior officers of Magna and Landmark.

Badgley and Andes have directed Magna since its inception in 1975, currently serving as chairman and president, respectively. Saitz joined Landmark in 1986 and was recently named chief executive officer of Landmark after serving as executive vice president and chairman of Landmark's Illinois Region. Thaman has been with Landmark since 1981 and is currently executive vice president and chief financial officer.

Kling will be a member of the board of directors of the combined organization. He will play a key role in the transition process and continue to be actively involved in the business of the company. Kling has been chairman of Landmark since its inception in 1975, building Landmark to its current size from a three-bank holding company with $230 million in assets.

The board of directors of the combined company will include directors from both the Magna board and the Landmark board.

The corporate headquarters of the new company will be located at Landmark Place in St. Louis. Management has stated that it is considering a new name for the combined company. A marketing study would be made to determine the name that best communicates the merged organization's position as a strong community banking organization with the sophistication and capabilities of a $4.4 billion interstate bank holding company.

Pursuant to the terms of the merger agreement, Landmark has granted Magna an option to purchase 1,446,067 shares of Landmark common stock at $8.00 per share upon the occurrence of certain events.

Magna Group, Inc. is a multibank holding company headquartered in Belleville, Ill., with $2.4 billion in assets and eight banks with 50 locations, a trust company and data processing company. Twenty-five locations and approximately $1.4 billion of Magna's assets are in the Illinois portion of the St. Louis metropolitan area. Magna also serves the Springfield, Bloomington and Decatur areas, as well as communities in central and southern Illinois.

Landmark Bancshares Corporation is a multibank holding company headquartered in St. Louis, Mo., with $2 billion in assets and 10 banks with 50 locations in Missouri and Illinois. Thirty-four Landmark locations and approximately $1.6 billion of the company's assets are located in the greater bi-state metropolitan area, and three banks serve southern Illinois. Landmark also serves the greater Springfield, Mo. area and Kansas City, Mo. Landmark owns a trust company, asset-based lending subsidiary and a central operations subsidiary.

CONTACT: Gary Hemmer of Magna Group, 618-236-9339, Mary Scholz of Landmark Bancshares, 314-963-2545, or Heather Wietzel, 312-266-7800, or Kathy Phelan, 212-661-8030, both of Financial Relations Board for Landmark

#90296p8375 10/23/1990 ~PR Newswire

PHOENIXVILLE, Pa. (OCT. 23) PR NEWSWIRE - The West Co. Inc. (NYSE: WST) today reported sales for the 1990 third quarter of $76.9 million, an increase of 11 percent over third quarter 1989 sales of $69.4 million.

Sales for the first nine months of 1990 totaled $243 million compared with $229 million in 1989, an increase of 6 percent. The sales increases were due to the continued strength of European currencies and the consolidation in 1990 of two European companies in which controlling interests were acquired recently.

Net income for the third quarter of 1990 was $1.7 million, or $.11 per share, compared with $3.2 million, or $.20 per share, in the same quarter of 1989. Net income for the first nine months was $10.2 million, or $.64 per share, compared to $16.1 million, or $.99 per share, in 1989. The decline in third quarter net income was due to several factors. First, in Brazil margins continue to be impacted by that government's monetary and fiscal policy initiated earlier this year. Domestically, as a result of improved operating efficiencies, the company has decided it will cease manufacturing activities at its oldest plant and consolidate production into other plants; costs associated with this plant closing are included in third quarter results. In

Europe, demand has been softer than expected, and costs have been incurred to integrate the acquired companies. Finally, the year-to-date tax provision has been increased to reflect a higher estimated annual effective tax rate. This change largely reflects reduced income from low-tax rate operations and a higher effective tax rate in Brazil.

Nine-month results for 1990 also were impacted by expenses recognized in the second quarter related to a raw material, used in a single product line, that was discovered to be below West's standard. Following a brief interruption, normal production of this product line was resumed in the second quarter.

Rene L. Guerster, president and chief executive officer, stated, "Our third quarter is normally our lowest, but we are particularly disappointed in these results. Actions have already been taken to reduce labor costs in Brazil and Europe. Also, we sold a small low- margin operation in California which was unrelated to our core businesses. In the future, additional operating cost savings will be realized from closing our oldest U.S. plant and from inventory reduction. These actions are consistent with our strategic plan, and our customers continue to recognize us as the supplier of choice worldwide."

The West Co. Inc. is the premier supplier of specialized packaging components and systems for the worldwide pharmaceutical, hospital supply/medical device and domestic consumer products industries, with more than 85 percent of its revenue generated by the health care markets. West's products include stoppers, closures, containers, medical device components and assemblies made from elastomers, metal, plastic, glass and combinations thereof, plus related packaging and application machinery.

#90296p8377 10/23/1990 ~PR Newswire

MENASHA, WI (OCT. 23) PR NEWSWIRE - Banta Corporation (NASDAQ: BNTA) today reported earnings from continuing operations for the third quarter of 1990 increased 17 percent over the same period last year. Sales during the quarter increased 15 percent. Simultaneously the company announced that it intends to dispose of its interests in Banta Ventures, Inc. and is currently negotiating a buyout with Banta Ventures management. As a result, this subsidiary is now being reported as a discontinued operation, therefore sales and earnings for prior periods have been restated. Banta Ventures is primarily engaged in the video post-production business.

For the three months ended September 1990, net earnings from continuing operations, which excludes results of Banta Ventures, were $8.9 million compared with $7.6 million in the restated third quarter of 1989. Earnings per share from continuing operations increased 17 percent to 69 cents from 59 cents in 1989's comparable period. Sales from continuing operations for the

quarter were $155.3 million compared with 1989's $135.3 million, a 15 percent increase.

The corporation anticipates that the sale of Banta Ventures will result in a one-time loss of approximately $8.5 million. In addition, for the three months ended September 30, 1990, Banta Ventures lost $1.6 million (13 cents per share) on sales of $12.1 million compared with a $365,000 loss (3 cents per share) on sales of $13.3 million for 1989's third quarter. The effect of the $10.1 million loss ($1.6 million in operating losses and a projected $8.5 million loss on the sale) was to cause the corporation to incur an overall loss of $1.3 million (10 cents per share) for the current third quarter. Net earnings for the same period last year were $7.2 million (56 cents per share).

For the nine-month period ended September 1990, net earnings from continuing operations were up 14 percent to $22.7 million ($1.77 per share) compared with $19.9 million ($1.56 per share) last year. Sales were up 13 percent to $434.1 million from $383.2 million during last year's first nine months. Including the results of Banta Ventures and the projected loss on the sale, net earnings for the nine months ended September 1990 were $11.5 million (90 cents per share) compared with net earnings of $28.4 million ($2.23 per share) in 1989, a nine-month period in which earnings were increased by a second quarter gain of $9.6 million (75 cents per share) from the sale of Daniels Packaging Company, Inc.

Chairman Calvin W. Aurand, Jr. said earnings from continuing operations for the third quarter maintained the improved trend of the first six months. He pointed out that gains over last year's third quarter were achieved in softcover books, consumer and business-to-business catalogs, and special-interest magazines. The good performances were the result of improved plant utilization rates, achieved in spite of very competitive pricing environments.

The single-use products category continued its long-term trend of excellent performance during the quarter, noted Aurand, as demand for all of its products remained strong. Overall, according to Aurand, the book segment achieved results below last year's unusually strong third quarter, which was positively affected by healthy demand for several supplemental educational programs. Positive activity occurred in softcover books, aided by completion of several schoolbook adoption programs and by software manuals.

Regarding the proposed sale of Banta Ventures, Aurand says the transaction would allow the corporation to focus more of its resources on its core printing businesses. "Over the long term we intend to concentrate on our areas of greatest expertise, specifically the printing and graphic arts-related businesses," he explained.

Five video operations compose the Banta Ventures video segment: three Editel companies in New York, Los Angeles and Chicago operated by ScanLine

Communications, San Francisco; Editel Boston, Inc., Boston; and One Pass, Inc. San Francisco.

Banta Corporation is one of the nation's leading graphic arts companies. It produces educational and general books, special-interest magazines, catalogs, direct marketing materials and security documents. It also offers prepress services, multimedia and software packages, point-of-purchase materials, and single-use products.

#90296p8380 10/23/1990 ~PR Newswire

NEW BRUNSWICK, N.J. (OCT. 23) PRNEWSWIRE - Johnson & Johnson (NYSE: JNJ) today announced that earnings per share for the third quarter of 1990 rose 17.5 percent to $.94 compared with $.80 in the 1989 period. Consolidated net earnings for the third quarter of 1990 were $314 million, compared with $265 million for the same period a year ago, an increase of 18.5 percent. Consolidated sales for the third quarter of 1990 were $2.87 billion, an increase of 17.1 percent over 1989 third quarter sales of $2.45 billion. The effect of a weaker U.S. dollar relative to foreign currencies increased third quarter sales by 5.3 percent. Excluding the effect of currency exchange rates sales would have increased 11.8 percent.

Commenting on the announcement, Ralph S. Larsen, chairman and chief executive officer said, "Each of our three operating segments -- pharmaceutical, consumer and professional -- contributed strongly to the increase in quarterly sales and earnings. Of particular note were three domestic subsidiaries -- Ortho Diagnostics, which introduced the first hepatitis C test earlier this year, Vistakon, which markets ACUVUE Disposable Contact Lenses and McNeil Consumer Products, with its broad line of over-the-counter pharmaceutical products, including TYLENOL. These operations posted significant sales gains for the quarter as well as for the year to date."

"Johnson & Johnson, which now generates over 50 percent of its revenues outside the United States, continues to aggressively expand its global reach. We are well-positioned to continue strong sustainable increases in world markets through our extensive network of manufacturing and distribution subsidiaries. For example, EPREX, which stimulates red blood cell production and is now sold in 41 countries excluding the U.S., more than doubled sales during the quarter. And HISMANAL, a once-a-day less-sedating antihistamine and the company's fastest growing drug in the U.S., is now marketed in 116 countries."

For the third quarter, international sales were $1.47 billion, up 22.1 percent over the same period a year ago.

Pharmaceutical sales for the quarter were up 22.9 percent worldwide, reflecting continued market penetration of key pharmaceuticals. International sales, through Janssen Pharmaceutica, headquartered in Belgium, and Cilag International, based in Switzerland, posted robust gains, up 32.2 percent. Domestic pharmaceutical sales advanced 11.1 percent, due to increased sales at McNeil Pharmaceutical, Ortho Pharmaceutical and Janssen USA. Ortho Biotech, which earlier this year became a separate subsidiary, also recorded increased sales of ORTHOCLONE OKT-3, a monoclonal antibody used to prevent acute rejection in kidney transplants.

During the quarter, the company received approval from the U.S. Food and Drug Administration (FDA) to market DURAGESIC, a new transdermal therapeutic system which delivers the drug fentanyl, an opiod analgesic, through the skin for the

management of chronic pain, such as cancer pain. This transdermal fentanyl patch is expected to be on the market in the first quarter of 1991. The company also recently announced a co- marketing and development agreement between Ortho Pharmaceutical and Organon, a subsidiary of Akzo, N.V. This agreement gives Ortho marketing rights to contraceptives and hormone replacement products containing Organon's desogestrel, a new synthetic version of the female hormone progesterone. Ortho is the leader in developing and marketing women's health care products and ranks number one in sales of oral contraceptives in the U.S.

Currently pending before the FDA are nine New Drug Applications (NDAs) and Product License Applications (PLAs), including PLAs to market EPREX for pre-dialysis patients who suffer from anemia and for AIDS patients in conjunction with AZT therapy.

Johnson & Johnson's Professional business includes suture and mechanical wound closure products, diagnostic products, medical equipment and devices, ophthalmic products, surgical instruments and medical supplies.

#90296p8383 10/23/1990 ~PR Newswire

ST. LOUIS (OCT. 23) PR NEWSWIRE - The board of directors of Landmark Bancshares Corporation (NYSE: LBC) declared a dividend distribution of one preferred share purchase right on each outstanding share of the company's common stock. Each right will entitle shareholders to buy one one-hundredth of a share of a new series of non- voting junior participating preferred stock at an exercise price of $30.00. The rights will be exercisable only if a person or group acquires 20 percent or more of the company's common stock or announces a tender contemplating the acquisition of 20 percent or more of the company's common stock or if the board of directors determines that a person holding at least 10 percent of the company's common stock is acting or likely to act adverse to the company's best interests. The company will be entitled to redeem the rights at $0.01 per right at any time prior to the 10th day after the acquisition of a 20 percent position by any person or group or prior to the time a person is determined to be an adverse person.

If a person or group has acquired 20 percent or more of the outstanding common stock, each right not owned by the acquiror would become exercisable for the number of common shares that at the time had a market value of two times the exercise price of the right. Alternatively, if the company should be merged or combined with another compay after the rights have become exercisable, the rights would entitle the holders to buy, at the then current exercise price, common stock of the acquiring company having a market value of twice the

exercise price.

The rights distribution will be made on Nov. 8, 1990, payable to stockholders of record on that date, and will expire 10 years from the distribution date.

#90296p8384 10/23/1990 ~PR Newswire

LAGRANGE, GA. (OCT. 23) PR NEWSWIRE - Interface Inc. (NASDAQ: IFSIA) today reported a 7 percent increase in net sales for the third quarter ended Sept. 30 over the same period in 1989 despite slowing economies in several of its major markets.

Fully diluted earnings were $.30 per share, the same as for the third quarter of 1989.

Sales for the third quarter of 1990 increased to $151 million, up from $141 million for the same period in 1989. Net income was $5.7 million for 1990 compared with $5.8 million for the same quarter of 1989.

Ray C. Anderson, chairman and chief executive officer, stated: "Third quarter results were bolstered by a strong performance in Europe where we benefited from an expanding market and strengthening currencies, as well as a consolidation of pension plans. These largely offset the effects of slowing economies in North America and confirm the value of the strategy of geographical diversification which we initiated several years ago."

For the first nine months of 1990, sales increased 6 percent, to $456 million from $430 million last year. Net income was $17.9 million, a 6 percent increase over the prior-year's $16.9 million. Fully diluted earnings increased to $.94 per share, which compares with last year's $.89 per share.

Looking ahead, Anderson noted that continuing weakness in North American economies will make it difficult for the company to equal last year's record fourth quarter results.

Interface Inc. is the world's largest manufacturer of carpet tiles under the Interface and Heuga brands, and interior fabric under the Guilford of Maine brand, for use in offices, healthcare facilities, airports, educational and other institutions, and retail facilities. The company also manufactures carpet tiles for residential use. In addition, the company engages in the manufacture and sale of chemicals used in various rubber and plastic products, and offers Intersept(R), the company's proprietary antimicrobial chemical, under a licensing program to manufacturers of other products.

GOLDEN, CO (OCT. 23) PR NEWSWIRE - Canyon Resources Corp. (NASDAQ: CYNR), a Colorado-based mining company, today announced that construction delays on the new heap-leach pad at the Kendall Mine in Montana will result in lower than earlier estimated gold production for the year. Unexpected weather conditions and additional excavation necessary for removal of the underlying material during May-July, 1990 were the primary reasons for the delays. A total of 19,600 ounces of gold have been produced during 1990 to mid-October. The company now expects to produce 26,000 ounces of gold from the Kendall Mine for the full 1990 year and 45,000 ounces in 1991, as previously estimated. The delays in gold production and cash flow from the new pad startup have caused Canyon to curtail certain non-essential programs and modify its gold-loan obligations.

Canyon is actively seeking financing to enable it to take the Briggs (California) and Seven-Up Pete (Montana) gold projects through definitive feasibility and permitting and to provide sufficient working capital for present and future operations. Alternate financing methods, such as project joint venture, sale of an asset, or private placement financing, are being evaluated. Canyon has entered into an agreement with Bankers Trust Co. to assist the company in seeking private placement financing. "I am confident that Canyon will meet its objective of obtaining the financing necessary by year-end to move these projects forward so that ultimately the company can achieve gold production of 150,000 ounces per year," stated Richard H. De Voto, president.

#90296p8394 10/23/1990 ~PR Newswire

ST. LOUIS (OCT. 23) PR NEWSWIRE - Landmark Bancshares Corporation (NYSE: LBC) today announced that changed circumstances involving one particular loan and the company's decision to make a larger general addition to the loan reserve than earlier announced have resulted in a loss of $9.2 million, or $1.27 per common share, in the third quarter and $6.4 million or $.90 per common share year-to-date. The company had previously announced that it anticipated earnings of $1 million or 12 cents per share in the third quarter. The board of directors determined not to declare a fourth quarter dividend on common stock.

Acting on the recommendation of S. Lee Kling, chairman, the board of directors

formed a special committee to review and consider the appointment of a new chief executive officer either from within or outside the company. The board has approved the committee's nominee, electing James A. Saitz as president and chief executive officer of the company, and appointing Saitz to the board of directors. Kling will continue as chairman of the board. Saitz, formerly chief executive of Landmark's Illinois region, had been recently appointed to oversee the review of current loans, the resolution of problem loans and the reduction of nonperforming assets.

Kling commented, "With asset quality as our company's number one priority, we have placed in Mr. Saitz's hands the authority to take decisive steps necessary to improve our company's performance. The board of directors and I are confident that Mr. Saitz is the type of chief executive that the company needs, and he has our complete support."

Saitz said, "I appreciate the board's confidence. We have moved quickly to strengthen our portfolio management and review, with top priority given to the resolution of problem loans and the vigilant review of current credits."

Kling said, "Since making a preliminary announcement with regard to third quarter earnings on Sept. 27, circumstances involving a $7 million loan to a manufacturing company, included in projected nonperforming assets for the third quarter, had deteriorated substantially. Information subsequently received by the bank revealed unusual circumstances and complications which make full collection on this loan unlikely. As a result, we have charged off $4.0 million of this loan in the third quarter.

"We have met with unexpected circumstances relating to the large charge-off which occurred in the third quarter," Saitz continued. "Based on our assessment of remaining exposure on this particular loan, and an intensive review of our loan portfolio, we are increasing the loan reserve in the third quarter to approximately $27.8 million or 1.9 percent of loans. In so doing, we improve the balance sheet and strengthen the loan reserve against any potential losses going forward."

Kling said, "In light of year-to-date results, regulatory expectations and other considerations, the board determined not to declare a fourth quarter dividend on common stock. The declaration of future quarterly dividends on common stock will be considered on the same basis." The most recent quarterly dividend of 20 cents per common share was paid on Oct. 1, 1990.

Quarterly and Year-to-Date Results For the three months ended Sept. 30, 1990, the provision for loan losses was $14.9 million compared with $1.6 million last year. The loan reserve at Sept. 30 was raised to $27.8 million from $16.9 million a year ago. Net charge-offs for the period were $5.2 million, or 1.39 percent of average loans compared with .42 percent in the third quarter of 1989. At Sept. 30, 1990, the nonperforming asset ratio was 3.74 percent, compared with 3.11 percent at June 30, 1990, and 2.78 percent at Sept. 30,

1989.

Total assets at period end were $2.0 billion, up 6 percent from $1.9 billion at Sept. 30, 1989. Total loans were up 4 percent, to $1.5 billion from $1.4 billion, and deposits increased to $1.8 billion from $1.7 billion a year earlier.

Shareholders' equity decreased to $117.6 million from $125.6 million. Average common shares outstanding for the third quarter increased 9 percent as compared with a year earlier. Book value per common share was $15.90 compared with $17.13.

For the three months ended Sept. 30, 1990, net interest income was $17.3 million compared with $17.4 million in the third quarter of 1989. Noninterest income was $3.3 million vs. $3.9 million. Noninterest expense was $15.9 million compared with $14.6 million for the third quarter of 1989. Results for the third quarter of 1990 include an income tax benefit of $1.0 million compared with income tax expense of $1.4 million in 1989.

For the nine months ended Sept. 30, 1990, net interest income was $52.2 million compared with $52.3 million in the prior period, while noninterest income was $9.7 million vs. $10.2 million. Noninterest expense was $48.1 million compared with $43.1 million a year earlier. Results for the first nine months of 1990 include an income tax benefit of $0.4 million compared with income tax expense of $4.0 million in 1989.

Total nonperforming assets includes 18 percent retail loans, 9 percent construction and land development, 31 percent commercial real estate, and 19 percent commercial and industrial. Foreclosed property accounts for the remaining 23 percent. These percentages are generally representative of the loan portfolio mix.

Saitz noted, "Base operating results demonstrate our continued fundamental earnings strength. For the three- and nine-month periods, growth in average earning assets was 6 percent and 4 percent, respectively. However, this growth was not sufficient to offset declines in the net interest margin. Among the primary factors contributing to the unfavorable margin comparisons were the decline in general interest rates in the first quarter of 1990 and increases in nonperforming assets."

Commenting on expense control efforts, Saitz said, "Our efforts to control costs are working. Excluding foreclosed property expense and other one-time expenses, operating expenses were 3.02 percent of average assets compared with 3.03 percent in last year's third quarter."

The company has in excess of $1.0 million of tax benefits relating to net operating loss carryforwards and the alternative minimum tax attributable to year-to-date 1990 results which can be recouped in future quarters as earnings

return to normal levels.

In conclusion, Saitz said, "Our programs to strengthen asset quality and control operating expense will position our company to benefit from our market franchise and earnings potential. These actions further the advantages of our pending merger with Magna Group, Inc. and set the stage for enhanced returns to our shareholders."

Landmark Bancshares Corporation is a St. Louis-based multibank holding company with approximately $2 billion in assets and 50 locations in Missouri and Illinois.

#90296p8400 10/23/1990 ~PR Newswire

CINCINNATI (OCT. 23) PR NEWSWIRE - Duramed Pharmaceuticals, Inc. (NASDAQ: DRMD), has recalled selected batches of Conjugated Estrogens tablets which have failed to meet dissolution requirements, meaning one or more tablets in those batches did not dissolve quickly enough during regular follow-up laboratory tests. Analytical tests will be performed on all 1990 production lots during the next two weeks and the results will determine the total number of batches to be recalled.

E. Thomas Arington, president and CEO of Duramed said in making the announcement, "Consistent with our corporate position on product quality, we have suspended manufacture and shipment of the product until the review process is complete." Arington further stated, "While Conjugated Estrogens has been an important product to Duramed, the company continues to work for

corporate success with or without it." This recent development coupled with the previous tablet uniformity issue and the FDA's continued pursuit of the withdrawal of all generic Conjugated Estrogens products, has created an unusual financial burden for the company. Duramed management is presently reviewing all aspects of Conjugated Estrogens, and the possibility does exist that the company may discontinue marketing the product.

Arington further reported that Duramed can enjoy success in the future without Conjugated Estrogens. However, the FDA has regularly reviewed other Duramed products and any future adverse findings could have a material effect on the company's future.

On related matters, Arington stated the release of third quarter 1990 operating results would be made in approximately two weeks. He noted that exclusive of the Conjugated Estrogens recall, third quarter results exceeded those of the second quarter, but the recall and related matters could result in a substantial loss for the quarter.

Duramed Pharmaceuticals, Inc. manufactures and sells generic drug products comprised of various dosages of prescription and over-the- counter drugs. The company's stock is traded on the NASDAQ National Market System under the symbol DRMD.

MIDDLETON, MA (OCT. 23) PR NEWSWIRE - NYNEX Information Resources Company, the directory-publishing subsidiary of NYNEX Corporation (NYSE: NYN), today announced a reciprocal Yellow Pages sales agreement with the United Kingdom's British Telecom.

The agreement allows NYNEX to sell advertising into British Telecom's directories and positions NYNEX as British Telecom's authorized sales agent for United States Yellow Pages directories. NYNEX Information Resources' National Marketing Services Group oversees the sales program.

"NYNEX has a 100-year legacy of bringing buyers and sellers together," said Harold A. Dakin, vice president of New Business Development at Information Resources. "This agreement bridges the Atlantic in enhancing NYNEX's Yellow Pages heritage. NYNEX's new joint sales pact with British Telecom proves that the Yellow Pages market is truly international."

Currently, approximately 150 United States directory publishers annually produce more than 6,000 Yellow Pages with revenues exceeding $7 billion.

United States businesses wishing to use the Yellow Pages medium in Great Britain to attract British consumers can now deal with one authorized sales agent, NYNEX, and benefit from the economy of scale the arrangement brings. NYNEX Information Resources now provides United Kingdom enterprises with an entry to the vast United States Yellow Pages consumer market.

"This agreement is another in a series of international initiatives that delineates NYNEX Information Resources as a world-class company and positions it in the vanguard of international information providers," said Dakin.

American firms desiring information on advertising into British Telecom's directories should contact NYNEX Information Resources at 800-233-1717.

NYNEX Information Resources Company is a subsidiary of NYNEX Corporation, one of the telecommunications companies created by the Bell System's breakup in 1984. In addition to its Middleton, Mass., headquarters, NYNEX Information Resources has major facilities in Lynn, Mass., and in North Greenbush and New York, N.Y. Information Resources annually publishes more than 300 White and Yellow Pages directories, primarily for New England Telephone and New York Telephone companies.

#90296p8427 10/23/1990 ~PR Newswire

FAIRFAX, VA (OCT. 23) PR NEWSWIRE - Mobil Corporation (NYSE: MOB) today reported estimated earnings for the third quarter of 1990 of $379 million, $153 million, or 29 percent, lower than the $532 million earned in the third quarter of 1989. Estimated earnings per common share declined to $.89 from $1.30.

Special items benefited this year's third quarter $111 million; this was $41 million lower than the $152 million benefit in the prior-year quarter. Excluding these special items from both quarters, earnings this year were $268 million, $112 million, or 29 percent, lower than last year.

In commenting on the third quarter results, chairman Allen E. Murray said: "The Iraqi invasion of Kuwait and the resultant embargo led to a loss of four

million barrels a day of free world crude oil supply, which increased crude prices dramatically.

"Although production from other countries has increased to almost offset the lost production, speculation that there might be an outbreak of hostilities in the Middle East has kept prices high. Contrary to current wisdom, these developments have not been favorable to our business in the third quarter.

"During the third quarter of 1990, results in our Marketing and Refining operations declined substantially, reflecting our inability to recover the rapid run up in crude oil and purchased product costs.

"In the United States, our monthly average crude oil cost more than doubled from June to September. However, we only recovered about one half of the increase in the market. In our International operations, results were also lower reflecting the impact of price controls in some key countries and competitive conditions in others.

"Exploration and Producing reported strong earnings as a result of higher crude prices. Apart from our own crude production, however, Mobil purchases substantial amounts of crude oil and products to meet its customers' requirements. The net effect was that the higher earnings in exploration and producing were more than offset by lower marketing and refining earnings."

Adjusted for special items, third quarter 1990 earnings were $160 million lower than in the second quarter of 1990. Similar to the comparison with the third quarter of last year, marketing and refining earnings were significantly lower, reflecting the substantially lower margins.

Realizations on product sales lagged the increase in hydrocarbon acquisition costs, while improved exploration and producing earnings, due to the higher crude oil prices, only offset about 50 percent of the decline in marketing and refining earnings.

Due to the weak third quarter earnings, estimated nine month 1990 earnings of $1,277 million were $85 million, or six percent, lower than the $1,362 million earned in the comparable nine month period last year. Estimated earnings per common share were $3.02, compared with the $3.32 earned in the first nine months of 1989. For the nine months, special items increased earnings $153 million in 1990, versus $12 million in 1989.

MIAMI, (OCT. 23) PR NEWSWIRE - Cordis Corporation (NASDAQ-NMS: CORD) today reported a 28 percent increase in sales and a 55 percent jump in net income

for its fiscal 1991 first quarter ended Sept. 30.

Revenues for the three months were $45.7 million, up from $35.7 million in the year-earlier first quarter. Angiography sales, which accounted for 91 percent of the total, advanced 31 percent while neuroscience revenues rose 2 percent.

Net income was $3.4 million, or 25 cents a share. This compared with $2.2 million, or 16 cents a share, in the corresponding quarter, which included a loss from a since divested joint venture of $614,000 or 5 cents a share.

Miami-based Cordis Corporation manufactures and markets a variety of medical devices and systems for the angiographic and neurosurgical markets. Shares of the company's stock are traded on the NASDAQ National Market under the symbol CORD.

DELRAY BEACH, FL (OCT. 23) PR NEWSWIRE - On Aug. 20, 1990, NSC Service Group, Inc. filed a report with the Securities and Exchange Commission announcing the incorporation of a new wholly owned subsidiary, FiberCorp, Inc.

FiberCorp will engage in the business of manufacturing and distributing, both nationally and internationally, products for the fiber optic telecommunications industry.

Ronald G. Caravello, the chairman and chief executive officer of the company and FiberCorp, has entered into a letter of intent to acquire, on behalf of FiberCorp, the exclusive worldwide license to manufacture and distribute a proprietary and fully developed fiber optic surveillance system to monitor fiber optic transmission equipment. FiberCorp is in the process of raising capital to provide the working capital to market the product to the international telecommunications industry.

On Oct. 4, 1990 FiberCorp received a purchase order from an Asian telecommunication company which provides for an irrevocable letter of credit in the amount of U.S. $2.6 million for the purchase of the 75 units.

Deliveries at the rate of ten per month will begin in the fourth quarter of calendar 1991. The purchase order requires that FiberCorp deliver packaging, shipping, and technical specifications prior to the delivery of the letter of credit. FiberCorp intends to deliver this information to the purchaser by the end of calendar 1990.

FiberCorp will be attending, as an exhibitor, the Tenth Annual Expo Comm China 90. This international telecommunications computer exhibition and conference is being held in Beijing on Nov. 8-13, 1990.

At this six day conference, FiberCorp will present its proprietary FOSS Unit to the 175,000 conference participants. FOSS provides telecommunication system operators with a standardized multi-vendor system to monitor the performance of the Optical Transmission and Receive Electronic components which house the critical Fiber Optic Laser Diode Telemetry.

FiberCorp's booth will be manned by its Far Eastern sales representative as well as its engineering personnel who will present complete system demonstrations as well as technical support information.

FiberCorp will manufacture and distribute surveillance, monitoring and testing products for the fiber optic telecommunication industry. The common stock of FiberCorp's parent, NSC Service Group, Inc., has limited trading in the over-the-counter market.

INDIANAPOLIS (OCT. 23) PR NEWSWIRE - RELM Communications (NASDAQ-NMS: RGCY) reported a net loss of $198,000 ($.02 per share) on sales of $6,630,000 for

the quarter ending Sept. 30, 1990.

On an operating basis, comparative losses were reduced 21 percent from $186,000 to $147,000. Inventories declined during the quarter by $1,175,000. The inventory reduction combined with corporate income tax refunds contributed to an increase in cash balances during the quarter. Working capital at Sept. 30, 1990, was $15,292,000 ($1.39 per share) and book value was $18,605,000 ($1.69 per share). The previous year RELM reported a net loss of $152,000 ($.01 per share) on sales of $6,246,000.

Steven L. Wilkening, president and COO, commented that operating results improved over last year primarily because of increased sales and gross margins from demand-side management and components. He added that the company continues to search for acquisition and merger possibilities.

RELM designs, manufactures and markets land mobile communications equipment, cellular telephones, utility demand-side management systems, electronic components and engages in contract electronic manufacturing.

RELM's 11 million common shares are traded in the NASDAQ National Market System under the symbol RGCY.

#90296p8438 10/23/1990 ~PR Newswire

EDISON, NJ (OCT. 23) PR NEWSWIRE - Crestmont Federal Savings and Loan Association (NASDAQ-NMS: CRES) announced today that in its second fiscal quarter ended Sept. 30, 1990, net income was $103,000 or $.03 per share compared with a loss of $1,346,000 or $.36 per share in the corresponding period a year ago. For the first six months earnings were $176,000 or $.05 per share compared with $446,000 or $.12 per share a year ago. As part of its restructuring and ongoing review process, Crestmont realized approximately $550,000 of non-recurring income in the second quarter as it previously announced was probable. The company's tangible book value at Sept. 30, 1990, was $14.18 per share.

As stated at last month's annual shareholders meeting and in an accompanying press release, Crestmont returned to compliance with its risk-based capital ratio as of Aug. 31, 1990. Also stated at the meeting was that with the resolution of a previously disputed loan loss classification by the Office of Thrift Supervision (OTS), Crestmont is no longer in a position of having to report its risk-based capital ratio on two bases. At Sept. 30, 1990, this ratio was 7.09 percent compared to a current minimum requirement of 6.40 percent. Management is making every effort to continue improvement in this ratio as the minimum requirement increases to 7.20 percent at Dec. 31, 1990, and to 8 percent two years later. The tangible and core capital ratios which have all along been in compliance were 3.22 percent and 3.32 percent at Sept. 30, 1990, as compared to minimum requirements of 1.50 percent and 3 percent. As required, Crestmont had filed a capital plan with the OTS on July 6, 1990. The company was recently notified by the OTS that approval of the plan is no longer warranted since it has regained compliance with the risk-based capital requirements. If Crestmont should fall out of capital compliance in the future, a new capital plan would be required.

The OTS has indicated its intention to adopt a new core capital requirement similar to that adopted by the Office of the Comptroller of the Currency. While a definitive statement cannot be made until such time as the regulations are adopted, it is likely that Crestmont will not meet the new requirement. The company also cannot state what restrictions, if any, it would face if it

was not in compliance with a revised core capital requirement.

At Sept. 30, 1990, non-performing assets were $67.7 million compared with $59.1 million at June 30, 1990, and $65.3 million at March 31, 1990.

The provision for loan losses was $750,000 in the first quarter and $1,731,000 in the second quarter. The provision was increased because of the continued deterioration in New Jersey real estate markets. At Sept. 30, 1990, the allowance for loan losses was $10.6 million.

Crestmont's results of operations are largely dependent on economic and market conditions, and a continuing weakness in the real estate market would likely result in further depressing the carrying value of assets and an increase in non-performing assets. Analysis and classification of assets is an ongoing activity and future quarterly performance could be uneven should market conditions not improve.

The regulatory environment with its evolving sets of standards, including the examination process, continues to be a matter of concern. It has been most difficult to meet the frequently changing and occasionally conflicting requirements. Operating decisions are made as the rules and procedures on critical issues such as capital and examinations change. Indeed, still arising with disquieting frequency is the question of who will be the primary regulator for the savings and loan industry. It is essential that there be more consistency so that the recovery process is not unduly impeded.

Seidman Financial Associates recently received approval to purchase up to 24.9 percent of Crestmont stock and has filed a revised Schedule 13-D to that effect.

Crestmont Federal Savings and Loan Association, with $1.5 billion in assets at Sept. 30, 1990, has 20 branch locations and two loan production offices serving Camden, Gloucester, Essex, Middlesex, Morris, Monmouth, and Union counties in the state of New Jersey.

CINCINNATI (OCT. 23) PR NEWSWIRE - Peoples Federal Savings and Loan Association ("Peoples"), a $61 million savings and loan association located in Bellevue, Ky., and Provident Bancorp, Inc. ("Provident") (NASDAQ: PRBK), a $2.3 billion bank holding company located in Cincinati, Ohio, jointly announced the signing of a definitive agreement to enter into a merger conversion transaction whereby Peoples will adopt a plan of conversion and acquisition which will result in it becoming a wholly owned savings and loan subsidiary of Provident. In conjunction with the transaction, Peoples

depositors will be offered the opportunity to subscribe for stock of Provident in a "Subscription Offering." The transaction is subject to Peoples member approval and receipt of necessary regulatory approvals and the definitive agreement allows Peoples to consider unsolicited proposals from other parties.

Peoples has two offices in northern Kentucky. Provident's subsidiaries currently provide banking services through offices in Cincinnati, Cleveland and Columbus, Ohio and in northern Kentucky. Allen L. Davis, president of Provident, stated, "Peoples is a well managed, customer service oriented financial institution. The merger will allow Provident to expand services offered in the northern Kentucky market. We are excited about the prospect of working with Peoples' directors, officers and employees. We believe this merger will offer greater opportunity for the employees as well as new products, services and conveniences to customers."

Larry J. Ludwig, CEO of Peoples, said, "This merger allows us to offer greatly expanded financial services to our customers. It provides the opportunity for us to compete on equal footing with major financial institutions in this marketplace. Our customers, employees and the community will significantly benefit from the combination of these very successful organizations."

#90296p8447 10/23/1990 ~PR Newswire

CHICAGO (OCT. 23) PR NEWSWIRE - Peoples Energy Corp. (NYSE: PGL) today reported preliminary results showing a marked downturn in net income and per-share earnings for its 1990 fiscal year, which ended Sept. 30.

The Chicago-based holding company for two natural gas utilities said unaudited results for the year indicate net income declined 23 percent to $67.5 million, or $2.07 per share. This compares with net income of $87.7 million, or $2.69 a share, for fiscal 1989.

Tracy cited last winter's warmer weather along with higher operating expenses and lower interest income as the principal negative factors affecting the company's 1990 performance. Weather alone, he said, reduced earnings by 19 cents a share.

These negative factors more than offset the effect of reimbursements from the state of Illinois for revenue shortfalls incurred by a subsidiary under a state low-income customer assistance program that ended last fall. The subsidiary recovered $17.6 million of revenue shortfall during the 1990 third quarter, compared to about $5 million received in the final period a year ago. The net impact of the shortfall recovery increased 1990 earnings by 19 cents

per share. Under a new program that began last November, utilities are reimbursed by the state -- generally month to month -- for assistance provided to low- income customers.

Peoples Energy and its two utility units had total revenues from operations in 1990 of $1.2 billion, down about 2 percent from the prior year. The decrease stemmed mainly from reduced gas deliveries due to weather that was 6 percent warmer than in fiscal 1989.

Fourth-quarter results -- which typically are in the red -- showed a loss of $19.2 million, or 59 cents per share. This compares with a loss of $10.9 million, or 34 cents per share, for the fourth quarter of fiscal 1989. The variation is due in part to the positive effect in last year's fourth quarter of the $5 million cost-recovery payment that was received from the state. Other factors included higher labor costs and increased expenses for interest and depreciation during the current period.

Revenues for the 1990 fourth quarter amounted to $97.8 million, compared with $111.4 million a year ago.

In releasing results for fiscal 1990 on a preliminary basis, Peoples Energy said that final, audited financial and operating data will be available in about three weeks, when the company's 1990 annual report is mailed to stockholders.

FARMINGTON HILLS, MICH. (OCT. 23) PR NEWSWIRE - Citing mutual differences, Robert J. Mylod, chairman and chief executive officer of Michigan National Corporation (NASDAQ-NMS: MNCO), announced today that he has accepted the resignation of Peter K. Thomsen from all positions within the company on behalf of the corporation and its subsidiaries.

Thomsen has also resigned as a corporate and bank director. Thomsen joined Michigan National Corp. in August 1986 as executive vice president and has served as president of Michigan National Bank since May 1988.

The day-to-day operations of the bank have been absorbed by members of Michigan National's senior management. Mylod has assumed the responsibilities of president of Michigan National Bank.

Commenting on the realignment, Mylod said, "This management team is strong and aggressive. It will continue to enhance and improve the momentum of our core businesses as it builds the future of Michigan National Corporation."

Michigan National Corp. is a diversified financial services corporation with total assets of $11.3 billion. It is a bank holding company and a savings and loan holding company. Michigan National Corporation's principal subsidiary, Michigan National Bank, has 200 branches throughout Michigan and operates the state's largest automated teller machine network. Michigan National Corporation has its headquarters in Farmington Hills.

PHOENIX, AZ (OCT. 23) PR NEWSWIRE - Syntellect Inc. (NASDAQ: SYNL) and Dytel Corp. announced today that they intend to delay completion of the proposed acquisition of Dytel by Syntellect. The two firms announced on Aug. 8, 1990, the signing of a letter of intent which contemplated that Syntellect would acquire Dytel through a stock transaction on or about Dec. 31, 1990. The companies cited turbulence in the financial markets as the principal reason for the delay in completing the transaction.

"Syntellect views the acquisition of Dytel as an important strategic move, and we look forward to completing the Dytel acquisition during 1991," said S. Thomas Emerson, Syntellect's chief executive officer. "In the interim, Syntellect and Dytel are cooperating in the marketplace, and we expect to complete a joint product distribution agreement within the next few weeks."

Syntellect Inc. develops, markets and supports a family of interactive voice response systems, and is the leading supplier of these systems worldwide. Syntellect sells its products primarily through a direct sales force and has an OEM relationship with IBM (NYSE: IBM), which markets and sells private-label versions of the company's products on a worldwide basis. The company's technology allows individuals to use a touch-tone telephone to access information in or services controlled by host computer networks. Syntellect is headquartered in Phoenix. Dytel Corp. of Schaumburg, Ill., manufactures call processing and voice messaging systems.

#90296p8452 10/23/1990 ~PR Newswire

BRIDGEPORT, Conn. (OCT. 23) PR NEWSWIRE - The Hydraulic Company (THC) today reported consolidated net income for the three months ended Sept. 30, 1990 of $2,807,000, compared with $2,582,000 in the 1989 third quarter, an increase of 8.7 percent.

Net income per share for the 1990 third quarter was 59 cents, compared with 55 cents in the 1989 third quarter.

Revenues were $20,997,000 and $19,149,000 in the 1990 and 1989 third quarters, respectively.

Earnings for the first nine months of 1990 were $5,246,000, down 10.3 percent from the $5,851,000 earned during the comparable 1989 period. Earnings per share were $1.10 for the first nine months of 1990, compared with $1.24 for the corresponding period in 1989.

Nine-month revenues in the 1990 and 1989 periods were $56,712,000 and $51,374,000, respectively.

Jack E. McGregor, THC president and chief executive officer, said the year-to-date decline in net income is largely due to lower earnings from the company's water utility segment.

McGregor noted that THC's public water supply subsidiary, Bridgeport Hydraulic Company (BHC), on June 29 filed an application with the Connecticut Department of Public Utility Control (DPUC) for a $9.8 million, 22 percent increase in annual revenues.

McGregor said a decision on the rate application, which is intended to enable the company to improve its earnings, is due from the DPUC by December.

In a separate application, the DPUC, effective Sept. 18, approved a Construction-Work-In-Progress (CWIP) surcharge that will allow BHC to recover the carrying cost of 90 percent of its investment in a filtration plant under construction at its Easton Lake Reservoir.

McGregor said THC's year-to-date earnings decline also is attributable to expenditures associated with expansion by Industrial & Environmental Analysts, Inc. (IEA), which was acquired by THC's principal nonutility subsidiary, Hydrocorp, Inc., in the second half of 1989.

IEA, which has multidisciplinary analytical laboratory operations in North Carolina, Vermont, and Massachusetts, recently added air sampling to its

water- and soil-analysis capabilities. In May it also formed an engineering consulting division specializing in ultra-high purity water systems for semiconductor manufacturers and other customers.

McGregor also observed that another THC nonutility subsidiary, Timco, Inc., which has forest products and electricity cogeneration operations in New Hampshire, benefited in 1989 from the settlement of a legal claim.

He said that THC's 1990 third-quarter net income improved as a result of tax benefits associated with its nonutility ventures.

A New York Stock Exchange-listed company, THC provides public water supply to a population of some 500,000 in 18 Connecticut communities through BHC and through BHC's Stamford Water Company subsidiary. In addition to its Hydrocorp and Timco operations, THC is engaged in the nonutility real estate field through Main Street South Corporation.

#90296p8454 10/23/1990 ~PR Newswire

DUBLIN, CA. (OCT. 23) PR NEWSWIRE - Hexcel Corp. (NYSE: HXL) today announced third quarter 1990 earnings of $361,000, 78 percent below net income of $1,649,000 reported in the third quarter of 1989.

The decline resulted from previously announced factors including reductions in spending for military aerospace programs creating excess capacity and costs at several plants, margin pressures in the honeycomb business, manufacturing difficulties which delayed full production of a new food additive and a slowdown in business at several of the company's European operations.

Sales in the quarter ended Sept. 30, 1990, were $101,126,000, 4 percent above the $97,021,000 in sales for the comparable quarter of 1989. Primary and fully diluted earnings per share were 5 cents in the recent third quarter compared with 24 cents in the same quarter a year ago.

Net income for the nine months ended Sept. 30, 1990, was $3,295,000, a decrease of 50 percent from the $6,656,000 earned through the same period of 1989. Sales for the recent nine month period of $318,085,000 were 3 percent above the $309,112,000 in sales through the first nine months of 1989.

Primary and fully diluted earnings per share for the nine months ended Sept. 30, 1990, were 47 cents compared with 96 cents in primary earnings per share and 95 cents in fully diluted earnings per share for the comparable 1989 period.

Third quarter and nine months 1990 results benefited from the extension of the depreciation recovery periods of certain property and equipment to coincide with changes in business conditions.

"We anticipate an improvement in fourth quarter results from the third quarter " said Robert L. Witt, president and chairman. "Third quarter earnings typically lag the second and fourth quarters as many businesses in Europe close during the month-long summer holiday there. Furthermore, production levels for the food additive are now on target and the product will be at expected profitability levels in the fourth quarter."

Hexcel is an international developer and manufacturer of honeycomb, advanced composites, reinforcement fabrics, chemicals and resins for commercial aerospace, space and defense and other general industrial markets. #90296p8458 10/23/1990 ~PR Newswire

LANSING, MI (OCT. 23) PR NEWSWIRE - Oldsmobile Division has taken another important step toward becoming the No. 1 customer-caring car company by providing a nationwide toll-free customer assistance network for its customers.

Simply by dialing 1-800-442-OLDS, any of the 11 million Oldsmobile owners nationwide can now reach the Oldsmobile Customer Assistance Network (OCAN), and receive immediate assistance with any request they may have. The hours are 8 a.m. to 7 p.m. ET, Monday through Friday. To date, 60 customer service advisers are averaging around 1,000 calls a day. Additionally, they respond to 250 letters per day.

Implementation of the customer service 1-800 number began on Jan. 16, 1990, with the Pittsburgh zone. Each of Oldsmobile's 18 zones was subsequently added to the 1-800 number with the Dallas zone joining the system on Sept. 17, 1990.

"Part of our philosophy in becoming the No. 1 customer-caring car company is to assure that all our current and future customers have direct access to the best customer assistance network in the industry," said Ken McCourt, general director of customer service.

"We've assembled a team of outstanding advisers, plus state-of-the- art equipment, to courteously and quickly handle any customer's concern," he added.

Customers are encouraged to first contact their Oldsmobile dealer for assistance. In the event the dealership personnel can't help, the customer assistance hotline stands ready to assist the customer.

Nearly 80 percent of the calls received at OCAN are for information that are handled on the spot while 20 percent of the requests must be referred to the Oldsmobile dealer organization for handling.

There is also a special number for those people who just want product information, and that is 1-800-242-OLDS. Also, in addition to reacting to customer queries, a number of surveys are conducted by the OCAN staff related to a variety of product and customer issues.

The new customer assistance network is just one element in a far- reaching program to assure Oldsmobile customers are the most satisfied in the industry. Each buyer of a 1991 Oldsmobile also receives the benefits of the Oldsmobile Edge, which include:

-- Buyer may return vehicle within 30 days or 1,500 miles for any reason for credit toward the purchase of another Oldsmobile.

-- GM's comprehensive Bumper-To-Bumper-Plus 36-month/50,000-mile warranty.

-- 24-hour roadside assistance for the entire warranty period which covers accidents, flat tires, lock-outs or mechanical failures.

-- Buyers may also receive free computerized trip routing service, which includes maps, sightseeing tips and coupons.

"We're pleased that we can now offer our customers the benefits of both the Oldsmobile Customer Assistance Network and the Oldsmobile Edge," added McCourt. "Customer satisfaction is extremely important to today's discriminating car buyer, and we want to be sure today's car buyer becomes a member of the Oldsmobile family."

#90296p8467 10/23/1990 ~PR Newswire

WESTLAKE VILLAGE, CA (OCT. 23) PR NEWSWIRE - Delphi Information Systems Inc. (NASDAQ: DLPH) today reported continued improvement in operating results.

Revenues for the company's second quarter ended Sept. 30, 1990, were $5,049,000 compared to $4,242,000 for the same period in the prior year, a 19 percent increase. A profit of $32,000 or $.01 per share was recorded compared to a loss of ($539,000) or ($.13) per share incurred in the prior year's second quarter.

Richard Janssen, president and chief executive officer stated, "The financial improvement resulted from increases in systems sales, maintenance and service revenues. The acceptance of the IBM RISC System 6000 (RS/6000) and the company's new INfinity software by both new and existing customers has been very good and is expected to continue at increasing levels.

"We are also starting to see increased sales activity as a result of the expansion we made to our sales force earlier this year. Operating expenses for the quarter were essentially flat when compared to prior year and reflect achievements in cost reduction and cost containment programs implemented during the prior fiscal year."

Janssen also added that new software applications which further enhance insurance agency efficiency are on target for release in the coming quarters.

For the six months ended Sept. 30, 1990, revenues were $11,722,000, compared with $10,497,000 for the year earlier period. Net income of $1,163,000 or $.26 per share was recorded, compared with net losses of ($197,000) or ($.05) per share for the sixth month period last year prior to the cumulative effect of an accounting change. Comparative prior year revenues and profits have been restated for an accounting change as previously reported by the company.

Janssen further stated, "The outlook for the remainder of fiscal 1991 is encouraging. We believe that revenue and profit growth will continue in the coming quarters. We also continue to believe that there will be a consolidation of agency automation vendors during the next year and that Delphi is well positioned to take advantage of this market condition."

Headquartered in Westlake Village, Calif., Delphi is the largest independent developer and marketer of turnkey automation systems for insurance agents and brokers in the property and casualty insurance field.

The Delphi system provides proven agency productivity and profitability increases through total agency automation, encompassing integrated functions of policy information, accounting, financial reporting, prospect management and cross selling, claims administration, management reporting, office administration, integrated rating and electronic interface with insurance carriers.

#90296p8470 10/23/1990 ~PR Newswire

BASKING RIDGE, NJ (OCT. 23) PR NEWSWIRE - NYCOR, Inc. (NASDAQ: NYCO) today reported that revenues for the third quarter of 1990 ended Sept. 30 totaled $1.5 million compared with $1.6 million a year ago. Net income totaled $1.0 million, or 4 cents per share, in the third quarter of 1990 vs. $1.3 million, or 6 cents per share, in the prior year.

For the nine months ended Sept. 30, 1990, revenues totaled $4.6 million versus $3.9 million in the year-ago period. Income from continuing operations in the nine months was $3.4 million, or 14 cents per share, compared with $2.5 million, or seven cents per share, last year. Including income from discontinued operations of $1.2 million, or 8 cents per share, net income totaled $4.5 million, or 22 cents per share, in the nine months of 1990. This compares with net income of $55.3 million, or $3.86 per share, in the first nine months of 1989 when NYCOR sold its major operating business, and income from its discontinued operations contributed $52.8 million, or $3.79 per share,

to net income.

NYCOR revenues from continuing operations currently are comprised primarily of interest income, as the company sold or discontinued its manufacturing operations as of the second quarter of 1989. Net income declined in the third quarter of 1990 due to lower interest rates and higher expenses reflecting normal staffing consistent with NYCOR's chief objective of making a substantial acquisition of underperforming manufacturing assets.

NYCOR's balance sheet included cash and marketable securities of $73.8 million and no debt at Sept. 30, 1990. Stockholders' equity totaled $3.84 per share on a fully diluted basis.

#90296p8471 10/23/1990 ~PR Newswire

RICHMOND, Va. (OCT. 23) PR NEWSWIRE - At the annual meeting of stockholders of Universal Corporation (NYSE: UVV) held today, Henry H. Harrell, president

and chief executive officer, reported earnings for the first quarter ended September 30, 1990 were $7 million or 43 cents per share compared to $14.7 million or 87 cents per share a year ago. Net income in the first quarter of the previous year included $8 million or 47 cents per share resulting from the adoption of FAS 96 "Accounting for Income Taxes." For the first quarter of the current fiscal year, net income included $2.8 million of income tax credits on earnings permanently reinvested abroad for which taxes had been previously accrued. Gross revenues for the 1991 quarter were $744 million compared to $679 million last year.

In the current quarter, results from domestic tobacco operations were significantly above those of the previous year primarily due to an increase in the volume of flue-cured tobacco bought, shipped and processed. This was the result of increased orders and the current year's crop being marketed earlier than last year. Orders for the 1990 domestic burley crop are up substantially and indications are that the crop should be large enough to meet this demand.

Foreign tobacco earnings declined in the quarter principally due to delayed shipments by the company's European operations. Brazilian earnings, while comparable in the first quarter, are expected to be lower for the fiscal year since it appears that there will be minimal opportunities to duplicate foreign exchange transactions which resulted in $6.3 million net of tax gains last year.

Recent developments in the Soviet Union and eastern Europe toward free trade should have a positive and continuing impact on the company's operations as worldwide demand for American-type cigarettes increases. On August 30, 1990 the company completed the acquisition of Gebrueder Kulenkampff AG, which did not materially affect the results of operations reported in the current quarter.

Title insurance revenues declined from $109 million reported in the prior year to $100 million this year, reflecting the continuing slump in the U.S. real estate market. The resulting decline in operating earnings, when compared to last year, was exacerbated by reduced capital gains and a deterioration in claims experience.

Agri-products earnings were in line with last year with improved results from coffee and rubber being offset by a significant decline in earnings from peanuts. A severe drought in the southeastern United States has forced the company to satisfy forward sales commitments with peanuts purchased at prevailing market prices. The final results for the season are not yet known, but included in the current quarter is an estimated loss before interest for the year of $2 million net of tax.

Lumber and building product results were comparable to the prior year's quarter, with volume and margin increases being offset by the additional financing costs from last year's acquisitions.

#90296p8473 10/23/1990 ~PR Newswire

NEW YORK (OCT. 23) PR NEWSWIRE - John Wiley & Sons, Inc. (NASDAQ-NMS: WILLA), the publisher, announced today that two Wiley authors have been made Nobel Laureates for 1990.

E.J. Corey, co-author of The Logic of Chemical Synthesis, has won the Nobel Prize for Chemistry; Harry M. Markowitz, author of Portfolio Selection: Efficient Diversification of Investment, is one of three American recipients of the Nobel Memorial Prize for Economic Science.

Charles Ellis, president and chief executive of Wiley, said, "There can be no greater source of pride for a publisher than to have two authors on its list win Nobel prizes in the same year. We extend our warm congratulations to the two new laureates, E.J. Corey and Harry Markowitz."

Corey, of Harvard University, was recognized for developing a method of constructing molecules called "retrosynthetic analysis". While the traditional approach to chemical synthesis calls for the scientist to construct molecules by "building" them from their components, Corey's approach gives scientists a new method.

First, a scientist plans the molecule to synthesize and then studies its theoretical structure. In learning about the desired molecule's components, the scientist may find that some of the components exist or can be produced with relative ease. As a result, retrosynthetic analysis has helped reduce the number of steps, the complexity, and cost of traditional chemical synthesis.

Markowitz, a professor of finance and economics at Baruch College of the City University of New York, has been described by an economist at the Brookings Institution as one of the "Intellectual fathers of the mutual fund business."

He first gained attention for his work in the 1950s that helped investors weigh risk and return. Markowitz showed how to measure the risk associated with different assets and how to mix assets to achieve the maximum likely overall return with the least possible risk.

His Portfolio Theory, considered innovative when it was first developed in 1955, is now ubiquitous among stockbrokers, bankers, mutual fund managers, government agencies and million of individuals.

LANDOVER, MD (OCT. 23) PR NEWSWIRE - Hechinger Company (NASDAQ-NMS: HECHA, HECHB), which operates a chain of specialty retail do-it-yourself home centers today announced quarterly cash dividends of $.04 cents per share on its outstanding Class A Common Stock and $.016 cents per share on its outstanding Class B Common Stock. Both dividends are payable on Nov. 23, 1990, to stockholders of record on Nov. 2, 1990.

During the quarter, the company opened three Home Quarters Warehouse stores, one in Denbigh, Va., bringing the HQ presence in the Tidewater area to five stores; and on Aug. 19 the first two HQ stores opened in the Boston metropolitan area in the communities of Danvers and Norwood. These are the first two of approximately 12 stores planned for the Boston market. Other HQ expansion plans include Birmingham and Montgomery, Ala.; Memphis, Tenn.; Louisville, Ken.; and Cincinnati.

Hechinger also announced plans to open four Hechinger stores in 1991. The new stores will be located in Leesburg, Va.; Largo, Md.; Maple Shade, N.J.; and Reading, Pa.

Hechinger Company operates 87 Hechinger stores, 20 Home Quarters Warehouse Stores and six Triangle Building Centers in 14 states and the District of Columbia.

BUFFALO, NY (OCT. 23) PR NEWSWIRE - Computer Task Group, Inc. (NYSE: TSK), and Volmac Software Group N.V. of the Netherlands today announced that they have reached an agreement in principle whereby CTG will provide professional software implementation services throughout the United States and Canada to users of the SAP Product Line.

Under the agreement CTG will become a Preferred Vendor of SAP, U.S., in connection with the installation, support and maintenance of the SAP Product Line licensed to users throughout the United States. Volmac, a leading implementor of the SAP Product Line throughout Europe, will provide CTG with technical and marketing assistance in promoting the relationship.

Volmac is one of the leading software companies in European Community with 3,600 professional staff mainly in the Netherlands and Belgium. During the last six months Volmac has utilized members of its professional staff to conduct implementation services for the SAP Product Line in the United States.

With 1989 revenues of $233 million, CTG is one of the leading software service companies in the United States, with professional staff totaling 4,000 and an ongoing relationship with any potential users of the SAP Product Line.

In commenting upon the relationship, Jelle Dohmen, chief executive officer of Volmac stated, "We are pleased that World Software Group, a minority shareholder in both CTG and Volmac, have been able to assist both firms in creating a business relationship which will expand implementation services for the SAP Product line in the United States and Canada.

"We have had a very successful start in the United States with our SAP approach which we developed in Europe. However, we recognized we needed a strong U.S. professional services firm in order to reach our full potential in the U.S. marketplace; CTG is that firm. We are delighted that they have agreed to work with us."

David N. Campbell, chairman and chief executive officer of CTG stated, "SAP products originated in Europe and the technical expertise in order to implement and support the products resides solely within the European Community.

"Our relationship with Volmac will give us a significant competitive advantage over other U.S. competitors in implementing the SAP Product Line for clients throughout the United States. We look forward to the opportunity of serving

our clients through our relationship with Volmac."

Volmac is a Netherlands-based company. CTG is publicly traded on the New York Stock Exchange under the symbol TSK.

#90296p8499 10/23/1990 ~PR Newswire

NEW YORK (OCT. 23) PR NEWSWIRE - The Equitable Life Assurance Society of the United States has elected Joseph J. Melone, who is resigning as president of the Prudential Insurance Company of America, as its new president and chief operating officer, according to an announcement today by Richard H. Jenrette, Equitable's chairman and chief executive officer. Previously, Jenrette also held the title of president. Melone will assume his new position on Nov. 5.

Melone, 59, has served as president of The Prudential, the largest insurance company in the United States, since 1984. He has had company- wide responsibility for individual insurance marketing activities and administration. During this period Prudential experienced record growth in premium income and statutory earnings.

Melone is a 1953 graduate of the University of Pennsylvania and subsequently earned his M.B.A. and a Ph.D. in economics from the Wharton School. After serving as an associate professor of insurance for seven years, he was research director of the American College of Life Underwriters for two years. He joined Prudential in 1968 as executive director, marketing development, and moved through various positions until his election as president in 1984. He is a Chartered Life Underwriter (CLU), Chartered Financial Consultant (ChFC) and Chartered Property and Casualty Underwriter (CPCU).

Jenrette stated, "We are enormously excited to be able to obtain the services of one of the life insurance industry's most distinguished leaders. His vast knowledge of the life insurance industry, first as an academician and as the leader for many years of Prudential's highly successful field force, is the perfect complement to my own background in finance and investment."

Equitable is the third-largest life insurer in the nation after Prudential and Metropolitan Life. With total assets under management of $135 billion at mid-year. Equitable is the second largest asset manager after Prudential among the nation's major life insurance companies.

MINNEAPOLIS, (OCT. 23) PR NEWSWIRE - Minntech Corporation (NASDAQ: MNTX) reported today net earnings of $706,000 or $.25 per common share for the second quarter ended Sept. 30, 1990, up 52 percent compared to net earnings of $464,000 or $.17 per common share for the second quarter last year. Revenues for the second quarter were $6,924,000, up 17 percent from revenues of $5,902,000 for the same period last year.

For the six months ended Sept. 30, 1990, the company reported net earnings of $1,354,000 or $.48 per common share, up 56 percent compared to net earnings of $869,000 or $.33 per common share for the first six months one year ago. Revenues for the six month period were $13,270,000, a 19 percent increase from revenues of $11,194,000 for the first six months last year.

Dr. Louis C. Cosentino, president, reported, "We are meeting our goals and continue to gain momentum in sales of reprocessing and dialysis products. Both sales and earnings in the second quarter increased by 9 percent over first quarter results. Profit margins in the second quarter and first six months equalled 10.2 percent of revenues. We are pleased with these results and are optimistic about the remainder of the year."

Minntech Corporation is a leading medical device manufacturer with advanced technology in electronics, solutions, fibers and plastics. The company's core technologies are being applied to the businesses of dialysis, reprocessing/sterilants, cardiosurgery and water purification. Minntech Corporation's common stock is traded on the national over-the- counter market under the NASDAQ symbol: MNTX.

HOUSTON (OCT. 23) PR NEWSWIRE - William C. Liedtke Jr., chairman of the board and chief executive officer of Pogo Producing Co., (NYSE: PPP) today announced that the board of directors of the company, at their fall meeting, appointed Paul G. Van Wagenen as the new president of the corporation. Van Wagenen has been associated with Pogo for 11 years, serving as senior vice president and general counsel as well as a director of the company.

The Pogo chairman then reported the company's third quarter results. Pogo Producing Co. incurred a loss of $2,777,000 or 10 cents per share on revenues of $25,690,000. This compares to a loss of $1,886,000 or 8 cents per share on revenues of $29,137,000 for the same period of 1989.

Gas sales for the quarter ending September 30th averaged 85.7 million cubic feet per day compared to 106.6 million cubic feet for the third quarter of last year. The average price received for gas was $1.66 per Mcf compared to $1.84 per Mcf during the same period a year ago. Pogo elected not to exercise its full delivery capacity in making natural gas sales during the summer months because of lower than anticipated spot prices.

Total liquids production for the most recent three months averaged 6,387 barrels per day compared to 6,674 barrels per day in the 1989 third quarter. The average price received for crude oil-condensate in the quarter increased to $22.11 per barrel over last year's third quarter price of $18.93 per barrel.

William C. Liedtke Jr., chairman of the Houston-based oil and gas exploration and development company commented: "Although crude oil and condensate prices increased during the quarter, the increase is not reflected in our realized price for the quarter. These increases will be reflected in our fourth quarter results. Also, natural gas prices were down 10 percent during the quarter as in the third quarter of 1989. Additionally, natural gas volumes were down because of low prices which caused us to pass up a number of sales for various reasons, mainly relating to price. The reduced gas volumes also resulted in less condensate production. The futures market indicates that natural gas prices will be very strong in both the fourth quarter and the first quarter of 1991."

Pogo's positive momentum broadened this quarter in a number of ways, the company having announced that it has been successful in finding new reserves, both onshore and offshore, and increased the delivery capacity of existing reserves in order to take advantage of higher product prices this winter. The company also said it has lowered its interest charges even further, and continued to significantly reduce long term debt.

MIAMI (OCT. 23) PR NEWSWIRE - Ryder System, Inc. (NYSE: R) today reported revenue of $1.4 billion for the third quarter of 1990. Net earnings in the quarter were $28.3 million, or $0.35 per share, it was announced by Chairman, President and Chief Executive Officer M. Anthony Burns.

In the third quarter of 1989, revenue was $1.3 billion, and the company recorded a net loss of $27.6 million, or $0.38 per share, which included a one-time $57 million after-tax charge to earnings.

Revenue in the first nine months of 1990 was $3.9 billion, and net earnings were $67.7 million, or $0.80 per share. In the corresponding period of 1989, revenue was $3.8 billion, and net earnings were $31.1 million, or $0.33 per share.

In the Vehicle Leasing & Services Division, pretax earnings were higher in the third quarter of 1990 than the same period in 1989, excluding the effect of last year's unusual charges.

"The full-service truck leasing and dedicated contract carriage product lines continued to grow during the third quarter, each adding new customers," Burns said. "However, both commercial and consumer truck rental experienced low market demand, reflecting the nation's slowed economy and weakened housing market."

Excluding the effect of last year's unusual charges, pretax earnings of the Automotive Carrier Division were higher than they were in the third quarter last year. "Current year performance gains were reduced by higher fuel costs " Burns commented.

He added that the Automotive Carrier Division recently negotiated fuel adjustment agreements with virtually all of its customers, which enable the division to recover higher fuel costs. However, the full benefit of these increases will not be felt until the fourth quarter.

Ryder System, Inc. is the parent of a group of companies which provide high-quality highway transportation and aviation services. Revenue for the 12

months ended Sept. 30, 1990 was $5.2 billion, and assets totaled $5.6 billion at Sept. 30, 1990.

DEARBORN, MICH. (OCT. 23) PR NEWSWIRE - General Motors engineers today announced an advance in the use of ceramics for automotive gas turbine engines.

In a Department of Energy-sponsored program, General Motors engineers from the Advanced Engineering Staff and Allison Gas Turbine Division operated a ceramic turbine full speed at 2,500 degrees Fahrenheit.

"It demonstrates one of the key technologies for successful automotive gas turbines," said Philip J. Haley, project manager of the DOE program for GM.

The achievement that took place in April at the General Motors Technical Center in Warren, Mich., was announced today at the DOE's annual Automotive Technology Meeting for its contractors. Technically managed for the government by NASA at the Lewis Research Center (Cleveland), the program allows GM to develop technologies necessary for an automotive gas turbine.

"Gas turbines are attractive because of their potential for high fuel economy at good performance levels," said Albert H. Bell, gas turbine project manager for the Advanced Engineering Staff. "It also offers possible emissions reduction and multi-fuel capability.

"Its reduced mass and volume will mean more styling freedom for car designers " he added.

On display at the meeting was the Chevrolet Express, a fully operational concept car powered by GM's developmental gas turbine engine, the AGT-5.

LATROBE, PA (OCT. 23) PR NEWSWIRE - The board of directors of Kennametal Inc. (NYSE: KMT) today declared a quarterly cash dividend of 29 cents per share payable Nov. 23, 1990, to holders of record as of Nov. 9, 1990.

This action continues the dividend at the rate paid in the preceding seven quarters.

At the annual meeting of shareholders held today, the shareholders of Kennametal elected Peter B. Bartlett, Robert L. McGeehan, Eugene R. Yost and Warren H. Hollinshead to the board of directors for three-year terms expiring in 1993. Hollinshead joins the company's board as a result of the retirement from the board of Alex G. McKenna. Hollinshead is vice president, deputy finance of Westinghouse Electric Corp. McKenna, a former chairman of the board and one of the founders of the company, was named director emeritus by the board.

Kennametal also announced today that its board of directors has adopted a shareholder rights plan. Quentin C. McKenna, Kennametal's chairman and chief executive officer, stated that the plan is designed to deter unfair takeover tactics and to protect Kennametal's long-range strategic plans against disruption. McKenna emphasized that the board is not aware of and its action was not in response to any actual efforts to acquire control of the company.

Under the plan, Kennametal will distribute one stock purchase right for each share of capital stock held as of Nov. 2, 1990. Each right will entitle shareholders to buy 1/100th of a newly issued share of Series One Preferred Stock of the corporation upon the occurrence of certain events. The rights will be exercisable only if any person or group acquires ownership of 20 percent or more, or announces or initiates a tender offer for 20 percent or more, of Kennametal's voting shares or becomes a controlling person as that term is defined under the Pennsylvania Business Corporation Law of 1988. The rights will expire on Nov. 2, 2000.

If a person or group acquires 20 percent or more of Kennametal's voting shares or a 20 percent shareholder engages in certain transactions, each right will then entitle the holder other than the acquiror to purchase, at the exercise price, Kennametal Capital Stock or other property having a value of twice the exercise price of the right. In addition, if Kennametal is acquired in a merger or sells 50 percent or more of its assets or earning power, each right will then entitle its holder to purchase, again at the exercise price, common shares of the acquiring company having a value of twice the exercise price of the right.

Kennametal will be entitled to redeem the rights at $.01 per right at any time

until the 10th day following public announcement that a person or group has acquired a 20 percent position in the company.

PRINCETON, N.J. (OCT. 23) PR NEWSWIRE - Bristol-Myers Squibb Company (NYSE: BMY) today announced that the Food and Drug Administration's (FDA) endocrine and metabolic advisory committee has recommended pravastatin, the company's cholesterol-lowering drug, for approval in the United States. This recommendation was made at an FDA advisory committee Meeting held today in Bethesda, Md.

The committee also requested the company to conduct additional post- approval Phase IV studies focusing on special populations.

Pravastatin is the newest member of a class of lipid-lowering agents known as HMG-CoA reductase enzyme inhibitors, used to treat primary hypercholesterolemia after diet and lifestyle modifications have proved inadequate. Pravastatin lowers cholesterol levels in the blood by inhibiting the synthesis of cholesterol at the primary site of cholesterol synthesis, the liver.

The New Drug Application (NDA) for pravastatin was submitted to the FDA in January 1989.

Kenneth M. Given, senior vice president, worldwide medical and regulatory affairs, Bristol-Myers Squibb Pharmaceutical Research Institute, stated, "We are extremely pleased with the committee's decision to recommend pravastatin for approval. We are also very proud of the development work on this new product which led to the committee's decision."

Bristol-Myers Squibb is a diversified pharmaceutical company whose principal businesses are pharmaceuticals, nutritionals, consumer products and medical devices. The Bristol-Myers Squibb Pharmaceutical Group, a division of Bristol-Myers Squibb Company, is among the world's leading makers of cardiovascular, anti-cancer, anti-infective drug therapies and diagnostic agents.

#90296p8545 10/23/1990 ~PR Newswire

IRVINE, Calif. (OCT. 23) PR NEWSWIRE - Allergan Inc. (NYSE: AGN), announced today that sales for the three months ended Sept. 30, 1990 increased 8 percent to a record $222.2 million over the same period a year earlier. At constant currency rates, sales grew 4 percent during the third quarter. Allergan net earnings for the quarter were $25.4 million, or 14 percent less than the pro forma earnings of $29.4 million for the same period in 1989. Earnings per share for the third quarter were $0.37. Additionally, Allergan said that its board of directors declared a regular quarterly dividend of $0.07 per share, payable Dec. 7, 1990, to stockholders of record on Nov. 16, 1990. The company also announced that Howard E. (Ted) Greene Jr., chief executive officer of Amylin Corp. and founder and former chief executive officer of Hybritech Inc., was elected to its board of directors.

For the nine months ended Sept. 30, 1990, Allergan worldwide net sales

increased 7 percent to a level of $638.5 million. At constant currency rates, sales grew 5 percent during the nine month period. Net earnings for the first nine months were $56.1 million, or 14 percent less than the pro forma earnings for the same period in 1989. Earnings per share were $0.83 for the first nine months of 1990.

Allergan Inc., formerly a division of SmithKline Beckman Corporation, became a stand-alone public company on July 27, 1989, resulting in a new capital and administrative structure. For this reason, 1989 financial data should be adjusted from an "as reported" basis to a "pro forma" basis to compare meaningfully with 1990 results. See "Discussion of Pro Forma Results" below.

Commenting on the operating results for the third quarter, Gavin S. Herbert, chairman and chief executive officer said, "Adverse sales trends continue in our Optical business in the United States, but sales growth was strong in the Pharmaceutical, Surgical and Dermatology businesses. Overall profitability improved compared to the first two quarters of the year, with both gross profit margin and operating earnings ratios to sales showing favorable trends. The net earnings to sales ratio also improved as continuing debt reduction and the settlement of certain U.S. tax issues lowered interest expense. The company's positive cash flow has enabled us to reduce debt by $32 million or 14 percent from year-end levels, improving our debt to equity ratio to 40 percent from 53 percent at year end. In view of these trends, we have initiated a stock buyback program of up to 1.2 million shares." Noting Ted Greene's election to the board, Herbert said that Greene's experience in health care and technology management will enhance the company's research and development activities.

WASHINGTON (OCT. 23) PR NEWSWIRE - Harman International Industries, Incorporated (NYSE: HAR) today announced its results for the first fiscal quarter which ended Sept. 30, 1990.

Sales were $131.6 million, a 12 percent increase over sales in the comparable quarter last year. Earnings per share decreased from 40 cents to 11 cents.

Commenting on the results, Dr. Sidney Harman, chairman and chief executive officer said:

"As predicted, results for the first quarter were adversely affected by weak demand in the U.S. for automobiles and other consumer durable hard goods. This economic weakness which was evident in the last half of the last fiscal year has been exacerbated by the tension in the Middle East. As a consequence we anticipate a relatively soft second quarter.

"Despite the slow U.S. economy, our Loudspeaker Group contributed impressively during the first quarter. The strength of the JBL, Infinity and Pyle brand names was quite apparent in this difficult market environment.

Harman International Industries, Incorporated is a leading manufacturer and worldwide marketer of high-quality, high-fidelity audio and video products for consumer home and automotive, professional and original equipment manufacturer (OEM) markets.

AMARILLO, TEXAS (OCT. 23) PR NEWSWIRE - The board of directors of Southwestern Public Service Co. (NYSE: SPS) today elected company President Bill D. Helton to be additional post of chief executive officer.

The board elected Senior Vice President Coyt Webb to the additional post of chief operating officer, which had been held by Helton. The board elected Executive Vice President Doyle R. Bunch II to the additional post of chief financial officer. It is the first time the board has designated a chief financial officer by title.

The officer changes are transitions preparing for the planned retirement next year of SPS Chairman of the Board W.R. Esler. Esler had been chief executive officer as well.

Helton was president and chief operating officer since 1989. He began with SPS in 1964 as a distribution design engineer. He subsequently held positions in marketing and in financial services. He was elected financial vice president in 1983, vice president of corporate services in 1986 and executive vice president in 1987.

Helton is a registered professional engineer and a graduate of Texas Tech University with a bachelor's degree in electrical engineering. He is vice chairman of the Southwest Power Pool and a member of the board of directors of the North American Electric Reliability Council. He is a member of the boards of directors of the Amarillo and Texas chambers of commerce, and has held leadership positions in several civic and professional organizations.

Webb was senior vice president and controller since 1986. He also is president of Quixx Corp., a wholly owned subsidiary of SPS. He began with SPS in 1964 as an auditor. He later was supervisor of internal auditing and

then administrative assistant. He became SPS's director of accounting in 1979 and controller in 1980.

Southwestern Public Service Co. primarily provides electric service to a population of more than one million in a 52,000-square-mile are comprising eastern and southeastern New Mexico, the South Plains and Panhandle of Texas, the Oklahoma Panhandle and southwestern Kansas. Corporate headquarters is in Amarillo.

CLEVELAND (OCT. 23) PR NEWSWIRE - NACCO Industries, Inc. (NYSE: NC) today announced net income for the third quarter of $9.0 million, or $1.01 per share compared with net income of $13.8 million, or $1.55 per share, reported in the same period last year.

Net income for the first nine months was $31.6 million, or $3.56 per share, compared with net income of $35.0 million, or $3.95 per share, in the first nine months of last year.

In the quarter, NACCO's subsidiary, Hyster-Yale Materials Handling, reported revenues of $204.6 million, down from $257.0 million in the same period last year. Prior year revenues included $40.8 million from certain assets held for sale as well as Hyster-Yale's Brazilian operation which have been deconsolidated for 1990.

In addition, lower revenues reflect reduced shipments compared to a period last year when Hyster-Yale enjoyed record demand. Operating profit of $20.8 million for the quarter declined in conjunction with the lower revenues. On a positive note, debt prepayments of more than $100.0 million since the acquisition of Hyster caused a significant decrease in interest expense in the quarter. Mining operations remained stable during the quarter with North American Coal shipments totaling 5.4 million tons.

Proctor-Silex increased unit shipments during the quarter and nine-month periods and gained market share in certain core products. Although revenues have increased, margins have been reduced by weaker than expected market conditions.

Ward Smith, chairman and chief executive officer, said, "Earnings for the quarter were below last year's record pace because of a decline in shipments of lift trucks. As expected, we are feeling the effect of a downturn in the U.S. economy which has reduced demand for materials handling equipment and has adversely impacted market conditions in housewares."

NACCO Industries is a holding company that has three major operating subsidiaries. Hyster-Yale Materials Handling, Inc. designs, manufactures, and markets forklift trucks and related service parts under the Hyster and Yale trade names.

Hamilton Beach/Proctor-Silex, Inc. is a leading manufacturer of small electric appliances. The North American Coal Corporation mines and markets lignite coal for use primarily as fuel in power generation by electric utilities.

#90296p8556 10/23/1990 ~PR Newswire

NEW YORK (OCT. 23) PR NEWSWIRE - USLIFE Corporation (NYSE: USH) today reported third quarter and first nine months operating results.

Excluding capital gain transactions, third quarter 1990 earnings per share increased nine percent to $1.08, compared to 99 cents for the third quarter of 1989 before an extraordinary charge. First nine months 1990 earnings per share excluding capital gain transactions, amounted to $3.00 compared to $2.92 for the 1989 period before the extraordinary charge.

Third quarter 1990 net income per share includes capital gain transactions equivalent to approximately two cents per share, versus approximately 22 cents per share from such transactions in the corresponding 1989 period, producing a negative swing of 20 cents per share.

Net income per share for the first nine months of 1990 also includes capital gain transactions equivalent to approximately two cents per share, versus approximately 54 cents per share from such transactions in the first nine months of 1989, for a negative swing of 52 cents per share.

For the third quarter of 1990, net income (including capital gain transactions) amounted to $17.7 million versus $21.3 million income before the extraordinary charge for the third quarter of 1989, with earnings per share of $1.10 compared to $1.21 for the 1989 period. Net income for the third quarter of 1989, after a $6.5 million extraordinary charge, amounted to $14.7 million or 83 cents per share.

For the nine months ended September 30, 1990, net income (including capital gain transactions) amounted to $49.1 million versus $60.2 million before the extraordinary charge for the first nine months of 1989, with earnings per share of $3.02 compared to $3.46 for the 1989 period.

Net income for the first nine months of 1989, after the aforementioned $6.5 million extraordinary charge, amounted to $53.7 million or $3.08 per share. Total revenues were $914 million for the 1990 period versus $895 million for the first nine months of 1989.

The extraordinary charge in 1989 relates to a judgment upheld against a subsidiary of the company by the Eighth Circuit Court of Appeals in September 1989. The judgment stemmed from a class action lawsuit initiated in 1975 that related to an acquisition by a company that was subsequently acquired by USLIFE Corporation.

The board of directors declared a dividend on USLIFE common stock of 37 cents per share. This dividend is payable November 30, 1990, to shareholders of record on November 15, 1990.

#90296p8560 10/23/1990 ~PR Newswire

PEARL RIVER, N.Y. (OCT. 23) PR NEWSWIRE - Orange and Rockland Utilities, Inc. (NYSE: ORU) today reported that total electric and natural gas operating revenues for the third quarter of 1990 were $143.4 million, versus $127.7 million in the third quarter of 1989. For the nine months ended Sept. 30, 1990, total electric and natural gas operating revenues were $420.4 million, compared with $396.2 million for the same period in 1989.

Net income for the third quarter of 1990 was $17.3 million, or $1.25 per share compared with 1989 third quarter earnings of $15.0 million, or $1.09 per share, according to James F. Smith, chairman and chief executive officer. Net income for the nine months ended Sept. 30, 1990, was $34.2 million, or $2.41 per share, versus $32.8 million, or $2.34 per share, a year earlier. The third quarter increase primarily reflects higher electric sales resulting from a warmer summer than that experienced last year as well as increased average energy use per customer. Further, a reduction in depreciation expense, provided for in an Aug. 29, 1990, New York electric rate case settlement agreement, also contributed to the improved quarterly earnings.

Electric Revenues

Total sales of electric energy to retail customers during the third quarter of 1990 were 1,145,271 megawatt hours (Mwh), an increase of 4.1 percent over the comparable period a year ago. Electric revenues from retail customers during the quarter were $127.4 million, compared with $115.2 million for the quarter of 1989. This increase reflects higher sales as well as the higher recovery costs of purchased power and fuel used for electric generation, which do not have an impact on earnings.

Revenues from sales to other utilities in the third quarter of 1990 amounted

to $5.8 million, compared with $2.7 million a year ago. Sales to these utilities totaled 180,917 Mwh, compared with 93,341 Mwh in the third quarter of 1989. While the timing of these sales may affect interim results, as it did this quarter, revenues from these sales are primarily a recovery of costs in accordance with applicable tariff regulations, and consequently they have little impact on the company's annual earnings.

Gas Revenues
Gas sales to firm customers during the third quarter of 1990 totaled 1,557.0 million cubic feet (Mmcf), compared with 1,412.4 Mmcf during the same period a year ago. Third quarter gas revenues from firm customers were $9.7 million, compared with $8.9 million in the third quarter of 1989. This increase reflects slightly higher sales and higher purchased gas costs than those experienced a year ago. This quarter's gas sales have little impact on the annual results of operations, since only a small portion of the company's total gas sales are made outside of the winter heating season.

Orange and Rockland serves an area of 1,350 square miles and a population of more than 655,000 in southeastern New York State, northern New Jersey and northeastern Pennsylvania. It generates, distributes and sells electricity, and distributes and sells natural gas.

#90296p8564 10/23/1990 ~PR Newswire
REGO PARK, NY (OCT. 23) PR NEWSWIRE - Globus-Gateway and Cosmos have joined the National Parks and Conservation Association and will provide information and educational material on conservation on all itineraries that visit national parks.

Twelve of Cosmos's 28 tours of the United States and 20 of Globus-Gateway's 39 North America tours visit national parks. Tour members on all departures of these itineraries will receive an NPCA pamphlet describing the association's goals and projects.

Tour directors, in addition to their normal commentaries, will pass on information on the National Park System, the NPCA's causes and undertakings and the "do's and don'ts" of behavior within the parks.

A mail-in coupon within the NPCA pamphlet will feature a special offer of a year's membership for $15 - against the standard $25 - and a free National Parks map and guide booklet.

Membership also provides six issues a year of the organization's magazine, National Parks; a Rand McNally atlas; reduced rates for car rentals and photo processing; use of the National Parks Education center - for books, videos,

detailed maps, trail guides; and a camping guide.

Philip Gordon, director, planning and operations, at Globus-Gateway/Cosmos, said the company had been searching for an effective way to promote its interest in conservation for more than a year.

"The percentage of our itineraries that feature national parks is evidence enough of their importance to us, so our support for their preservation is enlightened self-interest, at the very least," Gordon said.

"One motorcoach with 40 people aboard emits far less in pollutant fumes than a dozen or so automobiles carrying the same number of visitors; we're quite consciously ahead in that respect, but we felt the need to further the cause directly."

On each brochure page where park visits are described or listed, the company is including text that presses home the conservation message: "Behold the unspoilt beauty of Montana's Glacier National Park...and celebrate the 75th anniversary this year of the founding of America's National Park System...We want to help preserve these natural areas and wildlife habitats to ensure that you have the opportunity to enjoy their beauty today - and tomorrow."

Globus-Gateway/Cosmos also plans to take part in specific projects of the National Parks and Conservation Association as they arise, Gordon said. Further information can be obtained from Globus-Gateway/Cosmos at 95-25 Queens Boulevard, Rego Park, N.Y. 11374 or 150 South Los Robles Avenue, Pasadena, Calif. 91101.

CONTACT: Ewen Gillies, (212) 724-7695, or Jan Myers, (212) 724-5232, both of Gillies & Zaiser, for Globus-Gateway/Cosmos.

FREMONT, NE (OCT. 23) PR NEWSWIRE - While millions of Americans lament that U.S. jobs are being lost overseas due to the high volume of foreign product imports, Shade Pasta, Inc. of Fremont is doing its part to reverse the trend. Shade Pasta is using imported Italian technology and equipment to produce its DeFINO No-Boil(R) lasagna 30 miles northwest of Omaha in America's heartland.

A predecessor to Shade, DeRosa Pasta Company, imported Italian lasagna for several years and developed a small but intensely loyal customer-base for the No-Boil lasagna. But DeRosa ran into financial difficulties and sold its assets, including newly developed and never-used Italian pasta manufacturing equipment and a license to use it to Shade.

Since Shade acquired the DeRosa company in early 1989, it has invested several million dollars more in additional equipment for its 29,000-square-foot

Fremont plant. The plant's current capacity is more than 30 million pounds of pasta per year.

The technology which eliminates the boiling step in preparing pasta dishes is the result of research started in the mid-1970s by Mapimpianti S.P.A. of Milan Italy. Mapimpianti worked for 15 years to develop a dry no-boil lasagna noodle. Its process is the first significant change in pasta manufacturing since its inception.

Traditionally, dry lasagna noodles had to be cooked before they could be used in lasagna. The dry noodles were boiled for ten to 15 minutes, drained, separated and layered in a pan with sauce, cheese and other ingredients before being baked another 45 minutes. Shade's new dry Pasta DeFINO No-Boil lasagna noodles are pre-cooked and absorb moisture from other ingredients while they heat in either a conventional or microwave oven.

Consumers and food-service institutions alike have indicated they prefer not to cook, separate and handle the hot, limp noodles and they enjoy the quality and taste of the resulting product.

Shade is a subsidiary of Norfoods, Inc. of New York. Norfoods has various food interests, including Cofinco, Inc., a coffee and cocoa bean trading company, and Finora Co., Inc., a trading company, both in New York.

It also has Drumheller Bag and Supply, Inc. in Valdosta, Ga., and Garnac Grain Co., a grain exporter in Overland Park, Kan., and Shade Foods, Inc., an ingredient supplier to the diary, baking and cereal industries in Belmont, Calif., and Kansas.

Sales of DeFINO No-Boil lasagna by Shade Pasta Inc. mark Norfood's first venture into the pre-cooked pasta industry.

SEOUL, KOREA (OCT. 23) PR NEWSWIRE - A McDonnell Douglas (NYSE: MD) MD-11 long-range aircraft today completed a record non- stop flight from Dallas to Seoul.

Flying against a strong headwind of up to 100 knots, it landed here at 6:45 p.m. local time after leaving Dallas yesterday and covering 7,266 miles (11,693 km) in 14 hours and 50 minutes. The flight was made as part of the MD-11's certification flight test program to demonstrate long-range flight under airline operating conditions.

McDonnell Douglas has applied to the U.S. National Aeronautic Association to register the flight with the F.A.I.(International Federation of Aeronautics) as an official point-to-point world speed record between Dallas and Seoul.

George G. Field, MD-11/DC-10 general manager of product definition, design and test, said, "The run confirms the MD-11's ability to fly the long routes for which it was designed. The adverse winds at this time of year also provide a realistic picture of airline-type flying in worst case conditions."

The MD-11 landed with enough reserve fuel remaining to meet regulatory agency and airline margins for flying to an alternate airport if necessary.

The big airliner carried 34 passengers and crew, including McDonnell Douglas engineers, mechanics and others, and FAA representatives "to very accurately measure the aircraft's fuel consumption and to evaluate cockpit crew workload during a long flight," Field said.

Three General Electric CF6-80C2 engines provided power, performing flawlessly throughout the flight, as did all the aircraft's advanced systems.

The 2,000-hour flight test program with five MD-11s began Jan. 10 of this year. Two aircraft were used for determining the MD-11's handling and operational characteristics and limits.

Two other MD-11s were used for development and certification of the advanced avionics and flight deck systems. The fifth aircraft, equipped with a passenger interior, was added for a final group of tests -- including today's flight -- to check systems function and reliability under airline operating conditions.

The MD-11 is built by McDonnell Douglas at its Douglas Aircraft Co. plant in Long Beach, Calif. Three models are available -- passenger, freighter and "combi," in which both passengers and cargo can be carried on the main deck. MD-11s may be ordered with seats for more than 400 passengers; a typical three-class arrangement has 293 seats. As of Oct. l, l990 orders and other commitments had been received from 32 customers for 375 aircraft.

#90296p8572 10/23/1990 ~PR Newswire

SALT LAKE CITY (OCT. 23) PR NEWSWIRE - Bonneville Pacific Corp. (NASDAQ: BPCO), today announced that it has consummated its previously announced agreement with Portland General Corp. (NYSE: PGN).

Pursuant to the agreement on Oct. 23, 1990 Portland General acquired 3,333,333 newly issued shares of Bonneville's common stock for $20,000,000, completed

the acquisition of outstanding warrants for 4,000,000 shares of Bonneville's common stock for $4,000,000 and received from Bonneville an option to acquire additional shares of Bonneville common stock.

As part of the terms of the agreement, directors Raymond L. Hixson, Robert N. Pratt, Stephen D. Nadauld and David M. Higbee have resigned from Bonneville's board of directors and have been replaced by Richard G. Reiten, Richard E. Dyer and CD Hobbs of Portland General.

In an effort to more closely align the accounting policies and procedures of Bonneville with those of Portland General, Bonneville also announced that it would change its fiscal year-end to Dec. 31 from April 30.

Bonneville has also elected to modify certain of its accounting policies relating to project development rights and the capitalization of costs for projects in the development process. The initial implementation of these modified policies will result in Bonneville writing off approximately $13.3 million of project related costs.

Bonneville also noted that it will establish a reserve of $3 million as a result of the declining value of certain assets at its food processing plant in California and will establish a $3.5 million reserve against its Kyocera electric generating facility. All of these adjustments, which are non-cash in nature, will be reflected in Bonneville's results for the second quarter which ends Oct. 31, 1990.

Bonneville's chairman of the board and president, Robert L. Wood, noted that, "with the completion of this agreement with Portland General, we are now well positioned to focus on the future and take advantage of the numerous opportunities available to us in today's market."

CONTACT: Gerry Monson of Bonneville Pacific, (801) 363-2520.

NEW YORK (OCT. 23) PR NEWSWIRE - Financial News Network Inc. (NASDAQ-NMS: FNNIE) and Infotechnology, Inc. (NASDAQ-NMS: ITCH), today announced that, contrary to a published report on the Dow Jones Professional Investor Report, no bid has been received from National Media Corporation for the 51 percent position in The Learning Channel collectively held by FNN and Infotech.

As previously announced, FNN, Infotech, and the American Community Service Network have agreed to explore strategic alternatives with regards to their combined 82.5 percent stake in The Learning Channel, Inc., including its possible sale.

Preliminary bids have been received from several other parties. The

speculation as to potential ultimate value of the bids in the published report is apparently based on press reports from a number of months ago, when the market values of media companies were significantly higher, and before bids were solicited or received. It does not represent the current opinion of FNN.

The bid amounts are confidential. Further discussions are continuing as to the amounts bid and as to substantial bid contingencies. There can be no assurances that such a transaction will occur.

The Learning Channel is a cable television programming service that provides 24 hours daily of adult educational programming to up to 18 million households.

Financial News Network provides three services to more than 35 million homes on 3,500 cable systems throughout the United States and Canada. The services are: FNN:Business (business news and personal financial management); FNN:Sports (sports information and news), and FNN:Data Broadcasting (stock quotes and market information).

FNN also operates a business radio service, and owns 49 percent of Shark Information Service Corporation (supplying investment professionals with quotes and market data).

#90296p8574 10/23/1990 ~PR Newswire

HARTFORD, CT and BOSTON (OCT. 23) PR NEWSWIRE - Shawmut National Corporation (NYSE: SNC) today reported net income of $11.9 million, or 15 cents per common share, for the quarter ended Sept. 30, 1990, compared with $66.4 million, or 90 cents per common share, in the third quarter of 1989.

Net income for the nine months ended Sept. 30, 1990 was $82.7 million, or $1.10 per common share, vs. $197.8 million, or $2.63 per common share, in the first nine months of 1989.

Earnings for the quarter were negatively affected by a higher level of nonperforming assets, which reduced the net interest margin, lower levels of interest earning assets, and a higher provision for possible loan losses. These factors were partially offset by securities gains of $8.5 million and a net gain of $7.8 million relating to the securitization and sale of certain assets.

The corporation's interest-earning assets averaged $23.1 billion in the third quarter of 1990 and $23.4 billion for the first nine months, compared with $24.9 billion and $24.7 billion, respectively, in the comparable year-ago periods. Total loans averaged $16.1 billion for the third quarter of 1990 and

$17.3 billion for the first nine months, vs. $19.0 billion in the third quarter of 1989 and $18.8 billion for the first nine months of the previous year.

The return on average assets was .18 percent for the quarter and .43 percent for the first nine months of 1990. Return on average common equity was 3.21 percent for the third quarter and 7.81 percent for the first nine months of this year.

Third quarter net interest income, on a fully taxable-equivalent basis, was $196.6 million, an 18 percent decrease from $240.3 million in the same period in 1989. Nine-month net interest income was $613.1 million in 1990, down 18 percent from $749.4 million in the year-ago period, due to a lower level of interest-earning assets combined with lower net interest margins. The corporation's net interest margin for the third quarter was 3.38 percent, vs. 3.57 percent for the second quarter of 1990 and 3.83 percent for the third quarter of 1989. The decline was due to the higher level of nonperforming assets and the lower level of noninterest-bearing deposits, combined with a higher percentage of money market assets, reflecting the corporation's liquidity initiatives.

Shawmut National Corporation is a superregional bank holding company with headquarters in Hartford, Conn., and Boston. The corporation has a branch network of nearly 400 offices in New England. Its principal subsidiaries are Connecticut National Bank in Hartford and Shawmut Bank in Boston.

Weighted Average Number of Common Shares Outstanding	106,977,972	106,843,427

Robert McClements Jr., Sun's chairman and chief executive officer, said that the current crisis in the Middle East has had a significant negative impact on Sun Company. The decrease in the company's third quarter income was attributable to significantly lower domestic refining and marketing earnings, as a result of the company's inability to fully recover its increased crude oil costs in the marketplace. He also noted that higher earnings at Suncor, Sun's 75-percent-owned Canadian vertically integrated petroleum subsidiary, were offset by lower results from coal and real estate operations.

Domestic refining and marketing earnings were $14 million in the third quarter of 1990 versus $73 million in the third quarter of 1989, a decrease of $59 million. Commenting on the quarter, McClements said, "This is clearly one of the most volatile quarters in the history of the refining and marketing business. The three months of the quarter were dramatically different, as we went from a strong summer performance to a period after the August 2 invasion of Kuwait when the cost of crude oil more than doubled. Prices for gasoline, our major product, were unable to keep pace with the significant and frequent increases in raw material costs. The wholesale margins for residual fuel, distillate, propane and asphalt were even more negatively impacted."

McClements also noted that despite the Middle East crisis, Sun has been able to acquire enough crude to satisfy the needs of its refineries.

Referring to the improved results at Suncor, McClements said, "Suncor's earnings increased $7 million, compared with the third quarter of 1989, primarily due to higher oil sands and refining and marketing earnings. The increase in oil sands earnings was attributable to a 35 percent increase in average synthetic crude oil prices to $25.00 per barrel, partially offset by lower synthetic crude oil production volumes, resulting from a 1990 second quarter planned maintenance shutdown which was completed in mid-July." McClements indicated that, unlike the domestic R&M business, Suncor's refined product margins improved, despite significantly higher crude acquisition costs due to the use of the first-in, first-out (FIFO) method of accounting for Canadian inventories.

Discussing the lower results in Sun's coal business, McClements said the decline was mainly due to higher per ton mining costs resulting from poor mining conditions in certain Eastern operations.

McClements noted that results at Sun's real estate operations declined $6 million, compared with the year-ago period primarily due to lower results from housing projects and rental properties.

For the first nine months of 1990, net income was $211 million, or $1.97 per share of common stock, compared with $271 million, or $2.54 per share for the similar period last year. The decline in earnings during the first nine months was primarily due to lower domestic refining and marketing and international exploration and production results and the absence of a $35 million after-tax gain on the partial divestment of an office building recognized by Sun's real estate development subsidiary in the 1989 second quarter. Partially offsetting these negative factors was a $30 million after-tax benefit recorded in the 1990 first quarter, resulting from the cumulative effect for prior years of a change in accounting principle related to refinery maintenance shutdowns.

Revenues were $3.35 billion in the third quarter of 1990 compared with $2.73 billion last year. Revenues for the nine months were $9.35 billion in 1990 compared with $8.30 billion in 1989.

In an earlier announcement, the company indicated that in August it had reinstituted its stock repurchase program. During the third quarter of 1990, the company purchased 280,300 shares for $9.2 million.

TWINSBURG, OHIO (OCT. 23) PR NEWSWIRE - Revco D.S., Inc., today announced that the U.S. Bankruptcy Court in Akron, Ohio has denied the company's motion for a further extension to Dec. 31, 1990, of the exclusive period within which only Revco can file a plan of reorganization. The company's present period of exclusivity expires Oct. 31, 1990.

The court also denied a motion by the official and unofficial creditor committees in Revco's Chapter 11 case to end immediately the company's exclusivity.

According to Revco Chairman and Chief Executive Officer Boake A. Sells, "Revco needs to get out of Chapter 11 and focus on running drugstores. Today, Judge White encouraged all parties concerned to negotiate a consensus plan before Oct. 31. The court has sent a clear message to everyone that it's time to take this step toward exiting Chapter 11."

Revco has been in Chapter 11 since July 28, 1988. Based in Twinsburg, Ohio, the privately held company operates over 1,100 drugstores in 10 states.

#90296p8580 10/23/1990 ~PR Newswire

CALGARY, ALBERTA (OCT. 23) PR NEWSWIRE - Shell Canada's (Toronto, Montreal, Vancouver, Alberta: SHC) consolidated earnings for the first nine months of 1990 were $166 million or $1.48 per Class ''A'' Common Share compared with earnings of $178 million or $1.59 per share for the first nine months of 1989.

Earnings of $108 million or 96 cents per Class ''A'' Common Share were recorded in the third quarter of 1990 compared with $1 million or one cent per share for the corresponding period in 1989.

Oil Products earnings increased to $69 million in the third quarter of 1990 from $10 million in the same period of 1989 due to higher sales volumes and firmer sales margins resulting from stable retail market conditions and improved refinery operations. Resources earnings were $33 million for the third quarter of 1990 compared with a loss of $7 million for the same period of 1989. The improvement was the result of higher sales prices for crude oil and natural gas liquids due to recent events in the Persian Gulf, higher sales volumes for all products, in particular natural gas and natural gas liquids, and lower exploration expenses. Chemicals earnings improved compared with 1989 by $6 million to $16 million, primarily due to higher styrene margins.

Resources performance is expected to remain strong for the rest of the year if current crude oil prices are sustained. In the Oil Products segment, fourth-quarter earnings performance will be dependent on the ability to flow through the higher cost of crude oil to the market.

Cash flow from operations for the first nine months was $491 million compared with $447 million for the same period in 1989. The increase resulted from improved earnings in Oil Products and Resources.

Capital and exploration expenditures for the first nine months of 1990 were $415 million compared with $537 million for the same period in 1989. Resources expenditures of $266 million were primarily for natural gas exploration and development activities in Western Canada. Resources spending in 1990 was lower than anticipated due to delays in the commencement of Caroline development. Oil Products spending of $94 million included $58 million for improvements to the retail network and $36 million for manufacturing projects.

The Corporation issued debt of $150 million at the beginning of October 1990 for general corporate purposes. Further funding may be needed before year-end for working capital requirements if crude oil prices remain at current levels.

WASHINGTON, (OCT. 23) PR NEWSWIRE - CACI International Inc. (NASDAQ: CACIA) today announced its revenue and earnings for the first quarter of fiscal 1991.

Dr. J.P. London, president and chief executive officer, reported that CACI revenue for the first quarter FY91 was $35,642,207, compared with FY90's revenue of $34,617,378, a 3 percent increase.

Net income for the first quarter FY91 was $677,329 vs. FY90 net income of $837,150. Earnings per share were $.06 compared to $.07 a year ago.

London commented, "Along with virtually all our business colleagues in the information systems and software products industry, we are seeing a soft buyer market with tighter margins and a 'wait-and-see' approach due to U.S. government budget uncertainty. CACI's response to the market is increased effective sales, marketing investments for the future, and appropriate cost restructuring."

CACI, in its 29th year, is an international high-technology and professional services corporation. CACI is a leader in advanced information systems, engineering, logistics, proprietary software and market analysis. CACI provides worldwide services in support of national defense agencies, civil government and commercial enterprises.

CACI offices are located in major cities in North America and Western Europe. Corporate headquarters are in the metropolitan Washington area.

BOWLING GREEN, OH (OCT. 23) PR NEWSWIRE - Candy Graham, president of Mid American National Bank and Trust Company, today announced the consummation of Mid American's purchase of the Findlay, Ohio, branch of Union Federal Savings Bank.

This office is now part of Mid American's commercial banking operation and will be known as the Findlay Banking Center. The new banking center, located at 127 East Main Cross, is now fully insured by the Federal Deposit Insurance

Corporation (FDIC). "The addition of a second banking center in Findlay will strengthen our presence in that city, which has been enjoying excellent growth in recent years," stated Graham. In addition to the new Findlay office, Mid Am's Tiffin Avenue office will change its name to become the Eastside Banking Center.

As a result this association, Mid American National Bank and Trust Company has three offices in Hancock County and 29 banking centers located in six counties throughout Northwest Ohio.

Mid-Am, Inc. (NASDAQ: MIAM), through its affiliates -- Mid American National Bank and Trust Company, Bowling Green; First National Bank Northwest Ohio, Bryan; The Farmers Banking Company, N.A., Lakeview; The Citizens Loan and Building Company, Lima; and Home Saving and Loan Association, F.A., Defiance -- has 53 banking centers operating in 12 counties in northwest and west central Ohio.

#90296p8587 10/23/1990 ~PR Newswire

DUBLIN, OH (OCT. 23) PR NEWSWIRE - Pickett Suite Hotel Master L.P. I today released the following:

The General Partner has advised the Partnership that it does not expect to have sufficient funds to meet its obligations under the Performance and Breakeven Guaranty unless its partners provide additional funds to the General Partner. Although the General Partner has requested such funds from its partners, they have not yet committed to provide such additional funds to the General Partner, but negotiations are continuing in an effort to determine the circumstances, if any, under which the partners may be willing to provide such funds. The Partnership will not have sufficient cash to pay the November 14, 1990 distribution without funds provided by the General Partner pursuant to the Performance and Breakeven Guaranty and future cash distributions may therefore be limited to the cash generated by the Partnership's three properties.

Pickett Suite Hotel Master L.P. I announced that it had formally changed its name to "PSH Master L.P. I", effective October 11, 1990. Management stated that the elimination of the "Pickett" designation from the partnership's name was necessary to complete the transition of its hotels to the Guest Quarters Suite Hotel brand.

The cash loss from operations (net loss before depreciation and amortization expense) was $332,428, or $.107 per unit, during the third quarter of 1990 compared to a cash loss of $69,182, or $.022 per unit, in the third quarter of

1989. Year-to-date, the partnership's cash flow from operations was $343,797, or $.11 per unit, compared to $324,092, or or $.10 per unit, during the same period last year.

Combined occupancy during the third quarter was 67.5 percent down from 71.2 percent in the third quarter of 1989. Soft demand in the Florida markets during the quarter, resulting from a slower domestic economy and events in the Persian Gulf, offset continued improvement in volume at the Raleigh/Durham hotel. Operating revenues of the Partnership were $4,463,933 for the third quarter, resulting in a net loss of $1,138,988. Year-to-date operating revenues were $15,278,378 and the net loss was $2,085,271. Comparative results for 1989 were third quarter revenues of $4,620,231 and a net loss of $883,897 and year-to-date revenues of $14,431,428 and a net loss of $2,131,060.

The Partnership continues to investigate the sale of the Disney hotel, but due to present worldwide capital shortages and a weakening economy, the disposition of the Disney hotel at an attractive price appears unlikely during 1990.

The Partnership issued $31.1 million of units of limited partnership interest in July 1987 to finance the $69 million acquisition of three hotels located in Walt Disney World(R), Tampa and the Research Triangle near Raleigh/Durham, N.C. Originally managed as Pickett Suite Hotels, the properties began operations as Guest Quarters Suite Hotels in December 1989.

#90296p8592 10/23/1990 ~PR Newswire

NEW YORK, (OCT. 23) PR NEWSWIRE - Thomas G. Plaskett, chairman and chief executive officer of Pan American World Airways, announced today that Pan Am has signed a broad-scale cooperation agreement with United Airlines to strengthen each airline's competitive global position.

Under the alliance, United will acquire for $400 million Pan Am's U.S.-London route authorities (except Miami and Detroit); certain other Atlantic authorities from points other than New York; leasehold rights and assets in San Francisco and Washington-Dulles; two Boeing 747-200s and two spare engines and spare parts.

The two airlines anticipate working closely together in the future in order to take advantage of mutually beneficial long-term opportunities in schedule coordination, facilities sharing and joint marketing programs and joint tour programs.

Pan Am and United have also agreed to reciprocal participation in each other's frequent flyer programs -- Pan Am's WorldPass and United's Mileage Plus

programs. The combination of these two popular programs will create one of the most extensive air networks in the world for mileage accumulation and awards.

"This alliance is consistent with our 'rightsizing' strategy and provides us with the financial resources to pursue our strategic objectives," Plaskett said.

Plaskett continued, "Customers of both Pan Am and United will benefit greatly from the linkage of the two airline route systems into what we believe will be one of the largest and most significant alliances of its type in the airline industry."

Drawing on the complementary strengths of their route systems, the cooperative effort will be able to take advantage of growth opportunities in a dynamic European market and rapidly developing Latin American marketplace. As a first step, the airlines will coordinate their schedules at Miami, as well as to Central and South America from the West Coast of the United States.

Plaskett said Pan Am will now concentrate on one major European hub, Frankfurt. He noted that Pan Am will strengthen this key market by introducing new 747 nonstop service between Los Angeles/San Francisco and Frankfurt in 1991. In addition, he said Pan Am will increase its existing Miami-Frankfurt 747 services in 1991.

As part of the strategy of expanding Continental European operations with twin-engine A310/300 aircraft, Pan Am plans to inaugurate several new nonstop services next year, including New York-Amsterdam, New York- Hamburg, New York-Oslo, New York-Stuttgart/Nuremberg and New York- Zagreb, Plaskett noted.

Pan Am said that, after United's acquisition of its London authorities, Pan Am will serve 33 European destinations, including 27 nonstop markets from the United States.

Pan Am will also continue to increase its Miami presence by adding new long-haul flights from Miami to South America, he added. Furthermore, the airline plans to add new domestic flights to Miami, including Detroit and Cleveland.

The agreement is subject to various final approvals by appropriate U.S. government and foreign government authorities. The alliance is anticipated to be fully in effect by early 1991.

#90296p8595 10/23/1990 ~PR Newswire

WASHINGTON (OCT. 23) PR NEWSWIRE - A federal appeals court has rejected an attempt by Great Western Bank, a FSB, to switch its deposit insurance coverage from the thrift fund to the bank fund.

In upholding a lower court decision, the Ninth U.S. Circuit Court of Appeals in San Francisco ruled that a merger designed to effect the insurance transfer was not grandfathered under a previous law, and that regulators were not "arbitrary or capricious" in denying the merger in 1989.

The appeals court ruled Oct. 18 that federal law must be construed so as to "prevent the exodus of healthy thrifts from the insurance fund."

Great Western, the nation's second-largest thrift, filed a merger application in October 1988 with the Federal Home Loan Bank Board, predecessor agency to the Office of Thrift Supervision (OTS).

At the time, Great Western was insured by the Federal Savings and Loan Insurance Corporation (FSLIC). The institution proposed to convert to the Federal Deposit Insurance Corporation (FDIC) by merging with a smaller affiliated institution, Great Western Savings Bank, Bellevue, Wash., which was FDIC-insured.

Great Western claimed that under the Competitive Equality Banking Act of 1987 (CEBA), it was exempt, or "grandfathered," from a temporary prohibition against leaving FSLIC because it took certain steps by the March 31, 1987, deadline to exit FSLIC.

Great Western claimed it satisfied this requirement by entering into a memorandum of understanding on March 30, 1987, to merge with another FDIC-insured affiliate, Great Western Thrift and Loan, Salt Lake City.

The Bank Board denied the application on the grounds that, under CEBA, Great Western could not merge with the Washington thrift for the purpose of leaving FSLIC based on a memorandum of understanding with another institution.

Great Western subsequently sued the Bank Board in U.S. District Court in Los Angeles, and, in June 1989, Judge Harry Hupp ruled in the Bank Board's favor.

In upholding Judge Hupp's decision, the appeals court ruled that, although Great Western entered into a letter of intent with the Utah thrift by CEBA's statutory deadline, "the moratorium exemption transaction contemplated in the memorandum of understanding must be the same transaction through which the institution departs from the FSLIC insurance system."

The three-judge panel rejected Great Western's argument that it was in technical compliance with the CEBA exemptions, ruling that the grandfathering provisions must be "narrowly construed so as not to frustrate the purpose of the moratorium -- to prevent the exodus of healthy thrifts from the insurance

fund."

Under the Financial Institutions Reform, Recovery and Enforcement Act of 1989, FSLIC was dissolved and replaced by the Savings Association Insurance Fund (SAIF). Both SAIF and the Bank Insurance Fund (BIF) are now administered by the FDIC.

#90296p8601 10/23/1990 ~PR Newswire

TORONTO, (OCT. 23) PR NEWSWIRE - Denison Mines Limited today announced that earnings for the third quarter of 1990 rose to $7,515,000 or $0.04 per participating share, compared with a loss of $4,019,000, or $0.15 per participating share, a year earlier. The per share results are calculated after provision for preferred share dividends. Revenue rose to $98,297,000 from $80,115,000.

Helen Roman-Barber, Denison's Chairman and Chief Executive Officer, attributed the significantly improved results ''to higher oil prices and better overall performance in the mining division.''

For the first nine months of 1990, Denison recorded a loss of $94,340,000 or $1.69 per participating share, compared with earnings of $5,325,000, or a loss of $0.25 per participating share, a year earlier. The 1990 results include an $80,000,000 second-quarter write-down in oil and gas. Revenue was $268,899,000 down from $274,545,000.

Mrs. Roman-Barber said that ''the higher oil prices that resulted from the uncertain political and military situation in the Persian Gulf area have contributed to a dramatic improvement in the performance of Denison's oil and gas division.''

The average price received by Denison rose to $21.93 per barrel of oil in the third quarter of 1990 from $12.24 per barrel during the second quarter of the year and $14.87 per barrel during the third quarter of 1989. In addition, Denison's oil production rose in the third quarter with the completion of maintenance workovers on key wells offshore Greece.

Mrs. Roman-Barber said that the previously announced production and workforce reductions at the Elliot Lake uranium operations ''were successfully implemented on August 1, 1990,'' with production now normalized at an annual rate of 2.6 million pounds of uranium oxide, which is being sold on the basis of long-term contracts.

Denison and its joint-venture partners are evaluating feasibility studies of the Midwest uranium project in northern Saskatchewan, ''with the expectation

that a production decision will be made by year end,'' she said.

Mrs. Roman-Barber said that ''Denison concurs with independent market analysts who predict that uranium prices will rise significantly by the mid-1990s, as consumption by the world's nuclear generating stations continues to exceed production.''

She said that ''the third quarter also saw continued improvement at Denison's potash operations in New Brunswick, as prices remained stabilized, operating performance improved and the mine's new hydraulic backfill system has proven to be a success.''

#90296p8602 10/23/1990 ~PR Newswire

BRISTOL, TENN. (OCT. 23) PR NEWSWIRE - The Communications Workers of America (CWA) today denounced what it called United Inter-Mountain Telephone's attempt to "strong-arm" workers into accepting health care cutbacks, and circumvent the bargaining process.

CWA said the company sent a letter directly to workers threatening to cut off all health care benefits by Nov. 1, if workers did not agree to the company's cutbacks proposal.

"We are appalled by the coercive tactics that United Telephone has resorted to in these negotiations," said CWA Vice President Gene Russo. "United is refusing to bargain in good faith. CWA has repeatedly requested information which is essential to evaluate the company's proposal on health care, and consistent with the union's duty to represent its workers. This is information to which the union is legally entitled, but which they have refused to produce. They have stalled and delayed, and now are using fear and intimidation and making a mockery of collective bargaining process."

"What's at stake here is whether corporate headquarters in Kansas City can dictate to the people of east Tennessee and southwest Virginia how we meet our families' health care needs," said Darrell Freeman, president of CWA Local 3871. "Ratepayers and United's workers should not be held hostage to plans dictated by Kansas City carpetbaggers.

"Believe me," Freeman continued, "if a profitable company like United carries out its implied threat and locks us out of our jobs because we refuse to be intimidated and take drastic cuts in health benefits, CWA members are not the only ones who will suffer. Our entire community will feel this blow, first in disruptions in telephone service, and second, in the loss of income for 670 families and the local businesses they patronize."

CWA is filing charges of unfair labor practices with the National Labor Relations Board (NLRB) because of what the union called United's illegal changes in the terms and conditions of work, and withholding relevant and necessary information critical to the bargaining process.

The union contract at United Telephone expired on Aug. 23; workers have stayed on, working under the terms of the previous contract, while negotiations have continued.

CWA represents more than 670 workers at United Inter-Mountain Telephone, and several thousand workers at other United Telephone companies.

#90296p8606 10/23/1990 ~PR Newswire

MIAMI, (OCT. 23) PR NEWSWIRE - Atico Financial Corporation (NASDAQ-NMS: ATFC) today reported net income of $1.0 million, or $.18 per common share, for the three months ended Sept. 30, 1990, and net income of $3.1 million, or $.54 per common share, for the first nine months of this year. This represents the fourth consecutive quarter the company has reported net income in excess of $1.0 million. Chairman William H. Allen Jr. said the favorable 1990 earnings reflect the continued improvement in the company's non-earning asset levels and continued reduction in operating expenses. Non-performing assets have been reduced by almost 30 percent over the past 12 months.

The net loss of $37.4 million, or $6.65 per common share, in the 1989 third quarter and $37.1 million, or $6.60 per common share, for the nine months ended Sept. 30, 1989, were negatively impacted by restructuring charges primarily relating to the elimination of the goodwill from the books of the company's subsidiaries.

On July 5, 1990, the company completed the merger of its savings bank subsidiary into its commercial bank subsidiary, Intercontinental Bank. Allen stated that the merger terminates the company's involvement in the thrift industry and will permit the company to focus its growth in the commercial banking business.

Atico Financial Corporation, through its subsidiaries, operates 14 banking offices in Florida, with total assets of $618 million.

#90296p8620 10/23/1990 ~PR Newswire

NEW YORK (OCT. 23) PR NEWSWIRE - Amerada Hess Corporation (NYSE: AHC) reported net income for the third quarter of 1990 of $280,000,000 ($3.46 per share) compared with net income of $51,800,000 ($.64 per share) for the third quarter of 1989. Third quarter 1990 earnings include net gains of $213,800,000 ($2.64 per share) from petroleum futures trading activities.

Refining and marketing operations (including petroleum futures trading) had earnings of $279,500,000 in the third quarter of 1990 compared with earnings of $33,300,000 in the third quarter of 1989.

Third quarter 1989 refining and marketing earnings include a charge of $30,000,000 for expenses necessary to sustain refining and marketing operations as a result of Hurricane Hugo. Exploration and production earnings were $21,700,000 in the third quarter of 1990 compared with earnings of $37,100,000 in the third quarter of 1989.

The corporation utilized its remaining United States net operating loss carryforward in the third quarter of 1990. Consolidated income taxes amounted to $89,000,000 in the third quarter of 1990 compared with $12,100,000 in the third quarter of 1989.

Net income for the nine months ended Sept. 30, 1990 amounted to $247,500,000 ($3.06 per share) compared with net income of $404,500,000 ($4.99 per share) for the nine months ended Sept. 30, 1989.

Refining and marketing operations (including petroleum futures trading) had earnings of $259,700,000 for the nine months ended Sept. 30, 1990 compared with earnings of $367,300,000 in the corresponding period of 1989.

Earnings from exploration and production activities amounted to $83,100,000 for the nine months ended Sept. 30, 1990 compared with earnings of $94,100,000 for the first nine months of 1989.

Corporate charges (including increased interest expense), net of earnings from other operating activities, amounted to $95,300,000 in the first nine months of 1990 compared with $55,900,000 for the nine months ended Sept. 30, 1989.

Consolidated revenues amounted to $1,750,700,000 for the third quarter of 1990 compared with $1,183,100,000 in the third quarter of 1989. Consolidated

revenues for the first nine months of 1990 totaled $4,645,200,000 compared to $4,141,900,000 in the corresponding period of 1989.

Capital expenditures were $405,300,000 for the third quarter of 1990 compared to $1,348,700,000 for the third quarter of 1989. Capital expenditures in the third quarter of 1990 include $216,300,000 for the previously announced acquisition of oil and gas properties in Canada.

Third quarter 1989 capital expenditures include $1,132,800,000 for the acquisition of oil and gas properties in the Gulf of Mexico and the United Kingdom, North Sea.

Capital expenditures in the first nine months of 1990 amounted to $802,600,000 of which $684,900,000 related to exploration and production activities. Capital expenditures in the first nine months if 1989 amounted to $1,669,400,000 including $1,587,500,000 for exploration and production.

#90296p8621 10/23/1990 ~PR Newswire

VIENNA, VA (OCT. 23) PR NEWSWIRE - Perpetual Financial Corporation (NASDAQ-NMS: PFCP) announced today a major restructuring which will result in expense savings to exceed $20 million during the next 12 months.

John Morton III, Perpetual's chief executive officer, said: "Our action is consistent with sound management practices and is designed to improve operating performance. Perpetual, like many other fine corporations in the Middle Atlantic states, is experiencing the negative effects of the substantial downturn in their real estate markets and the overall economy."

Much of the savings will come from the acceleration of Perpetual's previously announced withdrawal from activities which require the commitment of high levels of capital, such as corporate and real estate construction lending as well as a general realignment of the management structure.

Morton further stated, "These initiatives are supportive of our objective to be a profitable consumer-oriented financial institution which emphasizes retail banking services and residential mortgage lending."

As part of this reduction, more than 145 positions will be eliminated tomorrow affecting more than 110 employees. This represents approximately 10 percent of the current workforce. Each affected employee will receive a severance package consisting of salary and benefit continuation and professional outplacement assistance. In addition, the company has announced a freeze in senior officer salaries and reduction of perquisites.

Morton further announced that Perpetual's board of directors has decided to discontinue dividend payments on the company's 8-1/2 percent Cumulative Convertible Preferred Stock, Series A (NASDAQ-NMS: PFCPP) until such time as the board decides that Perpetual's profitability and other considerations warrant a resumption of payments. Morton stated that the board will review and evaluate the preferred dividend situation on a quarterly basis at its regularly scheduled board meetings, but it is anticipated that preferred dividends will not be paid in the foreseeable future. This action will not affect the dividend declared and payable Oct. 31, 1990.

The actions announced today should have no negative impact on Perpetual's current high level of customer service or the safety of its deposits which are insured by the FDIC.

Perpetual Financial Corporation, with assets of $5.2 billion, is the holding company for Perpetual Savings Bank, F.S.B., the largest thrift institution in Virginia, Maryland and Washington.

#90296p8623 10/23/1990 ~PR Newswire

NORTHFIELD, IL. (OCT. 23) PR NEWSWIRE - Stepan Company (AMEX: SCL) today reported improved third quarter earnings and record sales.

Net earnings for the third quarter of 1990 increased 56 percent to $3,556,000, up from $2,282,000, reported for the same quarter of 1989. Earnings per share rose to 65 cents, up from 41 cents. Net sales for the quarter increased 18 percent to $101,672,000, from $85,824,000 for the comparable quarter of 989.

Net earnings for the nine month period of 1990 rose 94 percent to $11,558,000, or $2.10 per share, compared to $5,972,000, or $1.08 per share reported in the previous year. Net sales for the nine month period increased 13 percent to $293,710,000, up from $260,432,000 recorded in 1989.

"The company's core surfactant business posted another solid performance in the third quarter," said F. Quinn Stepan, chairman and president. "Over 60 percent of the improved earnings were attributable to a 16 percent increase in surfactant sales volumes." Both domestic and foreign operations contributed substantially to the improvements. The foreign portion includes the two 1989 Canadian acquisitions, and a change in the accounting method adopted in 1990 for Stepan Mexico, following acquisition of controlling interest. Phthalic anhydride based polyols achieved a record quarter for both sales and earnings. Phthalic anhydride (PA) recorded a slight gain but did not contribute significantly to the improved earnings.

Operating expenses increased 29 percent in the third quarter of 1990. Approximately one-third of the increase is due to foreign operations, most of which is related to the Canadian acquisitions and the change in accounting method for Stepan Mexico. Environmental related expenses also contributed to the increase.

Interest expense declined 15 percent for the third quarter primarily due to high capitalized interest.

For the nine-month period, surfactants and polymers accounted for the greater part of the improved earnings due to increased volumes. Specialty chemicals accounted for the remainder of the improvement.

"With the uncertainty of the economy and highly volatile raw material prices, it is difficult to make a prediction for the fourth quarter," said Stepan. "Under these circumstances, we expect fourth quarter earnings will be less than third quarter earnings."

Stepan Company, headquartered in Northfield, Ill., is a leading producer of basic and intermediate chemicals used in household, industrial, personal care, agricultural and energy-related products. The stock is traded on the American and Midwest Stock Exchanges under the symbol SCL.

#90296p8626 10/23/1990 ~PR Newswire

DALLAS (OCT. 23) PR NEWSWIRE - ENSERCH Corp. (NYSE: ENS) reports that it had a net loss of $3.3 million for the third quarter of 1990, compared with net income of $6.8 million for the third quarter of 1989. After provision for preferred dividends, the loss applicable to common stock in the third quarter of 1990 was $6.9 million, or (11 cents) per share, compared with earnings applicable to common stock of $3.4 million, or 6 cents per share, for the year-ago period. Third-quarter results were reduced some $11 million (after tax) by the establishment of a $16 million reserve in anticipation of the settlement of a class-action lawsuit brought by royalty owners in the Tri-Cities field in Henderson County, Texas. Also reported in the third quarter was income of $9.6 million related to the settlement with the Internal Revenue Service of prior-year tax issues. The 1989 third quarter was enhanced by a $5.4 million ($3.6 million after tax) reduction of franchise taxes paid in prior years, about half of which was included in the natural gas transmission and distribution segment. Operating income for the 1990 third quarter was $12 million vs. $35 million for the like period a year earlier. However, adjusting both quarters for the effects of the lawsuit settlement and franchise tax, operating results were about the same. Third-quarter revenues were $642 million, up two percent from the year-earlier period.

For the first nine months of 1990, ENSERCH's net income was $56 million, compared with $47 million for the same period in 1989. Earnings applicable to common stock for the nine-month period in 1990 were $46 million, or $.71 per share, vs. $36 million, or 62 cents per share, for the first nine months of 1989. Nine-month results included a $22 million, 34-cent-per-share after-tax gain on the sale of the corporation's 4.2 million-share interest in Oceaneering International Inc., a $9.4 million, 14-cent-per-share gain on the sale of Pool Co. and a favorable income impact of $22 million from settlements with the IRS of prior-year tax issues and related interest income. Unusually warm winter weather in the first quarter negatively affected results. In addition to the franchise-tax reduction in the third quarter of 1989, also favorably affecting 1989 nine-month results were $7 million (pretax) in contingency and guarantee fees received on a cogeneration facility constructed near Sweetwater, Texas. Nine-month operating income was $101 million, compared with $145 million for the 1989 period. Revenues of $2 billion were up nearly four percent from the first nine months of 1989.

ENSERCH Corp. is a diversified energy, engineering and construction company.

#90296p8627 10/23/1990 ~PR Newswire

DALLAS (OCT. 23) PR NEWSWIRE - Enserch Exploration Partners Ltd. (NYSE: EP) today announced that the third quarter 1990 net loss was $7.8 million or 8 cents per unit, compared with net income of $7.5 million or 7 cents per unit for the like period a year earlier. Third quarter results were reduced some $16 million, the result of the establishment of a reserve in anticipation of the settlement of a class-action lawsuit brought by royalty owners in the Tri-Cities field in Henderson County, Texas.

Net cash flows from operating activities for the third quarter 1990 were $25.6 million, compared with $31.5 million in the year-earlier period. In the third quarter 1990, $16.4 million ($16 million relates to accrual of the above mentioned settlement) was provided from working capital, compared with $7.2 in million the third quarter 1989.

The operating loss for the third quarter 1990 was $4.9 million, compared with operating income of $9.5 million in the third quarter 1989. Third-quarter 1990 revenues were $47 million, compared with $45 million a year earlier.

For the first nine months of 1990, EP's net income was $8.6 million versus $32 million for the year-ago period. Net income per unit was 8 cents versus 31 cents for the same period in 1989. Nine-month operating income was $16 million, compared with $37 million for the nine-month period last year. Nine-month revenues were $143 million versus $144 million a year ago.

Natural-gas sales volumes (net) for the third quarter 1990 were 18.4 billion cubic feet (Bcf), compared with a similar amount reported in last year's third quarter. The average sales price was $1.65 per thousand cubic feet (Mcf), down from $1.73 per Mcf a year ago.

Oil sales volumes (net) were 655 thousand barrels (MBbls) for the quarter, down from 759 MBbls in the third quarter 1989. The average sales price per barrel increased to $23.97 from $16.41 per barrel a year ago.

Enserch Exploration Partners Ltd., a Texas limited partnership, conducts substantially all of the domestic oil and gas operations of ENSERCH Corporation (NYSE: ENS).

TORONTO (OCT. 23) PR NEWSWIRE - Genstar Capital Corporation and Wolverine Holding Company today announced that the two companies have executed a definitive merger agreement for the acquisition of Wolverine by Genstar Capital.

Wolverine Holding, through its Wolverine Tube subsidiaries in the United States and Canada, is a leading manufacturer of copper, copper alloy and aluminum tube and copper rod, bar and strip. The company operates eight plants in North America and has annual sales in excess of U.S.$500 million.

Wolverine will become a subsidiary of Genstar Capital, a Toronto- based acquisition company dedicated to creating value for its investors by employing both operational and financial leverage in managing acquisitions. "We are confident that the combination of Wolverine's exceptional management team and Genstar Capital's operational experience will enhance the company's market leadership," said Genstar Capital's Jack West.

"Wolverine's state-of-the-art manufacturing operations and top flight work force will allow the company to capitalize on growth opportunities."

John Quarles, president and chief executive officer of Wolverine said: "We are enthusiastic about the proposed merger as Genstar Capital will provide capital and expertise to facilitate our growth and develop the next generation of products. The recently announced executive assignments covering marketing and manufacturing responsibilities at our eight plant locations will enhance our competitive position on a global basis." Wolverine management will be significant equity investors in the company.

Closing of the transaction is expected to occur in late November and is subject to certain conditions.

HOUSTON (OCT. 23) PR NEWSWIRE - Galveston-Houston Co. (NYSE: GHX) today reported net income for the first nine months of 1990 of $6,110,000, or 34 cents per share, compared with $2,163,000, or 18 cents per share, reported for the same period in 1989. Nine month 1990 revenues were $57,872,000 compared to $46,702,000 for the same 1989 period, an increase of 24 percent.

For the three months ended Sept. 30, 1990, net income applicable to common stock was $2,045,000, or 11 cents per share, compared to $1,053,000, or 9 cents per share, reported for the similar three month period in 1989. Revenues were $19,403,000 and $16,425,000 for the third quarter of 1990 and 1989, respectively. New orders for the first nine months exceeded those of the similar 1989 period by 21.8 percent. At Sept. 30, 1990, the company's backlog was 49.7 percent higher than on the same date one year ago. On Oct. 5, 1990, the company announced that it had completed its acquisition of Erichsen Industries Ltd., a valve actuator manufacturer located in Edmonton, Alberta, Canada.

Galveston-Houston Co. manufactures valve actuators and custom steel castings for the energy and other industrial markets and replacement wear parts and excavation buckets for the construction, mining and other earthmoving industries. Galveston-Houston Co. common stock is traded on the New York Stock Exchange under the symbol GHX.

OKLAHOMA CITY (OCT. 23) PR NEWSWIRE - Red Eagle Resources Corp. (NASDAQ: REDX) today announced that it had entered into an agreement with Boswell Energy Corp. of Oklahoma City to purchase an undivided 50 percent interest in approximately 23,000 acres of Boswell leases located on the periphery of the Silo field in Laramie County in southeastern Wyoming. On Oct. 19, 1990, Union Pacific Resources Co. of Fort Worth completed a horizontal well near Boswell leases which flowed 1,462 barrels of oil during a 21 hour test. According to Chuck Farmer, staff petroleum engineer at the Wyoming Oil and Gas Conservation Commission, the Union Pacific well is the first significant horizontal well drilled in Wyoming.

Red Eagle, which expects to be named operator of the block by Boswell and its partners, will spud the first well in early 1991. The proposed well will probably be located approximately two miles north of the Union Pacific well and approximately one mile southeast of a horizontal well currently being completed by Snyder Oil Co. The target formation in the Silo area is the Niobrara, a fractured shaley limestone of the upper cretaceous, comparable in geologic age to that of the Austin chalk in south Texas where horizontal drilling activities remain at a high level.

NEW YORK (OCT. 23) PR NEWSWIRE - Alfred Dunhill of London, Inc. announced today a reorganization of its benchmade tailoring department as part of a series of new changes in the overall Dunhill America structure.

While several of Dunhill's tailors will remain in service, the production workroom closed today. A core group of craftsmen will continue to produce quality suits in the traditional Dunhill construction and tailoring methods for its benchmade customers.

According to Alan P. Duddle, president and chief executive officer of Alfred Dunhill Inc., "We are continuing our benchmade department while expanding our made-to-measure and ready-to-wear clothing. The emphasis is to provide our Dunhill customers with the highest quality service and merchandise."

Today's change is part of the restructuring Alfred Dunhill of London is

experiencing. Other changes include new U.S. and Canadian locations and enlarging and renovating its stores. There are 17 Dunhill store locations in the United States and Canada.

CLEVELAND (OCT. 23) PR NEWSWIRE - Mayor Michael R. White welcomed news of Laidlaw Environmental Services' decision to close its hazardous waste plant on Bessemer Avenue. White said the plant, formely known as GSX, had proven to be "environmentally unstable" and a public nuisance that had "endangered the health, life and safety of the public.

"Residents near the plant and throughout the city can feel more secure now that Laidlaw has decided not to reopen its plant here," said White. "I think Laidlaw's decision is recognition that the problems with the plant were much more serious than they were willing to admit."

White said the city would work with Laidlaw to assist those employees unable or unwilling to relocate to other Laidlaw sites throughout the United States and Canada.

In August, in response to continuing accidents at the plant, White and the City's Law Department took legal steps to close the facility. The plant had been cited for numerous violations of hazardous waste law and safety requirements by the Ohio EPA and the Ohio Attorney General's Office.

#90296p8650 10/23/1990 ~PR Newswire

CALGARY, ALBERTA (OCT. 23) PR NEWSWIRE - TransCanada Pipelines today reported net income applicable to common shares for the third quarter of 1990 was $47.0 million or 30 cents per share, compared to $56.7 million or 38 cents per share a year ago.

The decrease reflects the recording of lower income tax benefits arising from the use of prior years' income tax losses. In the third quarter of 1989, the company commenced recognizing these benefits and the amount recorded in that quarter was $14.6 million or ten cents per share. The benefits relating to the current quarter amount to $5.3 million or three cents per share. On a year-to-date basis, 1990 earnings include a benefit of $21.1 million or 14 cents per share resulting from the utilization of prior years' losses.

Net income applicable to common shares from continuing operations for the first nine months of 1990 was $141.3 million or 92 cents per share, compared to $131.0 million or 87 cents per share during the same period in 1989. After discontinued operations, earnings during the first nine months of 1989 were $117.6 million or 78 cents per share.

In the first two quarters of 1990, the improvement in earnings reflected a combination of lower non-utility financial charges, lower preferred share dividends, higher interest income and a higher rate base, in addition to the tax benefits noted above. These improvements were somewhat reduced by higher income taxes applicable to current year operations.

Overall, those items continue to be the main contributors to the company's earnings this year. The third quarter, however, saw reductions in Allowance For Funds Used During Construction (AFUDC) and interest income, when compared to the same quarter in 1989. The decline in AFUDC results from the timing of construction of new gas transmission facilities. The reduction in interest income resulted from lower average cash balances on deposit. Offsetting these reductions was a gain on the disposition of the company's interest in the Montreal pipeline.

Funds generated from continuing operations in the first nine months of 1990 increased to $228.7 million, compared to $223.8 million a year ago. The effect of improved earnings was partially offset by the receipt of lower dividends from the Northern Border pipeline in which TransCanada holds a 30 percent interest.

TransCanada continued higher natural gas deliveries during the third quarter of 1990. The company shipped 1092 billion cubic feet of natural gas during the first nine months of the year, an increase of 66 billion cubic feet, or six percent, over the same period last year. Higher deliveries to new and existing shippers in both the United States midwest and northeast markets accounted for three- quarters of this increase. The remainder of the increase was due primarily to new contracts for service to two eastern Canadian distributors - Consumers' Gas and Union Gas.

TransCanada's wholly-owned subsidiary, Western Gas Marketing Ltd., sold 203 billion cubic feet of natural gas during the third quarter, a decrease of 14 percent compared to the third quarter of last year. A primary reason for this decrease is the continued erosion of markets as a result of both deregulation and further competitiveness in natural gas marketing.

NEWPORT NEWS, Va. (OCT. 23) PR NEWSWIRE - The Flight International Group, Inc. said today that in order to continue its restructuring efforts it had negotiated a further extension and modification of its April 13, 1990, purchase agreement with Smith Technologies Inc.

The extension agreement, which was unanimously approved by the independent directors of Flight International, extends from Oct. 27, 1990, until Nov. 27, 1990, Smith Technologies' put option on its original investment. Under this aspect of the agreement, Smith Technologies has the option to resell to Flight International the shares originally purchased on April 13, 1990. The aggregate sales price under the put option, $1 million, would be equal to Smith Technologies' original investment. As part of the new agreement, Smith Technologies has agreed not to exercise its put option before the close of business on Nov. 23, 1990.

The prior agreement gave Smith Technologies the right to acquire up to 5.5 million common shares of Flight International in a series of installments, the first installment of which had been scheduled to expire on Oct. 22, 1990. In connection with obtaining the foregoing standstill, Flight International, under the new agreement, also extended to Nov. 20, the date by which Smith Technologies must exercise the first installment of its purchase option, which installment may now be exercised during the ten-day period commencing Nov. 11, 1990.

The Flight International Group, Inc. is an aviation services company with interests in government and military contracts and commercial flight operations.

#90296p8661 10/23/1990 ~PR Newswire

DALLAS (OCT. 23) PR NEWSWIRE - BancTEXAS Group Inc. (NYSE: BTX) announced that it has reached an agreement with the Federal Deposit Insurance Corp. ("FDIC") under which an agreed order was issued in which the FDIC will "standstill" regarding certain claims against BTX's two subsidiary banks. BTX is a bank holding company which operates two national banks, BancTEXAS Houston N.A. and BancTEXAS McKinney N.A. The potential claims arose out of the January 1990 failure of BTX's former subsidiary, BancTEXAS Dallas N.A., and a law enacted by Congress in 1989 which authorizes the FDIC to recover its costs from a bank failure by assessing other commonly owned financial institutions.

Under the agreeement with the FDIC, which has been approved by the Boards of Directors of BTX and the FDIC, BTX will invest substantially all of its available liquid assets, which are approximately $6-3/4 million, as capital injections into BancTEXAS Houston and BancTEXAS McKinney. BTX's decision to

infuse capital into the two banks is subject to reaching an agreement with the Federal Reserve Board resulting in the termination of a pending administrative proceeding seeking capital injections into the banks.

To reflect uncertainties concerning the potential FDIC claims, BTX's recent financial statements have included a liability of approximately $36 million for the possible FDIC claims, thereby causing BTX to have negative shareholders' equity. As a result of the agreed order with the FDIC, it is expected that the $36 million liability will be eliminated. As of Sept. 30, 1990, BTX reported an operating loss of $5.8 million for the first nine months of the year and that shareholders' equity stood at a negative $21.2 million; if the adjustment had been made at that time, shareholders' equity would have been approximately $15 million. BTX's financial results for the third quarter are discussed below.

Under the terms of the order, the FDIC will not seek to collect any funds from BancTEXAS Houston or BancTEXAS McKinney if BTX complies with specified requirements, primarily by maintaining the regulatory capital of the two banks at required levels through at least Jan. 26, 1992. To encourage BTX to obtain an outside capital infusion, the FDIC also agreed that, if BTX succeeds in obtaining additional capital and infusing an acceptable part into the banks, the FDIC will make permanent its waiver of claims against BancTEXAS Houston and BancTEXAS McKinney.

BTX reported a net loss of $1.7 million, or 10 cents per share for the third quarter of 1990. This compares with a net loss of $8.9 million, or 53 cents per share for the third quarter of 1989. For the nine months ended Sept. 30, 1990, the net loss was $5.8 million, or 34 cents per share, compared to $24.7 million, or $1.46 per share, for the same period in 1989. The 1989 results include the nine months results from BancTEXAS Dallas N.A., which was then a subsidiary of BTX. On Jan. 26, 1990, BancTEXAS Dallas was declared insolvent by the Office of the Comptroller of the Currency and the Federal Deposit Insurance Corp. was appointed receiver for that bank.

At Sept. 30, 1990, nonperforming assets were $16.3 million, or 9.6 percent of loans and foreclosed property, compared to $16.4 million, or 6.7 percent, at Dec. 31, 1989. The allowance for loan losses at Sept. 30, 1990 was $5.3 million, or 3.3 percent of loans. This allowance compares to $6.1 million, or 2.6 percent, at Dec. 31, 1989. BTX's consolidated primary capital ratio was a negative 6.46 percent at Sept. 30, 1990 compared to a negative 2.27 percent at Dec. 31, 1989. At Sept. 30, 1990, the primary capital ratios of the subsidiary banks were 4.80 percent for BancTEXAS Houston and 4.13 percent for BancTEXAS McKinney. The equity capital ratios of these banks at Sept. 30, 1990, were 2.81 percent for BancTEXAS Houston and 1.75 percent for BancTEXAS McKinney.

ALBUQUERQUE, N.M. (OCT. 23) PR NEWSWIRE - Public Service Co. of New Mexico (PNM) (NYSE: PNM) today reported earnings applicable to common stock of $5.6 million or 13 cents per share for the third quarter 1990, as compared to net earnings applicable to common stock of $23.1 million or 55 cents per share for the comparable quarter last year.

Earnings applicable to common stock from continuing operations for the 12 months ended Sept. 30, 1990, were $5.2 million or 12 cents per share which included one-time charges of 46 cents per share, compared to a loss of $17.1 million or 41 cents per share for the like period last year which included one-time charges of $2.53 per share.

Operating revenues for the quarter decreased $23.7 million to $194.8 million from $218.5 million in the comparable quarter last year. The decrease was due primarily to the December 1989 expiration of a long-term power sales contract with Southwestern Public Service (SPS). As a result, electric wholesale revenues decreased $23.8 million (49 percent) from the like quarter last year.

Total retail electric kilowatt hour sales increased 3.2 percent from the period a year ago. Sales to industrial customers increased 9.6 percent and sales to all other retail customers increased 1.7 percent.

#90296p8664 10/23/1990 ~PR Newswire
MEXICO, Mo. (OCT. 23) PR NEWSWIRE - A.P. Green Industries Inc. (NASDAQ: APGI) announced results for the third quarter and nine months of 1990.

Net sales for the three months ended Sept. 30, were $43,705,000, a 7.6 percent decrease from the corresponding period in 1989. Net earnings amounted to $812,000, or 30 cents per share, compared with net earnings of $2,470,000, or 93 cents per share, for the third quarter of 1989.

Net sales for the nine months ended Sept. 30 of $137,979,000 were 1.8 percent lower than the comparable period of 1989. Net earnings declined 33.4 percent to $4,382,000. Nine months' earnings per share declined from $2.47 to $1.60.

Harry M. Stover, chairman of the board and chief executive officer, commented on the above, stating; "The reduction in year-to-date earnings has taken place primarily in the third quarter of this year due in part to a distinct downturn in the markets we serve.

"We are experiencing a sales decline along with continued price pressure which

have adversely affected margins in the refractory business. There are also a number of special factors which affected earnings in the third quarter, such as the unfavorable LIFO inventory cost adjustment of $675,000 in the third quarter of 1990 as compared to a favorable LIFO inventory cost adjustment of $220,000 in the same quarter of 1989. This aggregate impact of $895,000 affecting third quarter operating results comparability is attributed primarily to changes in inventory mix.

"During this third quarter, we substantially increased reserves for worker compensation claims filed by former employees of our discontinued construction operations. Both Canada and the United Kingdom had disappointing third quarter operating results due to weak economies in both countries and an extended strike in the Canadian steel industry.

"In response to this economic downturn, we have begun a reorganization of the company, with the objective of being more cost efficient. This reorganization will entail the reduction of a number of salaried positions. Prior to making those reductions, we are offering an early retirement program to salaried employees who are 55 years of age or older and who have at least 20 years of service. As soon as we can determine how many employees will elect to take early retirement, we will complete the reorganization. The cost of these reductions will initially impact our fourth quarter results, but considerable savings will be reflected starting in 1991.

"As part of this reorganization, we have closed our Macon, Ga. and Troy, Idaho plants and have moved their product lines to other plants which are more cost-efficient. Recently, new hydraulic presses have been installed in the Mexico and Fulton plants. These 'state-of-the-art' presses improve both quality of the product and productivity of the workforce."

Stover also noted that the previously announced buyback of 300,000 shares of the company's outstanding stock had been completed during the third quarter.

A.P. Green Industries Inc., headquartered in Mexico, Mo., is a leading manufacturer and distributor of refractory products in both the United States and international markets. The company also manufactures industrial lime products used in the production of steel, aluminum and paper, and for road stabilization and water purification.

CALGARY, Alberta (OCT. 23) PR NEWSWIRE - Asamera Minerals (Toronto, Montreal: ASM) today announced the assay results from its September drilling program at its Meliadine River property, approximately 12 miles north of Rankin Inlet in the Northwest Territories.

Fourteen holes, totalling approximately 3,600 feet, were drilled as follow-up to the company's July announcement of a gold discovery at the site. Mineralization was encountered in 11 holes and the anomaly remains open at depth and to both the east and west.

The following table details the mineralization encountered. Drill

Depth (feet)	from	to	Grade hole (ounces gold/ton)
1	76	90	0.228
2	173	199	0.321
3	110	139	0.187
4	220	229	0.413
5	no significant values		
6	no significant values		
7 (two zones)	83	101	0.337
	118	126	0.205
8	132	145	0.508
9	135	157	0.297
10	no significant values		
11 (two zones)	126	168	0.348

#90296p8668 10/23/1990 ~PR Newswire

MAYNARD, Mass. (OCT. 23) PR NEWSWIRE - Digital Equipment Corporation (NYSE: DEC) announced today it is the recipient of the Opportunity 2000 Award, which honors the Maynard, Mass.-based computer firm for its leadership work in addressing issues relating to cultural diversity and the "Glass Ceiling Initiative."

At an awards ceremony held Tuesday evening at the Omni Shoreham Hotel in Washington D.C., Secretary of Labor Elizabeth Dole commended John L. Sims, Digital's vice president of Strategic Resources, for the company's continuous commitment to equal opportunity and for its innovative strategies to improve the quality of its workforce.

William C. Brooks, assistant secretary of the Employment Standards Administration, presented the award.

The award is given annually by the Secretary of Labor, under the auspices of the Office of Federal Contract Compliance Programs (OFCCP), to an employer who anticipates the challenges of the changing American demographics while assuring its workforce equal opportunity with comprehensive affirmative action strategies and programs.

"Workforce diversity is part of our business, part of our philosophy and part of our long-term strategy for staying competitive," says Sims. "We promote a work environment where every employee is empowered and feels valued. The core of Digital's value system and culture is the belief that our people are our most important asset.

We value their differences and want to see people of difference at every level in the company."

More than a decade ago, Digital stepped beyond the basic requirements of Equal Opportunity law to initiate Affirmative Action programs and practices. In the early 1980s, the company began its work in Valuing Differences, a philosophy which supports the positive power of people's differences in race, color, sex, religion, age, national origin, citizenship, veteran status, sexual orientation or disability.

Today, Valuing Differences work takes place across the company in the form of formal training programs, leadership workshops and core group activities. In these settings, women, minorities and other people of difference come together to discuss and examine the stereotypes and barriers which hinder collaborative and productive work.

"It is our differences that distinguish us as individuals," explains Alan Zimmerle, Digital corporate manager, Affirmative Action/EEO/Valuing Differences. "And it is the positive power of these differences which gives Digital the edge in a highly competitive marketplace. The representation of people of difference at every level of the corporation is an important business goal that ensures our ability to be both the employer of choice and the preferred vendor for our customers."

Nine other federal contract employers were also honored at the Oct. 23rd awards banquet as recipients of the 1990 Exemplary Voluntary Efforts (EVE) Awards for their implementation of innovative affirmative action program events. In 1986, Digital was a recipient of an EVE Award.

Digital Equipment Corporation, headquartered in Maynard, Mass. is the leading worldwide supplier of networked computer systems and services. Digital offers a full range of computing solutions and systems integration for the entire enterprise -- from the desktop to the data center.

#90296p8670 10/23/1990 ~PR Newswire

SOUTH BEND, Ind. (OCT. 23) PR NEWSWIRE - Clark Equipment Co. (NYSE: CKL) today announced net income of $13.7 million, or $0.80 per share, on sales of $349.0 million during the three months ended Sept. 30, 1990. This compares to net income of $17.4 million, or $1.01 per share, on sales of $343.9 million in the second quarter of 1990 and net income of $17.4 million, or $1.01 per share on sales of $344.5 million in the third quarter of 1989.

Third quarter earnings benefited from a $3.5 million gain representing Clark's share of the profit realized by VME Group N.V. from the sale of its log skidder business. For the nine months ended Sept. 30, 1990, Clark net income was $51.2 million on sales of $1,078.7 million compared to 1989 nine-month net income of $48.5 million on sales of $1,014.4 million.

In making the announcement, Leo J. McKernan, Clark chairman and chief executive officer, said that third quarter results were affected by several factors, including Brazilian government economic actions and softer demand in most major markets for the company's products.

Noting that sales of Clark's Brazilian operations increased $23 million from depressed second quarter levels, McKernan said, ''Government economic actions initiated in March greatly reduced inflation, but also restricted profitability.'' Clark's Brazilian operating performance improved to break-even from a $3.0 million loss in the second quarter.

In discussing the performance of Clark's compact construction machinery business, McKernan said, ''At the Melroe Co., the softer demand in U.S. construction, rental and industrial markets combined with normal seasonal factors to significantly reduce sales volumes and margins from second quarter levels. There are similar reductions in demand in most European countries.'' McKernan added that the September introduction of a new technologically advanced skid-steer loader line received a very strong response from dealers.

Commenting on the company's material handling business, McKernan said, ''Slower market demand in the U.S. resulted in competitive pricing pressure, principally in its internal combustion product lines.'' Saying that European demand remained somewhat stronger, McKernan noted that ''While most of the company's product lines experienced flat sales, demand for the unit's new line of electric Powrworkers has been strong.''

Discussing sluggish markets for the company's off-highway drivetrain components business, McKernan said, ''Production schedules have been adjusted and actions taken to reduce costs and improve asset utilization.'' He added

that some additional costs and inefficiencies may result as the company implements these plans, but that they should positively affect future results.

During the third quarter of 1990, Clark called at par the 13 percent notes due in 1993 which had an outstanding principal balance of $52.0 million.

Clark order backlogs excluding Hurth Axle (acquired in July 1990) were $331 million at Sept. 30, 1990, compared to $342 million at June 30, 1990. Incoming orders for the third quarter 1990 were $332 million versus orders of $347 million in the second quarter of 1990 and $326 million in the third quarter of 1989.

Regarding the oulook for the remainder of the year, McKernan said, ''We face a period of great uncertainty. We expect to be operating into next year with softer U.S. and European markets. We will continue to reduce costs consistent with a lower level of sales, while investing in new product development and improved manufacturing capability for the future.''

Clark Equipment Company's business is the design, manufacture and sale of forklift trucks, construction machinery, transmissions for on highway vehicles and axles and transmissions for off-highway equipment.

CHARLESTON, W.Va. (OCT. 23) PR NEWSWIRE - Blue Cross & Blue Shield of Ohio today issued the following in response to news inquiries about the salaries of Mountain State Blue Cross & Blue Shield executives:

Thomas D. Farson, president and chief operating officer, earns compensation of $100,000 annually.

John D. Burry, Jr., chief executive officer, serves Mountain State Blue Cross & Blue Shield without salary.

The remainder of the Mountain State Blue Cross plan's executive team is not yet in place, pending the required filing under federal anti- trust statutes. This process is estimated to take 30 days.

When that process has been completed, the Mountain State plan's executive team will include, in addition to Farson and Burry, about 10 others at vice presidential levels.

These vice presidents will receive salaries ranging from $40,000 to $60,000 annually, with the average expected to be $50,000.

Burry, who is chairman and chief executive officer of Blue Cross & Blue Shield of Ohio (BCBSO), also heads five other companies affiliated with BCBSO. Burry's compensation is based upon his responsibilities with those companies and he is paid solely through the Ohio Blue Cross Plan and its affiliates.

The five affiliated companies are Medical Life Insurance Co., which is licensed in 38 states; Mutual Holding Co., an investment company; Mutual Health Services Co., a third-party administrator; Blue Guardian Insurance Co., which is licensed as a casualty company; and North Dakota Life Insurance Co.

In all, Burry is the chief executive officer of seven companies doing business throughout most of the country.

BCBSO has the lowest cost of doing business among health insurers in Ohio. Likewise, Parkersburg Blue Cross & Blue Shield, predecessor of Mountain State Blue Cross & Blue Cross & Blue Shield, has the lowest cost of doing business among health insurers in West Virginia. In both cases, the ratio is less than 10 cents on the premium dollar.

#90296p8677 10/23/1990 ~PR Newswire

FREMONT, Calif. (OCT. 23) PR NEWSWIRE - Lam Research Corp. (NASDAQ: LRCX) today unveiled an innovative chemical vapor deposition (CVD) product platform, designated the Integrity series. Representing a radical departure from traditional CVD system design, Integrity delivers two firsts to the global semiconductor industry. It is the first CVD system in which process performance has been approached from a hardware standpoint. It is also the only commercially available CVD tool to integrate several process steps within a single chamber, thereby significantly reducing the time, cost and thermal budget associated with integrated circuit fabrication.

The Integrity platform will address a variety of CVD films with products tailored for each film type. The first of these is borophosphosilicate glass (BPSG). In the Integrity/BPSG system, film deposition, flow and anneal all occur within the system's single patented chamber. This process breakthrough, aptly termed "flow as you go"(TM), eliminates two major technological hurdles chipmakers face today: Voids in trench structures and nonplanar surfaces on first level dielectrics. Both are capable of ruining a finished device.

Until now, chipmakers were forced to perform separate flow and anneal steps following the deposition process. This did not, however, completely eliminate voids or planarize topography. In contrast, Integrity's BPSG films flow as they are deposited, enabling the film to flow into the trenches. In essence, this "flow as you go" process ensures that completely void-free trenches and

planar topography on lines as small as 0.3 microns are easily achieved -- without subsequent process steps.

The performance gains realized through this approach are unprecedented. Thermal budget, a critical factor in progressive IC technology, is reduced by more than an order of magnitude and film characteristics optimized. These process advantages will become even more crucial in next generation devices that utilize high aspect ratio structures due to smaller device geometries. Unlike typical systems in which performance degrades as new device designs are introduced, Integrity's process advantages actually escalate with each new generation of IC fabrication.

Dr. Joseph Monkowski, chief technical officer at Lam, explains that by combining three process steps into one, the need for additional steps is eliminated. "We have progressed beyond the emerging integrated processing concept. Taking the next logical step, we created an 'intra chamber' system that performs multiple process in situ. We expect this to set a new trend in integrated processing systems for the global semiconductor industry."

This unique capability can only be achieved through inherently tight control, over a wide operating range, of all variables impacting the CVD reaction. These fundamental elements guided the direction of the Integrity platform, resulting in a complete "controlled reaction environment" with patented hardware developed to govern flux, temperature, gas concentration and pressure.

Integrity represents more than three years of research and development, conducted primarily at Lam's Advanced Research Center in San Diego. Today's introduction follows an intensive beta program launched in May to ensure reliable results in production. In all measurable areas, Integrity's performance is meeting or exceeding expectations.

The Integrity system is being unveiled this week at Semicon Japan in Tokyo.
About Lam Research

Lam is a leading supplier of wafer processing equipment for the worldwide semiconductor industry and the leading supplier of single wafer etchers. The company's broad product offerings are focused on etch and deposition, two of the most vital areas in the fabrication of current and future integrated circuits. Serving as the foundation for this focus, Lam has developed core technologies encompassing etch and CVD disciplines. Headquartered in Fremont, Lam maintains customer support centers throughout the United States, Europe and the Pacific Rim to support its global customer base. Founded in 1980, Lam Research is publicly held and listed on the NASDAQ National Market System under the symbol LRCX.

MOSCOW (OCT. 23) TASS -

PRIME MINISTER JACQUES SANTER OF LUXEMBOURG, WHO IS CURRENTLY HERE ON AN OFFICIAL VISIT, TODAY TOURED THE LENINSKY KOMSOMOL CAR FACTORY.

SANTER'S TOUR OF THIS MOSCOW-BASED CAR-MAKING AMALGAMATION IS PARTICULARLY NOTEWORTHY WITHIN THE CONTEXT OF THE AGREEMENT, SIGNED IN THE KREMLIN ON MONDAY BY THE SOVIET UNION AND LUXEMBOURG, ON AN INTERNATIONAL AUTOMOBILE TRANSPORTATION SERVICE.

ONE OF THE OLDEST SOVIET AUTOMOBILE-MAKING ENTERPRISES, THE AZLK - ITS RUSSIAN ACRONYM - IS THE COUNTRY'S MAJOR PRODUCER OF MOSKVICH CARS. THE FACTORY IS NOW BEING TECHNICALLY RE-EQUIPPED TO MANUFACTURE A NEW CAR MODEL, THE MOSKVICH-2,141.

SANTER VISITED THE AZLK MUSEUM WHERE YURI BORODIN, FIRST DEPUTY GENERAL DIRECTOR OF THE CAR-MAKING AMALGAMATION, TOLD THE DISTINGUISHED GUEST ABOUT THE FACTORY'S 60-YEAR HISTORY AND ITS PRESENT SITUATION.

AT THE MUSEUM, THE PRIME MINISTER OF LUXEMBOURG FAMILIARISED HIMSELF WITH THE LATEST CAR MODELS AND EVEN SAT AT THE WHEEL OF A MOSKVICH-2,141.

SANTER TOURED THE FACTORY'S WORKSHOPS, SHOWING INTEREST IN THE MAIN PRODUCTION CYCLES AND IN THE SPORTS AND HEALTH CENTREUSED BY AZLK PERSONNEL AND THEIR FAMILIES.

DURING A MEETING WITH AZLK PERSONNEL, THE HEAD OF THE LUXEMBOURG GOVERNMENT SAID THAT THE ENTERPRISE HAS GREAT TECHNICAL RESOURCES AND HAS CREATED FINE RECREATIONAL FACILITIES FOR WORKERS AND SPECIALISTS.

MOSCOW (OCT 23) TASS - LEADERS OF AUTONOMOUS REPUBLICS AT THE LATTER'S REQUEST FOR A THOROUGH DISCUSSION ON THE ROLE OF SUCH REPUBLICS IN THE ELABORATION OF A NEW SOVIET UNION TREATY AND THEIR PLACE IN THE UPDATED UNION.

PARTICIPANTS IN THE MEETING FAVOURED EXPEDITING DRAFT WORK ON A HISTORY-MAKING DOCUMENT THAT WOULD GUARANTEE EQUAL RIGHTS AND POSSIBILITIES FOR THE ETHNIC REBIRTH OF ALL PEOPLES INHABITING THE COUNTRY.

IN HIS CLOSING REMARKS GORBACHEV SAID THAT WHEN WORKING OUT A NEW UNION TREATY IT IS IMPORTANT TO HEAR ALL VOICES AND TAKE ACCOUNT OF EXISTING REALITIES.

"THIS COUNTRY WAS AND REMAINS MULTINATIONAL," HE STRESSED. "IT SHOULD ADAPT TO

THE NEW TIMES, BECOME MORE DEMOCRATIC AND ENSURE THE RIGHTS AND INTERESTS OF ALL CITIZENS AND ETHNIC GROUPS LIVING HERE. BUT WE HAVE NO RIGHT TO IGNORE HISTORY AND THE FACT THAT ALL THE COUNTRY'S REGIONS ARE INDISSOLUBLY LINKED WITH ONE ANOTHER BY POLITICAL, ECONOMIC AND HUMAN BONDS."

"THE TASK," GORBACHEV SAID, "IS TO ENSURE A HARMONY OF RELATIONS BETWEEN ALL MEMBERS OF OUR UNION, WHICH IS BEING BORN ANEW."

MOSCOW (OCT 23) TASS - EXPERTS FROM THE SOVIET COSMONAUT TRAINING CENTRE AND THE GERMAN AEROSPACE AGENCY HAVE HELD PRELIMINARY CONSULTATIONS AS PART OF SCIENTIFIC AND TECHNOLOGICAL COOPERATION BETWEEN THE TWO COUNTRIES, SOVIET FOREIGN MINISTRY SPOKESMAN YURI GREMITSKIKH TOLD A BRIEFING HERE TODAY.

HE SAID THEY DISCUSSED PRACTICAL ASPECTS OF BILATERAL COOPERATION IN THE EXPLORATION OF OUTER SPACE, POSSIBLY UNDER THE AEGIS OF THE EUROPEAN SPACE AGENCY.

GREMITSKIKH SAID THE DEVELOPMENT OF BILATERAL AND MULTILATERAL COOPERATION IN SPACE IS NATURAL AMONG COUNTRIES BUILDING A COMMON EUROPEAN HOME.

ONE RESULT OF THE CONSULTATIONS, HE SAID, WAS THE DECISION TO CONTINUE TALKS IN THE NEAR FUTURE, WHEN PRACTICAL PREPARATIONS HAVE BEGUN FOR A SOVIET-GERMAN SPACE FLIGHT.

KIEV (OCT 23) TASS - THE UKRAINIAN PARLIAMENT TODAY ACCEPTED, BY A MAJORITY VOTE AND WITHOUT DEBATE, THE RESIGNATION TENDED IN EARLIER IN THE DAY BY PRIME MINISTER VITALY MASOL.

HIS MOVE DID NOT COME AS A SURPRISE. UKRAINIAN PRESIDENT NOTIFIED THE REPUBLICAN SUPREME SOVIET LAST WEDNESDAY THAT THE PREMIER WAS GOING TO SEND IN HIS PAPERS.

MASOL TOLD PARLIAMENT TODAY HE DOES NOT SEE ANY POSSIBILITY OF NORMAL WORK FOR HIMSELF BECAUSE SOME DEPUTIES BLAME ALL CURRENT ECONOMIC TROUBLES IN THE UKRAINE ON THE CABINET, GENERATING FURTHER TENSION IN SOCIETY.

HE SAID HE BELIEVES THIS BLAME IS UNFAIR AS SINCE TAKING OFFICE LESS THAN THREE MONTHS AGO, THE GOVERNMENT HAS DONE A LOT.

WORK HAS INCLUDED LAYING THE LEGAL GROUNDWORK FOR ECONOMIC RECOVERY, SIGNING COOPERATION AGREEMENTS WITH THE RUSSIAN REPUBLIC AND BYELORUSSIA AND PREPARING SUCH AGREEMENTS WITH TEN MORE REPUBLICS, MASOL SAID.

HIS POSITION WAS SHAKY EVEN WHEN HE WAS CONFIRMED ON JUNE 28, WINNING JUST THREE VOTES MORE THAN THE REQUIRED MINIMUM.

HIS GOVERNMENT'S ECONOMIC STABILISATION PROGRAMME CAME UNDER SEVERE CRITICISM AT THE CURRENT PARLIAMENTARY SESSION.

MOSCOW (OCT 23) TASS - PREPARATIONS FOR A SOVIET-JAPANESE SPACE FLIGHT HAVE BEGUN AT THE SOVIET UNION'S BAIKONUR LAUNCHING SITE, A SPOKESMAN FOR THE SOVIET GLAVKOSMOS SPACE AGENCY TOLD TASS.

TWO JAPANESE JOURNALISTS -- TOYEHIRO AKIYAMA AND RIOKO KIKUCHI OF THE TBS RADIO AND TELEVISION NETWORK -- ARE PREPARING FOR THE FLIGHT WITH A SOVIET CREW TO THE SOVIET MIR SPACE STATION AT THE COSMONAUTS' TRAINING CENTRE NEAR MOSCOW.

THE TAKE-OFF IS SCHEDULED FOR DECEMBER 2.

ALEXEI LEONOV, DEPUTY HEAD OF THE TRAINING CENTRE, TOLD TASS THAT BOTH JAPANESE CONTENDERS FOR THE PLACE IN THE SOVIET SPACESHIP ARE "SELF-DISCIPLINED AND STUDIOUS".

A SOVIET STATE COMMISSION WILL DECIDE WHICH OF THE TWO WILL FLY TO MIR ON THE EVE OF THE FLIGHT.

SPECIAL PAVILIONS ARE BEING BUILT AT BAIKONUR FOR GUESTS AND REPORTERS. THE TAKE-OFF IS PLANNED TO BE BROADCAST LIVE.

PART OF THE SCIENTIFIC EQUIPMENT TO BE USED BY THE SOVIET- JAPANESE CREW DURING THEIR EIGHT-DAY MISSION HAS ALREADY BEEN TAKEN TO MIR BY AN UNMANNED CARGO SPACECRAFT.

(OCT. 23) UPI - Two California white supremacists and two Oregon skinheads were ordered to pay 12-and-a-half-Million dollars in damages Monday by a Portland, Oregon, jury. The panel ruled in a civil suit that white supremacist Tom Metzger and his son, John, incited the 1988 beating death of a black man by three skinheads. Damages were also assessed against two of the attackers. The money will go to the family of the victim. The lawyer who filed the suit hopes the decision will financially cripple the Metzgers' White Aryan

Resistance group.

George Bush is now just the third U-S president to reject a major civil rights bill. Bush Monday vetoed the Civil Rights Act of 1990 and urged Congress to pass his compromise version. The president says he wants to combat race and sex discrimination in the workplace, but says the congressional legislation would lead to hiring quotas.

The questions of how to cut Medicare and how to tax Millionaires apparently are the main obstacles still standing in the way of an agreement on a budget plan. Congressional leaders earlier Monday said a package was in sight. But the optimism faded as the day continued. A late-night meeting among top congressional and White House officials ended with NO agreement reached.

Officials for Seattle's Puget Sound Blood Center say they haven't decided whether to appeal Monday's jury decision that will cost the center one-point-eight-Million dollars. The money was awarded to a woman who developed AIDS after receiving a blood transfusion in 1984.

(OCT. 23) UPI - The U-N Security Council Monday recessed after a two-hour session that ended with members deadlocked on how to reprimand Israel. The Israeli government has rejected a request to send a U-N team to probe the killing of at least 20 Palestinians in Jerusalem two weeks ago. Diplomats say the U-N Secretary-General is still interested in sending the team to Jerusalem to probe the shootings, which were carried out by Israeli trooops.

A State Department official doubts the sincerity of an Iraqi-American group's claim that Baghdad is prepared to release a dozen Americans. Members of the Iraqi-American Friendship Society have been meeting with Iraqi officials in Baghdad to seek the release of U-S hostages. The State Department official said he'd believe it when the U-S hostages get off the plane.

BEIJING (OCT. 23) UPI - China criticized as ''totally unjustified'' Japan's use of patrol boats to protect a group of disputed islands in the East China Sea and demanded Tokyo stop activities it claims violates Chinese sovereignty over the area.

The Chinese Foreign Ministry issued the statement Monday after an incident Sunday in which Japanese coast guard patrol boats turned back two Taiwan fishing vessels whose crews had planned to land Taiwanese on the islands.

The eight tiny islands, all uninhabited, are located in the East China Sea between northern Taiwan and Okinawa to the north of another larger group of Japanese islands. The disputed islands are called the Senkakus by Japan and the Diaoyus by China and Taiwan.

The group has been the subject of conflicting territorial claims since the end of World War II.

''It is totally unjustified for the Japanese government to dispatch warships and airplanes to enter the sea waters of the Diaoyu Islands and intercept the fishermen from Taiwan Province,'' the Chinese Foreign Ministry statement said.

''The Chinese government strongly demands that the Japanese government immediately stop all its activities that violate China's sovereignty over the Diaoyu Islands and (their) adjacent sea waters,'' it said.

Although the Nationalist Chinese have ruled Taiwan since the mainland communist revolution in 1949, and Beijing views the island as a renegade province, both governments maintain there is only one China and close ranks in territorial disputes with other nations.

''The Diaoyu Islands have always been part of Chinese territory and China has indisputable sovereignty over the islands,'' the Foreign Ministry said.

The two Taiwan fishing vessels had planned to land a group of Taiwanese politicians and athletes on the main Diaoyu island to stage events to reinforce Taiwan's claim to the group.

Japanese patrol boats and helicopters forced the vessels to turn back after a

five-hour standoff in waters to the west of one of the islands.

Taiwan says the islands, claimed by Japan in 1895, came under Chinese sovereignty after Japan's wartime defeat in 1945, but the United States effectively took control of the islands and gave them back to Japan along with Okinawa in 1972.

Beijing renewed claims to the group in 1971, but agreed with Japan in 1972 to shelve the dispute when the two nations normalized relations.

After Sunday's incident, the Taiwan and Japanese governments both issued separate statements criticizing the other and declaring the islands as their own. China and Taiwan have criticized a Japanese plan to renovate a lighthouse on one of the islands.

#90296u0124 10/23/1990 ~United Press International

TOKYO (OCT. 23) UPI - Hokkaido Colliery and Steamship Co., formerly Japan's No. 2 coal producer, said Tuesday it will import coal from the Asian region beginning in fiscal 1991 as part of its survival program - a move symbolizing the crisis faced by Japan's declining coal industry.

The decision came against the background of the government's energy program aimed at cutting back domestic coal production and raising Japan's dependence on imports and atomic power and other energy sources.

The Japanese coal industry has lost international cost competitiveness as a result of the yen's sharp appreciation against foreign currencies, which made imports cheaper, and sluggish demand worldwide.

Prices of domestic coal are almost three times those of imported coal.

The Tokyo-based company said the plan calls for importing 1 million tons in the initial year from such countries as the Soviet Union, Australia, Indonesia and Malaysia.

The company also plans to acquire concessions to develop coal overseas in the future.

The company currently produces about 700,000 tons of coal annually on Hokkaido Japan's northernmost main island, for supplies mainly to electric power, cement, paper-pulp and chemical industries.

''It is hard to predict our future coal import program but it all depends on the government's coal policy,'' a spokesman for the company said.

The government's current coal production program, ending in fiscal 1992, calls

for domestic production of 10 million tons a year.

The Hokkaido Colliery official said the production goal may be lowered to 5 to 6 million tons in the next program.

Japan produced 55.4 million tons of coal in the peak year in 1961.

The government's policy shift toward greater dependence on foreign suppliers, which began in 1987, has forced the closure of about a dozen major coal mines at home and dismissals of nearly 11,000 workers, about half the industry's work force.

Japan's steel and electric power industries, which have long been the major customers of domestic coal producers, have turned to cheaper imported coal.

At a government request, the Japanese electric power industry has reluctantly purchased high-priced domestic coal.

The industry now calls for the phasing out of domestic coal production and warned it will stop purchasing coal from domestic suppliers at the end of fiscal 1992, when the government's eighth coal production adjustment program expires.

Electric power companies have been promoting the use of substitute energy sources such as atomic power generation and natural gas largely because of rising prices of domestically produced coal.

The leader of the Japanese coal industry said last week that coal producers will diversify into more profitable businesses to ensure their survival.

Atsushi Kawarasaki, President of the Japan Coal Association said the survival program includes coal development overseas, production of construction materials and operation of hotels and other leisure facilities at coal mining centers at home.

#90296u0178 10/23/1990 ~United Press International
CLEVELAND (OCT. 23) UPI - The Cincinnati Bengals unveiled a potent rushing attack Monday night and ran the playoff hopes of the Cleveland Browns into the ground.

The Bengals rushed 37 times for 233 yards and two touchdowns, Boomer Esiason threw two touchdown passes, and Jim Breech kicked a pair of field goals to lead Cincinnati to a 34-13 win over Cleveland. The win gave the Bengals a 5-2 record and dropped Cleveland into last place in the AFC Central with a 2-5 record that leaves them three games behind Cincinnati and in danger of missing the playoffs for the first time in six years.

''We looked like a big-time football team tonight,'' said Cincinnati Coach Sam Wyche. ''We didn't think coming in we could run against the Browns the way we did.''

Esiason completed 7 of 17 passes for 85 yards and was intercepted once, and threw scoring passes of 19 yards to Rodney Holman and 2 yards to Mike Barber. James Brooks scored on a 28-yard run and Ickey Woods, making his first appearance since suffering a knee injury since last September, closed out the scoring with a 1-yard plunge with 2:52 left. Woods carried five times for 7 yards.

Breech kicked field goals of 20 and 21 yards as the Bengals raised their record to 2-2 on their current stretch of five straight road games. Cleveland is 1-2 at home and plays Sunday at San Francisco against the undefeated 49ers.

Rookie Harold Green gained 75 yards on nine carries, Craig Taylor gained 73 yards on 14 rushes, and Brooks got 63 yards on six carries for the Bengals. Kevin Mack led Cleveland with 53 yards on 12 attempts.

''The one thing we've been talking about in the locker room is that we felt like we didn't have the running game together,'' Esiason said. ''I told our

offensive linemen at halftime that it was their game and when it is their game you can run the ball effectively.

''It should prove that we're more than one-dimensional, we don't rely on one player. When everyone gets involved and does their job we can win on the ground or in the air.''

The Browns trailed 17-3 in the second quarter, but scored 10 points in the final 1:52 of the first half to apparently grab the momentum when Leroy Hoard bulled over from the 1 as time expired.

''I thought at halftime we were in good shape,'' said Cleveland Coach Bud Carson. ''We got it to 17-13, we had the crowd behind us, we were in pretty good position to come back, and we go out there and didn't do much.''

But the Browns lost the momentum somewhere between Hoard's touchdown and the start of the third quarter.

''They appeared more motivated at the beginning of the game,'' Wyche said of the Browns.

On Cleveland's first possession after halftime, Carl Zander picked off a Bernie Kosar pass and returned it to the Cleveland 38 to set up a 21-yard Breech field goal that put the Bengals up 20-13. Cleveland botched a field goal attempt with 3:36 left in the third quarter when holder Mike Pagel dropped the snap, and the Bengals ground game sprung into high gear.

Keeping the ball on the ground, the Bengals drove from their 14 to the Cleveland 4, with Taylor busting loose for a 24-yard run, Brooks running twice for 34 yards, and Green ripping off a 15-yard gain on third-and-10. Esiason then completed a pair of passes, the second going to an open Barber in the end zone for a 27-13 Bengal lead.

''I think we caught them at the right time and they did their stunts at the wrong time,'' Green said. ''Our inside game was strong with a lot of our trap and counter plays.''

Kosar completed 17 of 33 passes for 190 yards and was picked off twice and sacked four times.

''The main thing tonight, not to take anything away from them, but I don't think the intensity was there tonight as a football team,'' Kosar said.

There were several long discussions among the referees, including one that took approximately 10 minutes to figure out what down it was and another long huddle after an Esiason touchdown pass to Holman was nullified by an illegal formation penalty. That penalty was upheld.

But the Bengals, who must vie for attention with the World Series champion Reds, say they're trying to emulate the success of their baseball-playing counterparts.

''I can only compare it to the Reds winning the World Series,'' Esiason said. ''They kept talking about team, team team, then winning the World Series. Tonight was definitely a team win.''

For the Browns it was a team loss, and for Carson, who has been rumored to have his job in jeopardy, it was an especially crushing defeat.

''The people in power, the people who run this city, want this football team to win and win now,'' Carson said.

WILMINGTON, Del. (OCT. 23) UPI - A minor earthquake registering at 2.9 on the

Richter scale was recorded in the Delaware River Valley, fanning out from the epicenter to points in New Jersey and Pennsylvania, the U.S. Geological Survey said Tuesday.

The earthquake occurred at 9:35 p.m. Monday and its epicenter was in the Delaware River Valley, about 15 miles south of Wilmington, Del., said Pat Jorgenson of the National Earthquake Information Center in Golden, Colo.

''Scientists here this evening recorded a minor earthquake,'' she said refering to the earthquake monitoring headquarters run by the U.S. Geological Survey.

The earthquake was felt in the Wilmington and New Castle areas in Delaware, and was reportedly felt by residents of Salem and Gloucester counties in New Jersey, she said.

''We also had reports of it being felt in Delaware County, Pa.,'' she said.

''Quite a few people felt it. We had quite a few calls from radio stations,'' she said. ''They felt things shaking and they wanted to know if there was an earthquake.''

She said no other tremors are likely to follow because it was not a major quake. ''It's a single event,'' she said.

#90296u0290 10/23/1990 ~United Press International

WASHINGTON (OCT. 23) UPI - Faced with slumping polls and a sluggish economy, President Bush headed to New England Tuesday in an effort to improve the GOP's numbers in the Democratic-controlled Congress.

In the process, the president, set to campaign for Republicans in Vermont, New Hampshire and Connecticut, hoped to improve his own chances of success in next year's Congress.

Bush has fewer Republicans in the House than any GOP president this century, just 176 compared with 258 Democrats. In the Senate, Democrats enjoy a 55-45 margin.

The president has complained in recent weeks that he would have been able to obtain a better 1989-90 legislative scorecard, particularly on the budget, if Republicans reigned on Capitol Hill.

That isn't expected to happen any time soon. But Bush has spent much of the past several month campaigning for GOP candidates in the Nov. 6 election, when the entire House and a third of the Senate will be up for grabs.

Bush was to begin Tuesday's campaign swing by attending a GOP fund- raising event in Burlington, Vt., for Rep. Peter Smith, R-Vermont, seeking reelection.

The president was then to address a similar function in Manchester, N.H., on behalf of Rep. Bob Smith, R-N.H., seeking to fill the Senate seat being vacated by Gordon Humphrey.

The president also was to attend fund-raising events in Waterbury, Conn., for

GOP congressional nominee Gary Franks, a black city alderman, and in Stamford, Conn., for Rep. John Rowland, R-Conn., who is running for governor.

Bush was to make this campaign trip on Oct. 5. But he postponed it so he could stay in Washington to lobby for a bipartisan budget agreement that was ultimately rejected by the House.

Most House Republicans, including the entire Vermont delegation, broke with Bush on the budget battle, handing the president one of the biggest legislative defeats of his administration.

Recent polls show that the budget debacle, combined with the sluggish economy, have hurt Bush's popularity. A Gallup survey last week showed his approval rating at 56 percent, down by nearly 20 points from a month ago.

A Washington Post-ABC poll, also released last week, found that a record high disapproval mark of 58 percent on Bush's handling of the economy. A month ago, the figure stood at 41 percent.

The same survey found that support of Bush's policies in the Persian Gulf, although still strong, had slipped from 78 percent to 64 percent.

In addition, the poll found that Bush's support among blacks, once as high as 74 percent, had dropped to 37 percent. That figure may likely decline further in response to Bush's veto Monday of the Civil Rights Act of 1990.

SEOUL, South Korea (OCT. 23) UPI - A U.S. Air Force F-16 fighter crashed Tuesday near Taegu, 150 miles southeast of Seoul, U.S. military authorities said.

The crash took place at about 9:45 a.m. The pilot ejected from the aircraft and was picked up by a helicopter and taken to a hospital where he is listed in good condition, officials said.

The fighter was assigned to the 80th Tactical Fighter Squardron at Kunsan Air Base, 115 miles southwest of Seoul. A board of officers is investigating the cause of the accident, the officials said.

-30- 710

#90296u0365 10/23/1990 ~United Press International

TOKYO (OCT. 23) UPI - A plan to dispatch Japanese troops to help the multinational forces in the Persian Gulf ran into trouble Tuesday when the two biggest opposition parties began a parliamentary boycott.

The Japan Socialist Party and the Komei Party refused to attend a committee hearing on the government's bill to authorize formation of what it calls the United Nations Peace Cooperation Corps.

The bill would allow the government to deploy troops overseas in potential combat areas for the first time since World War II. It has been denounced as violating Japan's pacifist constitution not only by opposition parties but by some senior members of the ruling Liberal Democratic Party as well.

Prime Minister Toshiki Kaifu has vigorously defended the bill, saying that as troops will be limited to non-combat roles, it is not only constitutional but vital for the nation to meet its international obligations.

The Japan Socialist Party, largest of the opposition groups, had demanded a weeklong committee hearing in the House of Representatives, with all 21 Cabinet members present.

The ruling party instead scheduled two days of hearings, triggering the boycott.

The special lower house committee met briefly Tuesday morning with only the Liberal Democrats and Japan Communists in attendance, then recessed, a parliamentary spokesman said. He said he did not know when hearings would resume.

Japanese television reports said backroom talks were making progress and that the committee hearing might resume Thursday.

Defeat of the bill would be a serious blow to Japan's prestige abroad, the Foreign Ministry's chief spokesman, Taizo Watanabe, said Tuesday.

The ministry, which drafted the bill, plans to lobby members both of the ruling party and the opposition on the importance and appropriateness of the bill, Watanabe said.

The walkout by the Japan Socialists surprised no one because they have until recently opposed the very existence of Japan's military, known as the Self-Defense Forces.

In contrast, the Komei, a centrist party affiliated with a Buddhist organization, had earlier waffled on its position about sending troops to help in the gulf.

But the day before House hearings were to open, Komei Chairman Koshiro Ishida came out firmly against bill.

Speaking at a news conference, Ishida said the bill was unconstitutional and declared his party would fight to see it defeated.

Although the Liberal Democrats hold a majority in the House of Representatives they have only a plurality in the Parliament's upper chamber, the House of Councillors.

There, the Japan Socialists and the Komei believe that, together with smaller opposition parties, they have the votes to defeat the bill.

Some members even think they can garner enough defections from the ruling party to stop it in the House of Representatives.

''I am confident this bill will fail,'' a Socialist member of the lower house said Tuesday.

''The ruling party is so confused and so split over this bill. Many of its members are against it. Only the right wing really supports it,'' said the member, who spoke on condition of anonymity.

Opposition to the bill intensified after the government revealed that the troops would be authorized to carry machine guns and other small weaponry in self-defense.

On Sunday, 23,000 people rallied around a U.S. air base near Tokyo to demonstrate against the bill.

The following morning, Masaharu Gotoda, the former head of Japan's Defense Agency who served as chief Cabinet secretary under former Prime Minister Yasuhiro Nakasone, denounced the bill in a front-page interview with the Mainichi Daily News.

''If Japan uses this as an opportunity to start sending troops to other countries ... the door will be opened for Japan to become a military superpower. Other countries do not want that,'' Gotoda said. ''Japan does not have a historical foundation for civilian control (of the military) like England and the United States.''

An opinion poll published by the same newspaper Tuesday said that 53 percent of respondents were against sending troops overseas, while only 13 percent were for it.

In Parliament Monday, Prime Minister Kaifu reiterated his view that the corps would be legal because it would have orders not to use force except in self-defense.

#90296u0383 10/23/1990 ~United Press International

LONDON (OCT. 23) UPI - The U.S. dollar opened higher against the major

European currencies Tuesday, aided by progress on a U.S. budget package and sharply lower oil prices, dealers said.

The dollar opened higher in Frankfurt, at 1.5200 German marks against 1.5145 at Monday's close, and was also higher at the open in Zurich, at 1.2875 Swiss francs against 1.2799.

In London, the pound dropped slightly against the U.S. unit, despite favorable British trade figures. The pound opened at $1.9475 against $1.9495 Monday.

The dollar opened higher in Paris, Brussels and Milan, at 5.0920 French francs against 5.0490, 31.3650 Belgian francs against 31.14, and 1,138.20 Italian lire vs. 1,129.30.

Earlier, the U.S. dollar continued to rise against the Japanese yen in Tokyo Tuesday mainly on short-covering buying.

''It's time to correct the recent steep rise of the yen against the dollar,'' one dealer said.

The dollar closed at 127.13 yen, up 0.88 yen over 126.25 yen at Monday's close of trading, the Bank of Japan said.

Foreign exchange dealers said market players purchased dollars for position adjustments. The downturn in crude oil prices also encouraged dollar buying, they said.

Elsewhere in Asia, the dollar closed higher in Hong Kong at 7.7862 Hong Kong dollars as against 7.7835 on Monday. In Singapore, the dollar closed lower at 1.7000 Singapore dollars against 1.7070.

Gold closed lower in Hong Kong at $370.55 from Monday's finish at $370.85.

In Zurich, gold opened higher at $371 per ounce against $368.50, and also opened higher in London at $370.50 an ounce against $368.25.

Silver opened lower in Zurich at $4.20 an ounce from $4.25, and was also lower in London at $4.23 an ounce from $4.28.

#90296u0470 10/23/1990 ~United Press International

BOSTON (OCT. 23) UPI - ''My wife's been shot. I've been shot.''

Those words a year ago touched off a chain of events that shocked a city, traumatized two families and left numerous questions about one of Boston's most infamous murders.

On Oct. 23, 1989, Charles Stuart, a prospering furrier, called the police emergency line from his car phone to report he and his pregnant wife, Carol, an attorney, and he had been shot. He would later claim the gunman was a black mugger.

In Boston Tuesday, black leaders declared the one-year anniversary a day of mourning for injustices committed against their community in the aftermath of the killing. They urged residents to wear black armbands and to drive with their headlights on to recall the events of that night and the days following during which police searched for the gunman in the Mission Hill neighborhood where the shootings allegedly occurred.

Blacks claimed their community was unfairly blamed for the killing and said many young blacks had their constitutional rights violated by police in their hunt for the killer.

Stuart was first thought to be the victim of a heart-breaking crime. But less than 2 1/2 months later, after Stuart had killed himself by jumping off a bridge, he was reviled throughout the city and his case had inflamed racial relations and buried police and the media under a heap of criticism for their handling of it.

The most compelling questions that remain involve not only what spurred Stuart to kill his wife, Carol DiMaiti Stuart, but the level of involvement of his brother, Matthew, in the crime.

The lingering questions add to the torment of the DiMaiti family, as well as to the rest of Charles Stuart's relatives.

On Oct. 23, 1989, Carol Stuart, 30, who was seven months pregnant, was shot in the head. Charles said a black gunman forced his way into the couple's car after they left a birthing class at an inner-city hospital. After the gunman robbed and shot them, Stuart called police from his car telephone.

The case made headlines across the nation because of the dramatic audio tapes of the police dispatcher's efforts to coax more information from Stuart so they could pinpoint his location. There also was video footage obtained by a television crew that happened to be filming in the area and a graphic photo of Carol with her head lolling and mouth agape.

Sympathy for Stuart poured in from across the nation. The story became more painful when the baby Carol was carrying - a boy who was christened Christopher - died 17 days after his delivery by Caesarian section.

The Stuarts were depicted as the perfect couple, living comfortably and happily in suburban Reading until tragedy struck. Boston Mayor Raymond Flynn ordered an all-out search for their attacker, and media reports named William Bennett, a black man who had spent 13 years in prison, as the prime suspect.

But on Jan. 4 Charles Stuart plunged from a bridge into the Mystic River and police revealed that he had become their prime suspect.

Speculation about his motive ranged from rumors of romance with a blond former co-worker, who steadfastly denied any romantic invovlement, to reports that Stuart did not want a baby, and finally to the theory that he killed his wife to cash in on insurance policies, possibly to finance his dream of becoming a famous restaurateur.

The day before Stuart's suicide, his brother Matthew had gone to police with evidence implicating his brother in the shootings. Matthew said he became an unwitting accomplice in the crime when he and a friend, John McMahon, met Charles in the Mission Hill neighborhood on the night of the shootings and agreed to dispose of a gun, Carol's purse and several other items. Matthew reportedly told authorities he thought he was aiding in an insurance scam and knew nothing of a murder plot.

Investigators want to know more about Matthew's role but he has apparently refused to testify before a grand jury, although Massachusetts law prevents the prosecution of blood relatives as accessories after the fact of a crime.

(OCT. 23) UPI - Japan's two biggest opposition parties- the Socialists and Komei - began a boycott today that signals trouble for government plans to send Japanese troops to the Persian Gulf force. Both the Socialists and the Komei stayed away from a parliamentary committee hearing on the deployment. The boycott shows that there is enough opposition in parliament to bury the plan. In the upper house of Parliament, the opposition of both parties will defeat the bill.

Time is running out again for White House and congressional budget negotiators. A temporary measure that allows the government to spend money expires tomorrow night. House Democratic leader Richard Gephardt says another temporary plan may be needed because NO budget agreement is in sight. Negotiators met yesterday, but made NO deal.

Leading German economic institutes predict that German unification will slow down economic growth for the next few years. They say the growth in the German gross national product will be only one and one- half percent next year and UNemployment will jump from six to 10 percent. The report says the decline in the eastern German economy, which began when the German mark was introduced, will continue.

Top security officials in the Soviet Union say their work has changed because of perestroika. They NO longer concentrate on dissidents, who are now allowed

freedom, and are fighting traditional crimes. And laws against economic crimes such as ''speculation'' are NOT enforced. The head of the K-G-B says because of increased foreign contacts, drug trafficking is expanding.

(OCT. 23) UPI - American Health magazine says nearly one-third of all the black Americans who died in 1987 would have lived if health conditions were the same for blacks and whites. The magazine said a chief cause is the lack of good medical care for blacks. But it acknowledged that differences in lifestyles and genetics are also factors. The magazine reports 75-thousand excess deaths among blacks.

A jury ruled in Portland, Oregon, yesterday that a former Ku Klux Klan leader and his son had incited two ''skinheads'' to kill an Ethiopian student. White supremacist Tom Metzger, his son John and the skinheads were ordered to pay more than 12-Million dollars to the victim's family. Skinheads are youths who shave their heads and sometimes favor radical right causes.

Peter MacDonald, once chairman of the largest U-S Indian tribe, has been sentenced to nearly six years in prison and fined 11-thousand dollars. MacDonald was convicted last week of scheming to collect money from companies doing business on the Navajo reservation at Window Rock, Arizona. His son was sentenced to 18 months. The elder MacDonald was suspended as Navajo tribal chairman last year after a Senate committee heard testimony about corruption.

Marine biologists released a rare megamouth shark yesterday because they do NOT know how to keep it alive in captivity. The fish was caught Sunday and was taken to Dana Point, California. It was the only megamouth scientists have ever seen alive. The scientists photographed it for several hours as hundreds of spectators crowded the area for a glimpse. The huge shark lives more than 600 feet below the ocean's surface.

TOKYO (OCT. 23) UPI - Japan and Germany will hold their first science and technology cooperation talks since the reunification of the European country, the Foreign Ministry said Tuesday.

The ministry said the session in Tokyo scheduled for Thursday and Friday will be devoted to discussions on further expansion of cooperation in such fields as oceanography, life science, environment and energy.

The meeting will be the 13th session of the Japan-Federal Republic of Germany Joint Committee on Cooperation in Science and Technology based on a bilateral agreement concluded in 1974.

The committee has held meetings alternately in Japan and Germany since the first session met in Tokyo in 1975.

Dr. Josef Remser, Director-General for Basic Research of the Ministry for Research and Technology, will head the German delegation consisting of about 10 officials.

The Japanese panel will be led by Hiroshi Ota, Director-General for Scientific and Technological Affairs of the Foreign Ministry.

MADISON, WI (OCT. 23) UPI - Controversial Rabbi Meir Kahane, a former member of the Israeli Knesset, was forcibly removed from the stage during a speech Monday night because of protests over his remarks on expelling Arabs from Israel.

Kahane, a former U.S. citizen who once headed the militant Jewish Defense League in this country, in his speech at the University of Wisconsin-Madison called for the expulsion of all Arabs from Israel.

He tried to talk between the angry chants of more than 100 protesters and UW-Madison police and security guards removed him from an auditorium stage on campus to avoid a major disturbance.

A spokesman for UW-Madison security said Tuesday Kahane was ''arrested and unarrested.'' The spokesman said Kahane was taken off the stage for his own protection but then released.

At one point Kahane left the stage to confront protesters but was escorted back to the stage. When the disturbance did not end, officials took him off the stage despite chants from about 50 people to ''let him speak.''

The speech was sponsored by the Zionist Organization.

Kahane wants all Arabs expelled from the Israeli-occupied territories and said he is worried Arabs, because of a higher birthrate, could one day have a majority vote.

''I don't want your love. I have my state. If you don't like it, eat your heart out because it will be a Jewish state,'' he said.

#90296u0565 10/23/1990 ~United Press International

(OCT. 23) UPI - Stock prices on the Tokyo Stock Exchange closed higher Tuesday as plunging global oil prices spurred the market to its seventh consecutive gain.

The blue chip Nikkei Average of 225 selective issues, which gained 589.37 points Monday, added another 227.44 points to 25,298.30.

The broader-based Tokyo Stock Exchange Price Index of all listed shares edged up 1.26 points to 1,859.56. TOPIX shot up 42.01 points Monday.

Volume slipped to an estimated 550 million shares, down from 599 million shares Monday.

Advances outnumbered declines 553 to 429, while 129 issues remained unchanged.

Elsewhere in Asia, stock prices jumped more than 2 percent in heavy trading on the Hong Kong Stock Exchange, spurred on by an ease in worries about tension in the Gulf and lower oil prices.

The Hang Seng Index, which gained 23.61 points Monday, surged 65.67 points, or 2.18 percent to 3,081.23.

Volume was heavy as an estimated 1.4 billion shares traded, up sharply from 982 million shares Monday.

In Singapore, stocks firmed in active trading on the Singapore Stock Exchange in line with the surge in Tokyo and fading fears of war in the Mideast.

The Straits Times Industrial Index, which climbed 33.38 points Monday, gained another 36.67 points to 1,209.90. The broader-based All Singapore Index rose 10.21 points to 334.39.

An estimated 88.6 million shares changed hands, up sharply from the 72.3 million shares Monday.

In Seoul, stock prices on the Korean Exchange closed sharply higher in active trading for the sixth consecutive day.

In Manila, stocks closed higher in active trading.

In Australia, prices were higher in active trading on the Sydney Stock Exchange.

#90296u0619 10/23/1990 ~United Press International

SAN FRANCISCO (OCT. 23) UPI - Humphrey the wayward humpback whale, who enthralled the world five years ago when he apparently got lost and wandered through northern California for three weeks, is back and in trouble again.

An endangered humpback was spotted Monday, stranded on the mud flats in San Francisco Bay, creating a massive traffic jam as motorists slowed to catch a glimpse of the beached creature, who could easily be crushed to death by his own weight if he is not returned to deep water.

Marine biologists familiar with Humphrey's 25-day odyssey of 1985 positively identified him late Monday from photographs of the distinctive markings and shape of the underside of his tail, said Denise Springer of the Marine Mammal Center.

''Right now it's most critical because he's fully exposed. He's in the mud. The problem is he's an animal that's usually in deep water,'' she said. ''Right now he's on land and he could easily crush his organs. He's literally lying on his lungs.''

Springer said a half-dozen rescue workers are manipulating the whale to keep it constantly moving so it doesn't crush any of his vital organs. They are awaiting high tide to make their job easier.

Scientists took blood samples to determine if he is sick, but said he does not appear to be ill or injured.

The whale was first discovered around dawn by California Highway Patrol officers investigating an unusual early-morning backup on Highway 101 near Candlestick Park, just south of the city.

Thousands of curious motorists slowed in the northbound lanes and hundreds of people stopped to watch the whale, causing what one dispatcher called, ''a major, major mess.''

Peigin Barrett, a spokeswoman for the Marine Mammal Center, said the whale apparently became beached when it came too close to shore in a shallow part of San Francisco Bay. ''We were unable to determine if it was ill or just became lost,'' she said.

Three people in a small boat pulled in next to the whale and spent the morning splashing water on it to keep it from becoming dried out or burned by the sun.

Barrett said the splashing, and the presence of humans, might have stimulated the whale to work its way loose at high tide and move away from shore.

Escorted by two Coast Guard boats, the whale began moving toward the Golden Gate Bridge in a zig-zag pattern.

But about 3 p.m. it started moving in closer to shore and again hit the mud flats near the Hunters Point shipyard, 2 miles north of where it first became stranded.

Volunteers threw wet cloths over the whale to keep its body temperature from rising. Shallow waters prevented boats from getting close enough to pull the animal into deeper water.

Barrett said it is highly unusual for a humpback, an endangered species, to find its way into the shallow bay.

The 30-foot whale later named Humphrey gained international fame in 1985 when he toured San Francisco Bay and even drifted inland up the Sacramento River into the Sacramento-San Joaquin Delta.

Humphrey was eventually herded back out to sea and was sighted as late as last year ''living a normal life near the Farallon Islands,'' off San Francisco, Barrett said.

#90296u0628 10/23/1990 ~United Press International

LONDON (OCT. 23) UPI - Stock prices were higher in moderate trading at midday Tuesday on the London International Stock Exchange.

The blue-chip Financial Times 100-stock index, which gained 13.0 points Monday was ahead 23.8 points to 2,125.8. The narrower top 30 industrial average was up 23.9 points to 1,657.5.

Volume amounted to around 260 million shares compared with 177 million shares traded during the same period Monday.

Analysts said stocks moved higher boosted by the strong performance in Tokyo, where the Nikkei Average climbed 227.44 points for its seventh consecutive winning session.

Market watchers said stocks also moved higher as local investors sought selective blue chips with high yields at bargin prices.

Among the most widely traded stocks, Royal Bank of Scotland eased 6 cents to $2.77, B.A.T Industries climbed 33 cents to $10.95 and BET, an international support services company, lost 12 cents to $4.09.

British Petroleum gained 4 cents to $6.46 as the prices of North Sea Brent blend crude oil moved $1.50 a barrel higher in light trading in Europe.

Among some of the water stocks, Thames Water gained 6 cents to $4.49, Anglian Water added 12 cents to $4.45 and Severn Trent added 6 cents to $3.90.

Elsewhere, Imperial Chemical Industries gained 25 cents to $16.16 and Barclays Bank PLC added 16 cents to $7.03.

#90296u0651 10/23/1990 ~United Press International

SOUTHFIELD, MI (OCT. 23) UPI - Two small girls fell through a window screen and plunged five floors to the ground outside their apartment building but escaped without serious injury, authorities said. Shrubbery below the window was credited with cushioning the blow.

''Mass times velocity equals force but these girls, being young, probably didn't have much mass and the bushes slowed down their velocity,'' said Dr. John Downs, a sports medicine expert and medical professor at Michigan State University.

The accident occurred Monday afternoon at the seven-story Franklin Towers, said Police Lt. Elbert Guerrini.

He said Sara Noureodine, 4, and her sister, Ghada, 6, were standing near the window and the screen ''gave way.'' Both children fell 60 feet.

The incident was reported by their mother, Guona Noureodine, Guerrini said.

The children were treated at the scene and transferred to Providence Hospital where they were in temporary serious condition. Authorities said they apparently suffered no internal injuries and will stay in the hospital for observation.

''They're pretty lucky kids,'' nursing supervisor Gerry McCormick said.

Shocked neighbors heard cries of ''Mama, mama'' from the bushes after the girls fell.

''I heard these cries,'' said Cindy Kovalenko, a first-floor apartment resident. ''I saw two children lying on the ground.

Downs said childrens' bodies are more elastic than those of adults and ''can tolerate a degree of trauma that would be unacceptable to adults.''

A Lebanese-American woman who befriended the family at the hospital interpreted the mother's remarks, saying the girls were playing happily on the couch when they started pushing at the screen.

''The mother's in shock that this happened,'' the interpreter said. ''She said it's a miracle that they're still alive.''

The children's father is still in Lebanon, police said.

#90296u0653 10/23/1990 ~United Press International

CANBERRA (OCT. 23) UPI - Nelson Mandela thanked Prime Minister Bob Hawke and the Australian people Tuesday for their support in opposing apartheid and urged them not to drop sanctions against the white minority government in Pretoria.

Mandela, who arrived in the Australian capital Monday night from Indonesia, was warmly greeted by Hawke and Foreign Affairs Minister Gareth Evans when he arrived at the country's Parliament House.

He was driven there in a special armored anti-terrorist limousine amid tight security.

In a luncheon speech, Mandela, deputy leader of the African National Congress, appealed to the Australian government not to drop its sanctions against South Africa.

''Australia has made a significant and consistent contribution to the sports and cultural boycott,'' Mandela said. ''This campaign must be maintained inside South Africa, especially in rugby, cricket, tennis and athletics.

''We are optimistic that with the maintenance of economic sanctions we will hasten the achievement of freedom for South Africans who have yearned and fought for so long and sacrificed so much.''

Mandela accused the ''fanatic right wing'' within the ranks of the South African government security forces of orchestrating the so-called

black-on-black violence.

''It is an attempt to weaken the African National Congress and to derail the peace process,'' Mandela said.

The 72-year-old Mandela was given a standing ovation by 1,000 official guests at the end of his speech.

When he arrived at Parliament House he was cheered by about 50 people and asked for help by aboriginal activist Michael Mansell.

''What about the aboriginals, Mr. Mandela, what about the aboriginals?'' Mansell yelled, referring to the dark-skinned native inhabitants of Australia.

Mandela, moving from his car to greet Hawke, appeared not to hear the shout or see the activist who was standing behind the aboriginal black and yellow flag.

Mansell asserted that Mandela had come to Australia on the condition he not speak out on aboriginal affairs.

''The Australian government has insisted Nelson Mandela not make any comment about aboriginal people while he's here because they see us little aborigines as being their aborigines and nobody else has got a right to do anything about it,'' Mansell told reporters.

On his arrival in Canberra Monday, Mandela told reporters he did not want to become involved in ''the internal affairs of every country.''

''We are coming here to express our sense of gratitude,'' Mandela said. ''Recent visits to Europe, the United States and Indonesia have so far exceeded beyond our wildest dreams.''

On Monday, Evans ruled out any early lifting of Australia's sporting sanctions against South Africa until there is further change in the remaining policies of apartheid.

Evans conceeded it was possible Australia could begin lifting some of the sanctions before apartheid was totally ended.

''It is not time yet, there are many other pillars of apartheid still intact '' Evans said.

#90296u0662 10/23/1990 ~United Press International

NEW YORK (OCT. 23) UPI - The New York Stock Exchange reported Tuesday these odd lot transactions by principal dealers through NYSE facilities for Oct. 22: Purchases of 393,400 shares and sales of 459,346 shares including 16,620

shares sold short.

-30- 394
#90296u0706 10/23/1990 ~United Press International
(OCT. 23) UPI - Another day on Capitol Hill and another chance for budget negotiators to try and reach agreement on cutting the nation's red ink. Congressional and administration officials talked until late last night without reporting any progress in their dispute over how to trim the nation's deficit by 500-BILLION dollars during the next five years. Taxes and Medicare are the focus of the talks.

The Philippine military is increasing its presence in Manila on the eve of a general strike called by leftwing unions demanding wage increases. The demand for more pay comes in response to a 29 percent hike in petroleum prices due to the Persian Gulf crisis. Troops in the capital are on full alert following two explosions at two oil companies in the capital.

A plan to deploy Japanese troops to help the multinational forces in the Persian Gulf hit a major snag today in Tokyo. The nation's two biggest opposition parties began a parliamentary boycott to protest the bill drafted by Japan's Foreign Ministry. But Japanese T-V reports say backroom talks are making progress and a parliamentary hearing on the bill may resume Thursday.

President Bush is looking ahead to next year's Congress as he heads to New England and a day of campaigning. Bush hopes to improve the G-O- P's numbers in the Democratic-controlled Congress with stops in Vermont, New Hampshire and Connecticut. Bush has the fewest number of Republicans in the House of any G-O-P president this century. In the Senate, Democrats enjoy a 55-45 margin.

-30- 1692
#90296u0708 10/23/1990 ~United Press International
(OCT. 23) UPI - The executive director of the Leadership Conference on Civil Rights says a veto yesterday will- in his words- ''define the Bush presidency.'' Ralph Neas says Bush joined just two other U-S presidents... Andrew Johnson in 1866 and Ronald Reagan in 1988... in vetoing a major civil rights bill. Bush cited fears of quotas in rejecting the bill. An override appears unlikely.

A surrogate mother with NO genetic link to the baby she bore says she'll appeal all the way to the Supreme Court. A judge in Santa Ana, California, yesterday rejected Anna Johnson's claim to parenthood, calling her a ''hereditary stranger'' to the test-tube baby created from the egg and sperm of another couple. The first case of its kind may help re-define motherhood.

Health Secretary Sullivan is asking for help in getting a national consensus on what to do about increasing health care costs. In remarks to a Stanford

University audience this morning, Sullivan asked for help in finding solutions. Sullivan opposes national health insurance... but has NOT offered an alternative, saying he first wants a national consensus on the issue.

The longest recorded volcano eruption in history continues to threaten the homes that remain along a southeastern coast of Hawaii. Spewing lava from the Kilauea volcano destroyed yet another home in an evacuated community yesterday... then oozed closer to other homes. Nearby, scientists are monitoring two other flows. The lava has consumed a total of 180 structures.

#90296u0709 10/23/1990 ~United Press International

TOKYO (OCT. 23) UPI - The value of Japan's agricultural output in 1989 grew 5.1 percent over 1988 to $88.41 billion, posting the first year-on-year rise in four years, the Ministry of Agriculture, Fisheries and Forestry said Tuesday.

The ministry said income of farmers, including government subsidies, soared 15.3 percent to $36.9 billion.

Rice production was worth $26.13 billion, up 29.2 percent. Vegetable production was valued at $18.6 billion, up 0.8 percent, while fruit output soared 15.7 percent to $7.55 billion, the ministry said.

Reflecting strong demand, production of flowers climbed 10.7 percent to $2.56 billion, the ministry said.

Japan's grain output in 1990 decreased 4.0 percent from a year ago to 1.297 million tons - marking the second straight year-to-year drop - due largely to decreased acerage, the ministry reported.

The ministry said production of wheat, which accounted for 73 percent of the total grain output, dropped 3 percent to 951,500 tons.

Production of barley and oats also declined, the ministry said.

#90296u0761 10/23/1990 ~United Press International

BEIJING (OCT. 23) UPI - Hard-line government propagandists Tuesday breathed fresh fire into waning social-control campaigns, railing anew at the so-called ''six evils'' and extolling a major crackdown on crime.

The prominent mass media campaigns suggested conservatives were consolidating their grip on government propaganda at the expense of relative moderates, including propaganda chief Li Ruihuan.

For example, a rambling anti-pornography speech delivered to a national meeting Monday and published in Tuesday's People's Daily was written not by Li but by Liu Zhongde, a new voice in the Communist Party Central Committee's powerful propaganda department.

Chinese sources said Li has waged a losing battle to maintain his influence in communist propaganda, which the party and government blares constantly in an

attempt to mold popular opinion and public behavior.

Li was snubbed last summer when a prominent culture newspaper published the propaganda views of dozens of key communist leaders but failed to include his.

An investigation of the affair ordered by Li was scuttled by powerful conservative rivals, the sources said.

In the new propaganda blitz, state-run newspapers, television and radio gave broad coverage to the Beijing conference called ''Sweep Away Pornography'' and to another meeting held to renew the nationwide ''Hit Hard'' anti-crime campaign begun last May.

Both meetings resurrected one of the noisiest social-control campaigns of the past year, the drive against the so-called ''six evils'' - prostitution, pornography, abduction of women and children, illegal drugs, gambling and superstition.

In his speech, Liu said the anti-pornography drive would not affect China's decade-old social and cultural opening to the world, but he nevertheless warned against an influx of ''social and cultural garbage.''

''China has opened a window that has ushered in fresh air as well as flies and mosquitos,'' Liu said. ''It is good to have fresh air and the window should remain open, but flies and mosquitoes should be wiped out.''

''Illicit books and magazines pollute the social environment and could work to ruin the future of the state and nation,'' he added.

Liu said 32 million pornographic publications and 2.4 million ''yellow'' audio and video tapes had been destroyed in the ongoing anti- pornography campaign.

The order to renew China's sweeping and sometimes brutal drive against crime was issued at the ''Hit Hard'' campaign meeting by senior Communist Party leader Qiao Shi, China's security boss.

Qiao repeated the familiar official line that while the crackdown has succeeded in stabilizing China since the crushing of last year's pro-democracy ''rebellion,'' the security situation nevertheless is ''severe.''

''We have won big successes, stopping many kinds of crime with the aim of maintaining social security,'' Qiao said. ''But we must see clearly that the stability of these few months resulted from the 'Hit Hard' struggle and will not necessarily continue.''

Officials at the conference said 796,000 criminal cases had been cracked since the campaign began in May, 156,000 of which were rated serious. Newspapers have carried frequent accounts of swift criminal trials, with many criminals

executed immediately upon conviction.

But the officials said the ''Hit Hard'' campaign had not produced a precipitous drop in crime and should be extended to combat a spate of hijackings, murders, robbery and other violent crimes.

#90296u0762 10/23/1990 ~United Press International

HAMBURG, Germany (OCT. 23) UPI - Germany is likely this year to again replace the United States as the world's biggest exporting nation, the head of the General Agreement on Tariffs and Trade said today.

Top GATT official Arthur Dunkel said global economic strength depends on a free trading system, and Germany therefore has special responsibilities in the troubled Uruguay Round trade liberalization talks.

The negotiations are scheduled to end Dec. 7 but are deadlocked over agriculture with Germany in particular resisting a European Community offer to reduce huge farm export subsidies as the United States and other nations have demanded.

Dunkel did not refer to the German position as such in his speech to the business Overseas Club in Hamburg but he did say ''massive use of export subsidies'' must be curtailed.

Reforming agricultural trade is a ''critical'' part of the Uruguay Round but ''five weeks away from the end we are nowhere near this goal,'' Dunkel said.

He noted Germany replaced the United States in 1986 as the world's biggest exporting nation and held the position in 1987 and 1988, with the United States moving back into the top spot in 1989.

''My instinct is that when the data for 1990 are available we shall see Germany in (the) top place,'' Dunkel said.

''Such a performance would not be possible without the stable conditions of competition that only an open, liberal multilateral trading system can provide. And leadership has not only its glories but also its responsibilities.''

As the world's basic trade regulatory system, GATT provides the framework for the Uruguay Round, which began in 1986. The talks also are is deadlocked on the services and textiles sectors as well as agriculture.

#90296u0768 10/23/1990 ~United Press International

WASHINGTON (OCT. 23) UPI - The money-losing federal crop insurance program, a disappointment for the past decade, would have to improve its financial performance under a bill being sent to President Bush.

The bill, which appropriates $52.1 billion for the Agriculture Department and related agenices for fiscal 1991, allows crop insurance to remain in operation if it is ''at least 75 percent actuarially sound.''

In addition, another Agriculture Department agency would be in control of sales and loss adjustments.

Half of the money in the agriculture appropriations bill would go to public food programs, including $19 billion for food stamps, $5.6 billion for school lunches and other child nutrition programs, and $2.35 billion for the Women, Infants and Children food program.

The House and Senate passed the bill on voice votes Monday, sending it to the White House for Bush's signature. The legislation was a compromise between House and Senate proposals.

Despite recent increases in farmer participation, enrollment in the crop insurance program is lower than anticipated when the program was reorganized a decade ago. It swallows an average of $500 million in subsidies each year but has not dissuaded Congress from enacting special disaster-relief laws whenever there is widespread crop failure.

The Bush administration proposed termination of the program with this fall's harvest but Congress refused, although it could not agree how to reform the program.

In addition to the instructions in the appropriation bill, the farm policy bill awaiting final congressional approval calls for the first steps toward reform of crop insurance. It includes higher premiums, wider offering of coverage and requiring insurance companies to carry more of the risk on policies.

At present, the government subsidizes 30 percent of the premiums paid by farmers.

Chairman Jamie Whitten, D-Miss., of the Appropriations Committee said he wanted to see the program run more efficiently. Last summer, Whitten's committee led a House-approved attempt to effectively shut down the program unless it was reformed.

''We are not against it. ... We went along with it and hope it will work again '' Whitten said.

Overall, the agriculture appropriations bill would spend $6.9 billion more

than the fiscal 1990 appropriation, mostly due to increased funding for nutrition programs. Nonetheless, it would be within budget guidelines for this year. It rebuffs an administration proposal by providing $974 million for food assistance in Puerto Rico. The adminstration wanted to transfer the program to the Health and Human Services Department.

The Export Enhancement Program, the major U.S. export subsidy program, would be scaled back to $475 million, down $75 million, and the Target Export Assistance Program held to $175 million, down $25 million.

Rep. Silvio Conte, R-Mass., in complaining about earmarking of money for special projects, cited an allocation of $500,000 to restore band leader Lawrence Welk's birthplace near Strasburg, N.D.

''What will they do for an encore? Restore Artie Shaw's wedding tuxedo?'' Conte asked.

#90296u0777 10/23/1990 ~United Press International

OTTAWA (OCT. 23) UPI - The Canadian dollar opened slightly higher on international markets Tuesday, hours after Finance Minister Michael Wilson said the country is in an economic recession.

Wilson told a Parliamentary finance committee late Monday night he has seen some third-quarter statistics that indicate a further decline in output.''However, we do not expect this to be a severe recession,'' he added.

Despite Wilson's admission, the first time he has used the word recession to describe economic activity, the Canadian dollar opened at 85.23 cents Tuesday, up slightly from Monday's close of 85.07 cents.

Gross domestic product declined in the second quarter of 1990. A decline in the third quarter would meet the technical definition of a recession. ''That appears to be what we are in right now,'' he said.

He said Canada had 7 1/2 years of very strong growth after the last recession in 1981-82.

The economic slowdown has been compounded by major work stoppages, the crisis in the Middle East and the weakening U.S. economy, Wilson said, adding he hoped to reveal plans for dealing with the recession at a meeting in December of provincial and federal finance ministers.

Wilson also said he expected the economy to recover by next spring.

His optimism contrasted sharply with a report issued Monday by the Royal Bank of Canada that indicated the recession could last as long as a year.

The bank's chief economist, Edward Neufeld, said consumers could not expect any increase in their standard of living for the next year or so and should concentrate on trying to keep their jobs.

Neufeld also predicted unemployment would rise to 9 percent during the height of the recession, substantially below the 1981-82 figure, from its current 8.4 percent.

#90296u0813 10/23/1990 ~United Press International

BERLIN (OCT. 23) UPI - The trust fund agency in charge of privatizing the 8,000 formerly state-run East German companies has to date converted 200 businesses, an agency director said Tuesday.

Within the next two years, the agency expects to determine which companies can be privatized and which would remain federal or state properties, said agency director Birgit Breuel in an interview with Berlin radio.

Breuel said investments in the eastern German economy will also open eastern European markets to western companies.

''Those who invest today in the five new German states also know that they are opening the door to Poland, Czechoslovakia, Bulgaria and the Soviet Union,'' she said.

She said it is essential to transform the companies into competitive participants in the free market.

The trust fund agency - Treuhandanstalt - was established as part of the economic and monetary union between the two German states, which went into effect July 1 and in advance of Oct. 3 unification.

Ever since the East German market opened to imports, local companies have had trouble competing with high-quality western goods and investors hesitated to enter joint ventures or buy the firms close to bankruptcy.

The agency has been widely criticized for failing to attract investors, and its first chairman, Rainer Gohlke, resigned after three months on the job.

''The situation is worse than I had assumed,'' said Gohlke when he took over the agency in July.

''We have chaos, nothing works normally, one falls from one ditch into another '' he said.

#90296u0821 10/23/1990 ~United Press International

RIYADH, SAUDI ARABIA (OCT. 23) UPI - Loud explosions, thick smoke and massive insect deaths.

Those are the warning signs of an Iraqi chemical attack, according to a booklet being distributed in Saudi Arabia by civil defense authorities on the proper use of gas masks.

The booklet says citizens should don their masks immediately if they hear a series of explosions, accompanied by thick smoke, massive insect deaths and oil stains, the English-language Riyadh Daily reported Tuesday.

Saudi officials have previously said they are buying about 3 million masks to guard against the possibility Iraq might be tempted to use some of its chemical weapons against civilian targets. There has been no word on when or how the masks would be distributed.

Authorities in Israel have started distributing gas masks to all citizens because of threats from Iraqi President Saddam Hussein, who said he would ''burn'' half the Jewish state with his chemical weapons.

The masks were not provided to Palestinians in the Israeli-occupied West Bank and Gaza Strip, who do not pay Israeli income taxes. The government said it would sell masks to the Palestinians.

Arab citizens of Israel, however, are entitled to the gas masks and hundreds of people from mostly Arab East Jerusalem came to pick up the chemical weapons protection kits Tuesday, ignoring leaflets issued by the underground Palestinian leadership ordering a boycott of Israeli civil defense measures.

U.S. soldiers stationed in Saudi Arabia have each been issued special full-body suits to protect against a chemical attack. They also carry syringes to inject themselves with an agent to neutralize the effects of poisonous gas.

The booklet published by Saudi Arabia's Civil Defense Directorate said the agency could help with putting out fires, provide first aid and offer housing and food if necessary.

But the pamphlet adds, ''It cannot dig trenches, or build shelters in every house, or turn off the lights in every home or carry out hundreds of the simple duties you should do to protect your family and belongings.

''All of you are the civil defense because you protect yourself, family and country,'' the pamphlet says.

#90296u0840 10/23/1990 ~United Press International

WASHINGTON (OCT. 23) UPI - The House ethics panel directed Rep. Donald Lukens R-Ohio, convicted last year for having sex with a teenage girl, to appear Tuesday to answer fresh allegations of sexual misconduct.

The House Committee on Standards of Official Conduct, which conducted a preliminary investigation into the earlier charges against Lukens, said in a statement Monday that since that inquiry ''the committee has received additional evidence indicating that Rep. Lukens may have made unwanted and unsolicited sexual advances to a congressional employee.''

The 12-member committee also stripped Lukens, 59, of some of his defense rights under House rules and ordered that Lukens appear before the committee Tuesday afternoon.

The panel voted that ''for the purpose of allowing this committee and the ... House to fully consider all issues before it concerning the conduct of Rep. Lukens, that pursuant to Rule 7, all time-frames provided under the committee's standing rules of procedure that apply to any statement of alleged violation that might be issued are hereby waived.''

Lukens' office issued a statement late Monday saying, ''My attorneys have advised me that since little or nothing is known about the new allegations, there will be no comment until we have more information.''

Lukens, who has served in the House from 1967 to 1971 and since 1986, was convicted in May 1989 in Franklin County Juvenile Court in Columbus on a charge of contributing to the unruliness of a minor for having sex with a 16-year-old girl.

Lukens, who did not testify or present any witnesses on his behalf, was sentenced to 30 days in jail, fined $500 and ordered to attend counseling for sex offenders.

The conviction was upheld by an appeals court and is now before the Ohio Supreme Court.

He refused repeated demands from Republican Party leaders that he resign, but he was defeated in a bid for re-election in the primary election in May, finishing a distant third in a four-man race.

In Columbus, Ohio Republican Party Chairman Robert Bennett again called on Lukens to resign.

''Buz Lukens was defeated in the primary,'' Bennett said. ''We came out and asked him to resign a year ago. I think it would be best for all concerned if he had resigned.

''I think it's unfortunate that we have now another incident, assuming that to be true, and this is the first I've heard of it. I think that is unfortunate and I would again encourage Buz Lukens to resign his office.''

Lukens, a hardline conservative from Middletown in southwest Ohio, was once one of the brightest stars in the Republican Party.

As a young conservative, Lukens teamed with Rep. John Ashbrook of Ohio, William Rusher, editor of the National Review, Tennessee businessman William Brock, F. Clifton White of New York and other arch- conservatives to defeat the moderate wing of the Republican Party and nominate Barry Goldwater for president in 1964.

Lukens's 10-year marriage ended in divorce in 1983, and soon thereafter he was battling throat cancer, an ailment that left him scarred at the neck.

#90296u0864 10/23/1990 ~United Press International

(OCT. 23) UPI - The latest temporary funding authorization holding the federal government together ends tomorrow, and top congressional leaders say they may try to get another stop-gap measure passed to keep the government going. All of this comes as Congress also battles over approving a budget for a fiscal year that began 23 days ago. The talks ended late yesterday with NO agreement reached.

A chartered Boeing jumbo jet carrying doctors, nurses and medical equipment is heading for Baghdad today to pick up some 64 sick and elderly British and Americans held hostage in Iraq. They are being freed after an appeal by former British prime minister Sir Edward Heath. The Virgin Airways evacuation flight is expected to arrive back in London early tomorrow. .

A top Saudi Arabian official who seemed to be saying that Kuwait should give Iraq two Persian Gulf islands in exchange for peace says he was misinterpreted. The Saudi defense minister made the reference to two islands that Iraq tried to lease for decades before it launched the August invasion. But the Saudi official said today that he was misinterpreted and believes Iraq should withdraw from all Kuwaiti territory.

In Paris, French officials announced they were sending 500 more troops to the multi-national force in the Persian Gulf. The new deployment will increase to 55-hundred the number of French troops in the multi-national force.

Opposition parties in Japan are boycotting a parliamentary debate about sending Japanese troops to the Persian Gulf area. The post-war constitution prohibits Japan from ever sending combat troops to foreign lands. The Japanese government says the force it wants to send to the Persian Gulf will take only NON-combat roles. But opposition has grown over plans to equip the troops with

side-arms for self-defense.

President Bush is in New England today, stumping for Republican congressional candidates, amid slumping polls and a sluggish economy. Bush is making appearances today in Burlington, Vermont... Manchester, New Hampshire, and Waterbury and Stamford, Connecticut. Bush will be campaigning for congressmen who broke with his administration in defeating a deficit-cutting budget package in the House.

Philippine authorities blame the communist New Peoples Army for explosions that rocked two oil company offices in Manila yesterday. There were NO injuries reported, and damage was minimal. The blasts came as the left-leaning Labor Advisory Council prepares for a nation-wide general strike tomorrow to back demands for 29 percent pay hikes. The Communists have announced their full support for the strike.

Controversial Rabbi Meir Kahane was forcibly removed from a stage during a speech last night as he called for the expulsion of all Arabs from Israel and Israeli-occupied territory. A former member of the Israeli parliament, Kahane is a former American who founded the militant Jewish Defense League in the United States. Police removed him from an auditorium at the University of Wisconsin in Madison to prevent trouble with about 100 angry protesters in the hall.

#90296u0875 10/23/1990 ~United Press International

BERLIN (OCT. 23) UPI - The former East German Communist leadership apparently embezzled millions of dollars West Germany paid over the years to maintain highways into West Berlin, a Berlin daily said Tuesday.

The East German government, ousted last fall in a peaceful revolution, transferred part of about $6 billion it received from West Germany since 1972 into secret bank accounts, the Berliner Morgenpost said, citing a government report.

For 17 years until 1989, Bonn paid the Stalinist East German government led by Erich Honecker an annual fee of $345 million to maintain the three highways leading to West Berlin.

But the report showed that between 1986 and 1989, the East German government only used between 330 million and 420 million in East German marks a year to keep up the roads, the newpaper said. The East mark, virtually worthless and not convertible, was replaced by the strong West German mark July 1 ahead of German unification on Oct. 3.

The report said the government tried to cover up for the embezzlement of the transit funds through an obscure bookkeeping system, which was only known to ''a small group of insiders in the East German Finance Ministry.''

It said the East German Finance Ministry would illegally ''top-up the state budget'' with the transit funds.

The 1971 transit agreement between East and West Germany, which was part of West German Chancellor Willy Brandt's approachment to Eastern Europe - explicitly stated the funds should only be used for maintaining the highways.

#90296u0885 10/23/1990 ~United Press International

NEW YORK (OCT. 23) UPI - Latest metal market prices as quoted Tuesday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 81.50-85.50 c- lb.

Antimony, domestic, refined in alloy, $2.00 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 130.00-131.00 c-lb.

Lead, common, U.S. primary producers 42.00-52.00 c-lb.; U.S. non- primary (secondary) producers 48.00-52.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $225.00-$240.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $4.50-4.75 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $102.00-$107.00 per troy ounce.

Platinum, soft, 99.5 fine, producer - $418.50-$459.00; dealer- approx., $419.50-$460.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $113.00-$114.17 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $105.67 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 294.75 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $7.80-9.59 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.00-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 80.00 c-lb.

#90296u0891 10/23/1990 ~United Press International

CONNERSVILLE, IND (OCT. 23) UPI - Stant Inc., a manufacturer of automotive parts, Tuesday asked the International Trade Commission to issue an order stopping the importation and sale of some foreign-made fuel and radiator caps that the company contends infringe on its patents.

Stant's complaint, filed under Section 337 of the Tariff Act of 1930, names as respondents Gin Seng Industrial Co. Ltd. of Tainan, Taiwan, which makes and

exports fuel and radiator caps which Stant said are copies of its protected products. Also named in the complaint are Chieftan Automotive Products of North Augusta, S.C.; Pic 'N Save Stores of Jacksonville, Fla., and Transworld Products, Inc. of Shawnee Mission, Kan., which Stant contends sell the products Gin Seng makes.

Stant, based in Connersville, also contends that certain promotional materials Gin Seng distributed in the United States with its products infringe on Stant's federally registered trademarks and copyrights.

Stant President David R. Paridy said his company sought ITC action not only to protect and enforce the company's property rights, but because the foreign products are of inferior quality and are being confused with Stant products.

Paridy said Stant's action will help prevent erosion of U.S. jobs and protect the domestic industry for the products his company makes.

The Tariff Act states in part it is illegal for persons to engage in unfair methods of competition, including infringing on U.S. patents, trademarks or copyrights, when importing or selling foreign-made products in the United States.

Stant's attorney, Alan R. Malasky of Washington, D.C., said the ITC, in Washington, has 30 days to determine whether it will institute formal proceedings against the respondents. A final ruling could come within a year, Malasky said.

Stant manufactures fuel and radiator caps involved in the ITC proceeding at its Pine Bluff, Ark., factory. The company also produces fuel and radiator caps at its Connersville plant.

In addition to the fuel and radiator caps, Stant manufactures automotive thermostats and is a major supplier of automotive heating and cooling system components. The company also designs on-board vapor recovery systems used to capture automotive emissions during refueling.

#90296u0898 10/23/1990 ~United Press International

PROVIDENCE, RI (OCT. 23) UPI - The city School Board plans to argue before the U.S. Supreme Court that mentioning a deity at public school graduations is as acceptable as it is in the Pledge of Allegiance, on U.S. currency, and at government forums.

''We're not talking about a minister, priest or rabbi proffering a prayer of fire and brimstone,'' board lawyer Joseph Rotella said Tuesday. ''We're talking about something very nonsectarian. Where a prayer is the periphery element, there are cases that say it is not in violation of the separation of

church and state.''

Rotella's assessment of the situation differed greatly from that of Steven Brown, director of the Rhode Island chapter of the American Civil Liberties Union.

''The basic point is that government should not be involved in sponsoring religion,'' Brown said, adding the the ACLU will file a brief asking the Supreme Court not to review the case.

''Whether it is directly offensive to a religious minority, the mere use of prayer in such a setting offends beliefs about how and when prayers should be given.''

The board voted without dissent Monday night to have the high court review the ruling of a federal judge in Rhode Island, who said the mention of a deity in public school graduation openings and closings violates the constitutional separation between church and state.

Last January, U.S. District Judge Francis Boyle barred the School Department from having mentions of ''God'' or any other deity at graduations this year and the 1st U.S. Circuit Court of Appeals agreed with him.

Some at Monday night's meeting questioned the wisdom of spending the time and money to appeal the decision when the likelihood of success appears slim.

But Rotella said the issue is a hot and contentious one in many states, including Utah, which has offered the School Board its support.

''It's a grey area that some definitive statement from the court might help solve,'' said Rotella, who estimates the appeal will cost $30,000 to $50,000.

#90296u0904 10/23/1990 ~United Press International

WASHINGTON (OCT. 23) UPI - The leaves are falling, mornings are darker, the air is crisper and that means just one thing - daylight-saving time is at an end and it's time to change your clocks and ''fall back'' an hour.

The change will come on Oct 28, the last Sunday of the month, and clocks should be set back one hour at 2 a.m. local time, ending the 7- month-long period of brighter evenings and giving most people an extra hour of sleep.

And, as you change your clock, your local fire department wants you to change the batteries on your smoke detectors as well.

The International Association of Fire Chiefs, the American Burn Association and the Eveready Battery Company, who are promoting the campaign to link

changing the clocks and changing smoke detector batteries in the public mind, said that each year as many as 6,000 people die and 130,00 are injured in home fires.

Although nearly 80 percent of all homes have at least one smoke detector, as many as half are useless because their batteries are old or dead.

In the effort to link the two changes, fire departments across the country - from Atlanta to Los Angeles, and Marinette, Wis., to Failmont, Okla. - will wage a nationwide door-to-door canvas on Saturday, Oct. 27., to check and change smoke detector batteries in high fire-risk neighborhoods.

The seven months of daylight-saving time now observed is based around the idea of providing an equal amount of extra evening sunlight on either side of the hotest days of the year, generally in late July.

It has not always been so, and not everyone in the United States observes the practice.

For instance, Hawaii, Arizona, the Eastern Time Zone part of Indiana, Puerto Rico, the Virgin Islands and American Samoa are excluded from having to make the change.

Historically, the idea of juggling the hour hand about to adjust personal schedules to the longer and shorter days can be traced to Benjamin Franklin, who wrote a paper while serving as the U.S. envoy to France recommending that shops be opened and closed earlier during summer months to cut the costs of providing lighting.

William Willett began urging the adoption of daylight-saving time in England and during World War I it was adopted by England, France, Germany and a few other nations.

The United States took up the concept late in the war when President Wilson, on March 31, 1918, signed legislation promoted by Robert Garland of Pittsburgh. However, it was repealed the following year.

In the United States the practice was revived in World War II, and in 1966 the Uniform Time Act provided for the first nationwide observance of daylight-saving time during peacetime.

During the energy crisis of 1973 and 1974 the nation went to daylight-saving time year-round to conserve energy, but standard time was reinstated late in 1974 for the four-month winter period with the fewest hours of daylight.

Always a controversial issue, a study by the Department of Transportation - which has responsibility for administering the law because of the one-time need for standardized railroad schedules - has shown the practice enhances the

public safety.

The study, done during the energy crisis of 1973-74, indicated a 1.5 percent to 2 percent reduction in March and April highway traffic deaths without any increase in hazards to early morning travelers.

It showed a 6 million barrel savings in oil use for March and April.

BERLIN (OCT. 23) UPI - Former East German school teachers who escaped to the west must repeat teachers' exams, while those who stayed and served under communism are allowed to continue working in unified Germany, a Berlin newspaper said Tuesday.

Although East and West Germany united on Oct. 3, the country remains divided for school teachers.

Teachers from formerly East Germany who want to teach in what used to be West Germany have to complete two-year assistantships followed by a state exam.

But those who choose to stay in the eastern part of Germany are allowed to continue teaching there. Only a year ago, they were still teaching under the Stalinist leadership of Erich Honecker.

''Those who turned their backs on the Communist regime at great personal cost are now being punished for their courage and logic,'' said Manfred Meyer, 45, a physical education teacher who emigrated from East to West Germany.

''After months of unemployment, I have to pass my second set of teachers' exams at the age of 45,'' Meyer said.

An estimated 300 teachers from East Germany will have to take exams to teach in western Germany, the Berliner Morgenpost newspaper said.

Government officials said the policy was designed to keep teachers from deserting the new part of Germany to work in the west, a problem that would strongly affect Berlin.

''We want to prevent a storm of ex-East German teachers from coming to the schools in the west part of the city,'' said Stefan Woll, a speaker of the West Berlin Senate. Berlin retains separate governments until Dec. 2 local elections.

MINNEAPOLIS (OCT. 23) UPI - A 47-year-old heart transplant patient died after he received a heart with the wrong blood type, officials said Tuesday.

The man, who was not identified, had type O blood and received a heart from a person with type A blood, said Dr. Robert Emery, director of heart transplantation for Abbott Northwestern and the Minneapolis Heart Institute.

The man's blood type was listed incorrectly on a transplant matching computer, he said.

Emery said he prefers to give patients with type O blood only hearts from type O donors to reduce the risk of rejection. People with type O blood are universal donors but not universal receivers.

The transplant was performed Oct. 11 and for seven days the anti- rejection drugs seemed to control the mismatch. Then, within a few hours, the patient's body turned on the heart and destroyed it as foreign tissue, Emery said. The man died last Friday.

Laboratory personnel discovered that the patient actually had type O blood shortly after the new heart began functioning in the man's chest. The survival rate when hearts from type A donors are transplanted into type O recipients is not more than 60 percent, Emery said. Otherwise the likelihood of survival would have been closer to 100 percent.

Emery said the man's family was notified immediately of what had happened. Doctors put out a call for a second heart but none became available, he said.

Because of kidney failure, the man was not eligible for an artificial heart to carry him until a properly matched heart became available.

AMMAN, JORDAN (OCT. 23) UPI - A leading Jordanian charity organization Tuesday accused the U.N. Security Council's sanctions committee of purposely delaying approval for a shipment of food and medicine to Iraq.

The General Union of Voluntary Societies made the criticism one week after the Jordanian government issued a blanket order against all shipments to Iraq in order to counter criticisms it was flouting the international boycott against Baghdad.

The charity previously sent three shipments of food and medicine since the U.N. sanctions were imposed in response to Iraq's Aug. 2 invasion of Kuwait, but the Jordanian government said all future shipment would first need specific U.N. approval.

The group, a mother organization for such charities, said in a news release Tuesday the U.N. sanctions committee, established to resolve questions about the embargo, has not replied to its request filed one week earlier.

''We notice that the technical measures concerning children's food and medicine to Iraq imposed by the Security Council are attempts to obstruct the right of the children to food and medication,'' the statement said.

The charity accused the Security Council of breaching agreements of the Geneva Convention of 1949 by using food and medicine as a basic component of U.N. Security Council Resolution 661, which imposed the embargo on Iraq.

''It is obvious that this trend contradicts international law and human rights '' the statement said.

Resolution 661 banned shipments to Iraq and Kuwait ''but not including supplies intended strictly for medical purposes, in humanitarian circumstances foodstuffs ... .''

The Jordanian government stopped the latest shipment by the organization on Oct. 14, only two hours before the convoy of 16 trucks was to leave Amman with its cargo of donations from individuals and institutions intended for Iraqi children.

Since Saturday, the government of Jordan has stopped all trucks carrying any supplies to Iraq, including food and medicine, from leaving the country.

The English-language daily Jordan Times on Tuesday quoted a security official as saying only empty trucks with authorization to bring back Jordanian expatriates' household goods and other personal effects were allowed to cross the border to Iraq.

The official said only oil was allowed to come to Jordan from Iraq as a repayment of debts to Jordan and that there was U.N. approval.

Two shipments of medicine were stopped from crossing the border into Iraq last weekend for the first time since sanctions were imposed on the country.

But according to a source at a pharmaceutical manufacturer whose shipments were stopped, Prime Minister Mudar Badran verbally agreed Tuesday to permit medicine shipments to Iraq after he agreed Resolution 661 excluded medicine from the embargo.

#90296u0968 10/23/1990 ~United Press International
WASHINGTON (OCT. 23) UPI - Despite drug awareness lectures from parents, teachers, bumper stickers and commercials, a national survey of fifth and sixth graders released Tuesday reveals the message is still not getting through to many.

The telephone poll of 250 fifth graders and 250 sixth graders was conducted by Drug Abuse Resistance Education, or D.A.R.E., a project sponsored by Kentucky Fried Chicken. The results were ''alarming,'' the report said.

''The sad fact is,'' Robert Bonner, head of the Drug Enforcement Administration, said at a news conference, ''that by the seventh and eighth grade, kids in our society are already exposed to drug peddlers.''

D.A.R.E.'s national chairperson Tempestt Bledsoe, who plays Vanessa Huxtable on NBC's ''The Cosby Show,'' said the television and movie industry does a poor job of showing children resisting drugs.

''It's time for the entertainment industry to be responsible for its own

actions and just not say (their programs) reflect society,'' said the actress, who is also a New York University freshman.

Bledsoe said she finds it ''irresponsible'' for prime-time television shows to portray young people ''wondering where their next keg is.''

The poll showed that fifth and sixth graders apparently do not have to wonder where to find drugs, if they so desire.

One out of five youngsters in both age groups said they had seen drugs or alcohol at school, the shopping mall or where they hang out. Beer and cigarettes were the most commonly seen substances, but marijuana, cocaine and crack and other types of alcohol were recognized. One percent of fifth graders said they saw ''ice,'' a potent methamphetamine.

Along those lines, 34 percent of fifth graders and half of the sixth graders said they have seen or heard of a youngster or group of kids at their school who have either smoked cigarettes, drunk beer or liquor or used drugs.

One out of 10 kids said they would know where to find drugs if they wanted to use them - 11 percent of fifth graders and 8 percent of sixth graders.

However, just 2 percent of fifth graders and 4 percent of sixth graders said they actually had been offered drugs, such as marijuana. Eight percent of fifth graders and 14 percent of sixth graders said they had been offered alcoholic beverages.

More than half of the students were able to correctly describe cocaine, crack and marijuana, although the question did not ask if their knowledge was from classroom education or personal experience.

Students overwhelmingly expressed negative attitudes toward trying or using marijuana and other drugs. They also described the behavior of people on drugs in negative terms - 30 percent thought drug users act ''weird'' and 14 percent said they seem ''crazy.''

One-third of the students said they probably will have tried alcohol at least once by the time they enter high school, 21 percent expected to sample smoking by that time and 7 percent reported they probably will have dabbled in drugs at least once.

The interviews revealed peer pressure plays a role in a child's use of drugs or alcohol.

Glenn Levant, Los Angeles deputy police chief and director of D.A.R.E., said the best way to arm a child against those pressures is to promote positive self-esteem.

''The results of this survey underscore the need to reach out to children in this age group when peer pressure is beginning to have a significant impact on their lives,'' Levant said.

(OCT. 23) UPI - A Virgin Airways jumbo jet left London's Gatwick Airport for Baghdad today to evacuate about 64 elderly and ailing British and American hostages from Iraq. Four doctors and seven nurses are aboard the Boeing 747 to handle any medical problems the evacuees may have.

The mercy flight was arranged by former British prime minister Edward Heath, who is on a humanitarian mission in Iraq. Heath made a personal appeal to Saddam Hussein last weekend to free sick and old hostages. The B-B-C says 50 Britons and 14 Americans will be released.

Prime Minister Thatcher met with the exiled emir of Kuwait today. And British and Kuwaiti officials said they would NEVER trade Kuwaiti territory in a deal to get Iraq's estimated 400-thousand troops to withdraw.

The House Ethics Committee is considering new charges of sexual misconduct against Ohio Congressman Donald Lukens. The new charges involve unwanted advances to a congressional employee. Last year, the panel convicted Lukens of having sex with a 16-year-old girl. The Republican has been directed to appear before the committee this afternoon.

Syria's vice president is on an unexpected visit to Beirut today to boost peace efforts by Lebanon's President Elias Hwari following the defeat of renegade Christian General Michel Aoun . Syria is backing efforts to rid Beirut of warring militias.

Israel has stepped up security in Jerusalem, with another two- thousand police called into the city to put down any violence. The latest incident occurred in northern Israel when two women soldiers waiting at a roadside army hitchhiking stop were stabbed, one seriously, by a West Bank Arab.

South African President Frederik de Klerk is in Holland for talks with top government officials, six months after the Dutch rejected plans for an earlier visit. The thaw comes as de Klerk opens a dialoge with the African National Congress. Traders from Holland founded South Africa 400 years ago.

Shrubbery growing five floors below is credited with breaking the fall of two small girls in Southfield, Michigan, yesterday. The children fell about 60 feet... but neither was seriously injured, although they remain hospitalized for observation.

The international embargo against Iraq now covers the mail. Postal authorities

from the Gulf Co-operation Council say Iraqi stamps are NO long valid and that mail carrying them will be returned. The move is an effort to further isolate Iraq.

Humphrey the whale is back and just as confused as during his first foray into the San Francisco Bay in 1985. Scientists have positively identified the humpback whale stuck on a mud flat as the same one who wandered around the California shore for three weeks before finally getting back to sea. They hope Humphrey's luck will be as good this time.

ROANOKE, VA (OCT. 23) UPI - The constitutional fight over Virginia Military Institute's all-male admissions policy is back in federal court Tuesday after nearly five months of behind-the-scenes legal wrangling in the discrimination case.

A woman, Attorney General Mary Sue Terry, is leading the state's fight to keep women out of VMI.

More than a dozen lawyers are expected for pre-trial arguments and U.S. District Court Judge Jackson Kiser may set a trial date to decide the controversy that was ignited last year when an unidentified female high school student complained that could not attend the state-supported military institution.

The U.S. Justice Department, which reviewed the young woman's complaint, warned Virginia in January it was violating the U.S. Constitution and the Civil Rights Act by refusing to admit women. When the school and the state refused to budge, the Justice Department sued on March 1.

Before the Justice Department's lawsuit, however, both the state and the VMI Foundation, a private fund-raising arm of the school, filed pre- emptive strikes demanding the policy be declared constitutional.

The lawyers last met in the U.S. District Courthouse in Roanoke on June 4, where Kiser ordered them to work together to resolve as many issues as possible, including attempts to agree on facts and suggested compromises as to who will be defendants, before the start of formal arguments on pre-trial motions.

Except for summer programs, no woman has attended the Lexington school that has prided itself on turning out ''citizen soldiers'' during its 151-year history.

Terry, who wants to be the Democratic nominee for governor in 1993, stopped short of endorsing the all-male policy but argues it is defensible because it

contributes to a broad range of educational programming in the state. She also claims women can receive a similar military education in the ROTC program at Virginia Tech.

Last Friday, Terry asked Kiser to dismiss the state's lawsuit, saying it was duplicative. Terry spokesman Bert Rohrer also said dropping the lawsuit means the burden will be on the Justice Department to prove VMI's policy is illegal, rather than the state having to prove it is legal.

Other observers said the suit had served it tactical purpose - forcing federal attorneys to fight the discrimination battle in conservative Western Virginia rather than in a Washington, D.C., federal court.

Court documents indicate the effort to resolve pre-trial issues has been partially successful but major issues remain. Attorneys have agreed to stipulate more than 100 items but they remain deadlocked on hundreds more.

They also have not compromised on motions by Virginia Gov. L. Douglas Wilder and the state Council on Higher Education that they be dismissed as defendants in the federal lawsuit. Both Wilder and the council claim they have no control over the school's admission policy.

The governor, who was denied admission to state law schools because he is black, has refused to take a position on the VMI dispute.

Both those demands to be dropped as defendants are scheduled to be argued Tuesday.

The Justice Department also remains adamant that the VMI Foundation has no overriding interest in the dispute and therefore should not be involved. The department wants the foundation's lawsuit dimissed.

The foundation is demanding the right to intervene. It argues it controls an endowment of nearly $100 million for the school, and in papers filed a week ago contends it has already been forced to delay major fund-raising efforts and to accept more conditional donations until the issue is settled.

VMI and The Citadel in Charleston, S.C., are the only state-run, all- male schools in the country.

#90296u1005 10/23/1990 ~United Press International

NEW YORK (OCT. 23) UPI - The first of a string of witnesses to the Central Park rampage last year by a group of youths that raped and beat a female jogger testified Tuesday he managed to escape the mob by speeding away on his bicycle.

Michael Vigna, 31, testified in State Supreme Court at the trial of Kharey Wise, 18, and Kevin Richardson, 16, and described the night of April 19, 1989, when he came upon the group of youths.

He said one of them leaped at him and took a swing with his fist but he swerved his bike and managed to escape.

''I felt the wind by my ear,'' Vigna said of the attempted blow.

Vigna was to be followed by two other bicyclists and four male joggers attacked or menaced by the mob, which also ran down a female jogger and dragged her into bushes where she was beaten and gang-raped.

Tuesday's testimony followed a bizarre outburst Monday by Wise, in which he pounded his head with his fist and screamed, ''I can't take it - No, no, no, no!''

Wise lunged forward in his seat and vomited on the floor as the final juror filed out of the courtroom during a recess. He was surrounded by four court officers as he sobbed and cried.

His attorney, Colin Moore, tried to assist him, but the young man yelled, ''Tell the jury this is wrong. It's not right. That woman is lying!''

The wrenching outburst came just after Assistant District Attorney Elizabeth Lederer in her opening statement told jurors that Wise and Richardson had led police to the scene of the attack.

Later, Richardson's lawyer, Howard Diller, asked Justice Thomas Galligan to declare a mistrial, describing Wise as ''foaming at the mouth.'' He claimed four or five jurors were still in the courtroom when it began, but the prosecution team maintained the entire jury panel was out of the room.

Galligan refused to grant a mistrial but warned Wise that another hysterical outburst would cost him a seat at his own trial.

Throughout Lederer's opening statement, Wise shook his head and mumbled to himself.

In her opening statement, Lederer told the panel Wise and Richardson made written and videotaped statements to police in which they admitted being involved in the attack in which the woman was gang raped, bashed into unconsciousness with a metal pipe and a rock and left for dead in a muddy gully.

Lederer told the panel that a pubic hair similar to that of the blonde jogger was found on Richardson's T-shirt. She also said head hair similar to that of the jogger was found on Richardson's underwear and jeans.

The testimony of the native of Upper St. Clair, Pa., whose name has not been widely published because of the nature of the crime, marked one of the most dramatic moments of the first trial in the highly publicized case.

That trial ended last summer in convictions for Yusef Salaam, Raymond Santana, and Antron McCray, all 16. Each is serving a 5- to- 10-year term in a juvenile jail.

A sixth youth, Steven Lopez, 16, was expected to be tried alone early next year.

In his opening statement, Diller told the jury that Richardson was merely a ''commentator'' in his videotaped statement. He said words included in the youth's videotape - specifically ''male, female, east and west'' - could not have been his own and were proof that police put words in his mouth.

Moore told the jury the prosecutor's preview of the case was ''an optical illusion,'' ''a conjurer's trick,'' and ''full of smoke and mirrors.''

NEW YORK (OCT. 23) UPI - Salomon Inc., the parent of investment brokerage Salomon Brothers, Tuesday reported third-quarter earnings of $79 million, or 55 cents a share, down from $177 million, or $1.28 a share, in the year-ago period.

Revenues for the quarter were $1.45 billion, down from $1.6 billion in the 1989 period.

For the first nine months, earnings were $318 million, or $2.32 a share, compared with $402 million, or $2.82 a share, in the comparable period of 1989.

Revenues for the period were $4.3 billion, up from $3.97 billion in the first nine months of 1989, Salomon said.

The quarterly results included a one-time $200-million pre-tax charge for downsizing Salomon's Philipp Brothers commodities unit.

''Phibro Energy's pre-tax earnings of $369 million in the 1990 third quarter were exceptional,'' the brokerage firm said. ''Trading and refining businesses benefited from heightened volatility, higher prices, and increased volume. The energy business, which is global in scope, derived a significant portion of its earnings from international markets.''

In the first nine months of 1990, Phibro Energy earned $422 million, nearly double the $242 million earned in the same period last year.

#90296u1019 10/23/1990 ~United Press International

DALLAS (OCT. 23) UPI - A team from General Dynamics Corp. of St. Louis and Westinghouse Electric Corp. of Pittsburgh was selected Tuesday for a $200 million contract to design and manufacture the magnets for the supercondcuting super collider.

Roy Schwitters, director of the SSC laboratory, said GD's Space Systems Division of San Diego, Calif., was selected as the leader with Westinghouse's Collider Dipole Division of Orlando, Fla., as the follower.

Each company will develop, under contract with the laboratory, its own capabilities for volume manufacture of the magnets.

Following evaluation of the prototypes, 502 magnets will be produced for installation in the accelerator.

The two firms will then compete for a follow-on production order for the remaining 8,200 superconducting magnets. Each magnet will measure 52 feet in length and weigh about 12.5 tons.

The magnets will guide beams of high-energy protons around the accelerator's rings at about the speed of light and bring them into collisions. Massive detectors will record the results.

Through these experiments, scientists hope to lean more about the fundamental nature of energy and matter.

The magnets will operate at near absolute zero temperature to allow electricity to flow without resistance.

Under a contract to be negotiated, General Dynamics will work with the SSC laboratory to produce 15 prototype magnets.

GD and Westinghouse will then produce 35 preproduction magnets which will be tested and evaluated beginning in 1933.

After that, each firm will produce 251 magnets for installation. During that time, both firms will prepare competitive bids for the remaining 8,200 magnets.

The collider, the largest instrument ever designed for research, will be built in Ellis County, 30 miles south of Dallas. It is being designed and built for the Department of Energy by the Universities Research Association Inc., a consortium of 77 leading research universities in the United States and Canada.

#90296u1027 10/23/1990 ~United Press International

WASHINGTON (OCT. 23) UPI - The Office of Thrift Supervision said Tuesday it has placed the insolvent Superior Savings Association, of Cleveland, into receivership and has chartered a new institution to take its place.

The takeover of Superior will not interrupt the thrift's daily operations, the OTS said.

The agency said Superior was operating in an unsafe and unsound condition with insufficient capital and no prospects of attaining additional capital without federal help.

Superior's financial position deteriorated through poor underwriting, the high cost of funds and loans for such non-traditional items as Arabian horses, the agency said.

Federal Regulators said Superior's management has attempted to call the bad assets and has made progress in reducing the thrift's brokered deposits.

As of June 30, the thrift reported assets of $98.6 million with liabilities of $98 million and tangible capital of negative $161,000.

#90296u1038 10/23/1990 ~United Press International

AMMAN, JORDAN (OCT. 23) UPI - Munzar Khalil, a 29-year-old Syrian businessman waited anxiously outside the Iraqi Embassy Tuesday, hoping to obtain permission to get into Kuwait before a midnight deadline.

After that time, the residence and work permits of all foreigners who have failed to return are to be annuled.

''I have all my things there,'' said Khalil, who has lived in Kuwait for 13 years and was traveling outside the country at the time of the Iraqi invasion Aug. 2.

''I have my parents there, too. I want to get (them.)''

While Iraqi officials have said a decision to annul work and residence permit of foreigners outside the country was announced more than two months ago, the approaching deadline caught many Jordanian and other nationals by surprise and created an exodus of hundreds of people over the past few days.

About 200 people, some in business suits and dozens of others wearing traditional red and white Jordanian headdress, jammed the shady sidewalk across the street the Iraqi Embassy Tuesday. Hawkers sold corn on the cob and falafel at lunchtime while others snapped passport photos and helped those waiting in line fill out visa forms.

A smiling Iraqi President Saddam Hussein was nearby - in posters plastered along the wall near the embassy's information window. The posters showed him wearing both traditional Arab garb and a business suit shaking hands with Jordan's King Hussein.

''Some people have been standing here more than two days waiting for their visas,'' Khalil said. ''I don't know why. They are thinking of canceling the permit. Nobody has any idea why.''

Iraqi Consul Sabar Abbas Al Ahbabi told the Jordan Times newspaper Monday that

Baghdad had announced Aug. 23 it would give Arabs working in Iraq two months to decide whether to stay.

He said with the deadline now near, ''All those wishing to keep their residence and work permits for Iraq or the province of Kuwait should be in the territories by Oct. 23.''

Al Ahbabi said the decision was a temporary measure to allow Baghdad time to conduct a population survey between Nov. 5 and 7. He did not give the purpose of the survey or say when foreign workers might be allowed to return to Kuwait and Iraq.

For non-Iraqi Arabs like Khalil, the possibility of being stranded outside Iraq and Kuwait while their families remain inside is a worrisome prospect.

About 300,000 Jordanian nationals live in Kuwait and Iraq, about 175, 000 of whom are workers.

Jordanian officials have recently estimated the Persian Gulf crisis has caused the country to lose remittances worth billions of dollars.

Because the Iraqi Embassy in Amman is one of the few in the region still open, scores of other Arab nationals also have traveled to the city to obtain Iraqi visas.

''Everybody, they left Kuwait once the crisis began. Now they look at the situation and see life is continuing. So some of them they are looking at going back, but about 80 percent of them want to go and bring back their luggage and household goods,'' said Ibrahim Hassan, a Palestinian taxi driver who ferries workers back and forth from the Iraqi border.

Like most outside the Iraqi Embassy, Hassan blamed the United States for prolonging the gulf crisis.

''If the Americans had not entered into it, the problem would have been solved in one week,'' he said.

Another man, a salesman in Kuwait who would only identify himself by the initials H. H. W., agreed.

''I think he (Saddam) is like a sheikh. If the other Arab leaders would come to him and say, 'Saddam, my dear friend, come on,' I think they would settle it.''

''I think this guy doesn't want a war. It's not easy. He tried it with Iran.''

WASHINGTON (OCT. 23) UPI - Anti-tax conservatives are calling on citizens to gather in cities across the nation this weekend to express their anger at the government's failure to end the budget impasse and send a message to incumbent lawmakers that they are fed up with ''inept leadership.''

Citizens Against Government Waste said it hopes to rally thousands of Americans across the nation to join in sending Washington politicians ''a message that they are fed up with the current generation of politicians'' responsible for the savings and loan bailout, the scandal at the Department of Housing and Urban Development, Pentagon cost overruns and the farm program.

In the effort, the group, which includes Phyllis Schafly, founder of the Eagle Forum; Robert Grant of the American Freedom Coalition; John Cregan of the U.S. Business and Industrial Council, Grover Norquist of Americans for Tax Reform; and Mark Wheat of Citizens for a Sound Economy, hope to marshal the efforts of many of the nation's radio talk show hosts.

The talk show hosts, represented in the coalition by Mike Siegal, president of the National Association of Radio Talk Show Hosts, were widely credited with stirring up massive public anger over proposed congressional pay raises last year.

Alan Keyes, head of Citizens Against Waste in Government, said voters are already showing they want change in Washington and they are dissatisfied with government at all levels.

The Oct. 27 rallies and demonstrations, he said, ''will provide a platform to express this outrage.''

''In Washington, there is a trail of broken promises and inept leadership in the fight to reduce the deficit,'' he said. ''The same politicians who want to take a bigger bite out of the family budget have raised their own pay, raised taxes, increased the deficit and presided over the biggest financial scandal in the nation's history, the savings and loan debacle.

''Taxpayers around the country are fed up,'' he said.

Organizers said they will use raised brooms as a symbol during the rallies, signifying taxpayers' desire for Washington ''to clean up the mess.''

''Notice will be served to incumbent officials everywhere that taxpayers demand efficient and responsible administration of their money,'' Keyes said.

#90296u1050 10/23/1990 ~United Press International

MALDEN, MA (OCT. 23) UPI - An expert on execution equipment who wrote a controversial report that Nazis did not use gas chambers to kill Jews in the Holocaust pleaded innocent Tuesday to practicing engineering fraudulently.

Fred A. Leuchter Jr., 47, who has helped numerous states design and maintain execution equipment, was accompanied by a heavy police force as he entered Malden District Court for his arraignment as Jewish groups protested outside.

Famed Nazi hunter Beate Klarsfeld was one of about 50 people who demonstrated outside the courthouse as the Malden resident was arraigned. The demonstrators carried signs with such slogans as ''Herr Leuchter Lies,'' the name ringed with swastikas.

''We combat him with the truth. He has to know there's a rampart against him '' Klarsfeld said.

Dubbed ''Dr. Death'' by ABC News, Leuchter in 1988 wrote a report that contends the Nazis did not use gas chambers to kill Jews during World War II. The paper, ''Leuchter Report: End of a Myth,'' was written for the May 1988 trial of Canadian revisionist, at which Leuchter testified as a paid witness.

Leuchter insists he is not anti-Semitic and maintains his report is a scientific document, but his paper has infuriated Holocaust survivors. An Albany, N.Y., organization, Holocaust Survivors and Friends in Pursuit of Justice, contacted authorities and urged that his engineering practices come under scrutiny.

''Leuchter's a fake and we're here to expose the Holocaust denier as a fraud '' the group's director, Shelly Shapiro, said as she demonstrated outside the courthouse.

Shapiro said her group planned to file a victim impact statement with the court, ''Because what he said affects Jews all around the world. He caused damage to the survivors and Jews whom he defamed.''

The group is also publishing a book titled ''The Truth Prevails'' next week,

Shapiro said.

''The book proves he's no expert on gas chambers despite what he says,'' she said.

Leuchter's paper was written for the defense in the May 1988 trial of revisionist publisher Ernst Zundel in Toronto. Zundel was charged and later convicted of knowingly disseminating false information in his booklet, ''Did Six Million Really Die?''

Leuchter has said he was paid $1,800 for his testimony as an expert witness, although some reports have put his fee at $30,000.

At his arraignment Tuesday, Leuchter received a court-appointed attorney and pleaded innocent to charges of practicing or offering to practice engineering without being registered.

The charge is a misdemeanor and carries a maximum penalty of 90 days in a house of correction and a $500 fine, a spokesman for Middlesex County District Attorney Scott Harshbarger said.

Leuchter, who is free on personal recongizance, is due back in court Dec. 11.

Klarsfeld, a Nazi hunter who numbers among her success the capture of Klaus Barbie, known as the ''Butcher of Lyon,'' said she traveled from Paris to protest at the arraignment.

''It's very important to document this. The group that believes this is not a big one but it is active. The group is small but it always starts with a small group,'' said Klarsfeld, whose efforts to track down Nazi leaders were the subject of a made-for-TV movie.

''If he lies on his engineering degree then he lies on his report too,'' Klarsfeld said. ''It was written for stupid people.''

''This is an outrage,'' said another demonstrator, Israel Arbeiter of Newton, who said he was in the Auschwitz extermination camp when he was 14.

''We were there. This man made up lies to make money. We saw the freight cars come in, we saw innocent men and women and children being led into the gas chambers. We saw the piles of burnt bones. For somebody to come out and say this didn't happen is an outrage.''

#90296u1058 10/23/1990 ~United Press International

SOUTHFIELD, Mich. (OCT. 23) UPI - The Bendix Automotive Systems Group of Allied-Signal Inc. announced plans Tuesday to phase out some vehicle disc brake operations at its St. Joseph, Mich., complex and build a new facility in Roanoke County, Va.

Company spokesman Pete Leatherwood said about 550 of the 1,200 hourly and salaried workers at the St. Joseph plant could be affected within the next three to five years because of the decision to build the new plant.

But Leatherwood said that employment at St. Joseph, which also makes medium- and heavy-duty truck disc brakes and other hydraulic components and castings, could increase in the near term, depending on the automotive market and general economy.

Bendix, the world's leading supplier of brake systems for cars and trucks, now builds disc brakes for North American cars and light trucks complex in St. Joseph, in southwestern Michigan.

But the new Roanoke Valley facility eventually will supply all of the firm's disc brakes for the North American car and light truck market. The company will concentrate all future anti-lock brake systems in a facility opened earlier this year in Clarksville, Tenn.

The new Roanoke plant will begin operations with 30 to 40 employees, increasing to some 300 employees at full production levels, Bendix said.

The initial $21 million phase of the facility is scheduled for completion next summer, with construction scheduled to begin immediately.

The first phase will contain 175,000 square feet, including over 100, 000 square feet of production space. That space is expected to more than double within the next three to five years as more disc brake programs come on stream the company said.

#90296u1070 10/23/1990 ~United Press International
KAMPALA, UGANDA (OCT. 23) UPI - Rebels fighting a three-week battle in the East African nation of Rwanda have agreed to a government-proposed ceasefire, Ugandan President Yoweri Museveni said Tuesday.

Museveni, from whose country the rebels stormed into northern Rwanda Sept. 30, told Belgian Prime Minister Wilfried Martens - on a peace- making mission for Belgium's former protectorate - that the Rwandan Patriotic Front Rebels had agreed to the ceasefire Monday.

Museveni, who has been sharply criticized in the region for allegedly sponsoring the rebels, said he had contacted them last week after a summit meeting with Rwandan President Juvenal Habyarimana.

''When they received my message to them, they asked for three days so that they could discuss it and later inform me the result,'' Museveni said in a statement. ''Fortunately I have just received a word from them which indicated that they were ready to observe a ceasefire.''

Martens planned to fly to Tanzania for talks with President Ali Hassan Mwinyi. He told Museveni the European Community, whose foreign ministers discussed the Rwandan situation Monday, was prepared to contribute financially to maintaining stability in the region.

Rwandan ambassador to Kenya Cyprien Habimana gave the news of the proposed ceasefire a cautious welcome.

''We have to wait and see if they mean it,'' he said. ''They have not set a date or a time for the ceasefire.''

Most of the estimated 5,000 rebels in Rwanda are long-term refugees from tribal fighting in the 1960s, which drove hundreds of thousands of the minority Tutsi tribe into exile.

Rwanda, the most densely populated country in Africa, has been trying to negotiate ways with neighbor countries to deal with its refugee problem since 1986.

The rebels have claimed their invasion was largely motivated by Habyarimana's statements earlier this year that his country had no room for returning refugees.

Habyarimana in turn has said the mainly Tutsi rebels are merely interested in reviving conflict with his Hutu tribe, which makes up about 90 percent of the Rwandan population.

#90296u1118 10/23/1990 ~United Press International
ADDIS ABABA, ETHIOPIA (OCT. 23) UPI - Thirty clergymen have died, 83 churches have been burned to the ground and a number of the country's most valuable religious relics have been plundered in the past 12 months of war in northern Ethiopia, an Orthodox Church report said Tuesday.

The report, presented to the ninth regular conference of the Ethiopian Orthodox Church in Addis Ababa, launched a strong attack on what it called the ''shocking and disgusting'' pillaging of churches by the rebel Tigray People's Liberation Front.

It said the rebels, hard-line Marxists fighting since 1977 to overthrow the Ethiopian government, had wrought worse damage even than the invasion of Ethiopia, then Abyssinia, by Mussolini's Italian fascists in World War II.

''The church arson and ransacking is so shocking and disgusting,'' the report said.

It accused the rebels of refusing to settle their dispute by peaceful means.

Most of the churches destroyed were in Tigray, Eritrea, Northern Showa and Gonder provinces, overrun or shelled by the rebels in the past year, as the TPLF launched a series of pushes, with hundreds of thousands of heavily armed

soldiers, toward Addis Ababa.

The report said the 30 clergymen who were killed died trying to save church antiquities and religious treasures from being plundered by the rebels.

It also said that thousands of children under church protection in the ancient towns of Axum, Adowa, and Makelle, between 350 and 400 miles north of Addis Ababa had been dislodged from orphanages and nurseries by the war.

The Ethiopian Orthodox Church, largest in the country, has 240,000 full-time priests and has exerted enormous power for centuries. Ethiopia became a predominantly Christian country in the 4th century A.D.

It lost its temporal power in Ethiopia's 1974 Marxist revolution, but has remained a major cultural and spiritual force.

Since President Mengistu Haile Mariam renounced much of his leftist doctrine earlier this year, the church has rapidly regained influence, and is widely regarded as the sole source of accurate information on events in the country's two civil wars.

It leveled similar accusations of atrocities against the TPLF last month. The rebels denied the charge.

#90296u1125 10/23/1990 ~United Press International

NEW YORK (OCT. 23) UPI - The World Series won the ratings race for CBS last week and put the network within two-tenths of a rating point of NBC for the season-to-date, it was reported Tuesday.

All four games of the Series finished in the top 10, with games two and four taking the top two spots, and games one and three coming in fifth and sixth.

CBS estimated that more than 59 million Americans viewed all or part of game four in Nielsen-measured homes, with as many as 6 million persons watching out-of-home in bars, restaurants, school dormitories, etc.

The World Series averaged a 20.8 rating and a 36 share, up 27 percent over last year's earthquake-interrupted four-game fiasco but down 10 percent from the first four games of the 1988 series.

In the ratings for the week ending Oct. 21, according to the A.C. Nielsen Co., CBS won with a 15.9 rating and a 26 share. NBC was second with a 13.9 rating and a 23 share, while ABC posted a 12.6 rating and a 21 share.

The five-week-old season-to-date statistics show how close this year's race has become, with CBS's World Series ratings enough to bring pull the network

close to a tie for the top.

NBC leads with a 13.4 rating and 22 share, followed by CBS with a 13.2 rating and a 22 share, and ABC not far behind with a 12.7 ratring and a 21 share.

Night-by-night competition saw CBS win Tuesday, Wednesday, Friday and Saturday - the four nights of primetime baseball. NBC took Monday and Thursday and ABC won Sunday.

NBC's counter-programming of Danielle Steel against baseball paid off, with ''Kaleidoscope'' taking fourth place and giving the network non-Series Monday night. ''Fine Things'' came in 10th against Game 1, the best an entertainment program has done against the first game of a Series since 1983.

In non-Series competition, ''The Cosby Show'' on NBC was in eighth place, while ''The Simpsons'' on Fox placed 18th, down from eighth the previous week.

Susan Lucci, a soap opera actress whose main distinction is never having won a daytime Emmy, proved a big winner for ABC in the Sunday movie competition. She starred in ''The Bride in Black,'' which ranked 15th. NBC's ''The Love She Sought,'' starring Angela Lansbury, came in 46th, while CBS - which had been hoping for a fifth game in the Series, had to settle for the theatrical ''The Big Easy'' in 60th.

None of the season's new shows are setting the ratings race on fire. Tops was ''America's Funniest People'' (ABC) in ninth place, outperforming its clone, ''America's Funniest Home Videos,'' in 13th.

After that it's down to 37th place for ''Fresh Prince of Bel Air'' (NBC). The only other new series in the top 50 were ''Ferris Bueller'' (NBC), 43rd; ''Married People'' (ABC), tied for 47th, and ''Uncle Buck'' (CBS), tied for 49th.

ABC's ''World News Tonight'' was No. 1 for the 41st consecutive week, with a 9.9 rating and a 20 share. ''CBS Evening News'' with Dan Rather and ''NBC Nightly News'' with Tom Brokaw tied for second, each with an 8.7 rating and an 18 share.

Each ratings point represents about 921,000 households. A share is the percentage of TV sets in use that are tuned to a particular show or network.

The top 10 programs for the week ending Sunday, Oct. 21, according to the A.C. Nielsen Co., were:

1. World Series, game 2 (CBS)
2. World Series, game 4 (CBS)
3. Cheers (NBC)
4. Danielle Steel's Kaleidoscope (NBC)

5. World Series, Game 1 (CBS)
6. World Series, Game 3 (CBS)
7. A Different World (NBC)
8. The Cosby Show (NBC)
9. America's Funniest People (ABC)
10. Danielle Steel's Fine Things (NBC)

#90296u1126 10/23/1990 ~United Press International
PHILADELPHIA (OCT. 23) UPI - Three Philadelphia police sergeants have been demoted because they are too fat.

Stephen Guckin, 31, Joseph McGoldrick, 41, and John Harkins, 37, passed a battery of oral and written tests and received their promotions to sergeant in April. But the promotion carried a stipulation that they lose weight in the next six months.

All three failed that test and were demoted last week by Police Commissioner Willie Williams, the Philadelphia Inquirer said Tuesday.

Guckin, who was supposed to lose 40 pounds, lost only 20 and weighs 280 pounds. McGoldrick, who pledged to lose 28 pounds, didn't lose any weight and stood at 291 pounds.

And Harkins, who promised to lose 100 pounds, lost only two pounds and weighed in at 313 pounds.

Police said the actions against the officers were part of an effort by the Police Department to keep their officers in better shape for health and safety reasons.

Authorities said if the three get into shape they most likely will get another chance at becoming sergeants in a year or two.

The city hopes to begin annual or bi-annual physical exams for police officers soon. Currently, medical exams are only given when officers are hired or promoted or return from an extended leave.

John Shaw, president of the Fraternal Order of Police, said he did not object to the city's desire to keep officers' weight in check. But, he said, police veterans should be given leeway because the city had not enforced the weight requirements until recently, even though they were on the books for 15 years.

#90296u1132 10/23/1990 ~United Press International
ALBANY, NY (OCT. 23) UPI - A Madonna he ain't.

But Simcha Pearl, a dentist at the Veterans Affairs Center Hospital in Albany, does write songs for the Hasidic equivalent of Top 40 radio.

Ten of Pearl's songs - all in Hebrew, most of them adapted from Scripture - have been recorded by cantor Yaacov Motzen of Montreal.

A bootleg recording of one of the songs, ''Ashle Asohr'' or ''To Raise up the Harp'' has reached No. 3 on the Hasidic hit parade in Israel, according to a published account in the Albany Times Union.

''It's like a fairy tale. All I can think of is Andy Warhol. So here's my 15 minutes, then I go back to being Joe Shmoe again,'' Pearl told the newspaper.

His inspiration for his big hit was the 92nd Psalm, he said.

But Pearl's songs don't have an air of solemnity.

They come complete with a danceable bass line, swelling choruses and even a sax solo.

''You should feel like snapping your fingers and singing along with the words '' Pearl said.

Pearl was himself born in Montreal and moved with his family to Albany at age 5.

His life appears to combine the best traits of his parents.

His father, Manuel Pearl, also practices medicine as a gynecologist, while his mother, Gina Pearl, taught music at the Hebrew Academy in Albany.

Pearl, 32, began writing music while a freshman at Princeton University and went on to dental school at the University of Pennsylvania.

The young dentist follows in his mother's footsteps in one other way. He teaches music at the same school where his mother taught.

Pearl's musical success story came about last year when he began to transcribe his songs with the help of an old accordion teacher.

Pearl said it also didn't hurt him that his second cousin, Morty Pearl, is president of the congregation where the pop-cantor Motzen sings.

''People tell me I can go out and buy my Lamborghini and my swimming pool, but I'm not business oriented,'' Pearl said of his new-found success.

''I'm not mercenary. I just want to be happy and to make some other people

happy,'' he said.

#90296u1134 10/23/1990 ~United Press International

MANILA, PHILIPPINES (OCT. 23) UPI - Philippine troops were placed on full alert Tuesday after explosions rocked two oil companies on the eve of a general strike called by left-wing unions demanding wage increases.

Military officials ordered 600 soldiers to reinforce the capital's security force of 15,000 and provide escorts to buses not joining the strike.

Officials of the left-leaning Labor Advisory Council, which claims a national membership of 3.5 million, said the strike will begin at 5 a.m. local time Wednesday.

The council is demanding a wage increase to compensate for the 29 percent raise in petroleum prices prompted by the Persian Gulf crisis.

President Corazon Aquino, facing a huge budget deficit that has forced her government to resort to massive domestic borrowing and threatens new foreign loans, has refused to grant the increase. Her government also is grappling with a $26 billion foreign debt.

Armed forces chief Gen. Renato de Villa said he had placed the 150, 000-member military on red alert - the maximum state of readiness - to ''prevent the strike from deteriorating into a security problem.''

School classes were ordered suspended Wednesday, but government and private companies announced it would be business as usual. Officials said some 200 provincial buses will be fielded in the capital to ferry commuters.

No one has claimed responsibility for the bombings at the Dutch-owned Shell Co. in the capital's financial district and the U.S.-based Caltex Philippines in the tourist area of Manila.

The blasts at both companies hit the roof of their generator sheds, tearing the galvanized iron sheets, shattering some windows but causing no injuries.

Police said five heavily armed men set ablaze a bus in the town of Kawit outside Manila Tuesday afternoon, bringing to four the number of buses torched since Sunday. Police said the coaches were burned because the owners refused to join the strike.

The bombings were the first in the capital in two weeks. At least 43 bomb attacks had been reported previously since Aug. 13. The previous incidents were blamed on rebel soldiers who have tried seven times to oust Aquino.

Police believed the bombings Monday were carried out by guerrillas of the communist New Peoples Army, possibly with help from military dissidents.

The 19,000-member NPA has been waging a rebellion to establish a Marxist state for 21 years.

Communist guerrillas Monday announced full support of the strike and warned ''scabs and saboteurs'' not to intervene.

Police believed guerrillas were behind the killings of two moderate labor leaders Monday - Oscar Lazaro, 53, the popular head of an 80,000- strong mini-bus drivers union who had refused to join the strike, and a port union president Eduardo Yumol, 67.

#90296u1140 10/23/1990 ~United Press International

WASHINGTON (OCT. 23) UPI - U.S. personal income growth increased by only 1.3 percent in the second quarter, primarily because of a slowdown in the Plains, the West and the Southeast regions, a Commerce Department survey said Tuesday.

''Personal income also slowed in the Southwest and Midwest,'' the department said. ''Income growth was unchanged in the Great Lakes and New England regions and increased slightly in the Rocky Mountain region.''

In the first three months of the year, personal income - which includes wages and all other types of income, such as dividends - advanced 2.1 percent, according to the survey by the department's Bureau of Economic Analysis.

In the Plains, personal income inched up 0.3 percent in April, May and June after gaining 1.9 percent in January, February and March, reflecting a decline in farm income as federal subsidies dropped and construction payrolls weakened.

''Two Plains states - Iowa and Nebraska - were the only states in the nation

that had income declines in the second quarter,'' the Commerce Department added. ''In contrast, both states had income gains in the first quarter.''

In the West, personal income increased 1.6 percent in the second quarter,after zooming 3.2 percent in the first three months of the year on a decline in the payrolls of durable-goods manufacturers.

Factory jobs have disappeared by the thousands across the nation over the last 12 months.

Falling construction payrolls and farm income also contributed to a modest 1.2 percent advance in personal income in the Southeast in the second quarter,vs. a 2.7 percent increase in the first quarter.

In the Southeast, ''payroll increases in both durables and non- durables manufacturing and in retail trade were smaller in the second quarter than in the first,'' the Commerce Department said.

In the Southwest, meanwhile, personal income was up 1.3 percent in the second quarter after a gain of 1.7 percent in the first quarter, with factories and farms accounting for most of the slowdown.

Cosntruction payrolls also took down the East, where personal income increased 1.3 percent in April-June period after gaining 1.7 percent in the previous three months, the department said.

In the Great Lakes region and New England, personal income growth remained unchanged, at 1.6 percent and 0.9 percent, respectively, while a slightly better growth rate of 1.6 percent was reported in the Rocky Mountain region.

#90296u1156 10/23/1990 ~United Press International

CHICAGO (OCT. 23) UPI - The former president and managing officer of a Cicero savings and loan was sentenced to six months work release for embezzling more than $1 million from the institution.

But, U.S. District Judge Nicholas Bua warned Richard Kukielski, 51, Westmont, at the sentencing Monday that he would serve a suspended sentence of five years in prison if he failed to live up to the terms of his work release program.

Kukielski faced a maximum 15 years in prison and $750,000 in fines for the fraud he engineered from March 1982 to June 1987 at the West Town Savings and Loan Association.

As part of a plea agreement, Kukielski admitted to making false ledger entries every day during that period and accepting worthless checks from a customer in

order to conceal his embezzling.

Prosecutors said Kukielski received worthless checks from Edward Czyznikiewicz then paid him cash. Kukielski would then have the worthless check processed, use it to balance the daily ledgers, then store it in his office desk drawer.

Kukielski also used a running account of his misappropriations to help him balance the ledgers. Prosecutors said in all, Kukielski accepted 212 undated and worthless checks from his now-deceased co-conspirator.

Assistant U.S. Attorney Michael Mullen said Bua handed down the lenient sentence after receiving a "glowing" two-page letter from other savings and loan officials asking that he show mercy. Czyznikiewicz, who was on parole for bank fraud during the time of the scheme, died before Kukielski was indicted in August of last year.

#90296u1169 10/23/1990 ~United Press International

(OCT. 23) UPI - President Bush is back on the campaign trail today, telling voters in Vermont that the country wouldn't be in the budget mess if more Republicans were in Congress. Bush is in Burlington to help Congressman Robert Smith as he runs for the Senate seat being vacated by Gordon Humphrey. Polls released last week show that the budget crisis and a slowing economy have cut into the president's popularity. Bush also plans stops in New Hampshire and Connectiut.

A Virgin Airways Boeing 747 is on its way to Iraq with doctors and nurses aboard to treat elderly British and U-S hostages who are finally being released. The plane is expected to be back in London tomorrow. Iraq President Saddam Hussein ordered the release after a personal appeal by former British Prime Minister Edward Heath. Heath reportedly is still bargaining for the freedom of others on a list of 200 people he has with him.

An ominious booklet is being distributed in Saudi Arabia. It tells people what to look for in the event of an Iraqi chemical attack. Civil defense authorities give this scenario- loud explosions, thick smoke and massive deaths of insects. An English-language newspaper says that if citizens see these signs and oil stains they should immediately put on their masks. The Saudi government is buying about three-Million gas masks. Israel is already handing out the chemical weapons kits to its population.

A Berlin newspaper says the former communist leadership of East Germany may have embezzled Millions paid by West Germany over 17 years to maintain highways in the east. The paper says a government report shows former East German leaders transferred about six-Million dollars received from West Germany into secret bank accounts. From 1972 until 1989, the West German government paid East Germany an annual fee of 345-Million dollars to maintain

three highways leading to West Berlin.

The House Committee on Standards and Official Conduct has opened a preliminary investigation into what could become new charges of sexual misconduct against Congressman Donald Lukens. The Ohio Republican was convicted last year of having sex with a teen-age girl and is to appear before the House ethics committee today to answer the fresh allegations. Little is known about the alleged incident other than it may involve a congressional employee. Lukens had NO comment on the advice of his attorneys.

While U-S economists continue to debate whether the United States is in a recession, officials in Canada say there's NO doubt Canada already is. Finance Minister Michael Wilson told a parliamentary committee last night that Canada's third-quarter output declined. It fell in the second quarter, too. But Wilson says officials don't expect the recession to be severe and predicts a recovery by spring. Canada had seven and one-half years of strong growth in the 1980's.The Canadian dollar opened higher today, at 85-point-23 cents.

SALINA, UT (OCT. 23) UPI - A minor earthquake measuring a magnitude of 3.2 on the Richter scale struck central Utah's Fish Lake National Forest at 2:49 a.m. Tuesday, authorities said.

Jim Pechmann, research seismologist with the University of Utah Seismograph Stations, said there were no reports of structural damage or injuries from the temblor.

The quake occurred nine miles southeast of a Jan. 29, 1989, magnitude 5.4 quake, which caused no significant damage or injuries due largely to its remote location, Pechmann said.

The 1989 earthquake was the largest in Utah since a 6.0 magnitude quake on the Utah-Idaho state line in 1975.

A cluster of 59 earthquakes of magnitude 2.8 or smaller occurred in April and May of this year in the same area as Tuesday's quake, Pechmann said.

(OCT. 23) UPI - World oil prices bounced back in midday trading Tuesday as markets stabilized after the prior day's record drop and after a Saudi official said his remarks seeming to suggest Kuwait cede some territory to Iraq had been misinterpreted.

Prices of home heating oil for November delivery were up 4.92 cents to 80.9

cents a gallon on the New York Mercantile Exchange at midday, while November unleaded gasoline had gained 3.9 cents to 80.4 cents a gallon.

In the first day of trading the December delivery contract, the U.S. benchmark West Texas Intermediate crude was down 93 cents to $29.48 a barrel.

WTI's decline was a technical move explained by Tuesday being the Merc's first day of trading December delivery as the spot-month contract, said Tom Bentz, director of trading at United Energy Inc. in New York.

Exchange rules limited its decline to $3 a barrel Monday, when the November spot-month contract was falling a record $5.41 to $28.38 a barrel. The December delivery contract is playing a little bit of catch- up, the trader said.

''So, the crude is really up a little bit. The whole market's bouncing a little bit here,'' Bentz said.

In addition to the market's normal tendency to rebound after a sharp drop such as the one experienced Monday, Bentz said there was upward price pressure from Saudi Defense Minister Sultan Bin Abdul Aziz saying his earlier remarks had been misinterpreted.

Sultan contributed to Monday's record drop in prices after suggesting Sunday that Kuwait should give Iraq two strategic gulf islands that Iraq tried to lease for decades before it invaded the tiny emirate Aug. 2.

''Saudi Arabia does not see any harm in one Arab country giving another sisterly Arab country a position or land overlooking the sea,'' he told reporters in Jeddah, Saudi Arabia.

But Saudi Television quoted the Saudi defense minister Monday as saying that ''erroneous interpretations'' of some of his remarks had led to ''clear distortion of the meaning intended.''

Sultan said he meant to say that Saudi Arabia had managed to amicably solve past border disputes with Iraq, Jordan and the United Arab Emirates.

Sultan was quoted as saying that Saudi Arabia ''reaffirms its complete commitment to all the Arab and international resolutions which demand from Iraq immediate and complete withdrawal from Kuwaiti territories unconditionally.''

Exiled Kuwaiti sources, however, said the Saudis were trying indirectly to pressure the emirate's exiled government into giving territorial concessions to Iraq in order to end the gulf crisis peacefully.

On the European spot market, Britain's widely traded North Sea Brent, which

tumbled $5.35 Monday, had regained $2.60 to $29.25 a barrel.

After plummeting $5.10 Monday, the United Arab Emirates' Dubai Light, the key OPEC crude from the Middle East shipped mainly to the Far East, was up $1.45 to $24.65 a barrel.

#90296u1237 10/23/1990 ~United Press International

WASHINGTON (OCT. 23) UPI - House Democrats split on a proposed budget package Tuesday, with about half the members resisting the Republican approach to taxing the rich and opposing further cuts in Medicare.

Democratic leaders conceded they did not have enough support to pass the plan and prepared to resume negotiations with Republicans, the Senate and the administration.

During a two-hour closed meeting, the leaders outlined the package being negotiated and heard the reaction of their colleagues.

Based on what was said during the caucus ''we're half-way there because half the members were supportive,'' Rep. Dan Rostenkowski, D- Ill., chairman of the House Ways and Means Committee, said afterward. But, he said, ''that's not good enough'' to win House passage.

House Democratic leader Richard Gephardt of Missouri said the ''two dominant messages'' from the Democrats were opposition to the Republican plan to increase taxes on the wealthy by limiting their deductions and opposition to further cuts in Medicare.

Democratic negotiators have argued for a straight 10 percent surtax on Americans who earn more than $1 million, rather than limit deductions, but have been unable to convince Republicans.

Opposition to the deductions plan comes chiefly from members representing states with high state income taxes because of the adverse impact it would have on their areas, ''and that leads to political difficulties in getting the votes'' to pass the package, Gephardt said.

The Democrats also want to hold the line on Medicare, which is expected to provide a substantial portion of the savings needed for the deficit reduction package. Nearly all proposals would increase costs for Medicare beneficiaries, but the increases would be less under the House version than under the administration-backed Senate plan.

Rep. Leon Panetta, D-Calif., chairman of the House Budget Committee, said Democrats do not want to go beyond the House figures. That ''is very much a bottom line that we cannot move from,'' he said.

Rostenkowski said Democratic leaders have warned the administration it must compromise further in order to win Democratic votes necessary to pass the budget package in the House, ''but that keeps falling on deaf ears.''

The talks are aimed at reaching an agreement on a package of program spending cuts and tax increases that will help lower the federal budget deficit by $500 billion over the next five years, with about $40 billion in savings in 1991.

The negotiators face a deadline of Wednedsay midnight when a stopgap funding bill will expire and could bring on another government shutdown.

On the campaign trail in Burlington, Vt., Tuesday, President Bush pressed for a budget resolution he said he hopes ''is about to be forthcoming.'' He made no mention of whether he would sign another stopgap funding measure if work is not completed by the deadline.

Bush accused Democrats of bowing to special interests and said he had no choice but to agree to include tax increases as part of any package.

''To come up with any budget at all this year, I had to work with the Democrats who control the Congress ... and that means a budget that isn't the best ever, but the best possible.

The budget package also is expected to include an increase in the federal gasoline tax, but the amount was uncertain. The Senate bill called for the current 9-cent-a-gallon gas tax to rise by 9 1/2 cents a gallon by 1992, while the House version had no increase.

There was apparent agreement over the weekend on raising the top tax rate for the wealthiest from 28 percent to 31 percent.

Doing so would elimiante the so-called bubble in which couples with taxable incomes of $78,400 to $185,750 a year pay a 33 percent tax rate and couples with even higher taxable incomes pay a lower, 28 percent rate on every dollar of taxable income above $185,750.

#90296u1267 10/23/1990 ~United Press International

ORLANDO, FL (OCT. 23) UPI - The banking industry's dwindling store of credibility has put bankers at a disadvantage at a time when the future of the industry hangs in the balance, the comptroller of the currency said Tuesday.

"The entire legal and regulatory structure for banking is being questioned, and it is being questioned in no small part because the taxpayer refuses to allow a repeat of the thrift crisis," Comptroller Robert Clarke told the American Bankers Association.

"The banking industry joins the discussion of its structure, not from a position of strength but from a position of weakness," he said. "Your reputation as an industry may not do you justice, but in Washington that does not matter because perception is reality."

Also addressing the bankers' convention was William Seidman, chairman of the Federal Deposit Insurance Corp., who called for reform of the nation's banking laws to allow corporate investment in the banking industry.

The savings and loan crisis is in part to blame for the bankers' loss of credibility, Clarke said, but bankers themselves also are responsible. "The image of (the banking) industry as a whole is more tarnished today than it has been in a half century," Clarke said. "One major reason for this erosion (of credibility) is that banks have done too little and have been too late in acknowledging their losses."

Many of the nation's major banks have been hurt by a softening economy that has soured a portion of their portfolio of commercial real estate loans. Clarke said the nation's small and medium-sized banks are also vulnerable because of their concentration of loans in real estate lending.

The loss of credibility may play into the hands of industry critics - "those who have sought and will continue to seek to constrict competitive opportunties for banking," Clarke said.

"The discussion in Washington on banking's future really comes down to one question: Do we need the banking system we have now? If the answer is yes, a number of alternatives suggest themselves," Clarke said.

Those alternatives include reforms to make commercial banks more competitive by allowing them to offer more products in more locations, imposition of new regulations on the industry or a combination of the two, Clarke said.

To restore the industry's reputation, bankers should focus on building a strong capital base and avoid over-concentration in their loan portfolios, he said. "Banking as an industry must now focus on damage control, whether it wants to or not," Clarke said.

Leaders of the bankers trade group had expressed concern to Clarke Monday about what they perceived as the negative tone of his speech after reviewing an early draft of the remarks. A spokeswoman for the association said it did not ask Clarke to change the speech, however.

Clarke nevertheless told reporters the speech he delivered Tuesday was changed to emphasize his support for the nation's banking industry, but he defended the tone of his address.

"The fact is this is a very difficult time for banking," Clarke said. "I think it is important that everyone recognize that it is a difficult time. There is no sense in denying that."

Later, pointing to a need for "more capital in banking," Seidman said that "we must let corporate America invest. "The separation of commerce and finance is no longer viable or desirable. The bank holding company, a particularly American institution, is as outmoded as the brontosaurus."

Seidman told reporters later that the likelihood such reforms would be adopted by Congress is stronger now than in the past. "I think the bankers are much more receptive to that idea now than they were in the past," Seidman said. "I think bankers know that more capital is needed and that every source ought to be explored, and that corporate America is one of the major sources."

#90296u1276 10/23/1990 ~United Press International

BOSTON (OCT. 23) UPI - A new technique that uses a tiny balloon to clear blocked fallopian tubes appears to be an effective alternative to surgery for some infertile women who want to become pregnant, researchers said Tuesday.

The procedure, known as transcervical balloon tuboplasty, or TBT, cleared at least one fallopian tube in 71 of 77 women - 92 percent - who underwent treatment, said Dr. Norbert Gleicher of Mount Sinai Hospital Medical Center and Rush Medical College in Chicago.

Blockage of the fallopian tubes, which carry eggs from the ovaries to the uterus, accounts for up to 30 percent of the estimated 1.8 million cases of female infertility in the United States, Gleicher said.

Currently, the condition is most often treated with surgery, he said. However, that can involve ''several hours of surgery under general anesthesia and several days in the hospital,'' said Gleicher. By contrast, the new technique can be done on an outpatient basis under local anesthesia and ''the woman can go home within an hour,'' he said.

Using a method similar to one used by heart specialists to clear blocked arteries, Gleicher and co-researchers threaded a series of three tubes called catheters through the cervix and uterus and then into the portion of the fallopian tube closest to the uterus.

When the third catheter reached the blockage, a balloon at the end was inflated to stretch the fallopian tube and dislodge the obstruction, the research team reported in the Journal of the American Medical Association.

All of the women who underwent the procedure had obstructions in both fallopian tubes. Gleicher said TBT cleared both tubes in 53 women, one tube in

18 and was unsuccessful in the other six.

During a one-year follow-up period, he said 13 women whose tubes had been cleared experienced renewed blockages. Among the rest, 22 became pregnant.

Gleicher said the apparent reasons the women's tubes were blocked varied. Some had evidence of past tubal inflammation and three had endometriosis, a condition in which cells which normally line the uterus implant in unusual places, including the fallopian tubes.

In some of the rest, he said researchers think the blockage was caused by mucous secretions from the fallopian tube that accumulated and became crystallized. ''In most women, these secretions are cleared from the tube, but we think some women have a defect in the clearing mechanism,'' he said.

Only one of the women who became pregnant experienced an ectopic pregnancy, in which the embryo becomes implanted in the fallopian tube rather than the uterus, Gleicher said. Researchers took that as evidence the procedure did not cause tubal damage, he said.

The manufacturer of the equipment the researchers used, C.R. Bard Inc. of Murray Hill, N.J., has applied to the Food and Drug Administration for licensing of the procedure, he said.

''Not everybody with tubal obstruction will be a candidate for this procedure, but for those who qualify, I believe it represents a big advance,'' he said. ''It is cheaper and less traumatic than surgery and almost foolproof. Any gynecologist or radiologist should be able to learn how to do it relatively quickly.''

The next step in research with TBT is to see whether it can be effective in clearing blockages that are farther along the fallopian tubes - away from the uterus - than they were in the initial study, he said.

#90296u1297 10/23/1990 ~United Press International

(OCT. 23) UPI - 14 Americans who had been held as human shields in Iraq are out. The White House confirms that the Americans headed to Amman, Jordan, on a chartered flight. Spokesman Marlin Fitzwater told reporters in Manchester, New Hampshire that the 14 were on a U-S Embassy list of hostages who should be freed for health and humanitarian reasons. Fitzwater had NO explanation for the timing of the release by Baghdad. A Virgin Airways jumbo jet left London for Baghdad today to evacuated 50 elderly and sick Britons.

President Bush is back on the political stump, as he campaigns for Republicans in New England. Bush told a fund-raiser in Burlington, Vermont, that the nation wouldn't be in the budget mess it is if Republicans controlled the

Congress. The president plans to stump for more G-O-P candidates in Manchester New Hampshire, and in Waterbury and Stamford, Connecticut, today.

Ohio Republican Congressman Donald Lukens has NOTHING to say on the advice of counsel. He's to appear today as the House ethics committee looks into new allegations of sexual misconduct against him. Lukens was convicted in May of last year in Ohio on charges of having sexual relations with a teen-aged girl. The conviction was upheld by an appeals court and is now before the Ohio Supreme Court. The new case reportedly involves allegations of sexual advances made to an unnamed congressional employee.

Doctors in Minneapolis say the incorrect listing of a patient's blood type in a computer led to the death of a 47-year-old man given a new heart but with the wrong blood type. The patient was type O, the transplant heart was type A. The operation was performed on October 11th and anti-rejection drugs controlled the mismatch for seven days before the patient's body eventually attacked and rejected the new heart. Doctors put out a call for a second heart but NONE became available in time.

A new national report just out says the message to say ''NO'' to drugs is still NOT getting through to many school children... despite drug awareness lectures from parents, teachers, bumper stickers and commercials. A telephone poll of about 500 fifth and sixth graders reveals that 34 percent of fifth graders and half of the sixth graders know kids who smoke, drink or use drugs.

Wrong-way Humphrey is at it again. The humpback whale that wandered through California's inland waterways five years ago is stuck on a mud flat in San Francisco Bay. The endangered whale was spotted yesterday stuck on mud flats. He seemed to swim free but is stuck again in two- and-a-half feet of water. Attempts to tow him out by boat have failed, so rescuers may use a crane. One researcher says Humphrey ''is always the odd man out'' among whales.

Sunrise will arrive one hour earlier Sunday morning when clocks are turned back one hour. The change will come at 2 a-m, local time, when seven months of daylight savings time gives way to standard time. And while you're changing your clocks, firefighters want you to replace the batteries in your smoke detectors. Firefighting organizations say that as many as half of all smoke detectors have old or dead batteries.

#90296u1299 10/23/1990 ~United Press International

WASHINGTON (OCT. 23) UPI - President Bush and the Saudi Arabian government teamed up Tuesday to try to shoot down what was seen to be a trial balloon for a negotiated, partial solution to the Persian Gulf crisis.

Both U.S. and Saudi officials insisted that Iraq should not be rewarded for its aggression and must withdraw unconditionally from Kuwait.

Prince Sultan Ibn Abdel-Aziz, the Saudi minister of defense in talks with Arab journalists Sunday, was quoted as suggesting that ''territorial, brotherly concessions - given willingly - are a matter of pride for the Arab nation.''

On the interpretation that this was an opening for a call for a negotiated settlement in which Kuwait would give Iraq access to a deep- sea port, the price of oil dropped $5 a barrel Monday on world markets.

But the Saudi Arabian ambassador, Prince Bandar Bin Sultan, who is Sultan's son, told reporters at the State Department Tuesday:

''There has been absolutely no change in Saudi policy. There has been absolutely no softening in our policy. Saudi Arabia is not suggesting there should be concessions by anybody.''

He said that any territorial concessions are a matter for Kuwait to decide, but the Saudi position is that there should be no concessions to Iraq until there is a total, unconditional Iraqi withdrawal from Kuwait in accordance with U.N. and Arab League resolutions.

''Aggression shouldn't be rewarded,'' said Bandar, adding, ''What we want is total, unconditional withdrawal from Kuwait by Iraq.''

President Bush, in Manchester, N.H., also hammered the no-compromise theme. ''The world is united and I want to tell you that I am more determined than ever to see that this invading dictator gets out of Kuwait - with no compromise of any kind whatsoever,'' said Bush.

Campaigning in Burlington, Vt., Bush answered the growing protest in the United States against his gulf policy with an impassioned defense of U.S. actions, and again ruled out ''compromise - any compromise'' with Saddam.

''I saw some signs coming in here that said 'no war for oil,''' Bush said of an estimated 100 protesters who picketed outside a GOP fund- raiser. ''I can understand the sentiment by some of those young people. But I would simply say that the rape and the dismantling, the systematic dismantling of Kuwait defies description.''

Bandar spent 85 minutes with Secretary of State James Baker Tuesday morning, beginning the session with an explanation of Sultan's remarks and the insistence that there is no change in Saudi policy.

Asked if Baker accepted Bandar's explanation, spokewswoman Margaret Tutwiler said, ''Yes.''

She said that only four minutes in the 85-minute Bandar-Baker session was devoted to the furor that followed Sultan's remarks. She said the main issue

in the meeting was the future of the multinational force in Saudi Arabia, responsibility-sharing for the costs of maintaining that force, and the enforcement of the sanctions against Iraq.

#90296u1323 10/23/1990 ~United Press International

NEW YORK (OCT. 23) UPI - Ratners Group PLC, a major British jewelry retailer, said Tuesday that shareholders of Kay Jewelers Inc. approved a merger with Ratners.

Under the merger, expected to take effect Friday, the Alexandria, Va.-based Kay chain will become a wholly owned subsidiary of Ratners, making the parent company the second-largest specialty retailer of fine jewelry in the United States, the company said.

Chairman and managing director Gerald I. Ratner said the acquisition, the largest ever completed by Ratners, ''provides the opportunity to capitalize on Kay's well-known trade names, including Kay Jewelers and J.B. Robinson, prime real estate locations and existing customer loyalty.''

As it has in the United Kingdom, the long-term growth rate in specialty retail jewelry market in the United States ''has exceed other sectors of the retail market,'' said Ratner.

He said that performance has been driven by increased purchases by women, particularly working women, and by the greater number of two- income households, which have more disposable income.

Kay shareholders will receive a new convertible preferred American Depositary Share of Ratners for each Kay common share they hold. The new Ratners preferred shares will pay cash dividends at an annual rate of $1.06.

Each of these convertible preferred shares represents three ordinary shares of Ratners. The convertible preferred shares are expected to begin trading on the NASDAQ over-the-counter market on or about Oct. 29, the company said.

NEW YORK (OCT. 23) UPI - Frederick Joseph, the former chief executive officer of Drexel Burnham Lambert Inc., testified Tuesday that Michael Milken and other members of Drexel's junk-bond department may have violated the firm's rules by giving preferential treatment to employees of Drexel clients.

The testimony came in the seventh day of Milken's presentencing hearing in U.S. District Court. The former head of Drexel's junk-bond department, who was convicted in April of six counts of insider trading, faces a maximum jail term of 28 years.

The government contends Milken bribed money managers and corporate executives to buy risky securities in the 1985 Drexel-financed buyout of Storer Communications Inc. by selling them lucrative equity interests in Storer.

The investments were made through MacPherson Partners, a limited partnership whose members included major Drexel customers as well as a trust fund for Milken's children.

Appearing for the first time as a witness against his former star employee,

Joseph said the partnership appeared to violate a company policy against giving preferential treatment to employees of investor accounts.

''We had a written policy that you could not give favored treatment to employees of investor accocunts,'' Joseph said. ''I think the opportunity to buy the equity in Storer without a related commitment to purchase the securities constituted favorable treatment.''

The former Drexel chief said Milken may have violated another Drexel policy by not disclosing that a trust fund set up for the children of Milken and his brother Lowell, who was also an executive in Drexel's high-yield department, had invested in MacPherson.

Joseph - who, unlike many other government witnesses, was appearing without immunity from prosecution - said he did not become aware of the existence of MacPherson until late 1988.

He said he was ''troubled'' when he learned that major Drexel clients had participated in the partnership. But when he asked if money managers whose companies were clients of Drexel had participated in the deal, Milken denied it, Joseph said.

Under cross-examination by defense attorney Arthur Liman, Joseph acknowledged that members of his own family had invested in another Drexel-sponsored partnership predating the Storer deal which made a lucrative profit on its investments.

Joseph, who repeatedly said he could not remember details of the events surrounding the Storer deal, also acknowledged that Milken was not responsible for making disclosures related to company employees and their investments.

Under questioning by Liman, Joseph also said that in 1986 he became increasingly concerned about the pressure on Milken and his department.

''Michael's workaholic habits were well known. He was the most valuable member of the firm, and I was worried he would burn out,'' he said.

Richard Grassgreen, who resigned last week as chairman of Enstar Group Inc., was expected to testify Tuesday afternoon. Grassgreen, who was a member of the MacPherson Partnership, agreed to plead guilty on Monday to two felony counts related to his dealings with Drexel.

Milken himself may testify later this week if the government agrees to grant the former junk-bond king immunity from further prosecution, his attorney said.

THE HAGUE (OCT. 23) UPI - South African President Frederik de Klerk said Tuesday his government sought universal suffrage in South Africa but with clear safeguards for the rights of minorities in the country.

De Klerk, who was in Holland on the first day of a three-day official visit to the Netherlands, is the first South African head of government to visit the estranged Dutch fatherland in 42 years of apartheid rule.

''This is one of the most important days of my life since I am in the home of my ancestors,'' De Klerk told reporters in his native Afrikaans, a close derivative of Dutch.

De Klerk's visit came after decades of cool relations between South Africa and the country whose traders fostered the African state in the 1590s.

De Klerk, 54, arrived at Valkenberg airforce base in southern Holland Tuesday morning.

''The South African government wants a new constitution,'' de Klerk said.

''We want a constitution in which all people in South Africa, irrespective of race and color have voting rights. But we must also have effective protection of the rights of minorities,'' de Klerk added.

''But it is difficult for me and my government to say when the new constitution will be realized because everything depends on the willingness of the black leaders to cooperate,'' he said.

The South African President spoke to reporters after extensive talks Tuesday afternoon with Holland's Prime Minister Ruud Lubbers and members of his Cabinet.

''The discussions were held in a good atmosphere,'' Dutch Foreign Minister Van den Broek told United Press International after the talks, adding he admired ''de Klerk's courage in beginning the process (of reconciliation) in South Africa.''

De Klerk said news of an impending meeting between African National Congress deputy leader Nelson Mandela and Zulu Chief Mangosutho Buthelezi was a ''positive sign'' in attempts to resolve black strife in South Africa.

''I am pleased that they have finally got together and am anxious to know what the outcome will be. But it is too early to tell whether this is the beginning of a reconciliation between the black groups,'' de Klerk said.

WASHINGTON (OCT. 23) UPI - Defense Secretary Dick Cheney will recommend that the $8.4 billion military construction bill be vetoed if Congress fails to restore money to build a new NATO base at Crotone, Italy, a spokesman said Tuesday.

''We feel very strongly that Crotone is very important to preserve,'' Pentagon spokesman Pete Williams said.

At the same time, Cheney will recommend that President Bush sign the $288.3 billion defense authorization bill for fiscal 1991 despite deep spending cuts in the Strategic Defense Initiative or ''Star Wars'' program, Williams said.

Williams quoted Cheney as calling it a ''pretty good deal'' despite not getting all the money or the specific program funding levels he requested.

In the military construction bill, the administration had sought $500 million as the U.S. contribution to NATO to build the new air base for the Air Force's 401st Tactical Fighter Wing.

The 401st must leave its current base at Torrejon, Spain, because the Spanish government, though a NATO member, no longer wants the American fighters in the country.

The $500 million for Crotone was deleted from the military construction bill, largely by those in Congress who contend it is no longer needed in a time of improving U.S.-Soviet relations.

The deletion may be challenged on the Senate floor.

Williams said Crotone is needed to protect NATO's southern flank once the U.S. fighters leave Torrejon. Other defense officials have privately noted that the base would be strategically located near the Middle East.

RIYADH, SAUDI ARABIA (OCT. 23) UPI - Colin Powell, chairman of the Joint Chiefs of Staff, consulted Tuesday with senior U.S. and Saudi commanders and said he was satisfied with the 77-day-old troop deployment.

Powell arrived late Monday and conferred with the head of the Central Command, Gen. Norman Schwarzkopf, both Monday night and Tuesday morning and visited troops at a base whose location could not be disclosed. He also consulted in Jeddah with the Saudi defense minster, Prince Sultan, and then flew to Brussels, Belgium.

Powell declined comment on a report that Pentagon planners believe two additional tank divisions are necessary.

He said he was ''enormously pleased'' with the deployment effort that in 77 days has seen the U.S. presence in the region soar from about 10, 000 sailors to about 200,000 U.S. personnel.

An aide said that Powell got ''an update from the operations and intelligence and logistics people'' during his visit to Central Command headquarters.

Powell said he had seen reports that Iraqi troops were moving back from earlier positions in Kuwai, ''But I have no evidence that would substantiate them.''

''The Iraqi forces still remain very solidly in Kuwait in the numbers we have been reporting all along and frankly, I have not seen any evidence of withdrawal,'' Powell said.

Powell said that although he talks with Schwarzkopf daily, at the meetings in Riyadh all the plans were reviwed ''and ... we examined every possible ocntingency with which we might be faced.''

An aide said the meetings provided ''an update from the operations and intelligence and logistics people.''

Powell said his talks with Sultan would cover ''the status of the buildup, the support being provoided by the Saudi government, the situation in Kuwait and a general review of all the plans.''

Powell last visited Saudi Arabia on Sept. 9 and on that visit did not meet with any Saudi officials.

Of the deployment, Powell said that in 77 days ''we have gone from roughly 10,000 sailors at sea to well over 200,000 ... It's gone extremely well.''

He said there were concerns early on about the clash of Western and Saudi culture but ''there have been very few incidents.''

He said he was ''very satisfied at the operational rates of the equipment and ... the morale seems to be good.''

#90296u1393 10/23/1990 ~United Press International

ISLAMABAD, PAKISTAN (OCT. 23) UPI - Tight security was in force nationwide Tuesday and gunmen killed a candidate on the eve of general elections viewed as a referendum on President Ghulam Ishaq Khan's decision to dismiss the government of Benazir Bhutto.

Ishaq Khan, in a broadcast address to the nation, issued a veiled appeal to voters to reject Bhutto's Pakistan People's Party at Wednesday's elections.

''It happens that the masses first lovingly bring some people to power and then, within a short period, turn against them,'' the president said in an apparent reference to Bhutto's ousted 20-month administration.

''The reason for the gradual withdrawal of their support is either that the rulers disregard their mandate or that the people make an initial error of judgment in the choice of their representatives,'' he said. ''So representatives should be carefully selected on the basis of their character and abilities.''

The president also reiterated at length some of his reasons for dismissing Bhutto and her government and dissolving the National Assembly.

Ishaq Khan took the action on Aug. 6, accusing Bhutto of corruption, nepotism and of failing to maintain law and order. He appointed opposition leader Ghulam Mustafa Jatoi to head an interim government until the elections he set for Oct. 24.

The president also set up special disqualification courts to try Bhutto and members of her administration on corruption charges in what observers believe was a bid to bar her from the elections.

Ishaq Khan on Tuesday filed charges that Bhutto set up a placement bureau that was used to find jobs for thousands of unqualified people. The charges bring to seven the cases against Bhutto in the courts.

Many believe Ishaq Khan's actions were inspired by the army, which has run Pakistan for more than half of its 43-year history and which had been in conflict with Bhutto's democratic government.

Tens of thousands of security personnel were duty throughout the country to guard against election violence. They included some 48,000 troops in violence-torn southern Sind Province, where caretaker Prime Minister Jatoi has warned that ''foreign-trained terrorists'' were seeking to create trouble on election day.

Meanwhile, gunmen shot and killed a candidate of the Islamic Democratic Alliance, a loose coalition of parties opposed to Bhutto, in the eastern city of Sialkot, state-run Pakistan Television said. On Monday, six PPP workers

were shot and killed in Sialkot.

Most projections show the PPP will emerge as the single largest party from Wednesday's vote but without an overall majority, and that the IDA will be able to cobble together a coalition government with the help of minor parties and independents.

However, most commentators say an IDA coalition government, founded largely on opposition to Bhutto, may not survive long and that the country could again be going to the polls within a year.

Analysts say the attempts to malign Bhutto and keep her from returning to power have instead evoked a wave of sympathy for the 37- year-old daughter of hanged Prime Minister Zulfikar Ali Bhutto.

Bhutto has drawn massive crowds at rallies across the country in an outpouring of support many observers say exceeds that of the campaign for the November 1988 elections. The PPP won those elections, the first democratic polls in the country since 1977.

But analysts say accusations by IDA leaders that Bhutto was to blame for this month's suspension of U.S. aid and that she is sympathetic to India and Israel may have cost her some support.

About 48 million of Pakistan's 110 million people are eligible to vote for 1,331 candidates to 217 National Assembly seats in the elections. Some 32,000 polling stations have been set up throughout the country.

#90296u1396 10/23/1990 ~United Press International

CHICAGO (OCT. 23) UPI - The race for Cook County sheriff, a hot contest pitting a former Chicago police chief against a former police officer, turned bloody early Tuesday when one campaign worker was shot and critically wounded.

Irving Bell, 34, was shot during what police described as a political argument with at least one man outside a South Side tavern.

Bell was in the intensive care unit at Christ Hospital and Medical Center in Oak Lawn in critical condition, a hospital spokesman said.

Bell, accompanied by four or five other people, either was hanging campaign posters for Democrat Michael Sheahan or defacing posters of incumbent Republican Jim O'Grady.

An O'Grady spokesman charged Bell was defacing O'Grady posters. Sheahan called on O'Grady to ''call off his thugs and goons from the street.''

Police questioned three suspects in the incident, including John E. Magett, 47 a sheriff's department investigator.

''Magett's gun has not been fired, as far as we know,'' said John Neven, a spokesman for the O'Grady campaign. ''We know that Irving Bell did draw his gun but we don't know who drew first.''

Police Sgt. Philip Michaels said the incident occurred about 3 a.m. Two men came out of the tavern and exchanged words with Bell and one told the other to shoot Bell. The second man then allegedly pulled a gun from an ankle holster and fired, Michaels said.

After he was shot, Bell ran into the street and was hit by a car, Michaels said.

''Apparently, it wasn't that big an argument,'' Michaels said. ''They just came out and, after a few words, started shooting.''

O'Grady spokesman Larry Horist said Bell or one of his companions brandished a crowbar and approached one of the O'Grady supporters.

''That's not to justify the shooting but when you're sending thugs out, this kind of thing is going to happen,'' Horist said, adding that other O'Grady campaign workers had been harassed by Sheahan supporters.

O'Grady said his office is helping in the investigation and called on Sheahan to ''cease and desist from hooliganism.''

''It's led now to some bloodshed and I don't want it to go any further,'' O'Grady said.

''I would like him (Sheahan) to make a statement to his people that this must stop. It's just carrying a case of running for office too much in the wrong direction.''

''A young man's life is more important than any campaign or office,'' Sheahan told a news conference. ''His (O'Grady's) supporters should realize this is a campaign, not a war.''

-30- 2725

#90296u1402 10/23/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (OCT. 23) UPI - Zephania Mothopheng, one of South Africa's most prominent political activists who broke with the African National Congress in 1959 and helped form the exclusively black Pan Africanist Congress, died Tuesday, hospital officials said. He was 78.

Mothopheng, a close friend of ANC leader Nelson Mandela and a long- serving

political prisoner, was admitted to Johannesburg General Hospital eight days ago with thyroid cancer, medical sources said.

Named president of the radical PAC in 1986 while still serving a 15- year term for inciting anti-government unrest, Mothopeng was released in November 1988 after nine years by then President Pieter W. Botha on health grounds.

The PAC hailed Mothopeng in a statement as the ''Lion of Azania,'' invoking the Black Consciousness name for a post-apartheid South Africa. It also lauded him for demanding a new constitution be drafted by a non- racial constituent assembly.

The ANC, in a statement issued by veteran member Walter Sisulu, said Mothopeng's death had left ''the people of South Africa, especially the oppressed, much poorer.''

''Comrade Zeph, as he was popularly known, was an ardent opponent of the apartheid system and a patriot dedicated to the liberation of our country,'' Sisulu said.

U.S. Ambassador William Swing, in a message of condolences, said in Pretoria Mothopeng ''spent his entire adult life in the forefront of the struggle against apartheid and in the effort to build a just society in South Africa.''

Mothopeng had strongly criticized the ANC's willingness to meet the white minority government before apartheid is abolished in its entirety, but the PAC is considering a government invitation to join preliminary power-sharing talks.

Both the PAC and the ANC were unbanned after 30 years as illegal organizations in February by President Frederik de Klerk at the launch of his racial reform program. Although the ANC announced in August a suspension of its armed struggle in a goodwill gesture to de Klerk, the more radical and racially exclusive PAC has refused to renounce the strategy.

A high school teacher by training, Mothopeng also served six years imprisonment in the 1960s for inciting black uprisings and was repeatedly detained and placed under house arrest. The PAC, the main rival of the ANC, has maintained that prolonged detentions and ''repeated government harassment'' exacerbated his ill health.

Born in the conservative Orange Free State province, Mothopeng was a member of the multi-racial ANC until he and other Black Consciousness activists broke away in 1959 to form the PAC.

He is survived by a wife, three sons and a daughter.

#90296u1419 10/23/1990 ~United Press International

CAIRO, EGYPT (OCT. 23) UPI - An Iraqi diplomat scoffed Tuesday at a Kuwaiti newspaper report that Iraqi President Saddam Hussein had a dream in which an Islamic spiritual leader told him he should withdraw from Kuwait and dismissed the report as ''wishful thinking.''

The Kuwaiti newsletter Al Azma, published in Saudi Arabia, reported earlier this week that the regional command of Iraq's Ruling Baath Socialist Party had distributed leaflets at mosques in Iraq and Kuwait.

The newsletter did not mention the Prophet Mohammed.

The leaflets said Saddam saw Ali bin Abee Talib, the fourth Islamic Khalifa or Moslem spiritual leader, as telling him to stop fighting Moslems and direct his weapons against ''the enemy of Islam Israel.''

But an Iraqi diplomat in the Middle East dismissed the Kuwaiti report as cheap propaganda.

''The report is nonsense and a cheap propoganda against President Saddam Hussein and the Iraqi people,'' the diplomat told United Press International.

The newsletter said Saddam called an urgent meeting of prominent religious leaders after his dream and the meeting lasted until the early hours of Saturday.

Al Azma quoted unnamed sources as saying, ''Saddam has promised to withdraw from Kuwait in accordance to religious considerations and the order of the Khalifa Ali.''

#90296u1434 10/23/1990 ~United Press International
(OCT. 23) UPI - 14 Americans held hostage in Iraq as human shields against possible attack left Baghdad today. U-S officials say the Americans departed on a plane headed for Amman, Jordan. The White House says Iraqi President Saddam Hussein promised to free 14 Americans in a meeting in Baghdad earlier this week.

Also today, a Virgin Airways jumbo jet landed in Iraq to evacuate some ailing and sick Britons after an appeal by former British prime minister Edward Heath. And in another development, the United States today warned Americans hiding in Kuwait NOT to comply with an Iraqi order to register with Iraqi authorities, saying they could put themselves ''at risk.''

On Capitol Hill, House Democrats are split on a proposed budget package. Half of the Democrats oppose the Republican plan to hike taxes on the rich and to increase costs in Medicare. But Democratic leaders say they don't have enough support to pass the plan and are prepared to resume negotiations with Republicans, the Senate and the administration.

The House ethics panel is considering new allegations against Ohio Representative Donald Lukens. The Republican congressman was convicted last year for having sex with a teen-age girl. Now, the panel wants Lukens to answer new charges of sexual misconduct involving sexual advances to a congressional employee.

President Bush was stumping for Republicans today in Vermont, New Hampshire and Connecticut. He told a morning fund-raiser in Burlington, Vermont, that Congress wouldn't be in the mess it's in today if there were more Republicans elected. Bush has fewer Republicans in the House than any G-O-P president this century and Democrats also reign in the Senate.

Explosions tore through two oil companies in Manila today... causing NO injuries but prompting Philippine troops to go on alert. The blasts come on the eve of a general strike called by left-wing unions. Laborers demand wage increases to make up for gas prices hiked by the Persian Gulf crisis.

A report from Berlin says East German school teachers who want to work in what used to be West Germany must repeat teachers' exams... but those who stay in the East can keep teaching. One educator who left the communist East before unification says teachers are ''being punished for their courage and logic.''

Pre-trial arguments begin today in Roanoke, Virginia, in a lawsuit to decide whether a young woman can attend all-male Virginia Military Institute. The Justice Department says ''yes''... but the state and a school fund-raising arm say ''NO''. A female attorney general is leading the state's fight to keep women out of V-M-I.

Three Philadelphia police sergeants have been demoted because they are too fat. The three passed a battery of tests and were promoted to sergeant in April. But the promotion required that they lose weight in the next six months. All of the officers weigh more than 280 pounds... and NONE came close to their goals for weight loss.

ORLANDO, FLA (OCT. 23) UPI - The nationwide average price of self-service gasoline inched up to $1.38 a gallon in the past week, while prices for other grades decreased slightly, the American Automobile Association said Tuesday.

The average price for a gallon of self-service regular gas rose 0.1 cents to $1.38, while mid-grade self-service unleaded declined 0.5 cents to $1.464 and premium unleaded dropped 0.3 cents to $1.548, the AAA said.

The average price of gasoline has risen 30.5 cents since Aug. 1, the day before Iraq's invasion of Kuwait, the AAA said. The highest price ever recorded by the AAA for self-service regular was $1.388 a gallon, just before the 1981 Easter weekend.

The ''fuel gauge survey,'' which is based on a nationwide spot check of stations for AAA by Computer Petroleum Inc., found the largest price increase

was in New England, while prices decreased most in the Southeast and mid-Atlantic regions, the AAA said.

#90296u1455 10/23/1990 ~United Press International

PARIS (OCT. 23) UPI - France indicated Tuesday it would accept an Iraqi offer to release up to 400 French hostages held in Iraq and Kuwait but would not drop its support for U.N. resolutions demanding Baghdad's forces withdraw from Kuwaiti territory.

Prime Minister Michel Rocard held a meeting of representatives of the main parliamentary parties to discuss the hostage issue. The meeting ended a short time before the Iraqi News Agency reported the Iraqi Parliament had voted to free all French hostages.

Bernard Stasi, a leader of the Social Democratic Center Party quoted Rocard as having stressed ''that there would be negotiations with Iraq'' and that the release of French captives would be ''a unilateral decision on the part of Iraq.''

''One will accept the return of the hostages, but France will remain faithful to the resolutions voted by the U.N.,'' Stasi quoted Rocard as saying.

In all, some 67 French are believed to have been taken to strategic sites to be used as human shields, some 212 others are trapped in Baghdad and elsewhere in Iraq and some 100 are thought to be in Kuwait.

Elysee Palace spokesman Hubert Vedrine declined to comment on the Iraqi Parliament decision and there was no other immediate official response.

Earlier Tuesday, the Foreign Ministry said it would not negotiate the release of the hostages and would view their release as the ''reparation'' of ''an inadmissible act.''

''Whatever happens the problem of the invasion and occupation of Kuwait will remain,'' the French Foreign Ministry said in a statement.

In another sign of Iraq wooing French public opinion, right-wing extremist Jean-Marie Le Pen's National Front Party said a delegation of the group would leave for Baghdad in the next few hours ''at the invitation of Iraqi authorities.''

The National Front repeatedly has opposed government policy against Iraq.

The Iraqi announcement was made a few hours after France said it was reinforcing its forces in Saudi Arabia with 500 more soldiers as well as extra tanks and helicopters.

The first contingent of troops was preparing to leave for the Middle East Tuesday from the southern port of Toulon for the six-day voyage to Saudi Arabia, the sources added.

Aside from the 500 new soldiers, France is also sending some 20 additional helicopters, including a Gazelle combat model equipped with anti-tank missiles and Puma transport vehicles, to join the 5th Regiment of combat helicopters in the city of Roi Khaled in northeast Saudi Arabia.

Two squadrons of 12 AMX-10RC tanks will also be shipped in the coming days as part of a buildup requested by French generals when President Francois Mitterrand visited Saudi Arabia earlier this month.

The military says the additional men and equipment are necessary to better protect French troops stationed near the Kuwaiti border and to insure their technical autonomy from other Western forces deployed in Saudi Arabia.

France is among several countries participating in a U.S.-led international force deployed in response to Iraq's Aug. 2 invasion of Kuwait.

The military reinforcement comes just one day after Iraqi President Saddam Hussein asked his country's Parliament to ''consider'' releasing French nationals still being held in Iraq and Kuwait.

France sold massive quantities of arms to Iraq during its eight-year war against Iran, becoming Baghdad's second largest military supplier after the Soviet Union.

Political analysts in Paris described the latest Iraqi overture to France as as the latest effort to split the international alliance against Baghdad. The analysts said if all French hostages are indeed released, Paris would be put in a embarrassing situation because the move would lead to new suspicions that the French are following an independent course in the Persian Gulf crisis.

#90296u1461 10/23/1990 ~United Press International

PARIS (OCT. 23) UPI - The battle in the spring-summer Paris ready-to-wear shows between the loose and the skin-tight burned on Tuesday with designer Emanuel Ungaro choosing both silhouettes.

Ungaro won the only standing ovation from buyers and press so far with some 200 ''very salable'' items, as one New York buyer raved.

His popular draped dresses hugging every pore of the body were fewer, mainly black chiffon or silk draped short evening numbers.

Otherwise the silhouette loosened up to surprising straight, loose smock dresses with tiny straps, puffy taffeta evening jackets, short cocktail numbers that were baggy except for tight wrapping low on the hips, easy shift dresses and A-line evening creations.

Another trend was those noisy colors that have influenced most of the eight-day shows that end Wednesday. Try a short pink jacket worn with a mango-orange skirt, turquoise blouse printed with pink flowers and a lavender hat adorned with a pink ribbon.

The designer not only mixed colors but mixed prints, a talent that brought him fame when he burst onto the fashion scene in 1965. Wild plaid jackets married skirts in other plaids or floral patterns. Polka- dotted dresses linked with flower-dotted jackets. Striped full, body- hiding jackets swung over more floral printed dresses.

Ungaro also joined the glitter stampede with shiny vinyl mini skirts in burgundy, red, yellow, green. Short evening dresses blazed with gold, silver, purple, red or black sequins. White lame interwoven with tiny pink flowers was used for bare-backed short dresses.

Then add A-shaped long puffy evening dresses flirting with ruffled petticoats, huge white collars, pink sashes, enormous gazar sleeves - what an ovation he received.

After reviewing the spectacular styles in the shows in the Louvre museum courtyard, journalists then settled down at the Guy Laroche parade to see what they will wear.

Designer Guy Douviers elegant line, suitable for women of all ages and the lowest priced of the designer shops, shone in bright colors as elsewhere. He gave hemline choices - above knee but also long jersey daytime dresses, narrow trousers, wide pajamas and not-too-short wide Bermuda shorts.

Black shorts with a blouse and billowing jacket in a black and white harlequin diamond print brought applause.

Also admired was a black and white checked jacket over a short black skirt and

long white sleeveless vest-top with crossed straps over a bare back.

Green or blue denim dresses and suits, evening pajamas under a long floating coat in two black-white prints, short evening dresses in white lace or silver, gold, red or purple sequins, a short black dress with an enormous white organdy collar - they all answer women's dreams.

The show of Hermes was as elegant and refined as the houses famed scarves and handbags.

The ready-to-wear, designed by a team of young creators including Martine Sitbon and Tad Gudicelli, included silk jackets printed like Hermes scarves with a horse bridle design to please Hermes' chateau- owning customers. Some jackets and trousers were shaped like riding outfits and long apron dresses sported leather shoulder straps.

A map of the Provence region of southern France was printed on sensible swim suits and silk jackets. Another new Hermes print of Asian junks and sampans was used for soft jackets, neck-to-toe body-plastering tights and short dresses.

For evening the show joined the sequin hysteria with long sequined tights twinned with a skimpy bra top.

Nina Ricci's new designer, Englishman Philip Waghorne, 28, offered sophisticated resort pajamas, wide shorts and trousers with sailor looks, full ruffled short dresses.

Waghorne, a master with ''trompe l'oeil'' magic, created what looked like a black jumper over a white blouse. But the ''jumper'' actually was just printed onto the dress.

#90296u1470 10/23/1990 ~United Press International
ORLANDO, FL (OCT. 23) UPI - Rear Adm. Louise Wilmot, head of the Orlando Naval Training Center, defended the base Tuesday against charges that it fails to prosecute rapists and takes sex offenses lightly.

''If you've been attacked by someone, we want to know. We want to prosecute,'' she said.

Six female students or female recruits stationed at the base, the Navy's only boot camp for women, reported that they had been raped in an 18-month period that ended in June, according to a report by the Navy Inspector General.

Wilmot said the Navy investigated five of those cases, and in each of those five, there was not enough evidence for a court-martial.

''The rules of law in a court-martial are the same as in a civilian court,'' she said.

She said she personally reviewed each case.

''And I agree with those decisions (not to prosecute), and each of those cases has been reviewed by our headquarters and Washington, and in each case, no one disagrees with us,'' she said.

The sixth alleged rape was investigated by the Seminole County State Attorney's Office.

''I've spent 26 years in the Navy trying to make this a better place for women '' she said.

''Despite progress made in this area to date, this report indicates that much more must be done in Orlando, within the Naval Education and Training Command, and, presumably, throughout the Navy,'' Vice Adm. J.S. Disher, chief of Naval Education and Training, in Pensacola, Fla., wrote in a letter of support of the inspector general's letter.

Wilmot echoed her supriors in saying the Navy has ''zero tolerance'' for sexual harassment, abuse and fraternization.

The report cited 13 cases of fraternization, social interaction between recruits or enlisted personnel and their superiors, a practice that is banned in the Navy.

Wilmot said that only two of those cases involved sex and that all 13 offenders was given ''non-judicial punishment,'' meaning they were not court-martialed but were transferred against their wills and given letters of reprimand that could prevent promotion.

''We have the strictest rules against fraternization in the Navy,'' she said. ''Our rules say you may not have a friendship or any kind of relationship with anyone who was your superior.

''There's been a lot of misinformation about that report,'' she said. ''We think we know what we're doing. This is a good place for women in the Navy.''

The inspector general's report also cited five cases of sexual assault during the same 18-month period. Wilmot said each of those cases had been prosecuted and each offender punished, however, a report published Monday by The Washington Post indicated only one of those assault cases resulted in court-martial.

''We're like a small city out here,'' Wilmot said, with a workday population

of 18,000.

''To find only 13 cases (of fraternization) I think that shows we've been very aggressive and good stewards of our nation's trust,'' she said.

#90296u1493 10/23/1990 ~United Press International

SANTA MONICA, CA (OCT. 23) UPI - Prosecutors trying Marlon Brando's son for murder said Tuesday they probably will fail in bringing the actor's daughter back to California in time to testify against her half brother.

Christian Brando's trial on a first-degree murder count stemming from the shooting death of his half sister's boyfriend is due to begin in two weeks.

The District Attorney's Office has sought for the last five months to return Cheyenne Brando from Tahiti.

She flew to the South Pacific island following the May 16 shooting death of her Tahitian lover, Dag Drollet, who was killed at her father's mountaintop estate. Cheyenne gave birth in June to Drollet's child.

Christian Brando, 32, had admitted shooting Drollet, but contends the gun went off accidentally while struggling for the weapon with Drollet.

However, before leaving for Tahiti, Cheyenne Brando, in a statement to police, said, ''It's a murder, in case you don't know it.''

At a hearing Tuesday, a judge ordered jury selection in the trial to begin Nov. 5.

Prosecutors, however, said they doubted they would be able to persuade officials in French-governed Tahiti to return Cheyenne, 20, by then.

''We continue to try and get her to return, but time grows short,'' said Deputy District Attorney Stephen Barshop.

Prosecutors were unable to subpoena her before she left Los Angeles for Tahiti and a federal judge and a Superior Court judge have turned down requests to ask French Polynesian authorities to subpoena her in Tahiti, saying they don't have the authority to do so.

Prosecutors then turned to the French consulate in Los Angeles but have been told to work through the U.S. State Department.

''We're not really overly optimistic it (Cheyenne's return) will happen,'' said Deputy District Attorney William Clark. ''If we had a couple of years, we might be able to pull it off.''

After spending three months in County Jail, Christian was freed in August when his father posted his $4 million Hollywood Hills estate as collateral.

Marlon Brando did not attend Tuesday's hearing. The 66-year-old Academy Award-winning actor is expected to testify at the trial.

His son was charged with first-degree murder because prosecutors believe he premeditated the slaying, acting on Cheyenne's claims that Drollet had been abusing her. Christian allegedly shot Drollet in the face at point-blank range while the victim was watching television. He faces up to 25 years to life in prison upon conviction.

-30- 2717

#90296u1506 10/23/1990 ~United Press International

EUGENE, OR (OCT. 23) UPI - Concerts by the Grateful Dead helped fund the University of Oregon's Athletic Department in a big way last summer, but the popular rock band won't be allowed to return next year, officials announced Tuesday.

Dan Williams, UO's vice president for administration, said Autzen Stadium will be off-limits to the San Francisco rock band next summer due to concerns the school could be seen as condoning drug abuse among the group's many fans.

The school official said he denied a request by Double Tee Promotions of Portland to bring the popular San Francisco band led by guitarist Jerry Garcia back to Eugene next summer for the fourth time in five years.

''This is not a permanent ban on the Dead, but we don't want it to become an annual or regular event,'' Williams said.

Williams said a significant number of people see the band's appearance at a university facility as an indication UO condones drug abuse.

''I think that perception is misplaced, but it isn't something we need to be devoting our energies to,'' he said.

The UO Athletic Department leases Autzen Stadium to various promoters to raise money for non-revenue sports. The Grateful Dead's pair of shows this year raised about $200,000 for those sports programs.

But the department, which is expected to be financially self- sufficient, will get a one-time infusion of state aid this year in the form of athletes' tuition waivers, UO officials said.

The Grateful Dead made several visits to Eugene in the 1970s, the last in 1978. But due to problems with the group's fans known as ''Deadheads'' camping

nearby, starting grass fires, relieving themselves on private property and bothering neighbors, they were not allowed to return until 1987, said university spokeswoman Gaye Vandermyn.

In recent years, the promoters paid for extra police and traffic control in the area, also setting up a ''tent city'' on the stadium's parking lot for the many ''Deadheads'' who follow the band from one city to another each summer.

''Some people in the community complained about drug use among participants attracting the wrong kind of people,'' Vandermyn said.

''A number of merchants make a lot of money when there's a big crowd. But some in the University District were not pleased with the kind of people that came and hung around for three or four days and shoplifted a lot,'' she said. ''They feel they lost a lot of money.''

#90296u1527 10/23/1990 ~United Press International

KANSAS CITY, Mo. (OCT. 23) UPI - UtiliCorp United Inc. said Tuesday it would receive $15 million in cash over two years for its part of a recent settlement in an anti-trust lawsuit.

UtiliCorp said the litigation was tied to overcharges from 1979 to 1982 by three of its natural gas suppliers, Amoco Production Co., Oxy USA Inc. and Williams Natural Gas Co.

In 1985, UtiliCorp joined several other utilities, the states of Missouri and Kansas, and Farmland Industries Inc. in a lawsuit against the three natural gas suppliers. The lawsuit claimed the defendants created a monopoly and fixed prices of gas they owned in Wyoming.

Amoco and Oxy settled their portion of the case on Sept. 26. After seven days of trial, Williams also agreed to a settlement.

The case was dismissed Oct. 4 with none of the defendants admitting guilt.

The overcharges, passed on to UtiliCorp customers by its Missouri Public Service and Kansas Public Service divisions, would be refunded according to procedures determined by Missouri and Kansas utility regulators.

''We will achieve a very substantial recovery for our Missouri and Kansas customers,'' said UtiliCorp Chairman Richard C. Green Jr. ''In addition, we will recoup our legal expenses and anticipate that our divisions also will be able to recover some portion of the earnings they lost. We are extremely pleased with this settlement.''

#90296u1549 10/23/1990 ~United Press International

NEW YORK (OCT. 23) UPI - The widely acclaimed picture ''Goodfellas'' Tuesday led the list of movies, TV shows and commercials to receive ''Golden Pit Awards'' for ethnic insults.

The award, a gold spray-painted peach pit on a blue ribbon, was presented by limousine magnate William Fugazy, the honorary chairman of the National Ethnic Coalition of Organizations. It consists of 66 of the largest ethnic groups in America.

Fugazy called Goodfellas ''the worst movie that ever came out as far as portraying the Italo-American family ... particularly in showing the family participating in crimes.'' He called it ''absurd.''

The award said the movie ''shamelessly puts Italian-Americans in a bad light, seeking to reinforce Italian men as vicious (and) women ... as dumb, loudmouthed accomplices...''

The next highest criticism came in for the Mazda Navajo, the ''new 1991 sports utility car,'' television commercials.

''This shows a lack of respect and understanding towards American Indians throughout the country by exploiting their image and culture.''

Tonya Gonnella Frichner, an attorney and president of the American Indian Law Alliance, said the flashing of religious symbols sacred to native Americans during the commercial was particularly insensitive and ''offensive.''

Other ''awards'' went to the films ''Mo' Better Blues'' for stereotyping Jews, and ''A Show of Force'' for switching the plot to make an American reporter the hero instead of the actual three Puerto Rican Americans in real life.

Another went to Tri-State (of New York, New Jersey and Connecticut) Oldsmobile and New York area Pontiac dealers ''for attacking the producers of competitive automobiles, the Japanese people.''

The awards singled out the parody record ''As Kosher as They Wanna be,'' by the team billed as ''2 Live Jews'' for self-denigrating Jewish jokes, which according to the Anti-Defamation League of B'nai B'rith ''can be bludgeons in the hands of bigots.''

The NBC television soap opera ''Santa Barbara'' was criticized for its recent portrayal of Arabs, and ''In Living Color,'' on Fox Television for crossing ''the fine line of comedy with its negative reinforcements of ethnic stereotypes.''

#90296u1552 10/23/1990 ~United Press International

OMAHA, NEB (OCT. 23) UPI - Conagra Inc. and Elders IXL Limited of Melbourne, Australia said Tuesday ConAgra has signed a letter of intent to acquire certain assets of two Elders businesses and a half interest in another for $175 million.

ConAgra, a diversified food company based in Omaha, would buy some assets of Elders Brewing Materials and Elders International Wool Division. The company also would acquire a 50 percent interest in the Elders Meat Division.

Combined sales from the three Elders businesses total $1 billion annually.

The remaining Australian ownership of the Meat Division would include 45 percent by Elders and 5 percent by ConAgra's partners in the D.R. Johnson Group, which owns and operates meat processing and trading businesses in the country.

Elders IXL is an international brewing and agribusiness company.

ConAgra said it would finance 65 to 100 percent of the investment through equity.

The Omaha company recently purchased Beatrice Co., a leader in the shelf-stable foods market, for $1.34 billion in cash and stock.

#90296u1562 10/23/1990 ~United Press International

TAYLOR, Texas (OCT. 23) UPI - A Texas condom maker involved in a legal dispute with Northrop Corp. said he will go out of business if he loses the fight for his product's trademark.

Northrop, the giant defense contractor that makes the B-2 Stealth bomber, has taken legal steps to deny John Hughes' application for a trademark for his kitchen-table business, selling red, white and blue condoms in a cardboard package resembling the bomber.

After he applied for a trademark last year, Northrop's attorneys filed a petition with the trademark office to block the application.

''If they stop my trademark - if they can - we're out of business automatically,'' Hughes said Monday. ''They know I'm not a big company. If they make me spend enough money, sooner or later I'm history.''

The attorney representing Northrop declined to comment without the company's permission, and Northrop officials were unavailable for comment.

The petition filed with the Trademark Trial and Appeal Board said Northrop, based in Los Angeles, believes it will be damaged by the trademark for Stealth Condoms because ''its use by applicant (Hughes) is likely to cause confusion, or to cause mistake, or to deceive.''

Hughes, who also has a tile-laying business in Central Texas, said his condoms have a better reputation than Northrop's airplane, which has been the subject of much debate in Congress.

''The condoms perform better than the bomber,'' he says. ''Our package will even fly over 40 feet - they don't do well in wind, though. They're totally radar-proof, can fly low and don't require a great length of runway to land.''

Hughes, 28, who says he's trying ''to put some fun back into condom buying ''said even if the government became confused and spent $865 million on his product instead of buying a Northrop bomber, it might not be such a bad deal.

''I could provide an incredible amount of protection for that kind of money,'' he quipped.

PASADENA, CA (OCT. 23) UPI - Cara Payton Rullman, a high school senior, was crowned queen Tuesday of the 102nd New Year's Day Tournament of Roses parade.

''I wasn't thinking about anything, but my heart was beating really fast,'' the blonde Rullman, 17, said after her name was announced at a ceremony.

The new queen's crowning was interrupted when her classmate and Royal Court companion Tisha Mei-Lin Kong fainted.

''She was hugging me as she went down,'' Rullman said of Kong. ''She was just so happy for me.''

The bubbly rose queen said she did not expect to win when she signed up for the contest along with 34 other seniors at San Marino High.

''At the beginning of everybody's senior year, we all go down and sign up,'' she said. ''I was more excited just making the finals than actually winning. At that point, it didn't matter to any of us who won.''

''I don't consider myself extra special,'' she added.

Rullman, wearing a high-neck red dress, stepped forward from the seven-member Royal Court to accept the crown and traditional bouquet of roses from 1990 rose queen Yasmine Delawari.

The new queen is a member of the varsity cheerleading squad at San Marino High the California Scholastic Federation and the National Charity League.

She said she hopes to attend either UC Berkeley, Virginia or North Carolina after high school to major in child education.

Born in New York, the new queen has been a Pasadena-area resident for nine years.

Her sister, Courtney, 19, was a previous rose queen contestant.

Rullman and her Royal Court will participate in more than 100 community events culminating in her reign over the 102nd annual Rose Parade and the 77th Rose Bowl game on New Year's Day.

NEWTON, MA (OCT. 23) UPI - General Cinema Corp. said Tuesday it will lay off about 85 employees, including 30 at its headquarters, and sell or close about 20 theaters in a restructuring effort to return its theater division to profitability.

Despite a $30 million to $35 million charge against earnings in the current quarter for the restructuring, the company predicted profits will exceed $50

million, or about 70 cents a share, for the period ending Oct. 31.

The company has not settled on the specific locations to be disposed of, but most of them, with a total of about 80 screens, will be in the South, said Peter Farwell, a spokesman. Also, the company said it will close some field offices around the country, but Farwell declined to say which locations would be affected.

Employees to be laid off were being notified Tuesday, Farwell said.

Meanwhile, the theater division, which had an operating loss of $1.7 million in the first three quarters, now is expected to lose $11 million from operations before taxes for the full year, the company said.

Offsetting the movie division operating loss and the restructuring charge in the current quarter is an after-tax gain of more than $80 million from the sale of the company's interest in Cadbury Schweppes PLC, the British candy and soft drink maker.

#90296u1618 10/23/1990 ~United Press International

HOLLYWOOD (OCT. 23) UPI - Movie patrons have paid nearly $4 billion so far this year at the domestic box office, just slightly behind last year's record-setting pace, when ticket sales reached $5 billion by year's end.

Good performances by action-adventure films such as ''Marked for Death'' and ''Memphis Belle'' and the continued popularity of ''Ghost'' have kept ticket sales from lagging in recent weeks.

The year-to-date total hit $3.92 billion over the weekend, compared with $3.97 billion for the same period last year, Daily Variety reported Tuesday. In 1988 the total at the same juncture had hit $3.51 billion.

The top 10 movies of the weekend grossed a total of $33.1 million, off 9 percent from the previous weekend's take of $36.3 million. The gross was also down 14 percent from the $38.5 million taken in by the top 10 last year, when ''Look Who's Talking'' set a fall weekend record of $14.1 million.

For the week, the domestic box office for all movies in release reached $75.6 million, off slightly from the $77.2 million grossed in the year-ago week. In 1988, the same week produced ticket sales of $54.6 million.

''Marked for Death,'' which has kicked in $28.9 million in 17 days for Twentieth Century Fox, will face stiff competition for the top spot next weekend when Paramount releases Stephen King's ''Graveyard Shift.''

Universal's steamy ''White Palace,'' meanwhile, may perform well as it goes into wide release. The romance-comedy, starring Susan Sarandon and James

Spader, grossed $1.1 million at just 99 screens in its debut last weekend.

''Ghost'' will probably pass Disney's ''Pretty Woman'' around Halloween as the year's most popular film. ''Ghost'' has pulled in $172.2 million for Paramount while ''Pretty Woman'' has grossed $177.2 million.

Five other 1990 releases have topped $100 million in ticket sales this year: New Line's ''Teenage Mutant Ninja Turtles,'' with $133.1 million; Paramount's ''Hunt for Red October,'' with $120.7 million; Carolco's ''Total Recall,'' with $118.3 million; Fox's ''Die Hard 2,'' with $114.1 million, and Disney's ''Dick Tracy,'' with $103.7 million.

LAGOS, NIGERIA (OCT. 23) UPI - President Ibrahim Babangida said Tuesday oil-rich Nigeria will give assistance to African countries suffering from high oil prices caused by the Gulf crisis.

The Nigerian leader said the move was to ''ensure the brotherhood of the region,'' but he gave few details of how Lagos would assist.

Nigeria produces 1.9 million barrels of oil a day and has earned an additional $2 billion from higher oil prices caused by the Iraqi invasion and takeover of Kuwait.

However, observers also believe Babangida is using the bait of financial assistance to ensure the unity of the West African sub-region, which has been divided over the role of the five-nation West African peacekeeping force now fighting in Liberia.

Ivory coast and Burkina Faso recently called for the withdrawal of the force, in which Nigeria is the largest member with more than 3,000 troops.

Babangida has already offered assistance to Ghana, the second largest member of the force. The Ghanain government has been stricken by the Gulf crisis and has boosted fuel pump prices by more than 50 percent.

In linked diplomatic efforts, Babangida during the past week received Togo's President Gnassing-be Eyadema and delegations from Sierra Leone and Mali.

PARIS (OCT. 23) UPI - The French broadcasting authority Tuesday approved the acquisition by the publishing company Hachette of a leading share in the private television chain La Cinq, officials said.

The government's Superior Audiovisual Council gave the green light for Hachette to increase its equity holding in La Cinq from 22 percent to 25 percent.

In addition, newspaper publisher Robert Hersant will reduce his share from 25 percent to 10 percent, while Italian television entrepreneur Silvio Berlusconi's holding of 25 percent remains unchanged.

Hachette is the largest media group in France and the second largest in Europe after Germany's Bertelsmann.

DURHAM, CT (OCT. 23) UPI - A florist has cut through red tape and will be sending homemade cookies and Christmas trees to U.S. soldiers who will spend the holidays in the desert of Saudi Arabia.

''I just didn't want them forgotten. I don't want what happened to the guys in Vietnam to happen to them,'' said Ann Page, who convinced the government to ship the artificial trees despite possible Saudi objections.

Page knew she could not send the decorated Christmas trees, food and other presents through the mail directly to U.S. troops in the Persian Gulf because the Saudis object to what they consider religious symbols.

The U.S. government initially refused to handle the shipments and risk offending the Saudis, but last week relented and will deliver the presents aboard military aircraft, said Page, who is an owner of Page's Flower Shop in Durham.

Nearly 60 of the 18-inch-high trees have been collected so far around Connecticut and western Massachusetts from florist and craft shops, which stock the plastic trees for display and sale during the Christmas season.

Page also is assembling packages for U.S. soldiers with batteries, underwear, insect repellent, sun tan lotion, pens and writing paper, toiletry items and foods, including powdered fruit drinks, peanut butter and jelly. Residents of a convalescent home in rural Durham are also baking Christmas cookies.

Page, who has no close family members in the Persian Gulf, decided back in August to start collecting the trees and presents.

''It sounded like fun to give them Christmas,'' she said.

The gifts will be sent after Thanksgiving through the American Red Cross to Westover Air Force Base in Massachusetts, where they will be sent on military planes when space is available.

NEW YORK (OCT. 23) UPI - Toronto Stock Exchange officials ventured onto the turf of a major competitor Tuesday to talk up an innovative stock price system they hope will give them an edge in the global equities marketplace.

The launching at the venerable Fraunces Tavern in Manhattan's financial district was the latest bid by a secondary exchange to claim a bigger niche in the new world markets scheme dominated by New York, London and Tokyo.

Executives of the No. 1 Canadian bourse hope to increase trading volume with their trademarked Market-by-Price system, giving stockbrokers and investors a ''look at the book'' of computer-entered share buy and sell orders.

The stock market data system provides ''real-time'' access to prices generated by Toronto's Computer-Assisted Trading System - known as CATS, a pioneer computerized trading system - and parallel exchange floor action.

The system tips the hand of the specialists, or market makers, who facilitate

buying and selling of a few stocks. The New York Stock Exchange is planning a similar ''look-at-the-book'' program, but with access at fixed intervals.

As many of the Canadian issues traded in Toronto also change hands on the NYSE it is hoped the greater transparency offered by the Market-by- Price system will draw business north of the border.

Toronto exchange officials say the system enables investment professionals to better monitor prices and activity on the exchange.

The system began operating in Canada in April. But TSE officials traveled to their major competitor's doorstep to launch it abroad.

TSE Executive Vice President James Gallagher set the annual trading volume in Canadian stocks at $65 billion (Canadian), of which $15 billion to $20 billion changes hands on the NYSE and other U.S. exchanges.

Some 1,597 stocks are traded on the Toronto Stock Exchange, of which some 200 are bought and sold on other U.S. and international markets.

WASHINGTON (OCT. 23) UPI - The Senate Ethics Committee, trying to end speculation that politics is influencing its investigation of the ''Keating Five'' savings and loan scandal, agreed Tuesday to hold public hearings on the affair next month and close the investigation by the end of the year.

The bipartisan panel adopted a resolution calling for the hearings to begin Nov. 15 - nine days after the midterm election - and for the committee's proceedings to be wrapped up by the end of the year, except in ''extraordinary circumstances.''

The scandal, in which five senators have been accused of granting improper favors to savings and loan executive Charles Keating, spilled onto the Senate floor Monday when one of the senators, Republican John McCain of Arizona, demanded that the committee make public its findings in the matter.

McCain is the only Republican among the five senators. There have been numerous reports in the past week that the committee's special lawyer

investigating the affair has decided there is not enough evidence to pursue a case against either McCain or Sen. John Glenn, D-Ohio.

After McCain took the unusual step Monday of publicly demanding that the committee end its inquiry, several other Republicans went to the Senate floor to call for the investigation of McCain to be ended.

That, in turn, prompted several leading Democrats to charge that Republicans were engaged in an organized campaign of leaks to make it appear that only Democrats were guilty of wrongdoing in the affair.

The other three senators involved in the matter are Alan Cranston, D- Calif., Dennis DeConcini, D-Ariz., and Donald Riegle, D-Mich.

None of the five senators are up for re-election this year.

The resolution adopted by the ethics panel declared that there was evidence in relation to all five senators, but that the reliability of the evidence depended on the credibility of witnesses who would appear at the public hearing.

The resolution also said the committee had made no finding that any of the five senators had engaged in any improper conduct.

Following release of the resolution, Cranston noted: ''The public is entitled to get beyond the malicious rumors and selective leaks and to know all the facts. I see this as an opportunity to achieve the public vindication I know I deserve.''

#90296u1791 10/23/1990 ~United Press International

ANCHORAGE, AK (OCT. 23) UPI - An Exxon exhibit boasting of the company's efforts to clean up its Alaska oil spill has been removed on government orders from the Anchorage federal building and courthouse, officials said Tuesday.

The display had been mounted in the lobby of the same building where Exxon Corp. and Exxon Shipping Co. face criminal charges and civil suits arising from the nation's worst oil spill.

''We didn't think it was appropriate that Exxon have that kind of display in the courthouse in Alaska where their case was pending,'' Justice Department spokeswoman Amy Casner said from Washington.

The U.S. District Court, where cases against Exxon have been filed, is on the second floor of the building, within sight of the lobby where Exxon put up its elaborate display, including large photos, a scale model of cleanup operations samples of boom and absorbent materials used to sop up crude and even a

life-size dummy wearing a survival suit.

Federal building rules allow building managers to deny exhibit permits if the subject matter ''pertains to any judicial proceeding ... pending in the public building and this use is intended to influence or impede the judicial proceeding.'' The Anchorage building manager, Jesse Avila, gave Exxon permission to display its exhibit.

But Avila's bosses at the General Services Administration overruled his decision and asked Exxon to remove the display.

Avila refused repeated requests for an interview, but deputy regional administrator Aki Nakao in San Francisco said, ''I presume the field office manager saw nothing wrong, so he went ahead with the permit and he didn't talk to anybody else.''

The exhibit has been a subject of concern since it went up late last month. Environmental groups objected to the display but, when it didn't come down, they put up one of their own earlier this month at the other end of the building. It, too, was ordered pulled down. Both exhibits came down Monday.

The Exxon exhibit was removed after Justice Department lawyers, in town last Friday for a hearing in the Exxon criminal case, saw the Exxon display, and after GSA officials, also in Anchorage Friday for a coincidental field office review, found the exhibit inappropriate.

Alaska Assistant U.S. Attorney Larry Card said the Exxon exhibit was ''like putting on your trial before the trial.''

The colorful Exxon exhibit, called ''Progress in Alaska,'' dominated the lobby. One poster quoted someone saying, ''I think Exxon did a great job.'' Another poster declared that areas hit by last year's 11-million- gallon spill were ''undergoing a robust recovery.''

Exxon also mounted a large picture of its cleanup manager, Otto Harrison, with a quote, ''We can get a good feeling about doing the job in a fashion that demonstrates to everybody who's watching that this has been a responsible caring response to whatever the problems were.''

The exhibit avoided depicting any problems caused by the spill, which killed wildlife, ruined fishing, painted rocks black, jeopardized food sources for native villagers and upset life along a stretch of coastal Alaska.

(OCT. 23) UPI - Iraq Tuesday freed 64 Western hostages, including 14 U.S. citizens, and Baghdad Radio said Iraq's National Assembly agreed to free all French nationals.

Baghdad Radio said Iraq's National Assembly agreed unanimously Tuesday to a request from Iraqi President Saddam Hussein to free all French nationals. It said they were now free ''to leave or stay in Iraq.'' Some 350 French hostages are believed to be in Iraqi custody.

The announcement came after a group of ailing Western hostages, including 14 U.S. citizens and 50 Britons, were freed and arrived in the Jordanian capital of Amman aboard a British airliner. Their freedom was won by an appeal by former British Prime Minister Edward Heath.

''Are you glad to be out?'' one reporter shouted at one oft the unidentified freed U.S. hostages after the group's plane touched down at Amman airport.

''Hell, yes! Go Steelers!'' he said, referring to the Pittsburgh football team.

The freed Americans then were whisked away to a hotel by U.S. officials.

The American-Iraqi Foundation, a U.S. friendship society of Americans of Iraqi origins, met Saddam before the group was released.

Dr. Salim Mansoor, a physician from the Washington, D.C., area and president of group, said Saddam ''will release all of them if he feels that the solution to the problem is a peaceful one or if the president (Bush) promises not to attack. We had the impression that the president of Iraq wants to solve the

situation peacefully.''

The released Americans included six students and two U.S. diplomats based in Kuwait.

The United States, meanwhile, warned Americans hiding in Kuwait that they could put themselves ''at risk'' if they register with Iraqi authorities.

President Bush also ruled out any compromise allowing Iraq to pull out of Kuwait while retaining some territory it conquered, and France said it would deploy 500 more troops to the gulf region to counter further Iraqi aggression. But Japanese plans for a troop deployment ran into a political roadblock.

White House spokesman Marlin Fitzwater, speaking to reporters in Manchester, N.H., hailed the release of the 14 U.S. hostages, but added, ''We want the rest to get out as soon as possible. We call on Saddam Hussein to ... release all foreign nationals.''

The British Broadcasting Corp. reported from Baghdad that Heath had secured exit visas for the 64 Britons and Americans realased Tuesday, and was still bargaining over the freedom of others on a list of some 200 names he took to Baghdad on a mercy mission.

Saddam agreed Sunday to free ailing and elderly hostages among the Westerners being held as a deterrent against any attack by Western and Arab forces now massing in Saudi Arabia to prevent further Iraqi aggression since its Aug. 2 invasion of Kuwait.

Heath, who ventured to Baghdad despite criticism from British politicians that he could be exploited in Iraqi propaganda, met Tuesday morning with Iraqi Foreign Minister Tariq Aziz.

The Virgin Airways Boeing 747 that flew the hostages out of Iraq carried four doctors, seven nurses and medical equipment to treat any needing it. Airline officials said the flight was scheduled to arrive back in London early Wednesday.

The Voice of America warned U.S. citizens in Kuwait against complying with an Iraqi order that they register with immigration authorities before Nov. 5.

''Until we can obtain clarification, we believe that Americans, particularly adult males, could put themselves at risk should they decide to register,'' the Voice said. It suggested that Americans ''keep a low profile and exercise caution.''

NEW YORK (OCT. 23) UPI - Stocks closed mixed in moderate trading Tuesday, with the Dow industrials pressured by renewed nervousness about the prospects for a peaceful resolution to the Mideast crisis.

The Dow Jones industrial average, which lost 4.70 Monday, slid 22.03 to close at 2494.06, easing about 15 points in the last hour of trading.

Among broad market gauges, the New York Stock Exchange composite index fell 1.03 to 170.50 and Standard & Poor's 500-stock index eased 2.40 to 312.36. The price of an average share lost 18 cents.

Advances led declines 806-690 among the 1,960 issues crossing the NYSE tape. Volume was 146,300,000 shares, compared with 152,650,000 traded Monday.

Analysts said the Dow was pressured in early trading by remarks by President Bush, who, in a speech in Burlington, Vt., declared the world should not compromise on Iraqi aggression against Kuwait.

The president's remarks, while not breaking any new ground, struck a firmer

tone than leaders of Saudi Arabia have expressed in recent days, analysts said and stirred fears about how the crisis would be resolved.

And in late trading, news of more violence against Israelis sent the Dow down sharply. Four Israelis were wounded Tuesday by Palestinians and an Arab suspect, severely beaten after he allegedly stabbed two soldiers, died several hours later. Police patrols have been stepped up in Jerusalem, and West Bank and Gaza Strip Palestinians have been barred from entering the city.

''It's pretty serious business,'' said John Burnett, senior vice president and head trader at Donaldson, Lufkin & Jenrette Securities Corp.

''I don't know how international markets will react to it, but it ain't good for peace in our time,'' he said.

''It may also mean it may take longer to settle our problems with Iraq,'' which has sought to tie its invasion of Kuwait to Israel's occupation of the West Bank, Burnett added.

Oil prices fell in New York Tuesday, but analysts described the drop as a catch-up move in line with the just-expired November contract's huge Monday loss of nearly $5.50 a barrel, so the latest drop failed to give much support to stocks. The current crude contract for December delivery closed $1.04 a barrel lower at $29.37 Tuesday.

Other analysts, such as Don Hays, director of investment strategy at Wheat First Securities Inc. in Richmond, Va., chose to look at the brighter side of Tuesday's mixed market.

''In general, it wasn't a bad day,'' he said. ''The advance-decline line was still up. I think it was a pause to refresh after the Dow was up strongly Thursday and Friday.''

On the trading floor, Citicorp was the most active issue, off 3/8 to 12 5/8. The largest U.S. bank holding company has had trouble finding buyers for its auction-rate preferred stock.

Philip Morris followed, easing 1/2 to 48. Bristol-Myers was third, down 1/8 to 62 5/8. C&S-Sovran was also active, plunging 2 3/8 to 16 1/4 after an analyst was reported to have downgraded the stock.

Among other blue chips, AT&T lost 1/2 to 33, IBM fell 1 to 106 3/4 and General Motors eased 1/2 to 38 1/4. The Dow's oil components lost ground amid the sharp drop in oil prices: Texaco fell 1/2 to 57 1/2, Chevron lost 1/2 to 69 3/4 and Exxon dropped 1 1/8 to 48 1/2.

Elsewhere, Motorola gained 1 1/8 to 54 3/8. The company unveiled a new method for sending data at high speeds within buildings using digital radio

transmission.

But Capital-Cities/ABC plunged 32 to 400 after reporting third- quarter earnings slipped to $4.16 a share from $4.56 and saying that it expects fourth-quarter earnings to decline as well.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 177,016,720 shares, compared with 185,906,170 shares traded Monday.

Prices rose in moderate trading on the American Stock Exchange.

The Amex Market Value index added 0.74 to 292.97. Advances led declines 300-255 among the 774 issues traded. The price of an average share rose 2 cents. Composite volume was 13,854,950 shares vs. 14,220, 700 traded Monday.

Conquest Exploration led the Amex issues, up 1/8 to 1 3/8, extending its gain on Monday's news that American Exploration will acquire the company.

The National Association of Securities Dealers composite index edged down 0.04 to 341.08.

SPOKANE, WASH (OCT. 23) UPI - The Securities and Exchange Commission has approved a new constitution for the Spokane Stock Exchange, clearing the way for installation of an electronic quotations system needed to expand trading on the exchange.

First, however, the exchange's 12 member/brokers must approve purchase of the $150,000 system.

The expenditure will be difficult to shoulder given the low level of trading at all equity markets, Exchange President Stan Covey said Monday.

''If we feel that we can, I'm sure that we will go ahead with it,'' Covey said this week. ''I would like to get it done, that's the reason I took this job.''

Transactions on the exchange are tallied manually and bid and ask prices are posted on a large board at the exchange by hand.

Regulations imposed Jan. 1 made trading in stocks not listed on exchanges with the electronic equipment much more cumbersome. Designed to control fraud in the trading of penny stocks, the rules have greatly reduced the liquidity of such stocks.

Covey said companies considering listing their stock on the exchange, and brokers considering joining the exchange, have been put on hold pending approval of the constitution and purchase of a quotation system.

''We really had our hands tied,'' he said. But he added, ''We've still got a lot of people contacting us.''

Covey, owner of Spokane Securities, said the new constitution replaces one drafted in the 1930s.

The document updates exchange compliance and surveillance procedures and incorporates the fair-practice rules of the National Association of Securities Dealers' national over-the-counter market, NASDAQ.

Covey said talks with SEC officials sometimes bogged down for months over details like definitions, the formation of various committees, who would serve on them and when they would meet.

''We volleyed back and forth for four-and-a-half years,'' he said.

#90296u1943 10/23/1990 ~United Press International
WASHINGTON (OCT. 23) UPI - Congress and the administration struggled Tuesday to complete a deficit reduction plan and overcome what Senate Democratic leader George Mitchell of Maine called a political ''Catch-22'' on taxing the rich.

The hitch was that Bush, needing House Democratic votes to pass any plan, continued to insist on a package that limited tax deductions for the rich - a provision about half the House Democrats would oppose.

The plan favored by most congressional Democrats - imposing a surtax on millionaires - is bitterly opposed by Bush.

''The problem in the House is that it's in a kind of Catch-22 situation in which the administration knows it requires a preponderance of Democrats' votes (to pass a deficit plan)'', Mitchell told reporters.

''Now, the ironic situation (is) the administration is insisting that (the bill) must be written in a manner acceptable to them, even though that makes it unacceptable to the very persons who the administration acknowledges are needed to pass it,'' he said.

''It is the fact that ... the president is unable to produce half the Republican votes in the House for a package that he might support, which makes the situation difficult for the House Democratic leadership.''

Asked about Mitchell's ''Catch-22'' comment, Rep. Bill Frenzel, R- Minn., said ''If he is in a Catch-22 box now, it's one that he built for himself. He strung out these negotiations to an impossibly long time period and made it impossible to pass anything and now he's hoist on that pitard.''

The talks are aimed at reaching an agreement on a package of spending cuts and tax increases representing the major portion of a $500 billion reduction in the federal budget deficit over the next five years, with about $40 billion in savings in 1991.

Negotiators face a midnight Wednesday deadline when a stopgap funding bill expires, possibly bringing on another government shutdown.

More meetings between congressional leaders and administration negotiators were expected later Tuesday in an attempt to resolve the issue. But the mood seemed increasingly tense, angry and partisan.

Senate Republican leader Bob Dole of Kansas told reporters Republicans had ''accommodated enough.''

''Every time they (Democrats) want someting, we give in,'' he said.

Assistant Senate GOP leader Alan Simpson of Wyoming said that any deficit reduction plan would be ''simply a political statement - nothing more'' and that Democrats were ''going to put one in our ear in both Houses'' if they can.

''We're at a real impasse,'' said Sen. Alfonse D'Amato, R-N.Y.

Earlier, about half the House Democrats meeting in a two-hour closed caucus said they would oppose the GOP approach to taxing the rich through limiting deductions - a move many said would be unfair to those in high-tax states like New York and California.

Based on what was said during the caucus ''we're half-way there because half the members were supportive,'' Rep. Dan Rostenkowski, D- Ill., chairman of the House Ways and Means Committee, said afterward. But, he said, ''that's not good enough'' to win House passage.

House Democratic leader Richard Gephardt of Missouri said the ''two dominant messages'' from the Democrats were opposition to the Republican plan to increase taxes on the wealthy by limiting deductions and opposition to further Medicare cuts.

Democratic negotiators have argued for a straight 10 percent surtax on Americans who earn more than $1 million, rather than limiting deductions, but have not convinced Republicans.

Democrats also want to hold the line on Medicare cuts, which are expected to provide a substantial portion of the savings needed for the deficit package. Nearly all proposals would raise costs for Medicare beneficiaries, but the increases would be less under the House version than the administration-backed Senate plan.

Rep. Leon Panetta, D-Calif., chairman of the House Budget Committee, said the House figure for Democrats ''is very much a bottom line that we cannot move from.''

Rostenkowski said Democratic leaders warned the administration it must

compromise further in order to win Democratic votes necessary to pass the budget package in the House, ''but that keeps falling on deaf ears.''

On the campaign trail in Burlington, Vt., Tuesday, President Bush said he hopes a plan ''is about to be forthcoming.'' He did not say if he would sign another temporary funding measure if the deadline is missed.

Bush accused Democrats of bowing to special interests and said he had no choice but to agree to tax increases as part of any package.

''To come up with any budget at all this year, I had to work with the Democrats who control the Congress ... and that means a budget that isn't the best ever, but the best possible,'' he said.

The budget package also is expected to include a higher federal gasoline tax, but the amount was uncertain. The Senate bill raised the current 9-cent-a-gallon gas tax by 9.5 cents a gallon by 1992. The House version had no increase.

There was apparent agreement over the weekend on raising the top tax rate for the wealthiest from 28 percent to 31 percent. But Democrats wanted the surtax on millionaires in addition to the rate increase while Republicans offered the deduction limits.

Raising the top rate to 31 percent would elimiante the so-called bubble in which couples with taxable incomes of $78,400 to $185,750 a year pay a 33 percent tax rate and couples with even higher taxable incomes pay a lower, 28 percent rate on every dollar of taxable income above $185,750.

#90296u1966 10/23/1990 ~United Press International

ORLANDO, FL (OCT. 23) UPI - The nationwide average price of self-service gasoline inched up to $1.38 a gallon in the past week, while prices for other grades decreased slightly, the American Automobile Association said Tuesday.

The average price for a gallon of self-service regular gas rose 0.1 cents to $1.38, while mid-grade self-service unleaded declined 0.5 cents to $1.464 and premium unleaded dropped 0.3 cents to $1.548, the AAA said.

The average price of gasoline has risen 30.5 cents since Aug. 1, the day before Iraq's invasion of Kuwait, the AAA said. The highest price ever recorded by the AAA for self-service regular was $1.388 a gallon, just before the 1981 Easter weekend.

The ''fuel gauge survey,'' which is based on a nationwide spot check of stations for AAA by Computer Petroleum Inc., found the largest price increase was in New England, while prices decreased most in the Southeast and mid-Atlantic regions, the AAA said.

#90296u1976 10/23/1990 ~United Press International

WASHINGTON (OCT. 23) UPI - The House, after bitter accusations over who was to blame for the painful cuts, passed a bill Tuesday that would lead to a 25 percent cut in farm spending, but try to make up for it by giving farmers more freedom to look for money-making crops.

The farm policy bill, which now goes to the Senate, also takes new steps to protect water supplies from contamination by farm chemicals as well as creating the first-ever nationwide rules on what can be called organic food.

President Bush was expected to sign the bill. It sets the terms for farm subsidies, export promotion, research and public feeding programs for the next five years. The bill passed the House, 318-100, with opponents mostly being urban Democrats and Midwestern populists.

In writing the farm bill, lawmakers reluctantly embraced the so- called triple base plan in order to meet budget guidelines. Under triple base, 15 percent of the nation's wheat, feed grain, cotton and rice land would be inelgible for subsidies but farmers would be allowed to grow crops on the land.

Rep. Edward Madigan, R-Ill., angrily responded when Rep. Dan Glickman, D-Kan., said the administration ''has worked to lower farm prices in America'' and was to blame for the steep cut in farm subsidies.

''Do you want this bill to pass or do you want every Republican to vote against this bill?'' Madigan said. ''The budget resolution that passed this house ... called for these cuts. It was passed by your party.''

Agriculture Committee Chairman Kika de la Garza interceded, saying, ''All of us have had an impact as to where we are today.''

Triple base is the centerpiece of $13.6 billion in cuts in projected farm

program costs. As a precaution, the House and Senate Agriculture committees made the cuts contingent on passage over an overall bill to reduce the federal deficit by $500 billion.

If the overall budget bill passes, subsidy spending would drop by 25 percent, to $40.8 billion. It the budget bill fails, farm spending would revert to $54 billion and there would be no triple base or the other spending cuts.

By comparison, the 1985 farm policy law, written during the worst of the agricultural recession, was the most expensive ever with a pricetag of $78 billion.

''This is a black day for agriculture,'' said Rep. Ron Marlenee, D- Mont., who complained of the budget cuts and said the administration had ''accomplished through the budget process a capitulation that farm organizations never would have subscribed to.''

Throughout debate, congressmen said they hoped the new crop flexibility would allow farmers to find profitable crops.

''This does not necessarily represent a cut in farmer income because this bill frees acres that would otherwise be dedicated to government programs and allow farmers to make choices about planting other crops ... that can be sold in the market and can increase their income,'' Madigan said.

Added Rep. Harold Volkmer, D-Mo., ''In all the circumstances, it's the best we could do.''

Triple base would be accompanied by a 10 percent ''planting flexibility'' program. It has similar rules as triple base but would be voluntary.

One of the few crop initiatives to survive in the bill was a proposal to create a marketing loan for soybeans and other oilseeds, although at a far lower rate than first proposed.

Congressmen preferred triple base to the idea of further cuts in target prices which are down 10 percent since 1985. The farm bill would freeze target prices, a key factor in calculating subsidy payments.

Ttriple base is an untested idea. Agriculture Department studies foresee fairly modest shifts considering 20 million to 25 million acres could be covered each year.

Soybean acreage was forecast to rise 2 percent-4 percent, corn acreage to drop 2 percent-3 percent, cotton acreage to increase 4 percent-8 percent and wheat acreage to be relatively stable. Soybean acreage was most likely to increase in the Midwest and to decline in the South, where yields are lower.

Critics say triple base will have little value to farmers who live where the climate allows few crop choices - wheat in the Great Plains, for instance - or there is no network for marketing new crops.

Farm organizations complained about the huge cuts assigned to agriculture but said the farm bill probably was the best choice possible.

The 1985 farm policy law was a milestone as the first farm bill to link environmental and farm program goals. It required farmers to practice soil conservation to be eligible for crop supports, created the Conservation Reserve to take highly erodible land out of production and set up the ''sodbuster'' and ''swampbuster'' rules to protect fragile grasslands and wetlands.

The new farm bill would strengthen the swampbuster program, create two voluntary programs to protect water purity and require farmers to keep records on use of restricted-use pesticides. The Conservation Reserve and the so-called conservation compliance rule would continue.

To protect water purity, there would be a wetlands reserve of up to 1 million acres, created through purchase of easements, and a water quality incentive program of up to 10 million acres. The water quality program would pay farmers up to $3,500 a year for five years to help defray the cost of changing their practices to protect sensitive land.

Environmentalists hope the water quality program will lead to changes in land management that persist long after the final payment.

-30- 5798

#90296u2045 10/23/1990 ~United Press International

(OCT. 24) UPI - Consumers have little chance soon of seeing a drop in retail gasoline prices at the pump or in home heating oil prices despite the recent record drop in volatile wholesale oil markets, oil analysts said Tuesday.

''We probably will not see any change in gasoline prices unless we have a further decline in crude oil prices. At this point, the increases in crude prices (since the Persian Gulf crisis began) are just about being passed through to the consumer,'' said John Sauer, general manager of planning and analysis for Conoco Inc. in Houston.

''Logically, the retail price should stay just about where it is, instead of going up about 25 cents a gallon. But logic may not have anything to do with it,'' said Phillip Verleger of the Institute of International Economics in Washington, D.C.

The wholesale price of U.S. crude oil fell a record $5.41 to $28.38 a barrel on the New York Mercantile Exchange Monday, $12 less than its high of Oct. 11.

Unleaded gasoline dropped 11.4 cents on the day and 19.5 cents over the period's seven trading sessions, while prices of its companion home heating oil fell 12.4 cents on the day and 29 cents over the same period of trading on the Merc.

Even though gas regained 3.7 cents of the loss Tuesday, its futures contract price on the Merc still stood around 80 cents a gallon, only 15 cents to 16 cents higher than Aug. 1, the day before Iraq's invasion of oil-rich Kuwait triggered the crisis.

Motorists, however, are paying on average about 30 cents a gallon more for gasoline at the pump than they did prior to the invasion.

Edwin Rothschild, energy policy director for Citizen Action, a consumers group said oil companies should be passing through to consumers the savings afforded by lower oil prices. But he said it was unlikely they would.

Rothschild said that when the oil companies began raising gas prices in August they said those increases reflected the ''replacement cost'' of crude oil. ''Now the replacement cost has dropped dramatically,'' he said.

Analysts also doubted the recent decline in wholesale prices would be soon passed along to consumers, unless they remain at these lower levels for awhilein the very volatile market.

Wholesale gasoline prices had risen as high as $1.11 a gallon on the Merc before the end of the summer driving season - a rise of about 37 cents from pre-invasion levels.

Partly because of public pressure and an appeal from President Bush to hold prices down, refiners were not able to ''pass along'' this entire increase to consumers, analysts said.

''I don't think retail gasoline prices should come under pressure initially. A one-day price swing on the Merc wouldn't be passed through to the consumer,'' said Fred Leuffer, senior oil analyst at New York's C.J. Lawrence Morgan Grenfell.

''For most of August and all of September, refiners' margins (between their cost of crude and the price charged for products) were depressed to levels that haven't been seen for awhile,'' Leuffer said.

This point was underscored by the earnings for the three months ended Sept. 30 of Mobil Corp. and Shell Oil Co., which depend on refining operations to generate most of their profits.

The two reported Tuesday respective declines in profits from a year ago of 29

percent and 33.2 percent, reflecting the higher prices they have had to pay for crude since the Gulf crisis began.

Other oil companies that receive more of their profits from the pumping of crude, such as Amoco Oil Co. of Chicago, have seen their earnings rise. Amoco last week reported a 57.7 percent increase in third-quarter earnings from a year ago.

Moreover, Amoco Tuesday dropped the its wholesale price charged distributors for gasoline by 1.25 cents a gallon and for heating oil and diesel fuel by 5.3 cents a gallon.

''We said at the time of rapidly rising prices that we were being responsive to the market, and the same holds true now,'' Robert Rauscher, Amoco's marketing vice president, said in a statement.

Leuffer said that the approaching winter should tighten the market for heating oil and push prices upward unless the Gulf crisis is resolved.

''I think crude oil prices will go back up and remain above $30 a barrel unless the crisis is solved,'' the analyst said. ''I wouldn't encourage consumers to look for relief.''

Gasoline prices might edge down 5 cents a gallon, but ''I wouldn't expect to see any large drop in gasoline prices until the crisis is over,'' agreed John Redpath of Energy Security Analysis in Washington.

Conoco's Sauer doubted crude-oil prices will fall further because of the decline experienced in U.S. crude inventories as imports from the Middle East have fallen off as a result of the Gulf crisis.

The United States had a ''cushion'' of about 55 million barrels in excess crude stocks over last year's levels prior to the Iraqi invasion. This has been largely eliminated.

''Because this stock cushion has been eliminated, I doubt that crude prices will fall (further) and we're getting into the high demand (winter heating) time of year,'' Sauer said.

#90296u2067 10/23/1990 ~United Press International

PORTLAND, OR (OCT. 23) UPI - A Portland man pleaded guilty Tuesday to 17 felony counts of sex abuse involving a teenage boy who was left in his custody even after state workers learned the man had a past sex abuse conviction.

Richard Herbert Smith pleaded guilty Tuesday to 11 felony counts of second-degree sodomy and six felony counts of using a child for sexually

explicit conduct, charges that involved taking nude photos of the boy.

Smith, 52, also pleaded guilty to two misdemeanor counts of second- degree sex abuse, also known as sexual touching, in an unrelated incident involving a 16-year-old girl and one misdemeanor count of providing alcohol to a minor.

Under a plea bargain, both sides have agreed Smith will be sentenced to 80 months in prison.

Four other misdemeanor counts of sexual touching involving the boy and seven counts of providing alcohol to two minor girls were dismissed as a result of the complicated plea bargain worked out by lawyer Richard L. Parker.

Smith was arrested in July and later pleaded innocent to 21 counts of sexually abusing a foster son who was 13 when placed in his care in May 1989.

Last month, Children's Services Division Administrator William Carey fired caseworker Janice Lessard and disciplined six other agency workers for leaving the boy with Smith for eight months after learning Smith had a previous sex abuse conviction in 1965 involving an 11-year-old girl in New York state.

The teenage boy had been placed in Smith's care after his mother was arrested for allegedly operating a methamphetamine lab. Carey called it ''probably the most mishandled case I've seen in my 28 years in social services.''

Multnomah County Circuit Judge Nely Johnson read from the plea agreement that said the offense ''involved a violation of the public trust in that the defendant was given responsibility for this child as a foster parent'' by the CSD.

Johnson set sentencing for Nov. 26 and ordered a pre-sentence evaluation to determine if Smith should be considered a sexual predator of children.

''It was a very good outcome,'' said Deputy District Attorney Chuck Sparks. ''He pleaded (guilty) to all the felonies and got the maximum amount of time the law provides. At the same time, the victims, especially the boy, did not have to experience a trial.''

Smith could get his sentence reduced by 20 percent for good behavior, Parker said. The attorney said he hopes Smith will be able to spend the last 18 to 24 months in the sex offender treatment program at Oregon State Hospital.

''That's the most complicated (plea) contract we've ever seen - the judge admitted to that,'' Smith's atorney said. ''I simply had to limit his exposure as much as I can, as well as balance the public and DA's office concerns. There's no doubt about the fact he did as well as he could.''

Parker called his client a ''very good candidate for treatment.''

''He has totally never denied anything with me,'' the attorney said. ''He's been one of the easiest clients I've ever had. He doesn't understand what happens and he wants to get some help for it. He has a problem.''

Sparks agreed that Smith appears to be a good candidate for treatment. But he added, ''If he's not completely cooperative in the treatment process, Oregon State Hospital will send him back to the State Penitentiary.''

Parker said he had been contacted by another attorney who plans to file a civil lawsuit on behalf of the boy.

Smith's arrest led the embattled CSD to beef up its staffing, seek state funds for more positions and overhaul its screening and review policies for foster parents.

#90296u2076 10/23/1990 ~United Press International

(OCT. 23) UPI - Iraq freed 14 Americans today, and Baghdad Radio says the country's National Assembly has agreed to release all French nationals in the country. Earlier today, a British jumbo jet flew to Baghdad to evacuate 33 ailing and sick British hostages. The B-B-C reports that former British Prime Minister Edward Heath secured exit visas for the Britons and the Americans. Heath is still bargaining for the freedom of others on a list of some 200 names.

Democrats are split in trying to come up with a budget plan before tomorrow night's deadline. About half the Democrats are resisting the Republican proposal to limit deductions for the rich and cut more from Medicare. House Ways and Means Committee Chairman Daniel Rostenkowski says there are NOT enough votes to pass the plan.

Syria's vice president says Lebanon's warring militias will NOT be allowed to block the formation of a Lebanese government. The official held a surprise meeting with Lebanese President Elias Hrawi today in Beirut. Syria would have a major role in assisting the Lebanese Army in maintaining security.

Security is tight across Pakistan before general elections. Tens of thousands of police are on duty to guard against violence. The clampdown comes as gunmen in an eastern city shot and killed a candidate of the Islamic Democratic Alliance, a loose coalition of parties opposed to ousted Prime Minister Benazir Bhutto.

Researchers say they have developed a new technique that clears blocked fallopian tubes, which account for 30 percent of female infertility cases. Dr. Norbert Gleicher of Mount Sinai Hospital Medical Center and Rush Medical College in Chicago says the technique uses a tiny balloon to dislodge the

obstruction. Gleicher says the procedure- known as trans-cervical balloon tubo-plasty, or T-B-T- appears to be an effective alternative to surgery for some infertile women who want to become pregnant.

American movie reciepts are running just slightly behind last year's record-setting box office pace. Cinema lovers have shelled out nearly four-BILLION dollars so far this year. Industry analysts say action- adventure films such as ''Marked for Death'' and ''Memphis Belle'' and the continued popularity of ''Ghost'' have kept ticket sales from lagging.

#90296u2095 10/23/1990 ~United Press International

NEW YORK (OCT. 24) UPI - Corporate bond defaults are likely to reach a 20-year high by the end of 1990 and defaults by commercial-paper issuers will continue at a worrisomely high level, Moody's Investors Service said Tuesday.

The credit-rating agency said the U.S. economic slowdown, ''precarious'' levels of debt on corporate balance sheets and a general credit market squeeze were the main factors driving up default rates.

Corporate bonds are long-term debt instruments, whereas commercial paper is a short-term vehicle for raising working capital.

In the first three quarters of this year, Moody's said, 48 rated issuers, all listed as speculative- rather than investment-grade, defaulted on bonds. In the same 1989 period, there were 33 defaults by rated issuers.

The agency said defaults were running at an annualized rate of 7.2 percent of all speculative-grade issuers, up from 5.1 percent last year.

''It promises to be the highest annual rate since 1970's 10.9 percent (rate) '' Moody's said. In 1970, 30 of Penn Central Railroad's subsidiaries defaulted on bonds rated as speculative-grade, Moody's noted.

Moody's reported five defaults by commercial-paper issuers in the first three quarters of the year, involving just over $300 million. In 1989, six issuers missed payments on some $712 million in commercial paper.

In the largest confirmed default to date this year, Mortgage & Realty Trust, an unrated issuer, defaulted on $167 million in commercial paper.

Including unrated corporate bonds, Moody's reported defaults on $12.3 billion of bonds through the first three quarters of 1990, for an annualized rate of 8.2 percent of the estimated $200 billion speculative-grade market.

At that level, Moody's said, defaults were running well ahead of $11.8 billion of rated and unrated bond defaults last year, when losses came to 5.9 percent

of the total speculative-grade market.

This year, industrial sector defaults accounted for 95 percent of the total dollar volume in the first three quarters. More than half involved companies that took on heavy debt in the 1980s to finance leveraged buyouts.

Notable among these were Federated Department Stores and Allied Stores Corp., which defaulted on nearly $3 billion of bonds in January. Southland Corp., a food-chain operator, defaulted on $1 million in bonds in March.

Moody's said defaults by such consumer-oriented firms were in part caused by a slowdown in U.S. household spending. A total of 23 companies were pushed into default by a downturn in American consumer demand, while weakness in real estate helped force another 10 companies into default, according to Moody's.

DENVER (OCT. 23) UPI - The Adolph Coors Co. has agreed to pay a civil penalty of $450,000 to settle water pollution violations dating back more than a decade, the state Health Department said Tuesday.

The department had cited the brewing company June 19 for discharging without a permit into Clear Creek and Kinney Run, which flow near the brewery, from three springs contaminated with solvents.

Coors also had been cited for failure to notify the state when these three springs and another contaminated spring were pumped into the company's wastewater treatment plant.

The violations occurred as long ago as the late 1970s, the agency said.

The settlement announced Tuesday includes payment of $150,000 in cash, an additional deferred $50,000 civil penalty and contributions to the Colorado Center for Environmental Management and a bike path right- of-way to the Jefferson County Open Space Program.

WASHINGTON (OCT. 23) UPI - Labor Secretary Elizabeth Dole intends to announce her resignation, becoming the first Bush Cabinet member to step down, an administration official said Tuesday.

Dole, transportation secretary during the Reagan administration and wife of Senate Republican leader Robert Dole of Kansas, plans to announce her resignation on Wednesday, the source said.

There were reports that Dole was leaving the administration to join the Red Cross in a top-level job. There was speculation on Capitol Hill that she was planning to run for the Senate in two years from her native North Carolina. That could not be confirmed.

Sen. Dole said his wife planned to meet with President Bush on Wednesday. A White House spokesman said he could not confirm that Mrs. Dole was about to quit her post.

A former registered Democrat, she was executive director of Lyndon Johnson's Commission for Consumer Affairs and deputy to Richard Nixon's consumer affairs adviser Virginia Knauer.

In 1973, she became the only woman member of the Federal Trade Commission, sworn in from a hospital bed as she recovered from a spinal problem. In 1982, she was named to the Reagan Cabinet.

She served as transportation secretary longer than any other in the department's history.

Dole presided over some of the most turbulent years in U.S. aviation history that saw public confidence shaken in airline safety and angry over deteriorating service.

Dole advocated requiring air bags or self-buckling safety belts for new automobiles and got her way in an administration not disposed to more government regulation.

She quit the Reagan Cabinet to help in her husband's unsuccessful bid for the presidency in 1988.

Mrs. Dole won Senate unanimous confirmation as labor secretary in January 1989.

Later that year, Mrs. Dole joined a delegation of top U.S. officials who traveled to Poland to deliver $20-million in food aid to that country's non-communist government.

In June of that year she was elected to Harvard's Board of Overseers. Mrs. Dole received her law degree from the Ivy League school.

The Doles were married Dec. 6, 1975. Dole is 13 years her senior and had been married once before with one child. The couple has no children.

#90296u2111 10/23/1990 ~United Press International

NEW YORK (OCT. 23) UPI - A former Penthouse Pet of the Year who sued publisher Bob Guccione for forcing her to sleep with his business clients was

awarded $4 million Tuesday by a judge who declared, ''Sexual slavery was not a part of her job description.''

The award was believed to be the largest in state history for a sexual harassment suit.

Declaring Guccione a liar, Acting Justice Elliott Wilk said the case came down to his word against the word of Marjorie Lee Thoreson, 37, also known as Anneka diLorenzo.

At the trial at state Supreme Court in Manhattan in March 1989, Guccione offered a ''blanket denial that the events took place. I do not believe him,'' Wilk wrote in his 20-page decision.

Instead, the judge believed Thoreson, who was under contract with Penthouse International Limited and was once Guccione's live-in lover at his Upper East Side townhouse.

After Thoreson became 1975 Pet of the Year and appeared in the porno film ''Caligula,'' Guccione began complaining about problems with two of his business associates and insisted she sleep with them to iron out the troubles.

Thoreson testified that she reluctantly agreed to have an affair with his London-based financial advisor but demanded it come to an end 18 months later when it appeared he planned to leave his wife and four children. In the second case, she said she initially refused to sleep with a furniture manufacturer from Milan but Guccione insisted she owed it to him and she capitulated.

She was eventually fired in 1980 when she refused to accompany Guccione to Japan on a promotion tour of Caligula.

Justice Wilk awarded Thoreson $4 million in punitive damages and $60, 000 in compensatory damages, noting Guccione's net worth is $150 million and Penthouse's assets are worth $200 million.

Citing the state's Human Rights Law, Wilk noted ''an employer is prohibited from exploiting a dominant position of power in the workplace by imposing sexual demands upon an employee as an implicit condition of continued employment.''

Although Thoreson may have willingly taken jobs posing nude for the magazine and performing sexual acts for the film, she never agreed to prostitute herself at Guccione's whim, Wilk said.

''Sexual slavery was not a part of her job description,'' Wilk wrote.

''When female employees such as the plaintiff are allowed to be confronted by sexual coercion on the job, women as a group are relegated to a subordinate

status,'' he wrote.

He said the law was particularly important for women employed ''in a workplace permeated by conceptions of women as sex objects,'' such as Penthouse.

Thoreson, who lives in California and has a 1-year-old daughter, burst into tears when she was informed of the decision in a phone call by her lawyer, Murray Schwartz.

''This is for all the women like her who suffered at the hands of Bob Guccione '' Schwartz said.

Guccione's lawyer said an appeal is likely.

''An award of this magnitude is an outrage,'' said Jeffrey Daichman. ''The decision reads more like a political manifesto about the women's movement than an objective analysis of the evidence.''

Guccione, in a statement issued after the decision, said the human rights law cited by the court ''does not permit the award of punitive damages.''

He said any sexual demands allegedly imposed upon Thoreson ''could not possibly have constituted an implicit condition of continued employment because after she discontinued the alleged affair she remained on the Penthouse payroll and received both a raise and a steady income.''

#90296u2224 10/23/1990 ~United Press International

SANTIAGO, CHILE (OCT. 23) UPI - Relatives of prisoners convicted of subversion peacefully occupied United Press International's downtown newsroom, demanding publication of manifestos, but left the office 70 minutes later without police intervention.

Five women and three men entered the 9th floor offices of UPI in a building one block away from La Moneda, the presidental palace, and staged a sit-in, declaring they were ready to ''stay indefinitely'' until the texts of two communiques were distributed on UPI news wires.

The group's statements demanded ''freedom for all political prisoners without conditions or exclusions'' and rejected a bill before Congress dealing with people sentenced for ''subversive activities'' under the military regime of General Augusto Pinochet, who ruled Chile for 16 years until March.

''We will not leave this office until we see our statements published in the national press in full,'' said Corina Diaz Aguilar, a spokeswoman for the group.

UPI National Editor Oton Gutierrez finally convinced the protesters they would not achieve their goals using pressure.

Police arrived at UPI's offices but did not intervene, and the demonstration ended peacefully.

About 250 men and women sentenced for subversion under Pinochet remain in jail according to human rights activists.

Government plans to confine them together in one prison have caused protests. Eighteen female prisoners burned clothes and mattresses early Tuesday in a small detention center in Santiago, authorities said.

(OCT. 23) UPI - 14 Americans were among some 64 ailing Western hostages freed today by Iraq. The Americans and 50 British hostages left Baghdad for Amman, Jordan, aboard a British airliner. Upon their arrival, the Americans were whisked away by U-S officials to a hotel. Also today, Baghdad Radio says Iraq's National Assembly has agreed to free all French hostages. It said the estimated 350 French nationals are now free ''to leave or stay in Iraq.''

Amoco Oil responded today to developments in the Middle East by cutting wholesale prices for gasoline, diesel fuel and heating oil prices. The markdowns average one-and-a-quarter cents a gallon for gasoline and a shade more than five cents a gallon for diesel fuel and heating oil. The Chicago-based company says the cuts reflect lower crude oil costs... just as earlier price hikes reflected the crude market.

As budget negotiations continue, President Bush today defended a Republican congressman who voted for the original plan Bush supported. The president flew to three New England states to make a pitch for G-O-P congressional candidates- including Vermont Representative Peter Smith. In Burlington, Bush praised Smith for voting to end the deficit for future generations. Smith's opponent has accused him of supporting a tax plan which favored the rich.

Representative Donald Lukens of Ohio has 24 more hours before facing an order to testify before the House Ethics Committee on new allegations of making sexual advances to a congressional worker. Lukens' office says the Republican lawmaker asked for and was given a one-day delay. Lukens was convicted last year of having sex with a 16-year-old girl. The House committee today stripped him of some of his defense rights under House rules.

#90296u2248 10/23/1990 ~United Press International

LOS ANGELES (OCT. 23) UPI - Pathe Communications' long-awaited $1.3 billion

buyout of MGM/UA Communications took a major step forward Tuesday with former Pathe antagonist Time Warner agreeing to back the deal through a licensing agreement to the tune of $125 million.

MGM/UA's board, meanwhile, met Tuesday to consider Pathe's proposed financing package, which would include the sale of various MGM/UA assets once the deal goes through.

Although the board was expected to put its stamp of approval on the deal, it was unable to wrap things up Tuesday and will resume the meeting Wednesday, Pathe spokesman Craig Parsons said.

In any case, the announcement regarding the Time Warner deal, which calls for it to pay $125 million for a variety of worldwide home video rights owned by MGM/UA, provided a strong indication that Italian financier Giancarlo Parretti will have the venerable MGM studio in his hands by week's end.

Pathe, which is controlled by Parretti, said Monday it expected to close the MGM/UA deal by Friday and disclosed that it had deposited the nearly $1 billion required to complete the transaction.

Pathe and Time Warner, which had sued each other over a financing deal that collapsed in June, also said they have agreed to settle the litigation, clearing a potential stumbling block to Pathe's buyout.

The home video rights deal covers a 12 1/2-year period and includes films in the MGM, United Artists and Pathe/Cannon film libraries. The 1, 070-title United Artists library is one of MGM/UA's key assets, as it includes 16 James Bond movies, ''One Flew Over the Cuckoo's Nest,'' and the ''Pink Panther'' movies.

Time Warner also will acquire worldwide home video rights to current and future Pathe and MGM/UA releases, including ''Quigley Down Under,'' which took in nearly $4 million in its debut over the weekend and the Chrismas release ''The Russia House'' with Sean Connery.

Pathe, meanwhile, has already made $353 million in nonrefundable down payments for its buyout of MGM/UA. It said Monday that it had also raised $600 million in cash, from which it will get the MGM/UA logo, all future MGM/UA films and the company's television and distribution arms.

The television segment produces ''thirtysomething,'' ''The Young Riders'' and ''In the Heat of the Night.''

Pathe had also earlier this week announced a deal with Turner Broadcasting System of Atlanta that provided it with a major cash infusion - possible as much as $400 million - from the sale of domestic television rights to the valuable MGM/UA film library.

The Turner deal encompasses about 1,000 titles for its TBS and TNT cable channels, which are licensed for 10 years, and an additional 300 titles being licensed for five years for Turner's recently announced English-language TNT feed to Latin America, due to start next year.

#90296u2266 10/23/1990 ~United Press International

(OCT. 23) UPI - The Senate Ethics Committee agreed today to hold public hearings on the ''Keating Five'' affair next month and close the investigation by the end of the year. Democrats have accused Republicans on the panel of leaking stories to the media for political reasons. The probe focuses on five senators accused of granting improper favors to savings and loan executive Charles Keating.

Chicago politics is notorious for being dirty, but today the race for Cook County sheriff turned bloody. Police say a 34-year-old campaign worker was shot and critically wounded during a political argument outside a South Side tavern. Irving Bell reportedly was either hanging campaign posters for Democrat Michael Sheahan or defacing posters of incumbent Republican Jim O'Grady when he was shot.

Humphrey the wayward whale is in trouble again in San Francisco Bay. Whale researcher Kenneth Balcomb says the endangered humpback whale apparently broke away from his friends along the coast and wandered into the bay, where he has become hopelessly stuck in the mud. Humphrey captured international attention five years ago when he got lost and wandered through Northern California's inland waterways for three weeks. Now 18 rescuers in wet suits are trying to free him.

20-year-old Lisa Nelson probably thanks her luck stars- or raccoon. The Cornell University student slipped from a trail and fell more than 75 feet into a gorge yesterday... and lived to tell about it. Ithaca, New York, police say thanks to a soft, plump raccoon... which cushioned her fall... Nelson suffered only a broken wrist and other minor injuries. They believe the coed landed right on top of the hapless raccoon... saving her life. The animal was injured and is recovering at a local animal shelter.

SAN SALVADOR, EL SALVADOR (OCT. 23) UPI - A missile hit a house located behind military headquarters Tuesday, killing two children and seriously wounding two women, military and Red Cross sources said.

''A missile was launched and fell on a house in the San Francisco neighborhood '' Army Col. Mauricio Vargas said.

Two explosions were heard in San Salvador at about 5 p.m.

Red Cross spokesman Ernesto Hurtado said 9-year-old Natalia Medina and 15-year-old Gerado Salazar were killed in the explosion, and Vilma Lando and Magdalena Salazar, both 49, were seriously injured.

The house, which sustained major damage, is located close to the military complex that houses the Salvadoran armed forces joint chiefs of staff.

#90296u2287 10/23/1990 ~United Press International

SAN FRANCISCO (OCT. 23) UPI - Humphrey, the whale that lost its way in Northern California's inland waterways in 1985, was freed Tuesday after spending a second day of high drama stranded in San Francisco Bay.

Coast Guard boats and environmentalists in dinghies were able to free Humphrey at about 4 p.m., pulling him off the rocks on their third attempt of the day to rescue the beast.

They then herded the wayward humpback across San Francisco Bay and toward the Golden Gate Bridge.

Earlier in the afternoon, around 2 p.m., a 41-foot search and rescue boat tugged at the recalcitrant animal while scientists played recordings of humpback sounds to lure him into deeper water.

But the 50-ton mammal, appearing disoriented, swam only about 50 yards and turned back to shore, where he again quickly became stranded.

Later, they tied another hawser to the whale and tugged him into deeper water. This time it took and Humphrey began swimming off.

More than 2,000 bystanders gathered at Candlestick Point to watch the effort. A picnic atmosphere prevailed under sunny skies that were dangerously warm for Humphrey.

One spectator, Bill Over of Pittsburgh, Pa., said he and a group of friends stayed over to watch the whale show after attending Sunday's 49ers-Steelers football game.

''I just want to tell my mother I'm watching the whale and not hanging out in a bar,'' he joked.

The mood of Humphrey's would-be rescuers - 18 men and women in wet suits, including a veterinarian, at least two biologists, a medical staff and volunteers - was not as light.

The endangered humpback was first spotted about daybreak Monday, stranded in 2 1/2 feet of water in the bay - a sight that created a traffic jam of leviathan proportions as motorists on shoreline roadways slowed and gawked at the beached giant.

Since then, the rescuers repeatedly doused Humphrey with water to keep his exposed skin wet. At about 2 a.m. Tuesday, during the morning high tide, they made their first attempt of the day to pry him free.

During the course of the day, the giant creature was draped with large towels that were constantly soaked with water to keep him wet and his body temperature down.

Humphrey captured the attention of the world five years ago when he got lost and wandered through the Sacramento River Delta for three weeks.

This time, he apparently broke away from his friends along the coast and wandered into the bay looking for herring, according to whale researcher Kenneth Balcomb.

''Humphrey has a different way,'' Balcomb said. ''He is always odd man out.''

A blood test taken Monday night showed Humphrey was healthy, though biologists feared he could crush himself to death by his own weight if he wasn't freed soon.

Still, ''his health is perfect,'' said Denize Springer, a spokewoman for the California Marine Mammal Center in Sausalito, across the bay from San Francisco.

''His respiration is even and deep. (There are) no outward signs of illness or injury,'' she added.

Peigin Barrett of the Marine Mammal Center said rescue workers teased and prodded Humphrey, even covering his blow hole to irritate him into action. It didn't work.

During the high tide of 2 a.m., the rescuers, using 12-foot 2-by-6- foot boards, tried to pry Humphrey from the mud while a boat tried to tug the whale into deeper water using a tow line.

But Humphrey ''didn't cooperate,'' Springer said. ''Usually when an animal is trapped it will coooperate to get out. He didn't.''

At one point, it was suggested that a crane be used. That idea, however, was scrapped.

''The sad part is that he's endangered and an adult and capable of making more of them (humpback whales), but that's not what he's interested in,'' Springer said.

#90296u2381 10/23/1990 ~United Press International

NEW YORK (OCT. 23) UPI - Federal investigators have linked Minnesota Vikings place kicker Donald Igwebuike to an attempt to smuggle heroin into the United States from his native Nigeria, ABC News reported Tuesday.

The U.S. attorney's office in Tampa, Fla., has ''irrefutable evidence'' tying Igwebuike to another Nigerian native arrested two weeks ago at the Orlando airport. The man, who teaches school in Florida, was found to have 31 small bags of heroin in his stomach, ABC reported.

Investigators told the network that Igwebuike bought the man's plane ticket and participated in telephone conversations indicating he knew of the drug deal.

The Customs Service obtained a search warrant Tuesday for Igwebuike's apartment in a Minneapolis suburb. Igwebuike confirmed he was the subject of an investigation, but he would not comment further.

''This isn't supposed to be news yet. Talk to my attorney,'' Igwebuike told an ABC News reporter during football practice.

Igwebuike's attorney, Larry Reed, later said he was confident his client would be cleared.

''I heard the recording,'' Reed said. ''It was in the Nigerian language. I had it translated and there was no mention of drugs on the tape. I saw all of the evidence and all of the documents and there is nothing to connect Donald with this case.''

If indicted, Igwebuike would be the first National Football League player charged with trafficking heroin.

''We have not been contacted by federal authorities,'' the Vikings said in a prepared release. ''We have talked with Donald Igwebuike and and his attorney about the matter. We have contacted the National Football League and they are looking into the allegations.''

Igwebuike, 29, played college ball at Clemson before being selected by the Tampa Bay Buccaneers in the 10th round of the 1985 draft. He spent five years with Tampa Bay before being released and was signed by Minnesota this season.

#90296u2435 10/23/1990 ~United Press International

LOS ANGELES (OCT. 23) UPI - Todd Marinovich, starting quarterback for No. 20 Southern Cal, was suspended Tuesday through this week for cutting class, and will miss Saturday's game at Arizona State, Trojan Coach Larry Smith said.

Smith said he met with the Marinovich family last month after receiving reports he was not attending class.

''At that time, we made an agreement that he would go to all his classes and we would monitor his attendance,'' said Smith. ''This afternoon, we received a report that he missed class last week. So we suspended him. If he meets his classroom commitments this week, he will be reinstated next week. Todd has assured us that he wants to play and be a part of this team and that it won't happen again.''

Marinovich went 18-for-35 for 174 yards and two touchdowns in a 35-26 loss last Saturday to No. 21 Arizona and was intercepted three times.

''We had an agreement that I would not miss class anymore,'' said Marinovich. ''I did not uphold that agreement, so I've got to suffer the consequences and be suspended for the week.''

Senior Shane Foley, who has completed 14-of-23 passes for two touchdowns as a reserve, will start for Southern Cal, 5-2, Smith said.

#90296u2475 10/23/1990 ~United Press International

WASHINGTON (OCT. 23) UPI - The Senate defeated a proposal Tuesday night that would have changed the Endangered Species Act and jump-started the process for seeking to lift logging restrictions aimed at protecting the northern spotted

owl.

The measure, killed on a 62-34 vote, was presented by Sen. Bob Packwood, R-Ore., as an amendment to an $11.7 billion spending bill for the Interior Department and U.S. Forest Service for the fiscal year that began Oct. 1.

Packwood said he offered the proposal on behalf of thousands of loggers and mill workers in the Pacific Northwest who stand to lose their jobs due to cutbacks in timber harvests imposed to preserve the habitat of the spotted owl.

But debate over the amendment became a referendum on the 17-year-old Endangered Species Act and the larger conflict between economic interests and wildlife conservation.

The owl was classified in June as a threatened species, requiring the government to avoid activities - in this case timber sales - that jeopardize the bird's continued existence.

Scientists consider the owl an indicator species for the overall health of aging forests on the western slopes of the Cascades where the bird dwells, an ecosystem more abundant in plant and wildlife than tropical rain forests.

''If natural ecosystems go down the drain, we go down with them,'' said Sen. Timothy Wirth, D-Colo.

The U.S. Fish and Wildlife Service has concluded that current logging patterns in these ''old-growth'' forests is driving the owl toward extinction.

Since the owl was listed as threatened, all timber sales proposed by the Forest Service or Bureau of Land Management in the Northwest must be submitted to the wildlife service for review, and if deemed a threat to the owl, be modified or forbidden.

All such decisions are to be based strictly on scientific findings.

Under extreme circumstances, current law provides for the convening of a special Cabinet-level committee empowered to override the Fish and Wildlife Service and, for economic reasons, grant an exemption to a timber sale that otherwise would be outlawed.

The committee, popularly known as the God Squad, has been assembled only twice since its creation in 1978, once to review the conflict between the snail darter and the Tellico Dam in Tennessee and once to weigh the clash between the whooping crane and the Gray Rocks Dam in Wyoming.

Packwood's proposal would have enlarged the scope of the committee's review to allow the panel to judge overall forest management plans in the Northwest rather than individual timber sales.

It also would have directed the Forest Service and BLM to immediately submit their forest management plans to the Fish and Wildlife Service - the first step in the exemption process - without first completing biological studies required under current law.

Opponents argued that because the formal management plans of the Forest Service and BLM fail to reflect the listing of the spotted owl, the amendment would preordain a conflict with the Fish and Wildlife Service and virtually guarantee the convening of the ''God Squad.''

''Congress is being asked to step in and make the exemption process not a matter of last resort but a matter of first resort,'' said Sen. Albert Gore, D-Tenn. ''The process ... is being bypassed and hotwired by this amendment.''

Sen. John Chaffee, R-R.I., one of the original authors of the Endangered Species Act, said the Packwood measure ''tips the scales in favor of the exemption process. We ought to let the act work.''

Packwood described his proposal as an attempt to make a ''procedural'' adjustment to the Endangered Species Act and denied charges it was designed to stack the process in favor of an exemption.

''Let us exercise a process to consider the total picture,'' said Sen. Mark Hatfield, R-Ore. ''We're not asking for that to be predetermined. We're merely asking for our day in court.''

Of the four senators from Oregon and Washington, the two states most affected by the spotted owl controversy, only Sen. Brock Adams, D-Wash., voted against the Packwood amendment. The three others - Packwood himself, Hatfield and Sen. Slade Gorton, R-Wash. - voted in favor of it.

(OCT. 23) UPI - A Bush administration official says Labor Secretary Elizabeth Dole will announce her resignation tomorrow. There are UNconfirmed reports Dole is taking a top job at the Red Cross... as well as speculation she will run for the Senate in two years in her native North Carolina. The 54-year-old Dole has held several high-level federal posts and served as transportation secretary during the Reagan administration.

Senate Democratic leader George Mitchell says the House is in a ''Catch-22'' situation on the issue of taxing the rich in its bid to work out a deficit reduction plan. Mitchell says President Bush insists the budget bill be written in a manner acceptable to him, even though that makes it unacceptable to House Democrats... whom the administration acknowledges are needed to pass it. Congress and the administration face a deadline of midnight tomorrow to pass a deficit reduction plan.

Iraq freed 64 Western hostages today... 14 Americans and 50 Britons. Later, Baghdad Radio reported Iraq will free all French nationals, believed to total about 350. The announcement came after the group of ailing Western hostages arrived in the Jordanian capital of Amman aboard a British airliner. Their freedom was won by an appeal by former British Prime Minister Edward Heath.

In Boston, black leaders today declared the one-year anniversary of the Carol Stuart murder case a day of mourning. The leaders urged residents to wear black armbands and drive with their headlights on during daylight hours to mourn the injustices committed against the black community in the aftermath of the murder of Charles Stuart's pregnant wife. Stuart told police a black mugger shot him and killed his wife... but later committed suicide as police sought to arrest him for the crime.

#90297b0006 10/24/1990 ~Business Wire
ATLANTA (OCT. 24) BUSINESS WIRE - First Financial Management Corp. (NYSE:FFM) (FFMC) Tuesday announced that it has signed an amendment to its existing debt agreement with a consortium of banks.

The amendment provides for an additional $28 million to the existing $162 million term loan outstanding plus a $95 million revolving credit. The term loan is for six years with semi-annual payments. The outstanding portion of the revolving line of credit at 12/31/92 will be converted to a four year term loan with semi-annual payments.

The funds will be used for general corporate purposes, including acquisitions, should suitable opportunities be available. Patrick H. Thomas, chairman of the board, president and chief executive officer stated, ''This additional

financing provides the company with adequate capital to continue our expansion program. The structure of the agreement allows flexibility as changes in the marketplace occur over time.''

FFMC is an information services company which offers a broad range of data processing and related services to a large and diverse customer base. The company provides products and services to financial institutions, retail merchants, governments and other industries.

It is a leader in financial institution processing, data imaging, micrographics, electronic data base services, debt collection, and health and pharmaceutical claims processing and is one of the largest merchant credit card processors in the country.

FFMC also owns Georgia Federal Bank FSB, the largest savings institution and one of the largest retail banks based in Georgia and its subsidiary, First Family Financial Services, a major regional consumer finance company. Its common stock is currently traded on the NYSE under the symbol FFM. Its debentures are quoted through NASDAQ under the symbol FFMCG.

#90297b0013 10/24/1990 ~Business Wire

NEWPORT BEACH, CA (OCT. 24) BUSINESS WIRE - Nationwide Health Properties Inc. (NYSE:NHP) Wednesday announced increased earnings for the quarter and nine months ended Sept. 30.

Nationwide, a real estate investment trust (REIT) which owns long-term care and other health-related properties, reported earnings of $12,643,000, or $1.16 per share, for the nine months ended Sept. 30, 1990, compared with $8,436,000, or $1.03 per share, in the same period of 1989.

Quarterly earnings increased to $4,464,000 from $3,453,000 for the third quarter of 1989. Per-share earnings decreased to 40 cents in the quarter ended Sept. 30, 1990, from 42 cents for the year-earlier period.

Results for most of the nine months and all of the quarter were affected by the $42 million public offering of 3 million shares in January 1990.

Nine-month and quarterly revenues for 1990 were $23.36 million and $7.97 million compared with $26,739,000 and $9,047,000 for the same periods of 1989.

Nationwide President and Chief Executive Officer R. Bruce Andrews said: ''Earnings increases are primarily due to the debt reduction made possible by

our recent financial restructuring, which included the public offering earlier this year. These results also reflect the sale of some facilities which had the effect of reducing revenues and increasing earnings.''

Andrews pointed out that the recent $22 million acquisition of 12 health-care properties in Texas and the agreements for their operation by ARA Living Centers of Texas were completed at the end of this quarter and therefore did not contribute to the earnings increase.

#90297b0015 10/24/1990 ~Business Wire

HAMILTON, OH (OCT. 24) BUSINESS WIRE - Ohio Casualty Corp. (NASDAQ:OCAS) recorded net income of $1.62 per share in the third quarter 1990 up from 95 cents in 1989.

Realized investment losses after tax for the quarter were 19 cents per share compared with 14 cents per share in the third quarter 1989.

For the nine months ended Sept. 30, 1990, net income was $3.53 per share compared with $4.42 per share in 1989. Realized investment losses were 44 cents per share during the first nine months of 1990 compared with realized investment gains of 9 cents per share in 1989.

The combined loss and expense ratio for the first nine months was 104.5 percent compared with 102.7 percent for 1989. The third quarter combined ratio was 100.6 percent in 1990 and 106.3 percent in 1989. Year to date catastrophic losses added 1.9 percent to the combined ratio compared with 2.1 percent in the previous year.

Net property and casualty investment income for the nine month period, excluding realized investment losses, was $134.4 million, $6.84 per share, compared with $141.4 million, $6.57 per share, in the previous year. This

represents an increase of 4.1 percent per share over 1989.

Gross premiums and related income increased 5.2 percent to $1,141.1 million for the first nine months of 1990. Net property and casualty written premiums were $1,107.4 million, an increase of 5.5 percent over 1989.

Life insurance premium income for the first nine months of 1990 was $12.3 million compared with $11.6 million in 1989, an increase of 5.9 percent. Life insurance operations recorded a net loss of 2 cents per share compared with net income of 19 cents per share in 1989. Realized investment losses amounted to 22 cents and 4 cents per share in 1990 and 1989, respectively.

Consolidated assets totalled $3.1 billion at Sept. 30, 1990, compared with $3.2 billion one year ago. Investments in securities amounted to $2.4 billion at cost, and had an estimated fair market value of $2.4 billion at Sept. 30, 1990. Investments in taxable high yield and unrated securities have an aggregate carrying value, determined in accordance with generally accepted accounting principles, of $485.2 million. The current estimated fair market value of such high yield and unrated securities is approximately $408.9 million. At Dec. 31, 1989, investments in taxable high yield and unrated securities had a carrying value of $700.7 million and a market value of approximately $655.1 million.

DALLAS (OCT. 24) BUSINESS WIRE - Medical Care International Inc. (NASDAQ/NMS:MEDC) Wednesday announced substantially higher revenues and earnings for the third quarter ended Sept. 30, 1990, compared with the year-earlier period.

The company's operating performance for the third quarter was highlighted by continued year- over-year growth in same-unit cases, together with record net revenues per case on a same-unit basis. Medical Care's results for the third quarter also reflected the addition of three surgery centers since Sept. 30, 1989.

On a per share basis, earnings rose 42 percent to 34 cents compared with 24 cents last year. Net revenue for the period totaled $58,140,000 vs. $35,023,000 in the third quarter of 1989, representing an increase of 66 percent.

Medical Care International is the nation's largest owner and operator of freestanding outpatient surgery centers. The company's facilities include 70 surgery centers and 10 specially equipped eye care practices located from

coast to coast, where a variety of surgical procedures are performed that do not require an overnight hospital stay.

#90297b0018 10/24/1990 ~Business Wire

DAYTON, OH (OCT. 24) BUSINESS WIRE - NCR Corp. Wednesday announced its Direct Mail Program, a significant new co-marketing program for the company's direct resellers that will provide them with tri-folded self-mailers and ''tear-off'' inquiry cards which can be used to generate sales leads.

''Our new Direct Mail Program enables all direct NCR resellers to attract qualified sales leads through customized mailings which demonstrate NCR's systems-based customer solutions and the reseller's value-added services and support,'' said Mike Dubrall, director of marketing and support in NCR's cooperative marketing division.

The Direct Mail Program will provide resellers with a customized direct mail

place that emphasizes the direct reseller's commitment and expertise in providing customer solutions, and it offers suggestions on how to use direct mail campaigns most effectively.

In addition, resellers can be reimbursed for their direct mail expenses through NCR's ValuePlan cooperative funding program.

According to Dubrall, ''ValuePlan, used in conjunction with the Direct Mail Program, makes it easy and inexpensive for resellers to generate leads through direct mail.

''The biggest advantage for a reseller, besides the generation of ready-to-buy prospects, is enhanced reputation and name-recognition among qualified buyers. Our program also provides promotional material that can be used in other marketing campaigns such as trade shows and sales visits,'' DuBrall stated.

The Direct Mail Program is one of a growing series of lead generation programs for NCR resellers. Another program, the Trade Show Program, provides backdrops, pedestals and other materials which enable resellers to generate leads through trade show participation. Upcoming plans will include telemarketing and enhanced advertising programs.

NCR Corp., with headquarters in Dayton, develops, manufactures, markets and supports business information processing systems for worldwide markets.

#90297b0020 10/24/1990 ~Business Wire

AKRON, OH (OCT. 24) BUSINESS WIRE - The tire industry is in a down cycle and Goodyear earnings are depressed, but the company has taken major steps to bounce back in a fiercely competitive market, Chairman Tom H. Barrett said in a message accompanying the Nine-Month Report to Shareholders.

Barrett said he shares concerns about the price of Goodyear stock, but, ''I am comfortable that we have developed and are implementing plans that provide the foundation for our company's long-term leadership in the tire industry.''

Citing the unprecedented industry consolidation that has left five companies with 72 percent of the world market, Barrett said management anticipated developing problems and initiated actions to make the company more cost effective and flexible.

''But putting these plans in place led to restructuring charges in the second and third quarters that amount to approximately $80 million before taxes and

accounted for the major portion of our losses in those periods,'' he said.

The sales and marketing functions were consolidated to create a more efficient organization that is ''closer to the customer and ready to adjust to changes in the marketplace in the future,'' he said.

One result of the restructurings will be the reduction of salary rolls by an additional 3,000 employees by mid-1992, the chairman reported, putting worldwide employment at 106,000 compared to 109,000 currently and 115,000 just two years ago.

Barrett also addressed the debt reduction objective.

''We are managing our working capital to match market requirements,'' he said.

The company reduced plant schedules to put product inventories in line with demand. ''Through our new organization we are able to operate at lower and more efficient inventories and better serve our customers,'' he said.

''Our 1990 capital spending will be $100 million lower than the $700 million originally planned,'' he said, and 1991 capital spending is targeted below expected depreciation of $450 million.

Barrett said the reduction is possible because the company has substantially completed its conversion to radial tire production and plants are generally modern, ''thanks to our extensive investment in prior years.''

Worldwide, tire unit sales were up 2.7 percent through the first nine months. New Goodyear brand tires such as the luxury/touring Eagle GA and the fourth generation all-season tire, Invicta GS, have been well received in the United States, Barrett said.

In addition, the new Just Tires retailing concept offering guaranteed fast service at competitive prices has produced encouraging results to date.

The Kelly-Springfield subsidiary has been achieving record sales, increased earnings and healthy cash flow -- and in 1991 begins an arrangement with Sears to supply more than 500,000 tires a year.

Barrett stated that in 1990, the All American Pipeline is transporting an average of 100,000 barrels of oil daily from the West Coast to Texas. He said he could not predict when higher oil prices would lead to offshore California crude in the pipeline.

During the consolidation of the industry, Goodyear has held its market position, Barrett said, by virtue of its strengths in manufacturing, distribution, research and development, and quality products and services.

#90297b0021 10/24/1990 ~Business Wire

NEW YORK (OCT. 24) BUSINESS WIRE - Atlantic Records has announced the establishment of a new division, East West America.

The announcement was made this week by Atlantic Chairman/Chief Executive Officer Ahmet M. Ertegun and President/Chief Operating Officer Doug Morris. Heading the new venture are longstanding Atlantic senior executives Sylvia Rhone and Vince Faraci, who have been named co-presidents of the label.

Rhone will serve as president/chief executive officer, while Faraci will serve as president/chief operating officer.

First releases from East West America are scheduled for January 1991, with initial artists to be announced in the near future. In addition to new signings, the EWA roster will include artists from the current Atlantic roster as well as selected artists signed by Atlantic's British sister company, East/West U.K.

A full service label, East West America joins Atlantic and Atco to become the third free-standing division under the umbrella of the Atlantic Recording Corp. EWA will begin operations with A&R, marketing, promotion, publicity and sales departments in place. In the promotion area, the company will have its own complete national and field staff, covering all musical formats.

Based in New York, the label will also open a West Coast office. Staff appointments in all areas will be announced in the upcoming weeks. In addition, East West America will utilize ''back office'' services of Atlantic Records in various areas.

Rhone commented: ''Doug Morris's decision to have two Atlantic executives head this new label venture is a perfect illustration of his unique management style. Drawing on the company's internal human resources, he is giving Vince and myself a chance to take our careers and our visions to the next plateau.

''This innovative approach in the executive area will undoubtedly be reflected in our artistic philosophy -- at East West America, the music will come first. Since artist development is the lifeblood of our industry, we intend to keep our roster to a manageable size, thus giving each and every one of our signings undivided attention."

#90297b0023 10/24/1990 ~Business Wire
AKRON, OH (OCT. 24) BUSINESS WIRE - A loss of $61.4 million or $1.06 per share in the third quarter was reported today by Goodyear.

Major factors in the loss were unusual charges totaling $51.7 million after tax or 89 cents per share.

In September, the company announced that these charges and other factors would lead to a loss for the quarter.

In the 1989 third period, the company recorded net income of $70.5 million or $1.22 per share.

Worldwide sales rose 8.2 percent above the 1989 period to $2.9 billion during the three months.

Chairman Tom H. Barrett noted that severe competitive pricing in the replacement market; reduced auto and truck production; increased selling, administrative and general expenses; and production cutbacks to reduce inventories contributed to the quarter's loss.

The third quarter unusual charges included $46.4 million before tax for restructuring. The costs resulted from: a realignment of European tire marketing, distribution and production operations, which will eliminate approximately 1,180 jobs by mid- 1992; the phaseout of medium and heavy truck tire production at the Valleyfield, Quebec, plant; rationalization of production operations in Canada and Argentina.

#90297b0025 10/24/1990 ~Business Wire
CUYAHOGA HEIGHTS, OH (OCT. 24) BUSINESS WIRE - American Steel & Wire Corp. (NASDAQ/NMS:RODS) Wednesday announced operating results for its first fiscal quarter ended Sept. 30, 1990.

Net income for the quarter was $409,000, or 5 cents per share, vs. net income of $393,000, or 5 cents per share, for the like period last year.

The company reported record first quarter sales of $53,138,000, up 31 percent from sales of $40,507,000 in last year's comparable period, which was adversely affected by operating inefficiencies experienced in conjunction with the Cuyahoga Works rod mill modernization project.

Operating profit of $3,220,000 for the first quarter more than doubled from the year-ago level of $1,544,000 and helped to absorb increased interest expense resulting from the June 1990 recapitalization of the company.

Commenting on the operating results, Thomas N. Tyrrell, president and chief executive officer, said, ''The good momentum with which we completed fiscal 1990 has been maintained to date in fiscal 1991. Customer acceptance of the improved quality capability of our modernized rod mill continues to grow. This trend, in addition to good cost control efforts, has provided the company with steadily improving product mix and operating profit margins over the past three fiscal quarters. Despite the relatively soft economic outlook, we expect to improve AS&W's profitability in fiscal 1991. In particular, we expect a strong performance in the second half, traditionally our best selling season.''

American Steel & Wire Corp. specializes in manufacturing high-quality steel rod and wire from semi-finished steel billets at its two facilities in Cleveland and one facility in Joliet, Ill. The company's customers are in the automotive, fastener, welding, appliance and aerospace industries.

KANSAS CITY, MO (OCT. 24) BUSINESS WIRE - US Sprint and most United Telecommunications Inc. local telephone companies have announced agreements where most US Sprint residential customers will be billed for their long distance calls along with local calls in a single bill at no extra charge.

Local United companies that have converted to equal access and are therefore eligible to offer this feature include:

United Telephone Company of Florida United Telephone Company of Ohio United Telephone Company of Indiana United of the West (Nebraska) United Inter-Mountain (Tenn. & Va.) United of the Carolinas (S. Carolina) United of the Midwest (Missouri, Minnesota & Kansas) Carolina Telephone (N. Carolina) United Telephone Company of New Jersey

Customers who choose this feature will transition to the single billing invoice option in the next few months.

The local company will be responsible for the production and collection of the bill, and will handle any questions regarding payment procedures. Specific questions about US Sprint's services will be directed to US Sprint.

The single invoice option will continue to support the existing residential services US Sprint now offers its customers, such as FONCARD, international calling and volume discounts. This program will enable local company customers to write a single check and use one stamp to pay local and long distance charges.

US Sprint billing through these local companies will provide many benefits for its customers:

- More efficient billing for residential customers. - More reasons to stay with US Sprint. - An opportunity to offer expanded programs and creative options in the future for customers.

US Sprint is a unit of United Telecommunications Inc., a diversified international telecommunications company based in Kansas City.

LOVELAND, OHIO (OCT. 24) BUSINESS WIRE - Baldwin Piano & Organ Co.'s net earnings for the three months ended Sept. 30, increased 57 percent to $653,000 from $415,000 a year ago.

Earnings per share increased 73 percent to 19 cents from 11 cents per share last year. Baldwin's sales for the three months ended Sept. 30, decreased 10 percent to $28,108,000 from $31,248,000 a year ago.

For the nine months ended Sept. 30, Baldwin's net earnings increased 22 percent to $2,144,000 from $1,754,000 last year. Earnings per share increased 33 percent to 60 cents from 45 cents a year earlier. Sales decreased 9 percent to $84,267,000 from $92,487,000 in the prior year.

The increase in Baldwin's net earnings in the third quarter and the first nine months of 1990 compared to the like period of 1989 was primarily the result of lower interest costs, reduced selling and administrative expenses and improved operating results from Wurlitzer.

DENVER (OCT. 24) BUSINESS WIRE - Grease Monkey Holding Corp. (NASDAQ:GMHC) Wednesday announced the memorandum of understanding for Pit Stop Auto Centers Inc. (NASDAQ:PSAC) to acquire Grease Monkey has been terminated and Grease Monkey has made an offer to acquire Pit Stop.

Grease Monkey has proposed that the Pit Stop shareholders receive 28 shares of Grease Monkey common stock in exchange for each Pit Stop share, for a total of 28 million new Grease Monkey shares.

In addition Grease Monkey has proposed that the Pit Stop warrant holders receive Grease Monkey warrants for 11.2 million shares, exercisable at 28 cents per share through July 31, 1995, in exchange for 400,000 Pit Stop warrants outstanding. If accepted, and consummated, Pit Stop shareholders will then own approximately 45 percent of Grease Monkey.

Arthur Sensenig, president of Grease Monkey, said: ''The combination, as originally structured, was not acceptable after reviewing the relative values of both companies.

''We hired the investment banking firm of Neideger/Tucker/Brunner to determine the value of both Grease Monkey and Pit Stop. The offer by Grease Monkey to acquire Pit Stop reflects a reasonable valuation of both companies.''

SAN DIEGO (OCT. 24) BUSINESS WIRE - Fujitsu Systems of America Wednesday introduced the Atrium9000 Primary/88, an 8088 microprocessor-based point-of-sale (POS) terminal.

Unveiled at the Retail Information Systems Conference in St. Louis, Primary/88 is the newest member of the company's Atrium9000 product family.

Fujitsu's Atrium9000 is a retail management system that includes PC controllers, controller terminals, intelligent primary terminals and non-intelligent satellite terminals. Atrium provides full sales transaction processing, credit authorization, manager workstation functions and host communications capabilities.

Primary/88 is an intelligent industry-standard POS terminal, running the MS-DOS operating system. The initial primary terminal in the Atrium line, an 80286-based terminal, runs either MS-DOS or Microsoft OS/2.

Primary/88 utilizes virtually all of the same modular hardware components (e.g., cash drawer, displays, etc.) as the other terminals in the Atrium9000 product family. Use of common hardware components provides maximum installation flexibility and minimizes maintenance costs. Different terminals, displays and keyboards may be mixed in each store to match individual checkstand requirements, with no additional training.

Atrium9000 controllers now support primary terminals running either Microsoft OS/2 or MS-DOS. Both MS OS/2-based and MS-DOS-based primary terminals may run in the same store, offering additional system configuration flexibility. As a result, the new Primary/88 terminal can be easily added to an existing Atrium9000 store system. The Primary/88 terminal will be available in the fourth quarter of 1990.

Fujitsu Systems of America Inc. is one of the Fujitsu Ltd. family of companies. A global leader in computer and telecommunications technology, Fujitsu Ltd. has annual revenues of more than $16 billion. Fujitsu Systems of America, a major suppier of end-user systems to the U.S. market, designs, develops and markets POS systems, automated teller machines and handheld computer systems.

SAN JOSE, CALIF. (OCT. 24) BUSINESS WIRE - Santa Clara Valley Water District General Manager Ronald R. Esau Wednesday announced the appointment of P. Kay Whitlock, P.E., as district flood control manager.

Whitlock, formerly chief engineer of the DuPage County Stormwater Management Division in Chicago, will begin her district position Nov. 13.

Whitlock's position with the Valley Water District will involve the management

of long- and short-range flood control planning and design as well as all district hydrology, environmental services and ordinance administration. She will manage a staff of 50 and a $40 million budget.

''We're pleased to have Kay Whitlock accept the flood control manager position with our district,'' Esau said. ''She brings more than 20 years of experience in effective flood control and stormwater management programs.''

Whitlock accepted her chief engineer position with DuPage County's Stormwater Management Division in 1988.

Under her direction a stormwater plan was adopted in 1989, the development of watershed plans began, a stream maintenance program was tested and approved, construction of the first major flood control project will begin this fall, and a comprehensive stormwater ordinance was developed and soon will undergo public review.

Whitlock is a member of the American Society of Civil Engineers and was elected by the society as 1989 Chicago Government Civil Engineer of the year.

#90297b0054 10/24/1990 ~Business Wire

GLENDALE, CALIF. (OCT. 24) BUSINESS WIRE - Spear Financial Services Inc. (NASDAQ:SFNS) announced a $466,285 after-tax profit for the third quarter ended Sept. 30, 1990, on record revenues of $7,398,851.

In the comparable 1989 quarter, the company had revenues of $5,403,151 and a profit of $75,955.

For the nine months ended Sept. 30, the company reported a profit of $950,535 on revenues of $19,084,489. For the first nine months of 1989, the company had a profit of $119,524 on revenues of $15,508,507.

Third quarter 1990 primary and fully-diluted after-tax earnings were 6 cents per share and year-to-date earnings were 12 cents per share. Third quarter and year-to-date 1989 earnings were 1 cent per share and 2 cents per share, respectively.

''Our excellent third quarter performance was principally due to the continuing growth of our insurance marketing subsidiary, James Mitchell & Co. (JMC). JMC produced almost 75 percent of the company's revenue in the third quarter of 1990,'' the company's chairman, Charles M. Spear, said. JMC markets tax-advantaged insurance products to customers of client financial institutions.

The company also identified that Barnett Banks Inc. has signed a three-year contract with James Mitchell and Co. This relationship was announced earlier but the client was not identified at that time. Sales at Barnett are expected to begin in November.

In addition to its insurance business, Spear Financial Services also operates two securities divisions: Spear Securities Inc., a California-based discount retail discount brokerage firm, and TCW Inc., a Pacific Stock Exchange specialist operation. Discussing these operations, Spear said, ''Our securities subsidiaries were somewhat stronger in the third quarter of 1990 than in 1989, but we do not expect significant growth in these operations.''

During the third quarter, the company repurchased and retired a large block of its securities, soliciting the purchase of 1,086,221 shares from its second largest holder, Liberty Mutual Insurance co. of Boston. This share retirement reduced the company's currently outstanding shares by 15 percent. During the period, Mr. Spear added 179,500 shares to his holdings by exercising options on 169,500 shares and by purchasing an additional 10,000 shares in the market.

SEATTLE (OCT. 24) BUSINESS WIRE - Celerex Corp. and founder Thomas Kegley have been named winner of ''Credit Card Management's'' Innovator of the Year annual credit card award.

''Credit Card Management,'' a monthly publication, is a major magazine serving the credit card industry.

According to John Stewart, editor of ''Credit Card Management'' magazine: ''We seek to recognize breakthroughs, typically in the financial/automation area, which fundamentally change in a positive manner, the way business is done in the credit card industry. Celerex was selected because of its innovative 'Faster Than Cash' electronic payment system.''

The Celerex system is operated by simply passing either a credit card or check through the Celerex reader and entering the purchase amount. In less time than it takes to complete a cash sale, the check or card is verified, the sale processed, a receipt issued, and the transaction stored with no voucher or customer signature required.

The winner of the award, founder Thomas Kegley of Celerex, stated, ''The Celerex system is the result of three years of extensive research and

development. It is now being used in many merchant locations and is gaining rapidly growing widespread consumer acceptance.'' Kegley further added, ''I am very appreciative of the award, but must make it clear that the award should go to all of the Celerex team.''

The Celerex system was developed to offer speed and payment convenience to consumers in the fast food industry. Other applications include retail grocery stores, movie theaters, parking lots, convenience stores and amusement parks.

For more information on the Celerex system, contact Celerex Corp., 1370 Stewart Street, Seattle, Wash., 98109, telephone 206/623-0225, or toll free 800/543-1615.

FRESNO, CA (OCT. 24) BUSINESS WIRE - The Bank of California is expanding its presence in Fresno with a move to Woodward Centre, 7108 North Fresno Street.

The bank's Fresno Regional Office opened at 1314 East Shaw Avenue eight year's ago with five employees. Today, the office has a staff of 22 headed by Vice President and Regional Manager Gary Reynolds and Real Estate Industries Group Manager Kathy Karst.

''The new location will enhance our ability to serve the growing Fresno marketplace,'' said Reynolds. ''With a 25-percent population increase anticipated in the 90s, this move is vital to our expansion within the community and to our staff growth. Naturally, we hope the larger facility will boost our visibility in the area.''

The Fresno Office will be located in the new four-story Woodward Centre, a Class A building in the Freeway 41 Corridor development complex just north of Herndon Avenue. It will be designated by The Bank of California signage on top of the building and will occupy 13,500 square feet -- more than double its existing space. The full-service office includes an automated teller machine.

The Bank of California is a business and private bank serving small and middle market businesses and providing private banking services to professionals, executives and entrepreneurs. The Fresno office particularly caters to the agriculture and real estate industries.

The sixth largest in the state, The Bank of California was the first incorporated banking institution in the West. The 126-year-old organization has $8.6 billion in assets, 50 offices in California, Washington and Oregon,

and 14 international offices.

BOULDER, CO (OCT. 24) BUSINESS WIRE - To better serve its growing client base SMARTSCAN Inc. has moved into new corporate headquarters located at 2344 Spruce Street, Boulder, CO 80302.

The firm will gain additional space and a more central location. Corporate offices moved during the third week of September, and all automated data conversion equipment and personnel will follow during the month of October. Phone and FAX numbers will remain the same: Phone, 303/443-7226 and FAX: 303/443-2997.

SMARTSCAN is the leading automated GIS conversion services company providing data conversion services to governmental agencies, natural resource companies and public utilities. SMARTSCAN uses proprietary scanning, artificial intelligence and interactive graphics technology to automate and improve the quality of the digitizing process.

SMARTSCAN President and Chief Executive Officer Mickey Fain, and Chief Operating Officer Bob Ackmann, will both speak at the GIS/LIS Conference in Orange County, Calif. (Nov. 17 to 21, 1990). Fain's speech focuses on automated data conversion technology, while Ackmann will present several project examples that illustrate applications of this technology.

The SMARTSCAN exhibit, located in Booth No. 205, will feature project examples which dramatically illustrate the capabilities of the company's proprietary automated conversion technology.

#90297b0081 10/24/1990 ~Business Wire

LOS ANGELES (OCT. 24) BUSINESS WIRE - Anthony Industries Inc. (NYSE:ANT) Wednesday reported lower sales and earnings for its third quarter ended Sept. 30, 1990.

For the three-month period, income before an extraordinary charge was $2.3 million, or 25 cents per fully diluted share, compared with earnings of $5.0 million, or 52 cents per fully diluted share, in the year-earlier period.

As previously reported, an extraordinary after-tax charge of approximately $1.0 million was recorded during the 1990 period which reduced net income to $1.4 million, or 15 cents per fully diluted share. This charge reflected the write-off of the unamortized original issue discount associated with the approximately $6 million of convertible subordinated debentures recently redeemed by the company.

Sales for the third quarter of 1990 were $102.9 million, down slightly from $105.7 million registered in the corresponding 1989 quarter.

For the nine months, Anthony's income before the extraordinary charge was $5.8 million, or 64 cents per fully diluted share, on sales of $295.4 million, compared with $10.4 million, or $1.10 per fully diluted share, on sales of $295.1 million for the year-earlier nine-month period.

Anthony Industries is a diversified manufacturer with operations in two major business segments: recreational products consisting of K2, Pre and Olin skis, Hilton active apparel, Shakespeare fishing tackle, Anthony swimming pools, Poolsaver pool covers and Stearns water safety products; and industrial products including Simplex building materials, Shakespeare fiberglass antennas and light poles and Shakespeare monofilaments.

#90297b0087 10/24/1990 ~Business Wire

DENVER (OCT. 24) BUSINESS WIRE - Tele-Communications Inc. announced Wednesday that its board of directors has approved a plan to distribute to its shareholders a new company named Liberty Media Corp. consisting of certain of TCI's programming and cable television interests.

This plan will be effected by means of a distribution of transferable exchange rights to TCI shareholders and holders of securities that are exercisable for or convertible into TCI common stock. The rights will entitle the holders thereof to contribute a portion of their shares of TCI Class A and Class B common stock to Liberty in exchange for Class A and Class B common stock of Liberty.

At or about the same time, TCI will contribute certain of its programming and cable television interests to Liberty in exchange for preferred stock of Liberty. The assets that management has identified for contribution to Liberty, subject to the receipt of governmental and third party consents and waivers, include substantially all of the company's programming interests

(other than its investments in Turner Broadcasting System Inc. and The Discovery Channel), the company's interest in certain cable television systems that served approximately 31,500 basic subscribers at June 30, 1990, the company's interest in certain cable television systems owned by equity affiliates of the company that served approximately 583,300 basic subscribers at June 30, 1990, and most of the company's investments accounted for by the cost method in other cable television systems that served approximately 849,200 basic subscribers at June 30, 1990.

In addition one of these investments owns a minority interest in a cable television company that, at such date, served approximately 174,400 basic subscribers. Also, a certain subsidiary of the company has a 50 percent interest in a general partnership which owns an indirect 15 percent interest in a corporation which owns cable television systems serving approximately 1.6 million basic subscribers at June 30, 1990.

Subject to the receipt of necessary third party consents and waivers, the company will contribute the stock of such subsidiary to Liberty.

Offering of Liberty common stock will be made only by means of prospectus/offering circular. Tele-Communications Inc. is traded over-the-counter with Class A common stock and Class B common stock trading separately under symbols TCOMA and TCOMB, respectively. The company's 11-1/8 percent senior subordinated debentures, 7 percent convertible subordinated debentures, and TCI rights are traded in the over-the-counter markets, the latter two under the symbols of TCOMH and TCOMR, respectively.

#90297b0089 10/24/1990 ~Business Wire

BEVERLY HILLS, CALIF. (OCT. 24) BUSINESS WIRE - Litton's Applied Technology division, San Jose, has been awarded a $28.7 million U.S. Navy contract to upgrade 117 computers for Litton-produced AN/ALR-67 airborne countermeasures warning and control systems.

The contract initiates a pre-planned product improvement program that will provide the systems with an enhanced radar warning capability for the Navy's F-14, F/A-18, A-6 and AV-8B aircraft.

A follow-on award to upgrade an additional 113 ALR-67 computers is also expected. The product improvement program has the potential to include more than 2,000 system computers.

The new program will modify the computers to provide identification of threats

projected for the 1990s and will extend the useful life of the ALR-67 system.

Charles Anderson, director of Navy programs for Litton's Applied Technology division, said, ''The program will significantly improve the detection of electronic signals from hostile sources, as well as the accuracy of the direction of arrival of those signals, and the system's signal processing capability.''

The ALR-67 system has been in production for several years for use by the U.S. Navy, Canada, Spain and Australia. It detects, analyzes, identifies and displays radar signals associated with hostile weapon systems, providing an alert to aircrews so they can take evasive action and employ countermeasures to foil an enemy attack.

The system also is linked to onboard fire control radars, radar jammers, missile detection systems and anti-radiation weapons, and can control the firing of chaff, flares and other decoys.

Litton is a technology-based company providing advanced electronic and defense systems, resource exploration services and industrial automation systems to U.S. and world markets.

#90297b0096 10/24/1990 ~Business Wire

COLORADO SPRINGS, CO (OCT. 24) BUSINESS WIRE - Brown Disc Products Co. Inc. announced that it has filed with the Securities and Exchange Commission its annual report on Form 10-K for the year ended June 30, 1990, showing an increase in sales of $848,788 over the previous year ended June 30, 1989.

This represents an increase of 23.6 percent due to increased market penetration; however, there was significant decrease in the average selling price of all magnetic media duruing the year compared to the previous 12 months.

Total operating costs and expenses increased $1,695,884 over the previous year. Other expenses rose $83,542 due to increased borrowing. Increased production costs were incurred with the introduction of an expanded production process and the acquisition of additional used manufacturing equipment.

Defects in the equipment resulted in a high level of scrap product after initially failing to meet quality assurance standards during the third quarter of fiscal year 1990. The defects have been remedied.

Additionally, a rain and ice storm in March damaged the company's manufacturing facilities, forcing a production line shutdown for several weeks before becoming fully operational again. The company also incurred significant and unexpected shipping charges as it was forced to send and receive product and materials via air freight to avoid supply interruptions to customers.

Profit from operations decreased from $42,899 in fiscal year 1989, to a loss of $821,561 in fiscal year 1990. This loss was due to the cost increases noted above, as well as to declining sales prices. The company regained profitability in July 1990 and management expects this trend to continue.

#90297b0105 10/24/1990 ~Business Wire

DALLAS (OCT. 24) BUSINESS WIRE - MicroProbe Corp. Wednesday previewed its DenTest Periodontal Pathogen Detection System at the 76th annual meeting of the American Academy of Periodontology.

Based on the company's DNA probe technology, the in-office system will enable one to directly identify bacteria associated with periodontal disease within 30 minutes, as an aid to diagnosis and for monitoring treatment.

The test system is scheduled to be sold for research use in 1991 and, upon market clearance by the U.S. Food and Drug Administration, will be available for use by periodontists.

The DenTest system consists of a small and easy-to-use instrument, dipsticks coated with DNA probes, a sample-collection device and reagents. Each dipstick employs Microprobe's Patient Analysis Card (PAC) format, which will allow for simple, fast and accurate analysis of subgingival plaque samples.

The system's complex chemistry is invisible to the user, who simply loads the

sample and reagents into the system, activates the instrument, and returns at the end of 30 minutes to read the test results before the patient leaves the office.

Unlike enzyme assay tests, which do not determine bacterial types, the DenTest system detects directly -- in a single bacterial plaque sample -- one or more of the following: Porphyromonas gingivalis, Bacteroides forsythus and Wolinella recta. The presence of each species is confirmed on a single dipstick by visual detection of a blue-colored bead. MicroProbe's DNA probes do not employ radioactive isotopes.

DNA probe technology is a well-established technique that is increasingly used in clinical settings. MicroProbe's technology takes advantage of the natural inclination of the two strands of complementary DNA to bind together. Its DNA probes are comprised of synthetic segments of nucliotides (oligonucleotides) designed to bind, or ''hybridize,'' to a single strand of target DNA unique to a specific organism. Synthetic DNA probes are ideal diagnostic reagents because of their high-hybridization specificity, precisely known sequence and chemical structure.

MicroProbe Corp. is a biomedical company established to commercialize automated diagnostic systems based on proprietary DNA-probe technology, for the rapid, accurate and cost-effective identification of infectious-disease microorganisms.

Founded in 1986, the privately held company is applying recent advances in molecular biology and synthetic chemistry to diagnostic products that offer significant advantages over traditional methods relying on cell culture, antibodies or enzymes.

Located in Bothell, Wash., the company also develops reagent kits for the extraction and purification of nucleic acids from complex specimens.

SAN JOSE, CALIF. (OCT. 24) BUSINESS WIRE - Silicon General Inc. (NASDAQ:SILN) a leading producer of Semiconductors and Telecommunications Systems, Wednesday reported results of operations for the first quarter of its fiscal 1991, which ended on Sept. 30, 1990.

Net sales for the first quarter were $14.3 million, compared to $14.2 million in the first quarter of fiscal 1990. Net earnings were $218,000, or 2 cents

per share, compared to $437,000, or 3 cents per share in the first quarter of this fiscal year.

''Demand for Telecom products remains strong, and several important new products are under evaluation, with several more about to be introduced, said Dan Rasdal, chairman and chief executive officer. ''Testing of the company's new Integrated Digital Services Terminal (IDST) by two large customers continues, and is going well.

Design work on several new Synchronization products for Telephone Companies is on schedule. These additional new products should be ready for customer evaluation during the second quarter of fiscal 1991.''

''Silicon General's Semiconductor business received significant follow-on contracts continuing work on programs from last year. In addition, a number of new business opportunities were identified which should lead to additional orders and shipments in the months and years ahead.

''Technical work to install advanced processes will lead to more new products later this year, including the company's first BiCMOS integrated circuits.''

''Financial condition remains strong due to tight control of spending and close attention to collections.''

Silicon General designs, manufactures and markets telecommunications system, data conversion products, linear bipolar integrated circuits and CMOS digital integrated circuits.

SCOTTSDALE, AZ (OCT. 24) BUSINESS WIRE - Go-Video (AMEX:VCR), the Arizona-based company that introduced the world's first dual-deck video cassette recorder, will be featured on ABC Television's 20/20 on Oct. 26.

The program, billed as ABC's ''news magazine,'' will highlight the company's efforts to bring to market the VCR-2, an innovative consumer electronics product.

The 10-minute segment on Go-Video is scheduled to air during the program on Friday, according to ABC program executives. The show airs at 9 p.m. MST.

A 20/20 production crew interviewed and filmed at Go-Video's headquarters in Scottsdale, Ariz., this past summer. The segment will air subject to network discretion.

Go-Video introduced its VCR-2 to consumers this summer. One of Popular Science magazine's 100 best new products of the year, the VCR-2 can play one tape while recording on another, duplicate tapes with incredible quality, edit from tape to tape, and record two different TV programs simultaneously. Other features include the exclusive HQ Copy circuitry, a 155-channel cable-ready tuner, multi-channel sound, an advanced remote control and on-screen programming.

For more information, contact Missy Lagomarsino at 602/998-3154.

#90297b0128 10/24/1990 ~Business Wire

LOS ANGELES (OCT. 24) BUSINESS WIRE - Price Stern Sloan Inc. (NASDAQ:PSSP) Wednesday reported net income of $76,000, or 2 cents per share, for the nine months ended Sept. 30, 1990, compared with a net loss of $9,101,000, or $2.41 per share, for the same period in 1989.

Sales for the first three quarters in 1990 were $27,062,000 compared with

$31,938,000 a year ago.

For the third quarter, PSS registered net income of $992,000, or 26 cents per share, compared with a net loss of $8,077,000, or $2.14 per share, in the third quarter of 1989. Sales for the third quarter were $10,934,000 compared with $14,004,000 for the corresponding prior year period.

The company attributes the sales reduction to the general slowdown of the economy and the loss of momentum with certain large accounts during the period the company was for sale.

The company reported that it has entered into purchase agreements and opened escrows for the sale of real estate in New York and its corporate headquarters in Los Angeles. These escrows are expected to close in November and December, respectively. All of the net proceeds of approximately $6,750,000 will be used to reduce debt.

Price Stern Sloan publishes and distributes children's books and related audio and video cassettes, cookbooks, humor and self-help books, calendars, puzzles and poster art, as well as the Questron electronic wand and books.

#90297b0134 10/24/1990 ~Business Wire

HOUSTON (OCT. 24) BUSINESS WIRE - Panhandle Eastern Corp. Wednesday reported a net loss of $13.5 million, or $0.15 a share, for the quarter ended Sept. 30, 1990, compared with third quarter 1989 net income of $0.3 million, or $0.01 per share.

The 1990 results include a benefit of $21.6 million after taxes, or $0.24 per

share, from the settlement of a 1985 Panhandle Eastern Pipe Line Co. (PEPL) general rate case.

A significant decrease in pipeline sales volumes, primarily for Texas Eastern Transmission Corp. (TETCO) and Trunkline Gas Co., also occurred this quarter. While market-area transportation service increased during the quarter, these increases did not offset the lower sales volumes. On a consolidated basis, the company's interstate gas transmission units had a 2 percent decrease in their market-area natural gas deliveries, compared to the same period last year.

The company's performance for the third quarter reflects increased competition and a changing mix of throughput on its pipelines. In the case of TETCO, this situation was the result of a number of factors, including the expiration of a low-cost gas purchase contract with a producer in late 1989 and the impact of arrangements that permit customers to transport third-party gas in lieu of purchasing system supply.

Net income for the first nine months was $33.2 million, or $0.37 a share. These figures compare with $28.3 million, or $0.42 per share, for the same period in 1989. The results for the first nine months of 1989 included Texas Eastern Corp.'s activity since its acquisition on April 27, 1989.

The average number of common stock shares outstanding rose to 88.5 million shares from 66.9 million shares, an increase of 32 percent over the first nine months of 1989. The primary cause of this increase was the shares issued in last year's acquisition of Texas Eastern.

Panhandle Eastern Corp. operates one of the nation's largest interstate natural gas pipeline systems, providing natural gas to the Midwest and Northeast markets.

PLAINFIELD, IND. (OCT. 24) BUSINESS WIRE - Directors of PSI Resources Inc. (NYSE:PIN), the holding company for PSI Energy Inc., Wednesday declared a quarterly dividend of 22 cents per share of common stock -- a 2 cents per share increase over last quarter.

Regular preferred stock dividends for PSI Energy were also approved.

The dividends will be paid Dec. 1 to shareholders of record as of Nov. 13.

''This is the first increase in our dividend since it was reinstated nearly two years ago,'' said J. Wayne Leonard, the company's chief financial officer. ''Before that, our dividend had been suspended for three years after the cancellation of our Marble Hill nuclear plant. Even with this increase, our payout ratio remains one of the lowest among U.S. electric companies.''

PSI Resources' capital expenditures over the next 10 years are expected to exceed $4 billion.

''To be in a position to attract the capital to serve our customers' needs and meet environmental requirements, it's important that we remain competitive with alternative investments,'' Leonard said. ''We continue to believe, however, that until key financial targets are met, a substantial share of earnings should continue to be reinvested in the business. A financially sound company can better serve the interests of both its customers and shareholders.''

The payout ratio is the percentage of earnings distributed to shareholders in the form of dividends.

#90297b0149 10/24/1990 ~Business Wire
MILPITAS, CALIF. (OCT. 24) BUSINESS WIRE - LSI Logic Corp. (NYSE:LSI)

Wednesday announced that it had concluded a licensing agreement with Sun Microsystems Inc. permitting LSI to sell worldwide the ASIC devices developed for the original SPARCstation 1 workstation.

The original ASIC chipset -- augmented by LSI Logic's L64801 integer unit, and an optional L64804 floating-point unit will be packaged with the ASICs and sold as the SparKIT-20 chipset.

In March 1990, LSI Logic introduced the SparKIT-25 (25 MHz, 18 MIPS) and SparKIT-40 (40 MHz, 29 MIPS) chipsets that would enable systems manufacturers to develop SPARC-compatible/a workstations.

The SparKIT-25 and SparKIT-40 families each consists of seven integrated circuits which can be used for workstations and SPARC-based servers to provide the data storage and computational needs of workstation networks. The new SparKIT-20 chipset runs at 20 MHz and provides 12.5 MIPs performance.

The SparKIT-20 consists of the L64821 memory management unit (MMU), the L64822 data buffer, the L64824 cache controller, the L64826 RAM controller (two are required), the L64825 video controller, the L64823 clock, L64853 DMA Controller, and the L64801 integer unit. The L64804 floating-point unit, developed by LSI Logic, is optional.

Gene Hill, vice president and general manager of the company's SPARC Division, said: ''This new product option provides a proven, SPARCstation 1-compatible solution for customers. It is available now in high volume, and is ideal for low-end, low-cost systems.''

In a simultaneous announcement, LSI Logic announced that 11 customers are designing products based on SparKIT chipsets. Production quantities of the SparKIT-20 are availble now and the SparKIT-25 will be available in quantity at the end of the fourth quarter.

The high-performance SparKIT-40, intended for use in compute-intensive engineering/scientific workstation applications, will be available in quantity by the first half of 1991.

LSI Logic Corp. is a leading supplier of high-performance semiconductors. The company is the world's premier manufacturer and marketer of HCMOS application-specific integrated circuits (ASICs) in gate array and cell-based technologies, with approximately 10,000 designs completed worldwide.

FREMONT, CA (OCT. 24) BUSINESS WIRE - Power Spectra Inc., (NASDAQ:PWSP) announced net profit for the third quarter ending Sept. 28, 1990 was $51,000 on revenues of $1.2 million.

For the nine months ended Sept. 28, 1990 a loss of $233,000 was incurred on revenues of $3.5 million.

Cash balances rose $269,000 to $1 million during the third quarter.

A search is being conducted for a chief executive officer to replace Donald C. Wright who resigned in September 1990. George W. O'Dair, who had been retained by the board in a consulting capacity earlier this year, is acting as general manager during this transition.

O'Dair has held senior management positions with several large companies, the most recent of which was executive vice president and chief financial officer of Varian Associates, a Palo Alto, Calif. electronics firm.

As reported earlier this year, several funding alternatives have been under discussion with the Boeing Company.

The company expects to reach agreement in the next several months on funding requirements for fixed capital and operating capital needs associated with the current development contract which concludes June 30, 1991.

It also expects to commence discussions soon with Boeing for a follow on development contract to become effective July 1, 1991 when the current contract concludes. They have targeted completion of these negotiations several months before expiration of the current contract.

In the meantime, Power Spectra employees continue to focus on achieving objectives on the Boeing contract as well as the $3.8 million development contract with the Air Force that was received earlier this year.

The 1990 shareholders meeting will be held on Nov. 8, 1990 at 9:00 a.m. at the Newark Fremont Hilton, 39900 Balentine Dr., Newark, CA 94560.

PLAINFIELD, IND. (OCT. 24) BUSINESS WIRE - PSI Resources' board of directors Wednesday adopted a 10-point Environmental Charter formally recognizing the company's obligation to do business in an environmentally responsible manner.

''We believe that we're the first U.S. electric utility to have an Environmental Charter endorsed at the highest level of its organization -- the board,'' Rogers said. ''Our charter says to our employees, customers and those we do business with that being a good environmental steward is a top priority in everything we do.''

To develop its charter, PSI Resources formed an environmental advisory council. Participants included Indiana leaders from state government, business, labor and the environmental movement.

''Their insight and guidance was a tremendous help in developing the charter '' Rogers noted. ''It formally recognizes several practices we already do and accurately reflects our corporate attitude on environmental issues. The advisory council's input will also be evident in our one-, three- and five-year environmental stewardship plans, now being finalized.''

Among other things, the charter pledges that PSI Resources and its subsidiaries will incorporate environmental considerations in business planning and make environmental responsibility and innovation a guideline for measuring employee performance. The charter also says that these companies will pursue methods to prevent pollution and conserve raw materials through recycling and promoting the efficient use of energy.

Anyone interested in receiving a copy of the company's Environmental Charter may request one by writing to: Environmental Charter, PSI Resources, 1000 E. Main St., Plainfield, Ind. 46168

NEWPORT BEACH, CALIF. (OCT. 24) BUSINESS WIRE - Downey Savings and Loan Association's (NYSE:DSL) board of directors Wednesday declared a 7 cents per share cash dividend payable on Nov. 26, 1990, to holders of record Nov. 5, 1990.

G.H. McQuarrie, chief executive officer of Downey Savings, in making the announcement reported that net earnings for the third quarter of 1990 amounted to $5.3 million, or 33 cents per share, as compared with a loss of $3,711,000, or 23 cents per share, for the same quarter in 1989.

For the first nine months of 1990, net earnings were $28,748,000, or $1.78 per share, up 25 percent from the $23,064,000, or $1.43 per share, recorded for the same period last year.

Turning to the announced results, McQuarrie said: ''Considering the unstable economic environment that we have had to operate in, we have continued to make noteworthy increases in operational income. Compared to the same quarter last year, net interest income before loan loss provisions increased 87 percent. For the first nine months of 1990, the comparable gain was 77 percent over 1989.''

McQuarrie attributed this positive indicator to a decline in cost of funds and an increase in loan and investment yields. McQuarrie pointed out that Downey's return on equity for 1990's first nine months was, on an annualized basis, over 17 percent and reflects the strong earnings potential of the company.

Loan volume for the current quarter was $100.4 million and $401.7 million for the first nine months compared with 1989 recordings of $97.5 million and $237.9 million, respectively. Currently, Downey's lending focus is on the production of adjustable-rate loans.

Downey Savings, with assets of $4 billion, has 49 offices throughout California.

SAN JOSE, CA (OCT. 24) BUSINESS WIRE - Business Bancorp, holding company of California Bank, N.A., announced net income of $106,000, (10 cents/share), for the third quarter of 1990 which ended on Sept. 30, 1990.

These results compare with net income of $221,000, (22 cents/share) for the third quarter of 1989. Average shares outstanding for the quarters ending Sept. 30, 1990 and 1989 were 1,089,842 and 1 million respectively.

For the nine months ended Sept. 30, 1990, Business Bancorp reported net income of $395,000, (36 cents/share) as compared with $582,000 (58 cents/share), for the like period in 1989, a decrease of $187,000, (17 cents/share). The decrease in net income is attributed to income taxes which increased from $1,200 for the nine months ended Sept. 30, 1989, to $228,000 for the nine months ended Sept. 30, 1990.

Average shares outstanding for the nine months ended Sept. 30, 1990 and 1989 were 1,089,842 and 1 million respectively.

Total assets at Sept. 30, 1990 were $59,749,000 as compared with $56,887,000 at Sept. 30, 1989. Total deposits were $53,712,000 as compared with $51,111,000 and net loans outstanding were $41,865,000 as compared with $34,025,000. Total shares outstanding at Sept. 30, 1990 and 1989 were 1,089,242 and 1 million respectively.

Business Bancorp is a bank holding company founded in 1982. California Business Bank, N.A., is a federally chartered commercial bank with one office in the downtown area of San Jose. The bank serves the needs of businesses and professionals in Santa Clara County.

Business Bancorp had approximately 650 shareholders at Dec. 31, 1989. The common stock of Business Bancorp is traded over-the-counter and listed on the National Association of Securities Dealers Automated Quotation System (''NASDAQ''). MONETT, MO. (OCT. 24) BUSINESS WIRE - Jack Henry & Associates Inc. (NASDAQ:JKHY) announced Wednesday that its board of directors, at the annual meeting of the board on Oct. 23, 1990, declared a quarterly cash dividend of 8 cents per share on its common stock, par value 1 cent per share, payable on Dec. 6, 1990, to stockholders of record of its common stock as of Nov. 6, 1990.

At Sept. 30, 1990, 3,528,553 shares of company common stock were outstanding.

The company also announced the hiring of two new employees. Terry W. Thompson joins the company as vice president - chief financial officer and William W. Caraway is the new director of international operations.

Thompson, a certified public accountant, has over 17 years of experience in the areas of accounting and finance. His career includes the public accounting sector and the private sector in both publicly held and privately held companies.

Most recently, he was controller with Penske Tank Inc. for three years. Previously, Thompson was with Iron Mountain Forge as vice president - finance for 2-1/2 years and was controller for Paul Mueller company, a publicly held company, for five years.

Caraway joins the company with over 19 years of experience in a variety of data processing positions. He comes to Jack Henry from Mellon Bank where he

served as vice president for two years. Prior to that he was with Florida Software in its computer operations for 2-1/2 years and with Home Savings and Loan for three years as manager of data processing.

Jack Henry & Associates markets, installs and supports integrated data processing software systems for banks and financial institutions. The company's software systems have been installed at approximately 600 banks throughout the United States.

DAYTON, OH (OCT. 24) BUSINESS WIRE - DPL Inc. Wednesday reported third-quarter earnings of 55 cents per share, an increase over the 45 cents per share earned in the like period last year.

Earnings for the first nine months of 1990 were $1.77 per share, as compared with $1.78 per share in 1989.

These economic conditions and hot weather also resulted in a new all-time record peak electricity usage by our customers of 2,643,000 kilowatts on Sept. 6. The previous record was 2,604,000 kilowatts set on July 9.

Earnings per share for the nine months ended Sept. 30 were just slightly lower than the like period a year ago despite milder weather, a lower level of sales to other utilities and an increase in the number of common shares outstanding.

SAN JOSE, CA (OCT. 24) BUSINESS WIRE - ARIX Corp. (NASDAQ:ARIX) Wednesday announced results for its first quarter of fiscal 1991.

For the three months ended Sept. 30, 1990, revenues were $9,601,000, compared with $18,304,000 in the first quarter of fiscal 1990. The $9,601,000 in revenues is comprised of net sales of $6,661,000 and license fees and other income of $2,940,000. The company posted a net loss of $1,645,000, or (21 cents) per share, compared with first quarter fiscal 1990 net income of $43,000, or 1 cent per share.

The company attributes the loss principally to substantially reduced sales to its largest customer, Unisys Corp., which had previously announced it would reduce its orders for calendar 1990.

ARIX Corp., through ARIX Computer Corp. and its subsidiaries, manufactures and markets UNIX-based symmetric multi-processing minicomputers for applications in multi-user environments.

ARIX computers are marketed worldwide indirectly through VARs, OEMs, systems integrators and distributors and directly to select large customers. The company has an installed base of over 6,000 systems.

#90297b0227 10/24/1990 ~Business Wire

CUPERTINO, CA (OCT. 24) BUSINESS WIRE - The Motorola Computer Group (MCG) Wednesday announced plans to provide wireless local area network (LAN) capability for the company's complete line of complex and reduced instruction set computers (CISC and RISC) by the first quarter of 1991.

The wireless LANs will be faster (15 megabits per second) than many standard wired LANs.

MCG's announcement follows one made Tuesday by Motorola's Radio Telephone Systems Group (RTSG), which outlined the corporation's plans to market this technology commercially by the first quarter of 1991.

While specifications of the new radio frequency (RF) LAN technology were not disclosed, Motorola executives confirmed that the product will enable users to connect desktop PCs, workstations and X terminals without cables, while providing comparable high-speed performance and higher security than is available on many wired LANs.

Wireless LANs, or radio frequency LANs, transmit data between computer systems via radio signals rather than special, static cables. Cabling can be very expensive to install and is inflexible if the physical locations of the networked systems have to be changed. Because of this, wireless LANs are particulary well-suited to sites where cabling does not currently exist or computers are frequently moved.

Motorola is one of the world's leading providers of electronic equipment, systems, components and services for worldwide markets. Products include two-way radios, pages, cellular telephone systems, semiconductors, defense and aerospace electronics, automotive and industrial electronic equipment, computers, data communications and information processing and handling equipment.

Motorola was a winner of the first annual Malcolm Baldrige National Quality Award in 1988, in recognition of its superior company-wide quality management process.

SAN DIEGO (OCT. 24) BUSINESS WIRE - PS Group Inc. (NYSE:PSG) reported a net loss of $1,698,000 (31 cents per share) for the third quarter of 1990 and net income of $1,698,000 (30 cents per share) for the first nine months of 1990 versus net income of $4,807,000 (73 cents per share) for 1989's third quarter and $7,748,000 ($1.16 per share) for 1989's first nine months.

Losses from the company's waste recycling subsidiary, Recontek Inc., increased significantly in the third quarter of 1990 with the hiring and training of personnel in anticipation of the opening in early November of its Illinois processing plant. Recontek's financial results were consolidated with those of PS Group effective Oct. 1, 1989.

Third-quarter 1990 results also include a one-time additional income tax expense of $1.2 million (22 cents per share) as a result of a statutory reduction in Investment Tax Credits after 1989 tax losses were carried back to prior tax years. Included in 1990 totals are the results of oil and gas operations that in 1989 were treated as discontinued and therefore had no impact on 1989 results.

Third-quarter 1990 results for fuel distribution and oil production were favorably impacted by higher petroleum prices. However, these gains were offset by weaker demand for travel distribution.

Results for the first nine months of 1990 include a one-time net gain of $1.2 million (21 cents per share) from the sale of the wholesale tour business of USTravel Systems Inc., the travel distribution subsidiary of PS Group.

Results for the third quarter and first nine months of 1989 were favorably impacted by a net gain of $3.8 million (57 cents per share) and $4.9 million (73 cents per share), respectively, from gains on sales of marketable securities.

LOS ANGELES (OCT. 24) BUSINESS WIRE - Los Angeles-based direct marketing firm Club America Inc. (OTC), announced Wednesday one of the lowest residential and commerical telephone rates in the country at its first day-long telephone training seminar convened at its South Bay Conference Center in Torrance, Calif.

Key elements in the Club America Communication Network's telephone program included: no up-front hookup cost, six second billing (saves clients 5-7 percent per call), calls from any location in the world, discounts from 15-20 percent or more per call, instant credit on misdialed calls, 800 service (no

set up fee), calls billed only when receiving party answers (voice activation) free independent phony analysis for monthly billings in excess of $10,000 and complete fiber optics network using the nation's three largest telephone systems.

Club America Independent representatives also learned they will receive 5 percent of the gross monthly telephone bills of their clients' 800 number, credit card and domestic/international long distance calling.

A special, additional benefit for non-profit organizations was also announced at Wednesday's landmark Torrance meeting. Starting immediately, charities and other non-profits hooking up on the Club America Communications Network will find themselves exempt from the 3 percent federal tax on long distance calls.

Further representative telephone training programs will be convened over the next several weeks at other Club America Conference Centers located in San Diego, Pasadena, Los Angeles, Woodland Hills, San Francisco area (Novato), Sacramento, Carmel, Irvine, Riverside and San Bernardino, Calif.; Phoenix; Dallas; Denver; Seattle; and Portland, Ore.

Club America Inc., founded in 1985, is a direct marketing organization that provides Americans with substantial savings on numerous services and products. The company also offers a unique business opportunity. Club America's Communication Network is one of the many consumer-oriented services currently available through the Club America Program.

BOSTON (OCT. 24) BUSINESS WIRE - Original Italian Pasta Products Inc. (OTC:ORIG), Chelsea, manufacturer of fresh pasta and sauces sold under the Trio's tradename, and Schreiber Foods Inc. of Green Bay, Wis., Wednesday announced that they had reached agreement in principle for Schreiber to acquire Original Italian for $2.40 share (fully diluted).

The proposed acquisition will be effected by a merger of Original Italian with a wholly owned subsidiary of Schreiber to be formed for that purpose.

The transaction is subject to successful completion of due diligence by Schreiber, negotiation and execution of definitive agreements, and final approval by the respective boards of directors of Schreiber and Original Italian and by the stockholders of Original Italian.

The parties expect to enter definitive agreements by early December, and Original Italian will hold a meeting of stockholders for approval of the transaction as soon thereafter as possible. The parties anticipate completing the transaction within 120 days.

Further announcements will be made as the transaction progresses.

WASHINGTON (OCT. 24) BUSINESS WIRE - The United Brotherhood of Carpenters and Joiners of America said Wednesday it appreciates the support of the AFL-CIO as

expressed in the following statement from Robert McGlotten, director of legislation of the AFL-CIO, regarding the Oct. 23 Senate vote on the Packwood Amendment to the Interior Appropriations bill which would have considered convening the Endangered Species Committee:

''Although the AFL-CIO is disappointed in the outcome of the vote on the Packwood amendment, organized labor sees this as an important step in the fight for the jobs of our brothers and sisters in the timber industry. We are hearing from union members all over the country who are concerned about the jobs of timber workers and their families.

''At a time of national economic distress, it would be a tragic mistake to enact a policy which, at a minimum, throws 50,000 men and women out of work, undermines the economic foundation of hundreds of Pacific Northwest communities and threatens the stability of the national housing market. The AFL-CIO will work with its affiliates to continue sensitizing the Congress to the economic and social devastation that will result if a fair and equitable balance between environmental needs and the interests of workers is not achieved.''

SUNNYVALE, Calif. (OCT. 23) BUSINESS WIRE - ZyMOS Corp. (NASDAQ/NMS:ZMOS) reported Wednesday, revenues of $13,081,000 for the third quarter ended Sept. 30, 1990, a new high for the company and an increase of 30 percent over revenues of $10,055,000 for the third quarter of 1989.

Net income for the third quarter of 1990 was $144,000 compared with a loss of $500,000 for the like period of 1989. The results for the third quarter of 1990 included the operations for August and September of Renaissance GRX which was acquired on July 30, 1990.

Revenues for the nine-month period ended Sept. 30, 1990 was $37,155,000, up 41 percent from the nine-month period ended Sept. 30, 1989. Net income for the nine-month period ended Sept. 30, 1990 was $425,000 compared with a loss of $636,000 for the nine-month period ended Sept. 30, 1989.

Commenting on the quarterly results, ZyMOS President and Chief Executive Officer David A. Handorf said: ''In the third quarter we saw continued improvements in revenues and profits. The acquisition of Renaissance GRX was a key activity in the quarter and we are pleased that the integration of the two companies has gone smoothly and already contributed to our improved operating results in the third quarter.

''The combined graphics expertise resulting form the acquisition will improve our overall performance in the graphics marketplace especially in 1991 when new product development efforts yield product shipments.''

#90297b0310 10/24/1990 ~Business Wire

REDWOOD SHORES, Calif. (OCT. 24) BUSINESS WIRE - Oracle Corporation Wednesday announced support for the Multi-Client Server (MCS) option for Version 6.0 of the ORACLE relational database management system (RDBMS).

Initially available on UNIX systems, this software option provides enhanced support for on-line transaction processing (OLTP) applications with very large user configurations of 250 or more users -- while maintaining the same high level of transaction processing performance.

The MCS option modifies ORACLE's client/server architecture to allow multiple client processes to attach to one or more server processes. This MCS architecture substitutes ORACLE's current architecture in which there is a one-to-one correlation between each client process and server process. As a result, the MCS option reduces process switching overhead and ensures that ORACLE-based systems maintain high throughput as customers add users. This, in turn, allows the ORACLE kernel to support much larger user configurations.

''For example, we have found that with MCS on Sun Microsystems computers, we can sustain high-transaction performance for three times the number of users on the system as before,'' said Jim Sha, vice president of Oracle's UNIX Products Division. ''We believe this new technology will support even larger configurations in the future.''

Exploiting Symmetric Multi-Processor Functionality

The Multi-Client Server option allows customers to operate in a multi-threaded environment, in which any particular server process can handle multiple client process requests, while fully exploiting the power of symmetric multi-processor (SMP) architectures. With the MCS option, ORACLE can maintain for much larger system configurations the same industry-leading performance on SMP computers recorded in recent audited benchmarks by Codd and Date, Inc. Codd and Date has benchmarked ORACLE's performance at:

42 transactions per second for PCs 208 transactions per second for minicomputers 416 transactions per second for mainframes

Support for Transaction Processing Monitors

The MCS option also supports Oracle's integration with UNIX transaction

processing monitors, such as AT&T's System/T and Independence Technologies, Inc.'s/iTi. Transaction processing monitor software coordinates transactions between client processes and a variety of system resources such as databases, printing and expert systems. Because transaction monitors view several networked computers as a system, these products are particularly valuable in distributed OLTP environments. The MCS option will also support X/Open's XA standard for distributed transaction management within the next 12 months.

Oracle Corporation, headquartered in Redwood Shores, Calif., is the largest supplier of DBMS software and the third largest software and services company in the world.

Oracle develops and markets an integrated line of software products for database management, applications development, decision support and office automation, as well as families of financial and manufacturing applications packages. All Oracle products are available on PCs, minicomputers and mainframes, and ORACLE is the first and only database to run on supercomputers.

The company offers its products, along with related consulting, education and support services, in 92 countries around the world. Oracle is a publicly held corporation whose shares are traded on NASDAQ/NMS with ticker symbol ORCL.

#90297b0610 10/24/1990 ~Business Wire
LOS ANGELES (OCT. 24) BUSINESS WIRE - Pacific Enterprises (NYSE:PET) Wednesday reported net income of $60 million for the third quarter, a 22

percent increase over net income of $49 million for the same quarter a year ago.

Earnings per share of common stock were 79 cents, up 14 percent over earnings of 69 cents per share, for the third quarter of 1989. The rise in net income outpaced earnings per share primarily because of an 8 percent increase in the weighted average number of common shares outstanding compared with a year ago.

For the nine months ended Sept. 30, 1990, the company realized net income of $174 million, or $2.31 per share, excluding $275 million ($3.94 per share) in after-tax charges to earnings of the company's oil and gas and retailing businesses taken in the second quarter.

Pacific Enterprises reported a net loss for the nine months of $101 million, or $1.63 per share, including the second quarter charges. For the same nine-month period in 1989, the company had net income of $169 million, or $2.49 per share.

Pacific Enterprises, with headquarters in Los Angeles, owns Southern California Gas Co., the nation's largest natural gas distribution utility. Its Los Angeles-based Thrifty Corp. is a drug and sporting goods chain retailer with more than 1,000 stores. Pacific Enterprises Oil Co., with headquarters in Dallas, is a leading independent oil and gas company with operations concentrated onshore in the United States.

Southern California Gas reported operating income after taxes of $59 million for the third quarter of 1990, compared with $57 million, a year ago.

According to Ukropina, the utility's improved performance was due primarily to a 6.4 percent increase in its rate base, the investment in facilities on which the gas company earns its return. The increase was partially offset by lower earnings from sales and transportation provided to large-volume customers.

Third quarter operating income after taxes for Thrifty totaled $5 million, down from $11 million, for the same period in 1989.

#90297b0615 10/24/1990 ~Business Wire

SALT LAKE CITY (OCT. 24) BUSINESS WIRE - ALPNET Inc. (NASDAQ:AILP; BSE:APN) Wednesday announced financial results for the third quarter and nine months ended Sept. 30, 1990.

Total revenues for the quarter were $6.2 million with a net loss of $187,000,

or $0.017 per share compared with revenues of $5.8 million and net income of $24,000, or $0.003 per share for the third quarter of 1989.

Total revenues for the nine months ended Sept. 30, 1990, were $17.2 million with a net loss of $492,000, or 5 cents per share compared with revenues of $17.4 million with a net loss of $366,000, or 4 cents per share for the first nine months of 1989.

The $187,000 net loss for the third quarter of 1990 and the $492,000 loss for the nine months ended Sept. 30, 1990, include $44,000 and $140,000 respectively of unusual interest expense which arises in connection with the terms of the company's acquisition agreements in the U.K. and in Germany.

Pursuant to the terms of these agreements, the company issued additional ALPNET Inc. shares and was required to register these shares with the Securities and Exchange Commission. The agreements also provide that the company will pay interest on the value of the additional shares issued until the shares are registered.

The company filed the registration statement for these shares with the SEC in May 1990 but the registration was not effective until Aug. 10, 1990. The company incurred interest expense during this registration period and accordingly the third quarter and nine month financial statements include an unusual amount of interest expense which is not related to ongoing operations.

ALPNET is a worldwide language services network with 22 offices in 9 countries. ALPNET provides its clients with a complete offering of language services including translation, language training, interpreting, multilingual desk-top publishing and printing services.

ALPNET is publicly traded on the NASDAQ stock exchange under the trading symbol AILP and Boston Stock Exchange under the trading symbol APN.

#90297b0616 10/24/1990 ~Business Wire

NEW YORK (OCT. 24) BUSINESS WIRE - REGENCY CRUISES INC. (NASDAQ/NMS Symbol:SHIP) Wednesday released financial results for the company's third quarter ended Sept. 30, 1990.

Revenues for the three months ended Sept. 30, 1990, were $46,612,000 as compared to $44,127,000 reported for the same three month period last year.

Income from operations was $7,921,000 vs. $5,824,000 recorded during the previous year's third quarter.

Net income for the period was $5,519,000, or $.24 per share, as compared to $4,593,000, or $.20 per share, for the third quarter last year.

In total, the financial performance for the three months ended Sept. 30, 1990, was the highest to date making it the most profitable quarter in the company's history.

Revenues for the nine months ended Sept. 30, 1990, were $98,311,000 as compared to $98,286,000 reported for the nine month period last year.

The company's income from operations was $3,882,000 vs. $5,883,000 for the nine month period ended Sept. 30, 1989. Net income for the current nine month period was $3,810,000, or $.16 per share, vs. $5,462,000, or $.23 per share, for the same nine month period last year.

Shareholders' equity per share increased from $1.61 at Sept. 30, 1989, to $1.71 at Sept. 30, 1990.

William Schanz, chairman and chief executive officer of REGENCY CRUISES INC., commented: ''The success of the third quarter was largely attributable to our Alaska program. This was our fifth season in Alaska and, again, we positioned two ships there, the Regent Sea and the Regent Sun, which represented the third largest passenger capacity cruising the 49th state.

#90297b0618 10/24/1990 ~Business Wire

PHOENIX (OCT. 24) BUSINESS WIRE - John W. Teets, chairman, president and chief executive officer, Greyhound Dial Corp. (NYSE:G), Wednesday announced revenues, income and earnings per share for the third quarter and nine months ended Sept. 30, 1990.

In the third quarter of 1990, revenues were $875,928,000, compared to $906,200,000 in the same period last year.

Net income and income from continuing operations was $31,990,000, or 80 cents per share, compared to $30,185,000, or 75 cents per share, in the 1989 quarter.

The services segment (excluding the sale of a small subsidiary, which netted a one-time after-tax gain of $3.7 million, or 9 cents per share) recorded a 7.5 percent increase in operating income. Travelers Express, the nation's leader

in the issuance of money orders, followed by Dobbs companies and Greyhound Lines of Canada, showed the largest improvements.

The financial group's net income was up 12.3 percent over the 1989 quarter due to higher yielding new business; the effect of the refinancing of certain older, high cost, fixed-rate debt in 1989; slightly lower levels of non-earning assets; and lower legal costs.

A sharp decline in the quarter in revenue and income from the transportation manufacturing and service parts group was due to the one-time effect of a new model start-up problem, causing severe production delays with a major transit bus order. In addition, softness in intercity coach sales due primarily to the uncertainties surrounding the bus line strike and bankruptcy impacted the group.

Revenues for the 1990 nine-month period were $2,653,750,000, compared to $2,673,449,000 recorded in 1989.

Income from continuing operations was $88,040,000, or $2.19 per share, up from the $80,669,000, or $2.05 per share in 1989.

There was a nine-month net loss of $11,960,000, or 32 cents per share, in 1990 compared to a net profit of $80,669,000, or $2.05 per share, in 1989. This was due to the $100,000,000 (after tax), or $2.51 per share, loss provision attributable to a discontinued operation taken in the 1990 second quarter as a result of the Greyhound Bus Lines bankruptcy. Greyhound Dial sold the bus lines in 1987.

#90297b0619 10/24/1990 ~Business Wire

SAN DIEGO (OCT. 24) BUSINESS WIRE - Cohu Inc. (ASE:COH) Wednesday reported that sales for the first nine months of 1990 totalled $31,178,000 with net income of $2,064,000, or $1.04 per share.

This compares with year-earlier sales of $26,323,000 with net income of $1,981,000, or $1.00 per share.

Third-quarter sales totalled $11,255,000 with net income of $675,000, or 34 cents per share, compared with year-earlier sales of $9,389,000 with net income of $628,000, or 32 cents per share.

Nine months order input totalled $34,033,000 compared with year-earlier orders of $26,954,000. Backlog at the end of the third quarter was $16,730,000, which compares with year-earlier backlog of $11,641,000 and year-end 1989

backlog of $13,875,000.

James W. Barnes, president and chief executive officer, said that all operations were profitable for the third quarter and for the nine-month period. The test and detection equipment business segment showed significant gains, for the quarter and year-to-date, in sales, income, orders received and backlog, mostly due to improved results relative to semiconductor test/handling equipment.

For the nine-month period, the television equipment business segment showed gains in sales and orders. Increased orders for microwave equipment and television camera equipment fell short of the increased sales in this segment, resulting in a small decrease in the business segment backlog. Earnings for the nine-month period, while lagging the improvement in sales, were slightly higher than those of the prior year.

Quote activity remains high in all of the company's operations. This activity, along with the high backlog level, places the company in a favorable position for improvements in sales and profits.

Cohu directors, at a meeting on Tuesday, Oct. 23, authorized a quarterly cash dividend of 8 cents per share payable Jan. 25, 1991, to shareholders of record on Dec. 7, 1990. This will be the company's 53rd consecutive cash dividend.

#90297b0621 10/24/1990 ~Business Wire

CARLSBAD, Calif. (OCT. 24) BUSINESS WIRE - International Totalizator Systems Inc. (NASDAQ/NMS:ITSI) is now anticipating a loss to be reported in the third quarter, ended Sept. 30.

In general, the loss will be attributed to low revenues combined with increased contract costs and initial production variances on the airline ticketing printer. The company expects to release the final numbers for the quarter by Nov. 2.

Initially, the company expected unfavorable comparisons between the third and fourth quarters of 1990 and 1989. The quarters ended Sept. 30, 1989, and Dec. 31, 1989, were the two best quarters ITS has ever recorded.

Importantly, Chief Financial Officer Ken Hoitt said: ''The company has not cut back on its commitment to meet the needs of its current and future customers and, as significantly, to stay ahead of the competition.

''Research and development expenditures, just for the nine months ending Sept.

30, 1990, exceed by 20 percent the full-year record R&D expenditures of $1.8 million made in 1989. Additionally, ITS continues to add to the sales staff as well as invest in its Just-In-Time/Total Quality Control program.

''ITS generates revenue from contract sales, the very nature of which dictates that there will be fluctuation from one quarter and often one year to the next. One measure of stability in this kind of environment is backlog, which at the end of September is $20 million.

''A significant portion of this backlog will not be filled until 1991. Therefore, we expect to see continued weakness, resulting in a loss, in our fourth quarter as well.''

ITS is an international leader in customized ticketing systems for computerized parimutuel wagering, lotteries and travel industry products. McKinnie & Associates, a wholly owned subsidiary, markets a proprietary management information system for parimutuel wagering, sporting and entertainment facilities.

HELSINKI, FINLAND (OCT. 24) BUSINESS WIRE - Apple Computer Inc. and Oy Mercantile Ab have Wednesday signed an agreement to transfer the operations of Oy Mercantile Computers Ab to a new company, Apple Computer Oy, effective April 3, 1991.

The new company becomes Apple's 13th European subsidiary. The event marks a significant step in the strengthening of Apple's presence in Finland, and reflects the growing maturity of the personal computer industry in the Nordic countries. The primary role of the subsidiary will be to enhance sales and marketing support to Apple's local resellers.

Oy Mercantile Computers Ab was founded in early 1985. The company has been fully devoted to importing and marketing of Apple Computer Inc. products in Finland. Timo Tiihonen, general manager of Oy Mercantile Computers Ab since its creation, will be general manager of the new Apple subsidiary.

''Our cooperation with Mercantile has been excellent. Apple sales have increased from $2 million to $50 million during the past 5 years in Finland. Given the growing business, all parties concerned have agreed that this is the right time to further develop the position of Apple in Finland. With Apple's international resources we intend to strengthen the service and customer support through resellers and other partners,'' said Soren Olsson, president of Apple Europe.

''As a global company our aim is to be present all over the world. By establishing this new subsidiary, Apple is demonstrating its long term commitment to the Finnish market place,'' he added.

''We have a large number of important customers here in Finland, in government education and business, including some key multinational companies. Since the number of Apple users is increasing at such a fast pace, it is a great benefit to have the resources of our mother company in order to improve the quality of customer support,'' said Timo Tiihonen.

The staff of Oy Mercantile Computers Ab will continue in the new company.

SEATTLE (OCT. 24) BUSINESS WIRE - Washington Energy Co. reported a drop in net income for fiscal 1990, while setting new growth records at its utility and oil and gas subsidiaries, chairman and chief executive officer James A. Thorpe announced Wednesday.

Net income was $20.7 million, a 13 percent decrease from last year.

Earnings per share in 1990 were $1.17, a 23 percent decline from 1989 earnings of $1.52 a share.

Even though the company's principal subsidiary, Washington Natural Gas, added a record number of customers -- 26,000 or 8 percent more than a year ago, mild weather hurt the year's results, noted Thorpe.

Utility gas sales for the year were $293 million, compared with $311 million in 1989. Weather was 3.5 percent warmer than a year ago and 6 percent warmer than normal.

Thorpe also reported that the August out-of-court settlement of a case involving former holders of preferred stock resulted in a charge that reduced earnings by 17 cents a share.

Another record for Washington Energy was accomplished through Thermal Exploration Inc., the company's oil and gas exploration and development subsidiary.

Thermal Exploration's oil and gas reserves increased 96 percent, to 16.4 million barrels of oil equivalent. Eighty percent of the reserves are in natural gas.

Revenues of $19.5 million for Thermal Exploration represent a 22 percent increase over 1989.

Washington Energy is a diversified energy company with interests in natural gas distribution, oil and gas exploration and production, biowaste technology, coal property holdings for future development, proposed development of rail transportation of coal, and the marketing of energy and conservation products and services.

The Washington Energy Co. trading symbol is ''WECO'' on the NASDAQ National Market System, and is quoted as ''WashEngy'' or ''Wash Energy Co.'' in other sources.

LOUISVILLE, KY. (OCT. 24) BUSINESS WIRE - Steel Technologies Inc. (NASDAQ/NMS:STTX) Wednesday reported results for the fourth quarter and fiscal year ended Sept. 30, 1990.

For the quarter, net income increased 125 percent to $1,785,000 compared with $795,000 in the fourth quarter of 1989. Earnings amounted to 22 cents per

share, up 120 percent from 10 cents per share a year ago.

For the fiscal year ended Sept. 30, 1990, net income increased 13 percent to $6,663,000, or 83 cents per share, compared with $5,906,000, or 74 cents per share, in fiscal 1989.

Sales for the fourth quarter increased 33 percent to a quarterly record of $38,380,000 compared with $28,893,000 in the comparable quarter a year ago. For the fiscal year, sales increased 15 percent to a new annual record of $140,836,000 compared with $122,628,000 in 1989.

Merwin J. Ray, chairman and chief executive officer, commented on the results:

''The company's strong performance in the fourth quarter caps a year of solid achievement for Steel Technologies. During 1990, we set records in sales and shipments and increased earnings in spite of weak conditions in our market. Our commitment to quality, service and technology continue to result in expanded market share and increased participation with existing and new customers.''

The company also announced today that it has finalized definitive agreements to establish a joint venture corporation called Processing Technology Inc. with LTV Steel Company Inc. and Mitsui Steel Development Co. Inc. The joint venture initially will operate two facilities managed by Steel Technologies which will provide steel storage and processing of mill material using the latest technology in metal processing including slitting and cutting to length.

As an intermediate steel processor, Steel Technologies processes flat rolled steel to specified thickness, width, temper and finish requirements for automotive, appliance, communications, electrical, machinery and office equipment industries, among others. The company's common stock is traded in the NASDAQ National Market System under the symbol STTX.

LA PUENTE, CALIF. (OCT. 24) BUSINESS WIRE - Southwest Water Co. (NASDAQ:SWWC) Wednesday announced increased revenues and earnings for the nine months ended Sept. 30, 1990.

Revenues for the third quarter of 1990 were $11.98 million and net income was $967,000, or 42 cents per primary share and 41 cents per fully diluted share.

This compares with revenues of $11,032,000 and net income of $1,314,000, or 58 cents per primary share and 56 cents per fully diluted share, for the same

period a year ago.

For the nine months ended Sept. 30, 1990, revenues rose 7 percent to $30,454,000 and net income increased 12 percent to $2,181,000, or 95 cents per primary share and 92 cents per fully diluted share.

This compares with revenues of $28,405,000 and net income of $1,954,000, or 87 cents per primary share and 83 cents per fully diluted share, for the same nine-month period in 1989. Results for the nine months ended Sept. 30, 1990, include an after-tax gain of $160,000, or 7 cents per fully diluted share, from the sale of real estate in the first quarter of 1990.

Commenting on the company's third-quarter performance, Anton C. Garnier, president, said: ''Our Southern California water utility faced a number of financial challenges, most notably a reduction in water revenues stemming from voluntary conservation on the part of our customers and unseasonably mild weather in July and August.

Southwest Water is the parent company of Suburban Water Systems (water service in parts of Los Angeles and Orange counties); New Mexico Utilities Inc. (water supply and sewage disposal services northwest of Albuquerque); ECO Resources Inc., Line-One Inc. and SOCI Inc. (operational and maintenance services for water supply and wastewater treatment facilities in Texas, Mississippi and California).

#90297b0659 10/24/1990 ~Business Wire

LOS ANGELES (OCT. 24) BUSINESS WIRE - Times Mirror (NYSE/PSE:TMC) Wednesday announced that revenues for the third quarter of 1990 rose 2.4 percent, to $895 million, from $873.9 million, in the comparable period of 1989.

Net income totalled $41.9 million, or 33 cents per share, compared with $70.1 million, or 54 cents per share, in last year's third quarter.

Revenues for the first three quarters of 1990 increased 3.7 percent, to $2.68 billion, from $2.58 billion, for the same period a year ago, while net income declined to $134.9 million, or $1.05 per share, from $223.9 million, or $1.73 per share. Included in the 1989 results is an 11-cent gain from the sales of timberlands recorded in the second quarter.

While revenues were up at The Times over the third quarter of 1989, revenues

declined at all other newspapers. Total Newspaper Publishing revenues for the quarter remained about even with the previous year, while operating profit declined 61.2 percent.

Daily circulation averages for all Times Mirror newspapers for the six-month period ended Sept. 30, as reported to the Audit Bureau of Circulations, showed a 3.9 percent increase over 1989, including an 8 percent increase for The Times. Total Sunday circulation rose 4.2 percent, including a 7.5 percent increase for The Times.

The company's legal, medical and flight information publishing businesses continued to spur growth in the Book, Magazine and Other Publishing segment, despite lower results from magazine operations due to declining advertising volume. Revenues for this group advanced 7.8 percent and operating profit rose 4.2 percent, over the third quarter of 1989.

Cable Television revenues grew 9.7 percent and operating profit was up 5.5 percent, primarily due to increased subscriber levels for basic cable services. Pay-service subscriber levels continued to taper off during the quarter.

Broadcast Television revenues rose 7.4 percent, compared with the third quarter of 1989. Operating profit declined 26.3 percent due to the impact of higher programming and other operating costs incurred to enhance the competitive position of the company's four stations in their local markets.

Third quarter results were also affected by one-time charges incurred at Newsday which reduced earnings per share by 3 cents. These charges reflect severance payments related to a voluntary early retirement program and lease costs.

The effective tax rate jumped to 40.8 percent in the quarter from 38.4 percent for the same period last year.

Interest expense in the third quarter was $18.8 million, up 29.6 percent, from the previous year, primarily as a result of higher debt levels incurred to finance construction of new facilities -- most notably for The Times, Newsday and Baltimore Sun -- and lower amounts of interest capitalized as these new facilities come on line.

Times Mirror, a Los Angeles-based media and information company, publishes the Los Angeles Times, Newsday and New York Newsday, the Baltimore Sun newspapers, The Hartford Courant, The Morning Call, The (Stamford) Advocate and Greenwich Time. The company also has interests in broadcast and cable television, and book, magazine and other publishing.

#90297b0660 10/24/1990 ~Business Wire

SAN ANTONIO, TEXAS (OCT. 24) BUSINESS WIRE - Kinetic Concepts, Inc. (NASDAQ: KNCI) Wednesday reported net earnings of $.8 million or $.02 per share for the three-months ended September 30, 1990 compared with $6.0 million or $.12 per share for the third quarter of 1989.

Third quarter results were affected by restructuring charges of $6.5 million or $.08 per share.

Net earnings from KCI's core business before restructuring charges and excluding Medirec operating results and acquisition financing costs for the quarter were $5.7 million or $.11 per share in the third quarter of 1990.

KCI's restructuring includes an overall reduction in workforce of approximately 10%, the anticipated sale of Simmons Healthcare and the write-down of certain other assets. The program is expected to remove $5-6 million in annual operating expenses from the company's cost base beginning in 1991.

Total revenue in the third quarter of 1990, including Medirec was $59.5 million, a 33% increase over $44.6 million in the third quarter of 1989. Revenue from KCI's core specialty bed business, was $48.2 million, up 8% from the third quarter one year ago. Medirec, which was acquired on July 2, 1990, contributed $11.3 million in revenue during the third quarter. Growth continued to be strong in the air suspension bed category, but Kinetic Therapy bed revenue declined versus the prior year. Average prices for air suspension beds remained firm at year ago levels but overall average rental prices declined slightly due primarily to a lower mix of higher-priced Kinetic Therapy bed rentals. Total operating income before restructuring charges was $10.6 million, up 12% from the second quarter of 1990, but down 3% compared with the same period last year.

For the nine-month period ended September 30, 1990, net earnings were $12.6 million or $.24 per share, compared with $18.9 million or $.38 per share in the prior year nine-month period. Earnings per share for the nine months differ from the sum of the quarters due to rounding differences. Total revenue in the first nine months of 1990 was $154.1 million, up 19% from $130.0 million in the prior period.

Kinetic Concepts is a leading manufacturer and distributor of specialized therapeutic beds and a major provider of rental medical equipment to select markets worldwide.

WAYNE, N.J. (OCT. 24) BUSINESS WIRE - POLYMERIC RESOURCES CORP. (TRADED OVER-THE-COUNTER-SHEETS) Wednesday announced net sales and net income for the fiscal year ended June 30, 1990.

For the year ended June 30, 1990, net sales decreased 28% to $17,720,355 from $22,727,540 in fiscal 1989. Management noted the decrease in net sales was due primarily to the Company's decision to reduce its low margin sourced product sales reflecting increasingly unfavorable pricing. Income (before cumulative effect of accounting change reflected in the Company's 1989 financial statements) increased 50% to $401,354, or $3.91 per share, in the current fiscal year from $267,650, or $2.57 per share, in fiscal 1989. Net income decreased slightly to $401,354, or $3.91 per share, from $420,185, or $4.03 per share, in the prior year.

POLYMERIC RESOURCES CORP. is engaged in the business of compounding, upgrading and selling engineering thermoplastics and related equipment.

#90297b0678 10/24/1990 ~Business Wire

CLIFTON, N.J. (OCT. 24) BUSINESS WIRE - Valley National Bancorp (NASDAQ:VNBP) Wednesday reported net income of $6.5 million or $0.52 per share for the quarter ended September 30, 1990.

For the first nine months of this year, Valley earned $23.3 million or $1.83 per share. Net income for the comparable three and nine month periods of 1989 was $8.7 million or $0.69 per share, and $25.4 million or $2.00 per share respectively.

Gerald H. Lipkin, Chairman of the Board and Chief Executive Officer, stated that Valley's recent results were primarily attributable to growth in net interest income and non-interest revenues, offset by a decision to increase the provision for possible loan losses as a cautious response to regional economic conditions which continue to impact the Company's loan portfolio.

He noted that after the increased provision for possible loan losses, Valley's annualized return on average assets was 1.69% and return on average equity was 17.28% for the first nine months of this year.

''During the third quarter, management and the Board came to the decision that a higher level of loan loss reserves was prudent, as economic uncertainties continued and the quarter showed an increase in non-performing assets,'' Mr. Lipkin said. He added that Valley's non-performing assets and net charge-offs remain at levels well below the industry average.

The provision for possible loan losses was $3.8 million in the third quarter of 1990, compared with $925,000 in the second quarter of this year and $375,000 in the third quarter of 1989. At September 30, 1990, the allowance for loan losses totalled $12.7 million, or 0.93% of loans, net of unearned income, and 68% of non-performing assets. Non-performing assets amounted to $18.7 million, or 1.37% of loans, net of unearned income, at September 30, 1990, up from $7.8 million or 0.57% of net loans at June 30, 1990.

Valley National Bancorp is a regional bank holding company which provides a wide range of traditional commercial banking services through its principal subsidiary, Valley National Bank. Established in 1927, the Bank operates 27 full-service offices located throughout the northeastern New Jersey counties of Passaic, Bergen, Hudson, Essex and Morris.

MONROVIA, CALIF. (OCT. 24) BUSINESS WIRE - STAAR Surgical Co. stated that it had been relisted on the National Association of Securities Dealers Automated Quotation Service (NASDAQ) effective Wednesday, Oct. 24.

Due to the company's improved financial status, STAAR was found to be qualified for relisting after being delisted by NASDAQ in June of 1989.

In addition, the company announced it had taken initial steps for listing on the Philadelphia and Boston exchanges, and as a result, the company will effect a reverse 1-for-2 stock split effective also on Thursday, Nov. 1.

''Current and proposed listing requirements for the various exchanges have a minimum per-share value requirement,'' stated LaMar F. Laster, chief operating officer and chairman. ''In order to meet and maintain all exchange requirements so as to assure our continued listing, we have instituted a 1-for-2 reverse stock split. This split will enhance our per-share value and make for the possibility of our trading on a realistic earnings per share basis during 1991.''

The STAAR relisting on NASDAQ came a full two quarters earlier than what had previously been perceived, a STAAR spokesman added.

''The new management team at STAAR has now delivered on every aspect of its rejuvenation plan outlined in the 1989 letter to the shareholders,'' stated William Huddleston, vice president and chief financial officer. ''Products have been transformed from disapproved to approvable by the FDA Ophthalmic Panel, litigation has been settled, the financial footing of the company is now sound and finally, our investors who have suffered most through this ordeal have the prospects for a legitimate trading market once more. This has truly been a remarkable year.''

STAAR, a publicly traded company founded in 1982, develops, manufactures and markets products for small-incision surgery, primarily for use in cataract procedures.

#90297b0685 10/24/1990 ~Business Wire

SAN DIEGO (OCT. 24) BUSINESS WIRE - Molecular Biosystems Inc. (NYSE: MB) announced it has been granted broad U.S. and European patents covering unique methods for synthesizing and labelling oligonucleotide probes.

This non-radioactive technology forms the basis of the Synthetic Nucleic Acid Probe (SNAP) system currently being developed and commercialized by Syngene Inc., an MBI subsidiary company.

The SNAP method covered in these patents, filed in 1983, enables Syngene to efficiently produce pure synthetic nucleic acid probes on a commercial scale

without any radioactive detection system.

"The use of non-radioactive synthetic probes has become the method of choice for a number of probe companies," said Vincent A. Frank, president of MBI and Syngene. "This patent, the first of its kind to be allowed in the U.S., gives Syngene a very early priority date and the basis for vigorous enforcement of our intellectual property position."

The direct, non-radioactive labelling of synthetic nucleic acid probes was pioneered by Syngene scientists who recognized, early on, the advantages of an all-synthetic approach.

Prior to the invention of the SNAP labelling method by Dr. Jerry L. Ruth, Syngene vice president of research, DNA probes were made by cloning methods, commonly labelled with radioactive isotopes, and were typically costly to produce and difficult to make consistently in commercial quantities.

"The publication of the Ruth patent is a real milestone in the commercialization of genetic probe technology, one of which we at Syngene are proud," added Frank. "The SNAP labelling system is at the heart of our current line of clinical and research products and will ultimately spawn a very broad family of kits and reagents."

To date, several SNAP products have been launched by Syngene, including two FDA-cleared kits to identify Mycobacterium species that cause serious respiratory diseases.

Syngene Inc., located in San Diego, is a leading developer of direct, non-radioactively labelled genetic probe products. Additionally, Molecular Biosystems Inc. is a leading biomedical firm developing proprietary medical products that diagnose human disease, including Albunex, an injectable contrast agent for use in ultrasound imaging.

#90297b0686 10/24/1990 ~Business Wire

CHANDLER, ARIZ. (OCT. 24) BUSINESS WIRE - Inter-Tel Inc. (OTC:INTL) Wednesday announced operating results for the third quarter and the nine months ended Sept. 30, 1990.

Strong orders and shipments to Inter-Tel's OEM and general distribution customers resulted in total net sales for the quarter of $17.7 million, up 33 percent from net sales of $13.3 million for the third quarter of 1989.

Net sales during the nine months ended Sept. 30, 1990, were $52.5 million or 22 percent greater than the net sales of $43 million for the same period last

year. The 1989 figures were adversely affected by production delays by Inter-Tel's principal subcontractor which were offset by strong shipments during the fourth quarter last year.

The 1990 nine months' shipments represent the highest level in Inter-Tel's history. They include approximately $1.5 million of sales in the United Kingdom where Inter-Tel has established a new subsidiary. Sales through Inter-Tel's direct branches remain about level with the preceding year.

Net income for the third quarter and the nine months ended Sept. 30, 1990, was $328,000 and $1,144,000 respectively, or 4 cents a share for the third quarter and 14 cents a share for the nine months of 1990. This compares with net losses of $491,000, or 6 cents a share, and $391,000, or 5 cents a share, for the comparable periods of 1989. The 1989 results were reduced by a $360,000 provision for employee severance pay and the lower shipments mentioned above.

Steven G. Mihaylo, chairman and chief executive officer of Inter-Tel, stated that the import duty dumping penalties imposed on certain Inter-Tel assemblies produced in Korea continue to impact Inter-Tel's earnings.

Such penalties increased costs of sales by $295,000 in the third quarter and by $964,000 in the nine months ended Sept. 30, 1990. This is equivalent to a reduction in income per share of 2 cents and 7 cents per share, respectively. Inter-Tel is in the process of moving production of such assemblies to a subcontractor in the Philippines. Initial shipments are expected to begin in the fourth quarter with the move scheduled to be completed in 1991.

Inter-Tel is one of the leading designers, producers and marketers of business telecommunications software and systems in the United States and abroad. Inter-Tel produces digital electronic key, hybrid and PABX systems which are totally software updateable with features such as least cost routing, voice mail, automated attendant and uniform call distribution.

BELLEVUE, WASH. (OTC. 24) BUSINESS WIRE - PENWEST's (NASDAQ:PENW) board of directors yesterday authorized an $8 million capital expenditure to increase by 30 percent its finishing capacity at Penford Products Co. in Cedar Rapids, Iowa.

Penford, a producer of specialty chemical starch products, is the company's principal operating unit.

''This key expansion brings to $36 million our capital investment at Penford in the last three years,'' said Tod R. Hamachek, chief executive officer. ''The investment reflects a continuing strong demand for the company's specialty starch products, a high level of customer satisfaction from existing customers and the development of new business.''

PENWEST develops, manufactures and markets specialty carbohydrate and synthetic polymer chemicals for papermaking. The company also produces and markets specialty food ingredients and agricultural nutrition supplements.

#90297b0691 10/24/1990 ~Business Wire

PASADENA, CALIF. (OCT. 24) BUSINESS WIRE - Conversion Industries Inc. (ASE:CVD) Wednesday announced that it has acquired 42 percent of Western Energy Management Inc. (''Western''), a leading energy conservation company based in California.

Conversion paid 222,222 shares of its common stock and performed certain professional services in exchange for 1.25 million shares of Western's common stock and rights to purchase an additional 1.75 million shares at $3 per share.

Western designs, engineers and installs total energy conservation programs primarily to municipalities and large corporate users of power. The company has engineered and installed conservation programs in over 20 municipalities. Western has entered into a series of agreements to acquire the ownership of its principal subcontractor for energy conservation projects -- Clarke & Rush.

This transaction, valued at approximately $3 million, is expected to close in about three weeks. On a combined basis Western and Clarke & Rush had revenues of approximately $5,831,000, and pre-tax income of approximately $1,221,000, for the year ended June 30, 1990. Western believes that 1991 revenues and earnings will be substantially higher based on existing backlog and contracts under negotiation.

The board of directors of Conversion has approved management's plan to distribute approximately 500,000 shares of Western common stock and 1.4 million rights to purchase additional shares of Western common stock at $3 per share to Conversion's shareholders. The distribution will be on the basis of one share of common stock of Western for every five shares of Conversion common stock and one Western common stock right for each two shares of Conversion.

The proposed distribution is subject to Western registering its common stock and common stock rights with the Securities and Exchange Commission. Western has advised the company that it expects a registration statement to be filed by mid-November.

The company plans to list both the common stock and the rights on a national exchange. Western is in the process of arranging a standby underwriting commitment for the excercise up to 1.25 million warrants at $3 to the extent not exercised by Conversion shareholders.

It is presently anticipated that the record date for the proposed distribution of Western common stock and common stock purchase rights to the Conversion shareholders will be established in early December, with the distribution to be completed before year-end.

Conversion Industries is an integrated independent power producer.

STAMFORD, CONN. (OCT. 24) BIZWIRE - Frank J. Kugler Jr., chairman and chief executive officer of Union Trust Co., Wednesday announced that the company had retained Goldman, Sachs & Co. to sell its credit card portfolio.

Kugler indicated that ''With the termination of The Bank of New York merger, Union Trust Co. is now free to make this important strategic move. Over the past several years, our credit card business has been profitable to the company.

''However, the consolidation trend in the credit card industry which has been accelerating over the last two years has put pressure on credit card operations the size of Union Trust's.

''The resulting competition has necessitated a larger commitment of marketing dollars in order to maintain market share. Given that this trend is expected to continue, we think that now is the time to maximize the premium that should be paid for a mature credit card portfolio of our size and quality.''

Kugler further noted that both the proceeds of the sale and the credit card marketing dollars will be redeployed to place greater emphasis on core business opportunities that will enable the bank to further expand market share throughout Connecticut.

The bank started issuing MasterCards in 1969 and Visa cards in 1977. Union

Trust was a member of the Eastern States' Bankcard Association from 1969 to 1988. The current card base of 123,000 cards representing approximately $110 million in outstanding balances is presently being serviced by First Data Resources.

Northeast Bancorp Inc. is the parent company of Union Trust Co., NBI Mortgage Investment Corp., UT Finance Ltd. and Fairfield Properties Inc. With $3.3 billion in assets and 70 offices throughout the state, Union Trust is the third-largest commercial bank in Connecticut.

BARTLESVILLE, OKLA. (OCT. 24) BUSINESS WIRE - For the fourth consecutive year Phillips Petroleum Co. (NYSE:P) will replace all the hydrocarbon reserves it produced according to Wayne Allen, senior vice president, exploration and production.

Based on data available Sept. 1, total worldwide reserves on a barrel-of-oil equivalent basis (BOE) will be up slightly from 1989 levels when reserves totaled 1.9 billion barrels-of-oil equivalent. In 1989, the company replaced 124 percent of its worldwide hydrocarbon production.

Extensions and discoveries are responsible for slightly over half of the reserves replacement while enhanced recovery programs also contributed to the replacement success. Revisions of previous estimates accounted for most of the remainder of the reserves replacement.

Estimates of proved reserves are based upon reservoir information, technology, and economics available at the time the estimates are made. Adjustments are made to reflect changes in economic conditions, results of drilling and production, and the technical re-evaluation of reservoirs.

POUGHKEEPSIE, NY (OCT. 24) BUSINESS WIRE - Poughkeepsie Savings Bank, FSB (NASDAQ:PKPS) Wednesday reported a net loss of $12.4 million, or $3.49 per share, for the third quarter of 1990 compared with a net loss of $18.3 million or $5.22 per share, in the 1989 third quarter. For the nine months ended September 30, 1990, the bank recorded a net loss of $31.0 million, or $8.70 per share, versus a net loss of $16.2 million, or $4.61 per share, for the comparable 1989 period.

Christoph H. Schmidt, Chairman of the Board and Chief Executive Officer, said that the quarterly and year-to-date results in 1990 were affected primarily by provisions for possible loan losses of $10.8 million and $31.9 million, respectively. Noting that the level of nonperforming assets declined slightly during the quarter, Mr. Schmidt stated, ''We believe these reserve additions anticipate further weakness in the commercial and residential real estate markets for the balance of the year and into 1991.

Poughkeepsie Savings Bank is a community banking institution whose principal market is the Mid-Hudson Valley region of New York, where it operates 11 branch offices. Its Market Street Mortgage subsidiary has loan production offices in Florida, Georgia, Virginia and Pennsylvania.

NEW YORK (OCT. 24) BUSINESS WIRE - Loral Corp. (NYSE:LOR) announced Wednesday

that it has completed the acquisition of Ford Aerospace Corp. for $715 million.

With the acquisition of Ford Aerospace, the combined companies, on an annualized basis, (excluding BDM) will have a revenue base approaching $3 billion, a backlog of approximately $3.8 billion and more than 26,000 employees worldwide.

Ford Aerospace was purchased by a new corporation, Loral Aerospace Holdings Inc. The new company was formed by Loral and the merchant banking partnerships of Shearson Lehman. Each contributed $147.5 million of equity to the acquisition, with the balance financed by bank borrowings that are non-recourse to Loral. Loral will operate the company and owns 51.5 percent, with an option to acqire up to 70 percent.

''The marriage of Loral and Ford Aerospace joins complementary programs, technologies, markets and customers and brings new dimensions to our business '' said Bernard L. Schwartz, Loral's chairman and chief executive officer.

''Additionally, Ford Aerospace will contribute to earnings immediately,'' he said.

Concurrently, Ford Aerospace's BDM operations were purchased by the Carlyle Group for $130 million, $105 million in cash and $25 million in notes, part of which are conditioned on future events.

Loral also announced this week it had signed Memoranda of Understanding with three major European companies to sell 49 percent of the commerical communication and weather satellite business acquired as part of the Ford Aerospace transaction for $182 million.

Loral Aerospace Holdings Inc., with 51 percent ownership of the business, will have management responsibility for the enterprise which will be known as Space Systems/Loral. A first quarter 1991 closing is expected.

Loral intends to run the combined Loral and Ford Aerospace, including Space Systems/Loral, as an integrated operation.

Ford Aerospace, a major high-technology defense and space systems company, earned $127 million of operating income on revenue of approximately $1.9 billion in 1989. BDM accounted for $356 million in revenues of Ford Aerospace's 1989 results.

Loral Corp. is a high-technology company that concentrates in defense electronics and space communications.

BASKING RIDGE, N.J. (OCT. 24) BUSINESS WIRE - AT&T Wednesday announced it has signed two contracts to provide long-distance service to more than 9,000 hotel room phones at the Walt Disney World Resort Complex in Florida and Disneyland Hotel in California and to 900 public pay phones within the Walt Disney World Resort Complex.

The contracts are for two years and include renewal options. Under these agreements, AT&T Long Distance Service also will be provided to all Walt Disney World Resorts currently under construction and will be made available to the nine independently owned hotels within the Walt Disney World Resort Complex.

''People come from all over the world to experience the resorts and attractions at Walt Disney World and Disneyland, and they expect the best from every service we provide, including long-distance service,'' said Dick Nunis, President of Walt Disney Attractions. ''That's why we selected AT&T.''

Walt Disney World Resort Hotels with AT&T long-distance service include: Caribbean Beach Resort, Contemporary Resort, Fort Wilderness Resort and Campground, Yacht and Beach Club. Three other hotels are under construction. In California, AT&T will provide long-distance service to the Disneyland Hotel and Queen Mary Hotel.

JASPER, AL (OCT. 24) BUSINESS WIRE - First Federal of Alabama, F.S.B. (NASDAQ/NMS:FFAL) Wednesday announced record results for its first quarter ended Sept. 30, 1990.

Net income for the first quarter was $238,908, or 27 cents per share, compared with $179,679, or 21 cents per share, in the same period last year.

Commenting on the results, Al H. Simmons, chairman and president, said, ''We are very proud to report the improved results for First Federal. The increase in net income for the quarter is primarily the result of improved interest margins and lower operating expenses stemming from the cost-cutting actions taken by management to improve profitability.

''Net interest income for the first quarter was $1,180,243 compared with

$859,108 in the first quarter last year. First Federal remains in a sound financial condition with total stockholders' equity of $12.4 million,'' Simmons concluded.

MONTREAL, QUEBEC; ARLINGTON, TEXAS (OCT. 24) BUSINESS WIRE - Techbyte International Inc. (VSE: TB) with offices in Montreal, Quebec and Arlington, Texas, Wednesday announced that its wholly-owned subsidiary, Onyx Informatique Inc. of Quebec, has been awarded a series of three software development contracts by Hydro-Quebec, the Quebec-based electric power company.

The contracts total over $240,000, according to Ron Moore, Vice President and General Manager of Techbyte's Canadian operations.

The contracts are for the production of computer-based training software for use on PC-compatible computers, according to Moore, who stated that, ''We are very pleased that Onyx has been awarded this new contract. Obviously, Hydro-Quebec has been satisfied with Onyx' services on earlier contracts.''

Hydro-Quebec, with headquarters in Montreal, produces almost all of the electricity consumed in Quebec, serving more than 2.9 million customers. The power network is one of the largest in North America, covering 1.5 million

square miles, and is one of the few power generating systems in the world that is exclusively hydro-based.

Hydro-Quebec also sells electricity to other power companies in Canada and the Northeastern United States, supplying more than 30 billion kilowatt hours annually outside of Quebec. With assets of over 30 billion dollars, and over 24,000 employees, Hydro-Quebec ranks second in size among Canadian Companies.

Techbyte International Inc., a federally incorporated company, was established in 1984 and has its head office in Longueuil, Quebec. In November, 1989, Techbyte International (USA) Inc., a wholly-owned subsidiary of Techbyte International of Quebec, was established in the United States, and is based in Arlington.

Onyx Informatique Inc. of Montreal, a wholly-owned subsidiary of Techbyte International, specializes in producing computer-based training materials for business and commercial customers.

#90297b0731 10/24/1990 ~Business Wire

BOSTON (OCT. 24) BUSINESS WIRE - Grove Bank for Savings (NASDAQ: GROV)

announced Wednesday that the board of directors has decided to postpone the proposed formation of a holding company for the bank which was approved by the bank's stockholders on June 7, 1990. The only steps remaining to be completed are necessary state and federal regulatory approvals.

Thomas R. Venables, president and chief executive officer, stated: "The regional economy has changed significantly since we first decided to form the holding company late last year, as has the regulatory environment for the banking industry generally.

"While we continue to believe that a holding company structure would enhance stockholder value and facilitate acquisitions of other financial institutions, the current climate is an extremely difficult one in which to achieve those benefits.

"Accordingly, the board of directors has determined that it is in the bank's best interest to defer, for the time being, the final steps necessary to accomplish the holding company formation. It is important to note that this is by no means a final decision. Management and the board will continue to assess the economic and regulatory trends to determine whether it would be appropriate to complete the holding company formation at some future date."

Grove Bank's total assets at Sept. 30, 1990 were $209.8 million and stockholder's equity was $26.1 million or 12.44 percent of assets. Book value per share was $17.74 on Sept. 30, 1990.

Grove Bank, a Massachusetts-chartered stock savings bank, became public in August, 1986. The bank's deposits are insured by the Federal Deposit Insurance Corp. (FDIC) and the Deposit Insurance Fund of Massachusetts (DIFM).

CLEVELAND (OCT. 24) BUSINESS WIRE - Eaton Corp.'s board of directors Wednesday declared a regular quarterly dividend of 55 cents per common share on the company's outstanding stock, payable on Nov. 23 to shareholders of record on Nov. 5.

Eaton has paid dividends on common shares annually since 1923.

With 42,000 employees in 20 countries, Eaton Corp. is a manufacturer of highly engineered products serving automotive, industrial, commercial and defense markets. Principal products include truck transmissions and axles, engine components, electrical equipment and controls.

The company's sales in 1989 were $3.7 billion, with net income of $225 million

or $6.00 per share of common stock. For the nine months ending Sept. 30, 1990, Eaton's net income was $143.1 million, or $3.99 per share, on sales of $2.764 billion.

#90297b0742 10/24/1990 ~Business Wire

HOUSTON (OCT. 24) BUSINESS WIRE - Union Texas Petroleum Holdings Inc. (NYSE:UTH) Wednesday reported $9 million in net income, resulting in a loss of 3 cents per common share, for the third quarter of 1990, compared to $21 million, or 10 cents per share, of net income for the same period a year ago.

The decrease was attributed primarily to a higher effective tax rate, due to increased production in the U.K. North Sea and the favorable resolution of certain tax issues in the prior year, and lower U.S. natural gas prices.

The company's results for the third quarter of 1990 also were affected by higher operating expenses for safety and maintenance work in the North Sea, which required a shutdown of production for eight days, and higher volume-related expenses in Indonesia.

These items more than offset increased North Sea oil and Indonesian liquefied natural gas (LNG) volumes and improved worldwide crude oil prices.

For the first nine months of 1990, the company had $56 million, or 24 cents per share, in net income, compared to $156 million, or $1.44 per share, in 1989's corresponding period. The company's performance in 1989's first nine months benefited from the business interruption insurance settlement concerning the Piper incident in the North Sea and its related impact on the effective tax rate.

As a result of the settlement, Union Texas recorded $58.6 million of net income in the second quarter of 1989 for payments to be received through 1990 in addition to business interruption insurance proceeds that had been accrued monthly since the incident in July 1988.

The independent oil and gas producer's results for the first nine months of 1990 also were affected by lower prices for ethylene and U.S. natural gas, partially offset by higher North Sea oil volumes, improved Indonesian LNG volumes and prices, and increased U.S. oil prices and natural gas volumes.

One of the nation's largest independent producers, Houston-based Union Texas Petroleum Holdings Inc. explores for and produces oil and gas in the United States and overseas and has petrochemicals and natural gas processing interests.

PORT CHESTER, N.Y. (OCT. 24) BUSINESS WIRE - Financial results continue to set new asset, deposit and net income records in 1990 at Village Financial Services Ltd. (NASDAQ: VIFS).

Edmund C. Grainger Jr., chairman of the board and chief executive officer of Village Financial, said net income for the third quarter of 1990, which ended Sept. 30, was $982,000, up 70 percent from $577,000 for the comparable 1989 period.

For the first nine months of 1990, the chairman reported net income of $2,952,000, up 60 percent from $1,847,000 for the same nine month period last year.

''Earnings per share for the 1990 third quarter were 42 cents'', Grainger said. ''For the first nine months of 1990, earnings were $1.27 per share. Book value per share at September 30 was $19.58.''

Per share data does not apply to periods prior to Dec. 4, 1989 when Village Savings Bank converted from mutual to stock form became a wholly owned subsidiary of Village Financial Services Ltd., and changed its name to Village Bank.

Overall financial results for the first nine months of 1990 at Village Financial include earnings generated from the investment of $21.3 million in capital received from the public offering and conversion last year.

Total assets were $526.2 million at Sept. 30, up 35 percent from $390.4 million at Dec. 31, 1989. Deposits increased 14 percent to $369.4 million at Sept. 30 of this year compared to $324.2 million at Dec. 31 of last year. Securities sold under agreements to repurchase increased $77.7 million to $90.2 million at Sept. 30 of this year from $12.5 million at Dec. 31, 1989.

Stockholders' equity grew to $45.5 million at Sept. 30, an increase of $2.9 million from $42.6 million at Dec. 31, 1989. Stockholders' equity at both dates includes the net proceeds of $21.3 million from the sale of 2,325,000 shares of Village Financial common stock on Dec. 4, 1989.

Village Financial and Village Bank, conducts business from their administrative center in Port Chester, (Westchester County), New York, and nine full-service banking centers, eight of which are in Westchester County and one in the Riverdale section of the Bronx. Deposits of the bank are

insured up to the applicable limits by the Bank Insurance Fund of the FDIC.

SEYMOUR, IN (OCT. 24) BUSINESS WIRE - Home Federal Savings Bank (NASDAQ:HOMF) reported a record first quarter net income of $757,000, or 81 cents per share for its first quarter ended Sept. 30. 1990; a 38 percent increase over the 1989 first quarter net income of $549,000, or 60 cents per share.

Home Federal Chairman John K. Keach Sr., attributed the bank's significant earnings increase to increased revenues and economies of scale made possible by the recent acquisition of the former Fidelity Federal Savings and Loan Association of Seymour.

Keach also cited continued improvement in the bank's net interest income and Home Federal's continuing emphasis on operating expense reduction as factors in the bank's record first quarter performance.

The first quarter earnings included $284,000 in loan loss provision, which represents an increase of $141,000; compared to $43,000 for the same period in 1989.

Net interest income after provision for loan losses increased 37 percent to $2,859,000, compared to $2,086,000, during the same period in 1989.

Total deposits increased 44 percent to $439,896,000 on Sept. 30, 1990, from $305,554,000 on Sept. 30, 1989.

Based on Sept. 30, 1990, book value of $22.59 per share, compared to 20.63 per share the previous year, Home Federal stock is trading at 40 percent of book value. The stock price at Sept. 30, 1990, was $9.00 per share.

Home Federal is an FDIC insured savings bank founded in 1908, currently operating 14 full service offices in southeastern Indiana, with total assets of $516 million as of Sept. 30, 1990.

LEXINGTON, MA (OCT. 24) BUSINESS WIRE - Lexington Savings Bank (NASDAQ:LEXB) Wednesday announced its third quarter results.

For the three months ended Sept. 30, 1990, Lexington Savings Bank reported a net loss of $1,388,000, or 60 cents per share compared to net income of $312,000, or 14 cents per share for the third quarter of 1989. For the third quarter, the bank provided $775,000 as a provision for possible loan losses and wrote-down the carrying value of other real estate owned by $168,000 due to a deteriorating real estate market in Massachusetts. Operating results for the third quarter included $235,000 in expenses associated with Lexington Savings Bank's pending merger with Waltham Savings Bank.

For the nine months ended Sept. 30, 1990, Lexington Savings Bank reported a net loss of $1,204,000, or 52 cents per share compared to net income of $389,000, or 17 cents per share in 1989. In light of an increase in nonperforming loans and the deteriorated condition of the Massachusetts real estate market, results for 1990 include $1,825,000 as a provision for possible loan losses compared to the $1,010,000 provided for the same period in 1989. Write-downs of other real estate owned amounted to $425,000 in 1990 versus $315,000 in 1989 and current year merger related expenses amounted to $443,000.

Net interest income for the nine months ended Sept. 30, 1990 was $5,118,000 versus $5,405,000 for the comparable period in 1989. The decline is attributed to a decrease in the level of loans and an increased level of nonperforming loans. At Sept. 30, 1990, nonperforming loans amounted to $10.8 million compared to $5.3 million at Sept. 30, 1989 and $10.8 million at June 30, 1990. For the quarter ended Sept. 30, 1990, net interest income was $1,719,000 versus $1,630,000 in 1989.

Other operating income, excluding write-downs of other real estate owned, for the nine months ended Sept. 30, 1990 was $559,000 compared with $595,000 reported in 1989. The decline in income is attributed to a decreased level of loan originations and subsequent sales of loans in the secondary market.

For the nine months ended Sept. 30, 1990 operating expenses were $4,161,000 versus $3,791,000 reported for 1989. The increase in costs is attributed to expenses related to other real estate owned and professional fees paid related

to the bank's previously announced merger with Waltham Savings Bank.

Total assets at Sept. 30, 1990 were $210.8 million versus $222.6 million at Dec. 31, 1989. As of Sept. 30, 1990 total loans amounted to $154.9 million and total deposits were $174.2 million compared with $170.0 million and $184.6 million at Dec. 31, 1989, respectively. Total nonperforming assets amounted to $13.8 million and represented 6.6 percent of total assets at Sept. 30, 1990. The comparable amounts at Dec. 31, 1989 were $11.1 million and 5.0 percent, respectively. Book value per share at Sept. 30, 1990 was $14.39 versus $15.03 per share at Dec. 31, 1989.

Lexington Savings Bank is an FDIC/DIFM insured, full service financial institution servicing the suburban Boston metropolitan area.

CHICAGO (OCT. 24) BUSINESS WIRE - Andersen Consulting announced fiscal year 1990 worldwide revenues of $1.88 billion, a 30 percent increase from fiscal 1989 revenues of $1.44 billion.

Andersen Consulting's fiscal year ended Aug. 31.

George T. Shaheen, managing partner and chief executive officer of the Chicago-based information technology consulting organization, said, ''The marketplace is adopting what Andersen Consulting has embraced for years -- that technology is critical to a company's success.''

The announcement was made at Andersen Consulting's annual worldwide partners meeting in San Francisco last week, held in conjunction with the annual partners meeting of the Arthur Andersen Worldwide Organization.

In discussing the organization's performance, Shaheen said the 30 percent increase was consistent with annual increases from previous fiscal years. He said Andersen Consulting's revenues have more than doubled since fiscal 1987 and are 10 times the size of fiscal 1980 revenues.

Shaheen attributed growth to strong demand for Andersen Consulting's service lines - integration services (which includes computer systems integration and systems management), strategic services and change management services.

''It is significant that all our service lines grew despite current economic uncertainty,'' Shaheen said. He added that growth has been shared across Andersen Consulting's worldwide regions - the Americas, Europe/Africa/Middle East and Asia Pacific.

Other growth indicators included climbing numbers of professionals - from 3,000 in 1980, to 10,000 in 1987 and to more than 20,000 in 1990. ''Few competitors can match this growing force of professionals - either in terms of quality or simply in sheer numbers,'' he said.

Andersen Consulting's worldwide client base has access to more than 20,000 highly trained professionals serving clients through 157 offices in 45 countries. Andersen Consulting is a business unit of the Arthur Andersen Worldwide Organization.

CORAL GABLES, FLA. (OCT. 24) BUSINESS WIRE - The Wackenhut Corp. (NYSE:WAK) has closed on $25 million in senior unsecured notes, at an interest rate of 10.2 percent.

According to the Chairman of the Board and Chief Executive Officer of the corporation, George R. Wackenhut, the proceeds of the notes will be used to reduce the corporation's present bank debt. The loan agreement, completed on Oct. 23, was arranged by Dillon, Read and Co. of New York and was placed with two insurance companies.

The notes are due Sept. 30, 2000, and are subject to principal payments of $5 million per year, beginning Sept. 30, 1996.

The Wackenhut Corp. is one of the world's largest providers of security and investigative services and has expanded in the past few years to the management and operation of jails, prisons, correctional centers and other government facilities.

According to Wackenhut, the corporation plans to continue the focused diversification of its service offerings to business, industry and government clients.

Founded in 1954 by its present chairman of the board, The Wackenhut Corp. now operates in over 125 U.S. locations and in over 40 countries on six continents.

NEW YORK (OCT. 23) BUSINESS WIRE - Loral Corp. (NYSE:LOR) reported that its net income for the quarter ended Sept. 30, 1990 rose to $20.9 million, compared with the $19.8 million recorded in the same time period last year.

Primary earnings per share for the quarter were 83 cents, up from the 79 cents earned in the comparable period last year.

Sales for the quarter were $357 million compared with the $296 million in the second quarter last year. Bookings were $318 million, a decrease from the $654 million booked in the comparable period last year which had included a $325 million booking to equip Turkisk F-16s with Loral's ALQ-178 electronic countermeasures system.

Results of the Ford Aerospace Corp., whose acquisition was completed earlier Wednesday, are not included in the quarter.

''Bookings, sales and income were all on target with our expectations. We continue to be on track for the year, not counting the additional contribution Ford Aerospace Corporation will make to our earnings in the second half,'' said Bernard L. Schwartz, chairman and chief executive officer.

Loral won two significant training programs during the quarter. In July, Loral won a next generation program with the U.S. Air Force to develop, operate and support aircrew training systems for the Special Operations Forces.

Loral booked $44 million of the initial $71.5 million contract in the current quarter; the balance will be booked in the second half. The company expects the total value to exceed $1.5 billion over 15 years. The program, which Loral believes is the most comprehensive and complex training and mission rehearsal effort ever undertaken, will include Loral-developed weapon system trainers, mission rehearsal devices, computer-based instruction, other course material and the conduct of all training.

In laser-based training, Loral received a $51.5 million production contract for an advanced air and ground engagement system known as AGES II, for the U.S. Army. AGES II is a MILES-based state-of-the-art simulation system that will train air and ground forces with infrared laser ranging and the high-fidelity replication of aircraft vulnerability.

Also in July, Loral won a $92.5 million contract to provide sonar systems and fire control electronics to be used aboard Israel's Dolphin-class submarines. The company booked initial funding of $3 million in the quarter and expects to book the balance, $89.5 million,
in the second half of this fiscal year. This is the second international sonar program the company has won in the last year.

Earlier today, the company completed its acquisition of Ford Aerospace Corp. for $715 million. Simultaneously Ford's BDM operations were sold to the

Carlyle Group for $105 million in cash and $25 million in notes, part of which are conditioned on future events.

Earlier this week, Loral announced Memoranda of Understanding to sell 49 percent of Space Systems/Loral, the commercial communication and weather satellite business it acquired as part of Ford Aerospace, to three major European companies for $182 million.

Loral expects that the combined resources of the partners in research and development, marketing and production will open up significant new international business opportunites in this burgeoning marketplace. Definitive agreements are expected by year end.

Loral intends to run the combined Loral and Ford Aerospace, including Space Systems/Loral, as an integrated operation.

For the six months, Loral's net income was $38.7 million, or $1.54 per share, up from the $36.4 million from continuing operations, or $1.44 per share, earned a year ago. Bookings for the first half were $568 million, compared wtih $813 million and sales were $675 million, compared with $528 million. Ending backlog was $2.0 billion, essentially unchanged from the prior year.

Loral Corp. is a high technology company serving the defense electronics and space communications markets.

ROSEMONT, IL (OCT. 24) BUSINESS WIRE - The Middleby Corp. (AMEX: MBY), a manufacturer of foodservice equipment, Wednesday reported that sales for the third quarter ended Sept. 29, increased 10 percent over the prior year's 13-week period.

However, because the earlier year only includes results from 11 weeks of operations which were acquired in 1989, sales on a comparable basis were essentially flat and reflect the continuing softness of the restaurant and food service industries.

Sales for the three months ended Sept. 29, were $26,436,000 compared to $23,937,000 in the same 1989 quarter. The prior year quarter is the first which includes for most of the quarter results of the Foodservice Equipment Group of Hussmann Corp. which was acquired on July 14, 1989. Net earnings for the period amounted to a loss of $465,000, or $0.06 per share, compared to a loss of $47,000, or $0.01 per share, a year earlier.

The Middleby Corp. (AMEX: MBY) designs, develops, manufactures and markets a broad line of equipment used for the preparation, cooking, refrigeration, serving and storage of food in commercial and institutional kitchens and restaurants throughout the world.

An industry leader in high-speed cooking ovens, the company expanded its product lines in 1989 through the acquisition of four companies with well-known industry brand names -- Southbend (heavy-duty cooking equipment), Toastmaster (cooking and warming equipment), Victory (refrigeration) and Seco (holding and serving systems). The expansion moved Middleby from being a single line manufacturer with sales of $35 million to a diversified manufacturer with annualized sales of over $100 million.

#90297b0773 10/24/1990 ~Business Wire

OCONOMOWOC, WS (OCT. 24) BUSINESS WIRE - Stokely USA Inc. confirmed a decline in sales and earnings for the second quarter ended Sept. 30.

Net earnings were $1,463,000 (18 cents per share) compared to $3,151,000 (38 cents per share) in the year-ago period. Net sales for the quarter were $52,845,000 vs. $59,992,000 last year. The company attributed the decline to lower selling prices.

''We announced in mid-September that selling prices for our principal products were lower and that, as a result, sales and earnings for the quarter would decline,'' stated Chariman Joseph B. Weix. ''Selling prices for our canned products are approximately 15 percent below year-ago levels due to market perception of an overabundance of processed vegetables. Our view is that supplies are not burdensome. When export demand is taken into account, product available for domestic consumption may prove to be less than adequate, resulting in some price improvement during the third and fourth quarters.

''Sales volume has recently increased substantially, indicating that the market has reached an equilibrium and further price declines are unlikely. However, the increased volume occurred too late in September to impact the second quarter favorably. Our second half results will not reach last year's levels, but we project an improving trend.''

RICHMOND, VA (OCT. 23) BUSINESS WIRE - Cadmus Communications Corp. (NASDAQ: CDMS) reports increased sales and earnings for the quarter ended Sept. 30, 1990.

Net income for first quarter fiscal 1991 was $848,000, up 19.4 percent from first quarter 1990 net income of $710,000. Sales for the quarter were $41,351,000, up 7.5 percent over first quarter 1990 sales of $38,484,000.

The company attributed the increase to improvement in promotional printing and direct marketing operations.

Net income per share for the quarter was 14 cents on average outstanding shares of 6,063,000, compared to 12 cents per share on average outstanding shares of 6,055,000 for the first fiscal quarter of last year.

Chairman Wallace Stettinius said, ''Soft market conditions continue, yet we have been able to achieve volume gains through aggressive marketing efforts, but with some decline in margins in several of our companies.''

Headquartered in Richmond, Cadmus is a graphic communications holding company specializing in publication production services, promotional and financial printing, point-of- purchase advertising and direct marketing.

MOBILE, Ala. (OCT.24) BUSINESS WIRE - QMS Inc. (NYSE: AQM) Wednesday reported that its year end revenues and earnings reached the highest level in the company's history.

Net sales for the fiscal year ended Sept. 28 were $276,250,000, an increase of 28 percent over sales of $215,817,000 in fiscal year 1989. Net income for the year was $14,554,000, or $1.33 per share, an increase of almost 63 percent over the fiscal year 1989 earnings level of $8,936,000 or 80 cents per share. Fiscal year 1989 earnings included $753,000 or 7 cents per share in extraordinary income resulting from utilization of a portion of IMAGEN Corp.'s net operating loss carryforwards.

The company also reported record fourth quarter sales of $74,624,000, an increase of 22 percent over sales of $61,155,000 for the same quarter in fiscal year 1989. Net income for the fourth quarter of fiscal year 1990 was $3,887,000, or 36 cents per share, compared with $3,462,000 or 31 cents per share for the fourth quarter of fiscal year 1989.

James L. Busby, QMS president and chief executive officer, attributed this year's strong performance to a combination of factors including increased revenues from major distribution channels, higher overall gross margins, and continuing operating expense controls. QMS U.S. direct channel revenues increased almost 47 percent over fiscal year 1989 levels. Revenues from the company's European operations increased nearly 18 percent year to year. Canadian business grew by nearly 40 percent, and QMS dealer channel revenue increased nearly 6 percent over its 1989 level. Overall, gross margin dollars increased 37 percent from fiscal year 1989 levels.

''We are very pleased with the balance among our various channels reflected in this year's results, and with the improvement we are seeing in gross margings

'' commented Busby. ''At the same time margins and revenues were increasing, our operating expenses as a percentage of sales remained almost flat. We are carefully and successfully monitoring and managing inventories and receivables. As a result, while sales increased 28 percent, increases in these key areas were only 8.8 percent and 21.1 percent, respectively. Our shareholders' equity increased well over 10 million dollars in these 12 months.

''We are also continuing to refine our distribution strategies, expand our service and support capabilities, and manage our operating expenses. We expect these efforts to result in continued success for QMS in fiscal year 1991.''

QMS Inc. is a leader in the rapidly expanding nonimpact print systems market and is a major producer of enhancement products for impact printers. The company offers a wide selection of laser and thermal transfer printers of electronic publishing, office automation, advanced imaging and automatic identification applications.

WALTHAM, MA (OCT. 24) BUSINESS WIRE - IPL Systems Inc. (NASDAQ: IPLSA) Wednesday announced revenues of $6,557,000 for the third quarter of 1990, an increase of 71 percent compared to revenue of $3,843,000 for the same period last year.

Net income was $1,405,000, an increase of 147 percent compared to $569,000 reported for the third quarter last year. Earnings per share for the quarter were 27 cents compared to 11 cents for the third quarter 1989.

''Our growth this quarter was strong when compared to the same period last year,'' said IPL's president and chief executive officer, Robert W. Norton. ''Although domestic sales did not meet the levels of the second quarter, we anticipate that recent developments, including the announcement of the 7636 Disk Array product, will give us greater opportunities to seek to improve domestic distribution and sales in 1991 of our expanded product line. The disk product components are not available from our supplier in quantities that permit immediate volume delivery of the product. We expect to have sufficient component supplies to begin such deliveries in the first quarter of 1991 and we are optimistic about the contribution this product can make to our growth plans.''

IPL Systems Inc. (NASDAQ Symbol: IPLSA) designs, manufactures, markets and services a broad range of DASD and tape subsystems, plus memory upgrades for IBM midrange computers. The company was founded in 1973.

IBM and AS/400 are trademarks of International Business Machines.

#90297b0792 10/24/1990 ~Business Wire

WESTFIELD, Mass. (OCT. 24) BUSINESS WIRE - Stanhome Inc. (NYSE:STH) announced Wednesday that 1990 third quarter and year-to-date results achieved new highs.

Third quarter sales increased 16 percent to $155,347,000, operating profit increased 14 percent to $18,497,000, net income increased 19 percent to $10,353,000 and earnings per share fully diluted increased 19 percent to 51 cents compared to 43 cents per share in 1989.

For the first nine months, sales increased 20 percent to $469,923,000, operating profit increased 12 percent to $55,276,000, net income increased 18 percent to $32,397,000 and earnings per share fully diluted increased 18 percent to $1.61 compared to $1.37 per share in 1989. Year-to-date other income this year benefited from gains on the sale of assets which amounted to 3 cents per share.

This year's results include the operations of the Hamilton Group Limited Inc., which was purchased in May 1989. In 1989, Hamilton's results were included starting in May. For the first nine months of 1990, Hamilton's sales amounted to 13 percent of total sales compared to 8 percent in 1989 and operating

profit improved.

Sales and operating profit for the Enesco worldwide giftware group increased for the quarter and year-to-date, with year-to-date sales and operating profit up 14 percent. Worldwide direct selling sales and operating profit also increased for the quarter and year-to-date, with year-to-date sales up 12 percent and operating profit up 3 percent.

Year-to-date European direct selling results increased and benefited from favorable translation rates this year compared to 1989. Year-to-date U.S. direct selling sales and operating results decreased, while Latin American sales and operating profit increased. The company also announced that the board of directors has approved an increase in the company's share repurchase program to 2 million shares. The purchased shares may be used for employee benefit plans and general corporate purposes. The purchases may be made from time to time, in the open market or in private transactions, depending on market and business conditions.

#90297b0794 10/24/1990 ~Business Wire

BROOKLYN, NY (OCT. 23) BUSINESS WIRE - Brooklyn Union Gas Wednesday announces its financial results for this fiscal year ended Sept. 30.

Elwin S. Larson, chairman and chief executive officer, said fiscal 1990 was ''an excellent year in most respects.'' However, a write-down by a subsidiary reduced consolidated earnings to $2.14 per share compared to last year's record of $2.52 per share. Without this write-down of 29 cents per share, consolidated earnings would have been $2.43 per share.

In fiscal 1990, utility operations once again performed well, contributing $2.37 per share to consolidated earnings as compared to $2.42 last year. For a record 12th consecutive year, the company has earned the rate of return allowed by the New York State Public Service Commission.

This year utility operations achieved a return on equity of 13.2 percent, which far exceeded the allowed rate of return of 12.1 percent. The company's last rate settlement required a sharing of any excess earnings equally with customers and the company provided for a $4 million refund.

As a result, the adjusted return on equity was 12.7 percent which compares favorably to the rate of return of 12.9 percent achieved in fiscal 1989.

Firm sales normalized for weather increased approximately 3 percent this year, a growth rate exceeding the national average for gas utilities for the third

consecutive year. The company sees substantial growth in both traditional markets, spurred by oil-to-gas conversions, and in new markets related to gas applications for congeneration and as an alternate fuel for fleet vehicles.

The write-down, noted above, was a non-cash impairment charge of 29 cents per share related to the methane-recovery plant, jointly owned by Methane Development Corp., and a third party. The plant produces gas from garbage at New York City's landfill at Fresh Kills Staten Island.

The operating and economic environment has changed significantly since the plant went on line in 1982, and operating performance reflected the difficulties of reclaiming gas from a landfill being used as an active garbage-disposal site. As reported in the third quarter, the plant had been shut down since March 1990 pending the results of an operating review.

It resumed production in September, however, unnecessarily strict operating requirements have severely limited gas production. As a result, expected revenues will not recover the remaining investment in the plant and the company recognized the financial impairment at this time. While the company pursues options for improving operating conditions, the plant will continue gas production, though at reduced levels. It can provide unique environmental benefits by reclaiming gas that otherwise would escape into the atomsphere.

The company believes the strategies of its other subsidiaries remain sound as their value increased in 1990. These subsidiaries contributed 6 cents per share to consolidated earnings per share in 1990 compared to 10 cents per share last year. BU's gas-exploration and production subsidiary has a major field (Matagorda Island) in production, increased its reserves to 75 billion cubic feet, over 20 percent in 1990, and acquired attractive acreage in and along the Gulf of Mexico.

Its propane subsidiary continued its acquisition and consolidation program, increased its cash flow by 35 percent and is well-positioned for earnings growth. Propane companies are valued on the basis of cash-flow multiples and the increase realized in 1990 has brought meaningful added value.

The company's cogeneration subsidiary, capitalizing on the success of the 50-megawatt Grumman cogeneration project on Long Island, is making arrangements, for participation in similar porjects in the metropolitan New York area.

There are opportunities for cogeneration in the Northeast, where the need for additional electric generating capacity is critical. The Iroquois pipeline continues to progress and the FERC certificate order is expected next month which would allow for construction in 1991.

#90297b0795 10/24/1990 ~Business Wire

NEW YORK (OCT. 24) BUSINESS WIRE - American International Petroleum Corp. (NASDAQ:AIPN) Wednesday announced that it has entered into an agreement with an undisclosed refiner to lease its 30,000 barrels/day Lake Charles, La., refinery beginning Nov. 1, 1990, for an initial period of 17 months, extendable to 29 months, at the option of the lessee.

Monthly lease payments will be made to the company based upon the refinery's actual processing rate between Nov. 1, 1990, and March 15, 1991, with a guaranteed minimum processing rate of 18,000 barrels per day after March 15, 1991. In addition the agreement provides for an advance payment of $100,000 by the lessee against future processing fees.

The lessee has the option to terminate the lease agreement at any time prior to Feb. 15, 1991, should it find the refinery not suitable for its purposes. The name of the lessee and the other terms of the lease were not disclosed at the request of the lessee.

The company noted that with crude oil prices at $30 per barrel, the minimum processing requirements under the agreement would be about $200 million provided the lessee fulfilled its obligations under the initial term of the lease agreement. The company also stated that its profitability would be materially increased in such an event.

American International Petroleum Corp. is engaged in refining, oil and natural gas production, transportation, exploration and marketing activities in Louisiana and Kentucky as well as Colombia, South America.

NEW YORK (OCT. 24) BUSINESS WIRE - Westvaco Corp., a major manufacturer of paper, packaging and chemicals, made a series of announcements Wednesday regarding organization of the company's management.

John A. Luke Sr., president and chief executive officer, who will reach age 65 at the end of November, has been asked by the Westvaco board of directors to remain in his present responsibility until sometime in 1992, at which time he expects to retire as an officer of the company. David L. Luke III will remain as chairman of the board.

Yesterday, the board elected John A. Luke Jr. executive vice president. He will turn over his responsibilities for all of the company's activities outside the United States, including Westvaco Worldwide and Rigesa, Ltda., the company's Brazilian subsidiary, to R. Scott Wallinger after an orderly transition to be worked out in the next few months.

John Luke, Jr. will then work closely with the company's chief executive officer on the affairs of all of the major operating units of the company.

Scott Wallinger, senior vice president of the company, will relocate to New York from South Carolina. He will retain supervisory responsibility for all of Westvaco's timberland activities and for Westvaco Development Corp.

He will give up superivsory responsibility for the company's Chemical Division in order to permit him to take on responsibility for Westvaco's activities outside the United States.

William D. Major, manager of the Chemical Division, has been elected a vice president of the company. He will retain his responsibilities for the Chemical Division and will report directly to the chief executive officer.

Rudolph G. Johnstone, vice president, has been elected a senior vice president and will assume responsibility for the company's Envelope Division. Charles E. Hill, vice president and manager of the Envelope Division, will report to Johnstone until Hill's retirement in the summer of 1991. Johnstone will give up his present responsibility for the company's Container Division and will report directly to the chief executive officer.

Gilbert M. Gillespie has been appointed manager of the Container Division and elected a vice president of the company. Previously, he was Eastern region manager of the Container Division. Gillespie will report to Brantley D. Thomas, senior vice president and manager of Westvaco's Kraft Division.

The following members of the Westvaco organization, whose job content will remain the same, will have new titles to reflect their important new roles in marketing or manufacturing the company's differentiated products.

Donald L. Clem, sales and marketing manager, Fine Papers Division, has been elected a vice president.

Dudley L. Hager III, sales and marketing manager, Bleached Board Division, has been elected a vice president.

David H. Hartley, manager of the Wickliffe, Ky., mill of the Fine Papers Division, has been elected a vice president.

James L. Martin, manager of Westvaco Worldwide, has been elected a vice president of Westvaco.

James M. McSherry, sales and marketing manager, Kraft Division, has been elected a vice president.

William R. Small, manager of the Covington, Va., mill of the Bleached Board Division, has been elected a vice president.

Harry K. Williams, general manager, Bleached Board Converting Division, has been elected a vice president.

HOUSTON (OCT. 23) BUSINESS WIRE - Stewart Information Services Corp. (NASDAQ:SISC) earned $1.2 million, or 29 cents per share, in the third quarter of 1990, compared to $1.4 million, or 33 cents in the third quarter of 1989.

For the first nine months of 1990, Stewart earned $0.5 million, or 12 cents per share, compared to a loss of $1.4 million, or 35 cents per share, for the same period last year. Last year's results included a second quarter after-tax gain of $1.1 million on the sale of municipal bonds.

Orders have been in a downward trend, although they increased slightly (less than 1 percent) in the third quarter of 1990 over the same period a year ago. Orders were down 9 percent for the first 15 working days in October.

Although real estate activity in several of the company's markets is improving the overall outlook for real estate, as seen by most economists, is for a downturn for the rest of this year and 1991. The crisis in Kuwait, the decline in consumer confidence, increasing inflation and the tightening of real estate loans are clouds on the future.

The company believes it will be profitable for the current year and for next year. However, the company may not earn sufficient profits to pay its dividends at the current rate, while at the same time reinvesting the funds necessary for future growth.

Stewart's primary business is title insurance. The company issues policies on homes and other real property in all 50 states, the District of Columbia and Canada through over 2,650 issuing locations. In issuing a policy, and as one process, the title is first searched, examined and then closed.

Stewart's customers include homebuyers and sellers, attorneys, builders, developers, lenders and real estate brokers. The company also sells computer-related services and information to the real estate industry.

Additionally, the company produces photogrammetric engineering products and geographic information systems for government and private entities, both domestic and foreign.

WATERBURY, CT (OCT. 24) BUSINESS WIRE - MacDermid Inc. of Waterbury, manufacturers of specialty chemicals for the electronics and metal finishing industries, reported total sales of $37,901,000 for its second quarter ended Sept. 30, an increase of $737,000 over the same period last year.

Earnings for the quarter of $1,614,000, 45 cents/share, were up 47 percent from last year's $1.1 million, 31 cents/share.

For the six months, total sales of $76,282,000 were up $1,428,000 providing net earnings of $3,418,000, 96 cents/share, up 75 percent from last year's $1,952,000, 55 cents/share.

Net earnings improvement for both the quarter and six months ended Sept. 30 were principally the result of cost reductions begun during the previous fiscal year. Additionally, interest expense was reduced because of lower borrowings during the current period and foreign exchange losses were down reflecting recent weakness in the U.S. dollar.

During each of the June and September quarters of 1990, one-time profits on exchange of business and transfer of a license agreement were offset by write-off of certain intangible assets and recognition of costs associated with closing a small manufacturing plant resulting in essentially no net effect upon earnings.

#90297b0804 10/24/1990 ~Business Wire

BRISTOL, CT (OCT. 23) BUSINESS WIRE - Frank J. Pascale, chairman and chief executive officer of Eagle Financial Corp. (ASE:EAG), Wednesday announced 1990 fourth-quarter earnings of $1,039,000, or 39 cents per share, compared to $832,000, or 31 cents per share, for the last quarter of fiscal year 1989, a 24.9 percent increase.

Contributing to this jump was a 15.4 percent increase in net interest income

to $3,801,000 for the current quarter.

For the fiscal year ended Sept. 30, 1990, net income was $3,533,000, or $1.31 per share, compared to $3,466,000, or $1.29 per share, in the prior year. Net interest income for fiscal 1990 was $14,813,000, an increase of 13.5 percent over the $13,051,000 reported in 1989.

Pascale, in making the announcement, commented, ''Improvement in our core earnings during 1990 more than offset $419,000 in expenses relating to the termination of a proposed merger this year with Webster Financial Corp. Net income this year would have been just under $3.8 million, or $1.41 per share, without the merger costs.

''By operating within our long-range business plan stressing residential mortgage lending and focusing on recurring earnings as our primary source of revenues, Eagle has been able to maintain consistent income throughout this year.''

At Sept. 30, Eagle has total non-performing loans of $3.7 million. Non-performing assets, which include non-performing loans and real estate acquired in foreclosure, totaled $4.4 million, or .91 percent of total assets, at year end.

Ralph T. Linsley, vice chairman and president of Eagle, commented, ''Although our non-performing loans to total loans ratio remains low and well below industry averages, the level of real estate problems in our area is a continuing concern. In response, we added $100,000 to our allowance for loan losses in the fourth quarter and $281,000 during the year.

''While we believe that our current loan loss reserves are adequate, we will continue to carefully monitor reserve levels during this period of economic uncertainty in our region.''

In July 1990, Eagle announced its intention to repurchase up to 10 percent of its outstanding stock from time to time over the next 12 months in the open market and unsollicited negotiated transactions.

Also in July 1990, Eagle declared a regular, quarterly cash dividend of 13 cents per share, its 14th consecutive quarterly dividend.

Eagle Financial Corp. is a $480 million holding company for Bristol Federal Savings Bank of Bristol, Conn., and First Federal Savings of Torrington, Conn. At year end, Eagle had total capital of $48.9 million, or 10.17 percent of total assets. Eagle presently has 2,666,035 shares of common stock outstanding.

PRINCETON, NJ (OCT. 24) BUSINESS WIRE - Church & Dwight Co., Inc. (NYSE: CHD) Wednesday announced earnings for the first nine months of 1990. The company reported net income of $18.2 million, or $.84 per share, compared to $11.3 million, or $.55 per share, during the prior period. Earnings per share for both years were affected by divestiture activity, which benefited 1990 by $.05 per share and reduced 1989 by $.09.

In the third quarter, despite significantly higher promotional expenses behind new product introductions, earnings of $.33 per share were equal to record earnings in the comparable quarter of 1989.

Dwight C. Minton, Chairman and Chief Executive Officer, commented, ''This excellent performance for the nine months was the result of the continued strength in the core businesses, led by the tremendous success of ARM & HAMMER DENTAL CARE(R), margin improvement resulting from price increases and the sale of businesses which had been diluting margins.''

Church & Dwight Co., Inc. is the manufacturer of ARM & HAMMER(R) consumer and industrial products.

INGLEWOOD, CALIF. (OCT. 24) BUSINESS WIRE - Hollywood Park Realty Enterprises Inc. and Hollywood Park Operating Co. (NASDAQ:HTRFZ) Wednesday jointly announced that their annual meetings for shareholders will be held Jan. 28, 1991.

The meetings will be held at Hollywood Park Race Track in Inglewood at 9 a.m. local time.

Pursuant to the companies' by-laws, any stockholder seeking to submit proposals or nominations for directors for consideration at either meeting must provide notice in writing to the secretary of the relevant corporation no later than Oct. 31.

The information required to be provided in such notice is contained in the corporations' by-laws, copies of which can be obtained from the corporate secretary.

The companies noted that their second quarter earnings marked a significant

financial turnaround. For the second quarter ending June 30, net income for both companies increased 87 percent to $6,158,000 from $3,282,000 for the same period a year ago.

In addition, the companies restored dividends this year, paying a third quarter dividend of 12.5 cents per share and announcing a fourth quarter dividend of 15 cents.

The companies attributed their financial turnaround to increased efficiences in on-track operations, strong simulcast revenues and a greatly reduced debt load.

To continue to maximize revenues for shareholders, the companies are pursuing expansion of the Southern California Off-Track Wagering network, more Friday night racing, and a development plan for excess acreage in Inglewood.

#90297b0820 10/24/1990 ~Business Wire

WESTBOROUGH, MASS. (OCT. 24) BUSINESS WIRE - New England Power Co. (NEP) Wednesday filed a settlement agreement with the Federal Energy Regulatory Commission (FERC) that would reduce NEP's currently effective rates by $5.4 million annually.

If approved by FERC, this agreement would reduce, from $31.1 million to $25.7 million, a rate increase NEP is currently collecting subjet to refund. The rate increase recovers costs associated with the entry into service of the Seabrook nuclear generating unit. NEP is the wholly owned wholesale electric generation and transmission subsidiary of New England Electric System (NEES) and owns approximately 10 percent of the Seabrook power plant.

The settlement resolves all issues associated with NEP's investment in the Seabrook unit since Jan. 1, 1988. NEP's investment in the unit before Jan. 1 1988, was the subject of a prior settlement agreement. The principal element of the settlement agreement filed today is the removal of approximately $4 million of estimated purchase power expense from the filed rate.

To the extent that this expense is incurred, it will be recovered through a rate mechanism established in the settlement of NEP's last rate case. The settlement agreement also makes adjustments in certain estimated operating expenses for the unit.

If FERC approves the settlement, NEP will decrease the rates it began charging subject to refund, on June 30, 1990, when Seabrook entered commercial operation. Amounts collected in excess of the settled rate level will be

credited to customers with interest. The settlement would decrease the bill of a typical residential customer who uses 500 kilowatthours of electricity by approximately 13 cents per month.

NEP filed another rate case on Aug. 1, 1990, which is still pending before FERC. On Sept. 28, 1990, FERC issued an order in that case allowing a base rate increase of $72.7 million to become effective, subject to refund, on Jan. 1, 1991, the beginning of the test year on which the rates are based.

The FERC order also allows for additional rate increases to become effective, subject to refund, upon commercial operation of two new power sources that are not yet in service. Specifically, NEP is allowed to increase rates by $21.9 million annually for the second phase of the New England/Hydro-Quebec DC Interconnection, and by $17.4 million annually for Unit 1 of Ocean State Power the natural gas-fired project under construction in Burrillville, R.I.

New England Electric System (NEES) is a public utility holding company headquartered in Westborough.

CINCINNATI (OCT. 24) BUSINESS WIRE - Cable & Wireless Communications Inc. (NYSE:CWP) (CWCI), one of the nation's largest business-to-business telecommunications providers, will automate its extensive circuit design functions with TecNet/Design, a new circuit provisioning system launched by CBIS (NYSE:CSN) earlier this year.

CWCI, which is the only American company other than AT&T to design its own network architecture and switching technology, was designing an in-house circuit provisioning system when CBIS asked the firm to serve as the TecNet/Design Beta site. CWCI accepted the offer as a cost-effective alternative and was first in line to purchase the system when it was formally introduced.

''CBIS's TecNet/Design will help to integrate our corporatewide needs for circuit provisioning,'' said Jim Burdge, CWCI vice president for information systems. ''The resulting cost savings will more than pay for the system.''

''Cable & Wireless is an ideal first customer for the TecNet/Design product,'' said Jim Johnston, senior vice president for telecommunications information systems at CBIS.

''CWCI, the nation's largest long-distance company which exclusively serves businesses, is a well-respected member of the telecommunications industry. CWCI's confidence in TecNet/Design sends a strong signal to other potential customers that our product has the capabilities that will be critical for telecommunications companies hoping to compete in the 1990s. We see it as a very strategic sale.''

TecNet/Design is an automated circuit design system that aids in determining optimum circuit routes and automatically assigns facilities and equipment. The system allows users to customize design rules and variables that are unique to the company and its network.

Developed using CASE tool technology and relational data base design, TecNet/Design takes full advantage of high-performance graphic workstations to enable users to provision circuits at the touch of a button, a capability that is quickly becoming essential to keep pace with the explosive growth in network circuits.

CBIS, a subsidiary of Cincinnati Bell Inc., is a worldwide information services company that develops management sytems for telecommunications, government and financial entities.

JOHNSON CITY, Tenn. (OCT. 24) BUSINESS WIRE - Vance W. Cheek, chairman and chief executive officer of Home Financial Corp. (NASDAQ/NMS:HFET), Wednesday announced the resignation of W. Kyle Huddle from the company's board of directors and the boards of directors of its subsidiaries, including Home Federal Savings and Loan Association of Upper East Tennessee, effective Oct. 16, 1990.

Huddle, a prominent Kingsport, Tenn., businessman, was first elected a director of Home Federal in 1960.

Commenting on Huddle's decision to resign, Cheek said, ''Mr. Huddle has served this company with great distinction and commitment during his tenure as a director. His informed judgement and broad business experience has been a valuable resource to us during a period when Home Financial grew to be a leading financial institution in the state. We will certainly miss his counsel, support and loyal commitment.''

Home Financial Corp. is a holding company for Home Federal Savings and Loan Association of Upper East Tennessee, which is the leading financial institution headquartered in the region. Federally chartered in 1934, the association operates 19 offices strategically located throughout the area.

Home Financial's common shares trade on the NASDAQ National Market System under the symbol HFET.

PLAINFIELD, IND. (OCT. 24) BUSINESS WIRE - PSI Resources Inc. (NYSE:PIN) Wednesday announced a decline in operating income of over 16 percent for the 12 months ended Sept. 30 compared to the like period last year.

The decrease is attributable to the effects of a phased-in 13.2 percent retail rate reduction ordered by the Indiana Utility Regulatory Commission in 1988 and another 4.3 percent reduction in April 1990. Nevertheless, earnings for the quarter ended Sept. 30 were 61 cents per share of common stock, up 7 cents from the third quarter of 1989.

''This increase is a result of our being able to take advantage of lower interest rates last year to restructure our capitalization,'' said J. Wayne Leonard, PSI's chief financial officer. ''The benefits of reduced interest and preferred dividend costs have helped offset the effect on earnings of the rate reductions.''

Earnings for the 12 months ended Sept. 30 were up 14.1 percent, from $1.85 per

share a year ago to $2.11 due primarily to a charge in December 1988 for reserves to cover the anticipated cost of the tentative settlement of a lawsuit by Wabash Valley Power Association. The pending suit is related to the canceled Marble Hill nuclear project.

PLAINFIELD, IN (OCT. 24) BUSINESS WIRE - Directors for PSI Resources Inc. (NYSE:PIN) Wednesday named Indianapolis civic and business leader Michael G. Browning and former Indiana Lt. Gov. John M. Mutz as its newest board members.

Browning will start serving immediately on the board to fill the post of Darrell V. Menscer. Menscer retired from the company on Sept. 1 as a PSI Resources board member and as president of the company's main subsidiary, PSI Energy.

Mutz's term on the board will begin Jan. 1, 1991. He will fill the post of Richard B. Stoner, vice chairman emeritus for Cummins Engine Co. in Columbus. A 16-year member of PSI Resources' board, Stoner will retire as a director at the end of the year because of the board's age limitation.

Browning is president of Browning Investments Inc. and serves as general partner of the firm's related real estate ventures. He also serves as a board member of CONSECO INC., INB National Corp. and Emmis Broadcasting.

Browning plays an active role in the central Indiana community and in the development of public-private partnerships. He serves on area community, business, cultural and educational boards and has been actively involved in the emergence of Indianapolis as the Amateur Sports capital of the world.

Mutz is president of the Lilly Endowment, which supports the causes of education, religion and community development. Named to his current post in February 1989, he leads the philanthropic work of the fourth largest private foundation in America.

Before joining the Endowment, Mutz served as Indiana's lieutenant governor from 1980 to 1988. While in office, he was active in state economic development activities which have helped to bring businesses and jobs to Indiana. Before his term as lieutenant governor, Mutz served as a member of the Indiana General Assembly for 13 years.

LAKE MARY, FLA. (OTC. 24) BUSINESS WIRE - Maynard, an Archive company, has announced the availability of the 525MB Archive Viper cartridge tape drive for industrial customers.

This quarter-inch drive features 240KB per second transfer rate, 256K RAM buffer, hardware ECC, and a dual tape speed of 90 and 120 inches per second (ips). The unit reads and writes QIC-525, QIC-150, and QIC-120, and it reads QIC-24. It has a 40,000 hour Mean Time Between Failure (MTBF) rate, the industry's highest level of reliability.

The 525MB Viper drive has a SCSI interface and is available as an internal unit (model 2525S) or an external unit (model 2525ES). It has been designed specifically for the rigors of data storage environments and is ideal for servers, workstations, and high-end personal computer applications.

The drive is available through U.S. industrial distributors, including Arrow Electronics, Hamilton/Avnet, and Bell Microproducts. Maynard sells its products through a worldwide network of dealers, distributors and value-added resellers.

Based in Lake Mary, Fla., Maynard is the industry's leading supplier of tape backup systems and offers the most complete selection of 5 1/4-inch and 3 1/2-inch cartridge, cassett, 4mm and 8mm tape drives available for the IBM-compatible PC and PS/2 computers, DEC VAX computers, and Apple Macintosh family of computers.

ALBANY, N.Y. (OCT. 24) BUSINESS WIRE - Home & City Savings Bank announced that its board of directors had met earlier Wednesday to consider preliminarily the acquisition proposal submitted last week by Rose Associates I L.P.

Home & City said its board of directors has directed the company's advisors to contact representatives of Rose Associates solely for the purpose of obtaining additional information concerning the acquisition proposal.

Home & City said that the Rose Associates' proposal lacked material information necessary for its board to assess carefully the merits of the proposal, including the ability of Rose Associates to obtain financing of the proposal and the prospects for receiving all required regulatory approvals.

Home & City said that its board of directors also needed information with respect to the process by which it would be determined which stockholders would be among the 60 percent that would receive the cash and debt under the Rose proposal and which stockholders would be among the 40 percent that would continue to hold Home & City common stock indirectly by receiving stock of the new company proposed to be formed by Rose Associates to own Home & City.

John J. Brunner, chairman, president and chief executive officer of Home & City Savings Bank, said, ''We are seeking information from Rose Associates in order to better enable the board of directors to understand the Rose Associates' proposal.''

#90297b0854 10/24/1990 ~Business Wire

WINDSOR, CONN. (OCT. 24) BUSINESS WIRE - ADVO-System Inc. (NASDAQ:ADVO) Wednesday announced record results for its fiscal year ended Sept. 29, 1990.

Net income was $16.4 million or 95 cents per share on a fully diluted basis, compared to $5.3 million or 32 cents per share for the prior year. Operating income in 1990 was $22.5 million, an increase of $15.7 million from a year ago. Revenues of $655.0 million represented a 6.0% increase over the prior year.

For the fourth quarter of 1990, the company reported net income of $5.5 million or 32 cents per share. In the fourth quarter of the prior year, ADVO reported net income of $4.6 million or 27 cents per share. For the fourth quarter, operating income was $7.6 million, a 21.5% increase over the prior year. Revenues for the fourth quarter were $167.1 million vs. $167.6 million last year.

The prior year fourth quarter was comprised of 14 weeks and the total year included 53 weeks. Adjusting for the extra week in fiscal 1989, comparative revenues for the fourth quarter and full year of 1990 were 7.4% and 8.1% higher than 1989.

Robert ''Kam'' Kamerschen, chairman and CEO of ADVO, said ''The fourth quarter of 1990 represents our sixth consecutive quarter of significant improvement over the prior year. It also represents a 3.4% annual operating profit as a

percentage of 1990 net revenues, and a successful conclusion to our year two turnaround goals.

ADVO specializes in targeted direct mail products and services. The company's brands of Shared Mail, Marriage Mail and Mailbox Values, are distributed nationally to over 52 million households weekly. ADVO also processes Solo mailings and offers limited printing and transportation services. It has 20 production facilities and 69 sales offices nationwide. ADVO's Corporate headquarters are located at One Univac Lane, Windsor, Conn., 06095.

#90297b0865 10/24/1990 ~Business Wire

DAYTON, OHIO (OCT. 24) BUSINESS WIRE - NCR Wednesday announced new additions to the NCR 6091 family of stackable data storage systems, including a 525 megabyte quarter-inch tape subsystem and a 600 megabyte CD-ROM subsystem.

About the size of a shoebox, each new subsystem connects to a computer system and offers expanded data storage capacity for workstations and servers. Intended for desk-top or desk-side usage, the 6091 subsystems are available in stackable cabinets using interlocking grooves for stability. The units offer data backup, high-capacity storage, high-speed data retrieval and record archival.

''The key advantage of the NCR 6091 family to our customers is the 'building block' flexibility of the products,'' said Randy Bell, assistant vice president, Product Marketing Division.

''Customers purchase only the devices needed for a specific storage and/or data retrieval need. As data storage requirements grow, more 6091 units can be added to form a space-saving 'stack.'

''As technology changes, the NCR 6091 is designed to bring new technology to the customer. These subsystems use the industry-standard Small Computer System Interface (SCSI), and the result is investment protection for the customer,'' added Bell.

SCSI enables computers to share a common interface with the latest in peripheral-device technology -- such as disks, tapes, printers and scanners -- while protecting existing system hardware and software investments. Up to seven NCR 6091 subsystems can be attached to a computer system through one SCSI interface. NCR played a leadership role in pioneering the development of this interface. NCR 6091 600 Megabyte CD-ROM Subsystem

Using durable, removable, industry-standard optical media, the NCR 6091 CD-ROM

(Compact Disc Read-Only Memory) 600 megabyte subsystem runs pre-recorded optical compact disks. This data storage technology is valuable for users who access directories, government regulations, catalogs, sales records, market surveys and other databases; it is also emerging as a medium for multi-media applications.

NCR Corp., based in Dayton, develops, manufactures, markets and supports business information processing systems for worldwide markets.

CANTON, MASS. (OCT. 24) BUSINESS WIRE - Bay State Gas Co. (NYSE:BGC) Wednesday announced that net income for fiscal 1990 grew to $20.2 million, a 11.2 percent increase from the $18.2 million earned in fiscal 1989.

Greater preferred dividend requirements reflecting a full year's impact of the issuance of additional preferred shares in 1989, plus an increase in the number of common shares outstanding, resulted in earnings of $1.78 per share for fiscal 1990, compared to $1.81 earned a year ago.

''Despite the sluggish economy in New England, Bay State's natural gas sales volume growth continued to exceed the gas industry average, thanks in large part to the company's success in converting existing homes and businesses to natural gas,'' said Roger A. Young, president.

Total firm gas sales volume increased by 1.6 billion cubic feet, or 3.1 percent, in fiscal 1990 as compared with fiscal 1989. Net gas revenues grew from $113.2 million in fiscal 1989 to $128.2 million for fiscal 1990, or 13.3 percent. Principal reasons for the increase in net revenues were sales volume growth and the impact of a November 1989 rate increase in the company's Massachusetts service area.

''Only 32 percent of homes in our service area currently heat with natural gas '' Young said, ''and the situation in the Persian Gulf has refocused New England on the benefits of natural gas as a method of reducing the region's excessive dependence on foreign oil.

Bay State Gas is the New England region's largest independent natural gas distributor. The company serves more than 260,000 customers in Massachusetts and through its Northern Utilities Inc., subsidiary, in New Hampshire and Maine. The company also operates Granite State Gas Transmission Inc., a wholly owned gas pipeline subsidiary, and is involved in retail sales of

propane and home-improvement products.

ATLANTA (OCT. 24) BUSINESS WIRE - Patrick H. Thomas, chairman, president and chief executive officer of First Financial Management Corp. (NYSE:FFM) announced that FFMC's board of directors declared a cash dividend of 5 cents per share, payable on Jan. 3, 1991, to shareholders of record as of Dec. 3, 1990.

This declaration follows the company's policy established in 1989 to make semi-annual dividend payments.

Thomas said, ''We are pleased to declare this dividend in line with our policy to provide cash rewards to our loyal shareholders for their consistent support over the years.

''We do, however, continue to emphasize our growth strategy through an aggressive acquisition program as the primary use of our cash resources as well as, at current price levels, the possible repurchase of the company's common stock, pursuant to the company's previous announcement of the authorization to purchase up to $90 million of its common stock.''

FFMC is an information services company which offers a broad range of data processing and related services to a large and diverse customer base. The company provides products and services to financial institutions, retail merchants, governments and other industries.

It is a leader in financial institution processing, data imaging, micrographics, electronic data base services, debt collection, and health and pharmaceutical claims processing and is one of the largest merchant credit card processors in the country.

FFMC also owns Georgia Federal Bank FSB, the largest savings institution and one of the largest retail banks based in Georgia, and its subsidiary, First Family Financial Services, a major regional consumer finance company. Its common stock is currently traded on the NYSE under the symbol FFM. Its debentures are quoted through NASDAQ under the symbol FFMCG

#90297b0886 10/24/1990 ~Business Wire

LITTLETON, MA. (OCT. 24) BUSINESS WIRE - Alliant Computer Systems Corp. (NASDAQ--ALNT) today reported a loss from operations for the 1990 third fiscal quarter of $6.4 million, before additional charges, compared to a net income of $.8 million, or 6 cents per share, for the third quarter of 1989 period.

The third quarter 1990 revenues were $14.2 million, compared to third quarter 1989 revenues of $17.2 million.

The company also recorded a charge of $24.8 million in the third quarter of 1990. The charge consisted primarily of a write-down of the goodwill recorded when Alliant acquired its Japanese distributor, Nihon Alliant, plus a provision for surplus and obsolete inventory and uncollectable accounts. Including the added charge items, the net loss was $31.2 million, or $2.34 per share.

For the nine months ended Oct. 1, 1990, the company recorded a net loss of $31.4 million, or $2.38 per share, compared to a net income of $1.3 million, or 10 cents per share, for the nine months ended Sept. 30, 1989. Revenues for the nine months ended Oct. 1, 1990 were $55.8 million, compared to $49.9 million for the 1989 period.

''In addition to the charge, we have taken actions which lower our expense levels and we are managing our cash closely,'' said Alliant President Craig Mundie. ''We have lowered the quarterly break-even revenue point to $21-22 million, compared to the previous quarters' $24-25 million.

''The third quarter revenue level reflects the continuing product transition to the company's FX/2800 Family of RISC-based supercomputers,'' Mundie said. Approximately 40 FX/2800 systems have been shipped to date.

''Fourth quarter sales opportunities for this product look promising. A number of software performance enhancements were delivered to customers recently, and more are planned for release this quarter,'' Mundie said. ''Based on the fact that a significant portion of the required enhancements are now demonstrable on customer benchmark tests, we believe bookings will increase in the fourth quarter.''

Alliant Computer Systems Corp. manufactures standards-based parallel supercomputers with visualization tools that enable scientists and engineers to quickly interpret and solve complex problems.

TUPELO, MS (OCT. 24) BUSINESS WIRE - The board of directors of Bancorp of Mississippi Inc. (NASDAQ/NMS: BOMS) declared a cash dividend of 23 cents per share payable Jan. 2, 1991, to shareholders of record Dec. 14, 1990. This represents a 9.5 percent increase over the 21 cents per share previously paid.

Bancorp of Mississippi previously reported 1990 third quarter earnings of $3.844 million with fully diluted third quarter earnings of 77 cents per share compared with third quarter earnings in 1989 of $3.186 million and 64 cents per share on a fully diluted basis.

The common stock of the company is quoted on the NASDAQ National Market System under the symbol BOMS.

#90297b0896 10/24/1990 ~Business Wire

FRAMINGHAM, MA (OCT. 24) BUSINESS WIRE - Framingham Savings Bank (NASDAQ:FSBX) announced Wednesday a net loss for the quarter ended Sept. 30, 1990, of $3,538,000 or 87 cents per share.

For the same period in 1989, the bank reported a net loss of $8,386,000 or $2.05 per share. Operating results for the first nine months of 1990 reflected a loss of $8,388,000 compared to a loss of $8,875,000 for the same period in 1989. Total assets at Sept. 30, 1990, were $515.0 million compared to $573.8 million a year ago at Sept. 30, 1989, representing a decrease of $58.8 million.

The loss for the quarter was attributable to a $1,880,000 provision for loan losses, $1,289,000 foreclosure and loan workout expense, a $508,000 loss on sale of other real estate owned and the lost income on nonperforming assets. During the third quarter of 1990 the bank substantially increased its efforts in loan portfolio review, loan workout, foreclosure auction and other real estate owned management and disposition activities.

Some results of these efforts were a major shift in non-performing assets from non-accruing loans to other real estate owned and the recognition of discretionary non-accruing loans which are technically performing, but considered and accounted for by management as non-accruing. During the quarter, $2.1 million was charged to general loan loss reserves representing writedowns on loans when property was taken by foreclosure or deemed in-substance foreclosed.

Other charge-offs net of recoveries amounted to $114,000. The bank made a provision for loan losses of $1,880,000 in order to restore and maintain reserves at $20.6 million at Sept. 30, 1990. At Sept. 30, 1990, nonperforming assets totaled $71.4 million of which $7.7 million represented discretionary non-accrual loans.

The bank's capital remains within regulatory capital requirements at Sept. 30, 1990 with a ratio of regulatory capital, which includes general loan loss reserves, to average total assets of 8.17 percent.

Operating expenses for the third quarter of 1990 were $4.4 million compared to $3.8 million for the third quarter of 1989. The expense of loan workout and other real estate owned disposition activities amounted to $1.3 million in the third quarter of 1990. Similar expenses were not material during the same quarter of 1989.

During the quarter just ended there were staff reductions of 30 positions in non-workout departments. The bank continues working to consolidate operations and reduce expenses wherever possible, although the bank may add additional resources to workout efforts.

SCHEDULE 14D1

SEC - AMENDMENT NUMBER: 8

ANNOUNCEMENT:

On Oct. 17, 1990, the plaintiffs and defendants in Abrams et al. v. Caesars New Jersey Inc.(TICKER: CJN) et al. entered into a settlement agreement with regard to their claims. On Oct. 22, 1990, a US District Court entered into an order, in accordance with the settlement, that consolidates several actions and provides for the dismissal by the plaintiffs in the actions and scheduled a hearing for Nov. 28, 1990 to determine whether the proposed settlement is fair to members of the plaintiff class.

By MICHAEL STRAUSS - Comtex Washington Correspondent

WASHINGTON (OCT. 24) COMTEX - Early use of the Strategic Petroleum Reserve (SPR) following Iraq's Aug. 2 invasion of Kuwait would have kept the crisis-induced oil price hikes significantly lower than those which have occurred, a congressional task force was told today.

"If we had drawn down SPR from the beginning, you never would have seen oil prices in the $40s or even in the $30s," said John Lichtblau, chairman of Petroleum Industry Research Foundation, a non-profit think tank specializing in matters which affect the U.S. petroleum industry. "There would have been an increase in prices, maybe $5, $6 or $7 per barrel."

"The failure to use strategic stocks early in the crisis is the most serious failure of energy policy during the episode to date," echoed Dr. Philip

Verleger, Jr., an independent economic consultant and former senior adviser on domestic energy matters at the U.S. Treasury. "We wouldn't have seen prices rise above $25 a barrel."

However, Dr. Daniel Dreyfus, vice president of the Gas Research Institute, said early release of the petroleum stocks may not have made much difference because of the volatility of the oil markets.

"I think in the kind of situation we've had, the biggest problem is uncertainty," Dreyfus told a House panel investigating the policy implications of the Middle East oil crisis. "If SPR is going to do us any good in this situation, it has to reduce the uncertainty not add to it. "I don't see this as a sensible way to deal with uncertainty."

Oil prices, which hovered near $18 to $19 a barrel in July, peaked at $41.15 a barrel on Oct. 10 but have fallen 29 percent since then, closing yesterday at $29.37 a barrel on the New York Mercantile Exchange.

The U.S. SPR presently stands at 590 million barrels and, except for a a modest test several weeks following the Iraqi incursion, the Bush administration has so far decided against tapping the reserve. Other members of the International Energy Agency, most notably Germany and Japan, have followed the U.S. lead and refused to draw on their respective stockpiles.

Once the crisis is resolved, Lichtblau and Verleger advocate aggressively expanding the SPR through leasing oil from select foreign producers.

"Under this concept, certain foreign oil producers with substantial spare producing capacity would supply oil that would otherwise remain in the ground, and lease it to the Department of Energy to fill the government's SPR storage facilities," Lichtblau said. "The leasing cost would presumably be much lower than the market price of the oil. If and when the oil is used for SPR purposes the lessor would get its full value."

"We ought to encourage oil exporting countries in the Middle East to store oil here," added Verleger. "The greater exposure of our economy to price fluctations requires that the United States build a much larger strategic petroleum reserve."

"I think this whole crisis situation is based on speculation," countered Dreyfus. "I don't see what increasing SPR will do now."

WASHINGTON (OCT. 25) COMTEX - Cibro Refinery LP filed a registration statement with the SEC in which it proposes to offer 5 million convertible preferred units representing limited partner interests.

The preferred units, which represent an approximate 44% limited partner interest in the partnership, are entitled to receive, if as and when declared by the general partner, cumulative quarterly distributions of cash derived from the partnership's operations of $2.10 per unit per annum payable at the rate of $0.525 per unit.

The convertible preferred units represent newly issued limited partner interests in Cibro Refinery LP.

The partnership has been formed to acquire, own and operate the petroleum refinery and wholesale marketing operations of Cibro Terminals Inc. and its wholly-owned subsidiary, Cibro Petroleum Products Inc.

The refinery is located in Albany, NY and currently produces primarily liquid asphalt, military aviation fuel and fuel oils.

PaineWebber, Prudential-Bache Capital Funding, Smith Barney and First Albany are managing the offering.

Cibro's executive office is located at 1066 Zerega Ave., Bronx, NY 10462 and its telephone number is (212) 824-5000.

BEIRUT (OCT. 24) - A moslem militia death squad Wednesday executed a man it said was responsible for two carbomb explosions that killed 12 persons in southern Lebanon two months ago.

Security sources said Mohamad Abbas Daher, 21, was shot in the head by three hooded Shiite Amal militiamen in front of 2,000 spectators in the main square of Tyre, south of Beirut.

Daher was accused of complicity in carbomb attacks against Amal militia offices in Tyre last August in which 12 civilians and Amal militiamen were killed.

Daher, believed to be a member of the Shiite fundamentalist Hezbollah or Party of God, had admitted the charges in an earlier press conference.

Amal and Hezbollah have been involved in feud for control of Lebanon's powerful Shiite community since 1988. The struggle has left 2,000 persons dead and as many as 100,000 homeless.

TEL AVIV (OCT. 24) - Israeli troops killed two guerrillas and wounded several others in a raid into areas of Lebanon controlled by the pro-Iranian Hezbollah movement, Israel radio reported Wednesday.

The raid occured Tuesday night near the village of Huna, some 25 kilometres inside Lebanon. There were no casualties among Israeli troops from an elite paratroop unit, the broadcast said.

The attack was far to the the north of the self-proclaimed security zone running 10 kilometres inside Lebanon's border with Israel where Israeli troops usually confine their activity.

NAIROBI (OCT. 24) - A ceasefire between government troops and rebels in Rwanda took effect on Wednesday at l0 a.m. local time (0800 GMT), Belgian Foreign Minister Mark Eyskens told the press in the Kenyan capital.

He said he received a phone call from Rwandan counterpart Casimir Bizimungu telling him the government in Kigali had accepted the ceasefire.

But the rebels had already violated it, Mr. Bizimungu had added, which made it ''an absolute necessity'' to organise supervision of the ceasefire, Mr. Eyskens said. That was an African responsibility, and a supervisory force could be stationed in Rwanda by the Organisation of African Unity, the Belgian minister said.

Belgium was ready to provide logistics and financial backing, but not troops, he added.

-30- 957
#90297d0070 10/24/1990 ~French/German News Agency
AMMAN (OCT. 24) - An Islamic fundamentalist group, Beit al-Makadess, on Wednesday claimed responsibility for an assault last Sunday in Jerusalem in which three Israeli Jews were stabbed to death.

Sheikh Assad Bayoud al-Tamimi, the leader of the organization, said the attack was carried out by the Khaled Islambouli wing, named for the militant who assassinated Egyptian President Anwar Sadat in 1981.

Israeli police said a 19-year-old Palestinian killed a woman soldier, a florist and a police officer and wounded a fourth Israeli with a bayonet.

Sheikh Saad in remarks to Agence France-Presse disputed an earlier claim of responsibility from a another fundamentalist group, Jihad Kataeb al-Aqsa, which he said had been expelled from Beit al-Makadess.

In Jerusalem an anonymous telephone caller said Force 17, a security branch of the mainstream Fatah movement of the Palestine Liberation Organization, had carried out the killings.

The attacks came in the aftermath of a clash October 8 in east Jerusalem during which Israeli security forces shot dead 21 Palestinian stonethrowers.

Another Palestinian died Wednesday from his wounds, but Palestinian sources said he had been shot by an Israeli civilian.

#90297d0220 10/24/1990 ~French/German News Agency

ANKARA (OCT. 24) - Turkish State Minister Isin Celebi left here Wednesday for Sofia in what appeared to be the first concrete step to revitalize economic ties after an earlier political normalisation.

Celebi, responsible for the economy, was accompanied by a large delegation of businessmen, bankers and contractors.

Relations between the two Balkan countries, which had steadily deteriorated over the forced assimilation of some 1.5 million ethnic Turks since 1984, started improving after the toppling last year of Todor Zhivkov, Bulgaria's former hard-line communist leader.

At the peak of the tensions, some 350,000 ethnic Turks fled to Turkey last year, but nearly half subsequently returned, disappointed with lack of jobs and housing.

#90297d0230 10/24/1990 ~French/German News Agency

CAPE TOWN (OCT. 24) - The South African President's Council is to recommend that a new constitution provide for a possible future confederation of sub-Saharan African states, its deputy chairman Mr. J.H. Heyns said Wednesday.

Proposals of a report by the President's Council were released on Wednesday and were to be debated Wednesday and Thursday before formal adoption and submission to President Frederik de Klerk as a basis for negotiations on a new constitutional dispensation for the country.

The report says confederation was already a reality in the relationship between South Africa and its four nominally independent tribal homelands - Transkei, Bophuthatswana, Venda and Ciskei (TBVC).

This could serve as a "basis for closer ties with other neighbouring states in southern Africa", says the report.

Infrastructure already existed on the basis of a confederation involving several southern African states such as Swaziland, Lesotho and Namibia among others, Mr. Heyns told Agence France-Presse.

Primarily because of economic links between Sub-Saharan countries and South Africa, the council envisaged a "broad Sub-Saharan" confederation, he said.

The report also acknowleged the TBVC states' lack of economic viability adding they had "little or no legitimacy".

Basically, the council report proposes for South Africa a negotiated constitution with a Bill of Rights, protected by a Constitutional Court.

It foresees a bicameral parliamentary system with one chamber elected on a countrywide proportional basis and the other on an ethnic or "other basis" - "a system somewhere between a traditional federation and a union, with consociational features".

#90297d0250 10/24/1990 ~French/German News Agency

BRASILIA (OCT. 24) - Brazil unveiled Wednesday a 130 million dollar program to combat AIDS, which claims a new victim every 80 minutes in the country, the Health Ministry official announced Wednesday.

Eduardo Cortes, director of the center for contagious diseases, said that more than 13,000 Brazilians had the Acquired Immune Deficiency Syndrome (AIDS) and that an additional 7,000 were expected to come down with the disease over the next year.

He said there was a new AIDS case reported every 80 minutes, adding that between 300,000 and 500,000 Brazilians were currently believed to be infected

with the HIV virus held responsible for causing AIDS.

Dr. Cortes said the 130 million dollars would primarily be spent to purchase and provide anti-AIDS drug treaments, notably using AZT.

-30- 963

#90297d0280 10/24/1990 ~French/German News Agency

HANOI (OCT. 24) - Successive typhoons and storms have seriously damaged treasures in the former royal capital of Hue, which was virtually flattened in fighting between Vietnamese and U.S. forces during the 1968 Tet offensive.

The Vietnam News Agency (VNA) said Wednesday that the natural calamities had whipped off some 30,000 square metres (yards) of roofing from former imperial buildings, mostly built in the 19th century.

The report did not give a time frame for the damage, but informed sources said it had happened over recent years, though with the most devastation coming when a big typhoon hit the central Vietnamese city last month.

Hardest hit were the Noon Gate, the Thai Hoa Court Hall, the Dien Tho Palace and the prominent royal tombs of Thieu Tri, Minh Mang, Gia Long and Tu Duc outside Hue.

VNA said some 20 kilometres (12 miles) of roads and 23 bridges had been destroyed in the royal complex.

The agency had reported Tuesday that work was under way with international help to restore the national treasures at Hue, particularly the royal palace.

It said that Japan had in March contributed 100,000 dollars towards restoring the Noon Gate, the entrance to the Citadel housing the former royal capital of Vietnam and the site where the last emperor Bao Dai abdicated on August 30, 1945.

Craftsmen from across the country had been asked to help restore the Ngu Phung Pavilion and the Thai Hoa Palace.

Hue, one of the country's top tourist destinations, became a part of Vietnam in 1036 and capital of the country in 1802 as the seat of the Nguyen imperial dynasty - the last in Vietnam.

It was the scene of some of the fiercest fighting of the Vietnam War during the Viet Cong's 1968 Tet offensive against the U.S. and South Vietnamese armed forces.

The citadel and its treasures were virtually flattened as U.S. marines recaptured Hue in more than three weeks of desperate house-to-house fighting.

#90297d0300 10/24/1990 ~French/German News Agency
TOKYO (OCT. 24) - Japan's three long-term credit banks will lower their benchmark long-term prime rate by 0.6 point to 8.3 percent per annum on November 1, bank officials said Wednesday.

The rate cut, the first in five months, will be accompanied by the same cut in rates on five-year fixed-coupon debentures, the banks' main fund-raising tools the officials said.

The long-term prime rate is the fee charged on loans of more than one year to the most creditworthy customers of the three banks: Industrial Bank of Japan, Nippon Credit Bank and Long-Term Credit Bank of Japan.

The rate has been raised three times since August.

-30- 830
#90297d0340 10/24/1990 ~French/German News Agency
MOSCOW (OCT. 24) - New annual subscriptions of the Soviet Communist Party daily Pravda have plunged from 6.5 million last year to 504,000 on October 1, Ivan Frolov, the paper's chief editor said here Wednesday.

Mr. Frolov, a close aide to President Mikhail Gorbachev, said that he "will work at Pravda until further notice" after the party's Politburo and the Central Committee rejected his offer to resign.

He took over the paper's top job a year go but has run into stiff opposition from Pravda staff.

Subscribers traditionally make up the bulk of Pravda's readers who have until November 20 to renew their subscriptions. The paper reports a circulation of 7.7 million copies.

The number of subscriptions has dwindled as several hundred thousand members left the Communist Party over the past months. At the same time subscription rates increased by up to two and a half but the paper still costs no more than four kopecks (eight cents at the official rate).

Pravda said last November that more than three million readers had failed to renew subscriptions.

Speaking at a press conference, Mr. Frolov was confident that the paper's circulation "will be sufficient for a paper with a worldwide readership" and that it will not run into a deficit.

Pravda is to become more independent financially, notably by opening up its pages to advertisers, but it will maintain close "ideological ties" with the Central Committee, according to Mr. Frolov.

#90297d0410 10/24/1990 ~French/German News Agency

ABU DHABI (OCT. 24) - The United Arab Emirate of Abu Dhabi has reactivated a major gas gathering and processing plant that was shut down four years ago, oil industry sources said on Wednesday.

The plant, which re-started last week, can process 280 million cubic feet per day of associated gas from the emirate's offshore Zakum field, operated by the Abu Dhabi Marine operating Company (ADMA-OPCO).

It was shut down in 1986 when oil production plunged in response to low prices and a glut on the international market.

The Abu Dhabi National Oil Company (ADNOC), with a 60 percent shareholding in ADMA-OPCO, decided last year to bring the plant back on stream.

Abu Dhabi accounts for most of the two million barrels of oil produced each day by the United Arab Emirates.

ADMA-OPCO, which operates Abu Dhabi's offshore fields, is owned by British Petroleum (BP), Total-Compagnie France des Petroles (Total-CFP) and the Japan Oil Development Company (JODCO).

#90297d0460 10/24/1990 ~French/German News Agency

MOGADISHU (OCT. 24) - Violent demonstrations in the Somali capital on Tuesday left three people dead and 31 injured, Interior Minister Abdiqasim Salad Hassan announced here Wednesday.

Mr. Hassan charged that the dmonstrations were organised and staged by "hooligans and gangs bent on looting people's assets" and also caused considerable loss of both public and private property.

A policeman was killed and five others were hurt, he said.

"Food stores for the Agricultural Development Corporation, a police truck and a goods truck belonging to the National Refugee Commission were expropriated and set on fire, along with other smaller cars", the minister told a press conference Wednesday.

Organizers of the demonstration said October 23 was 'Somalia's Political Prisoners Day' and have accused the government of still holding detainees

under security laws that were scrapped when a new constitution came into force on October 12.

Mr. Hasssan said the protests "were contrary to the country's recently introduced democratic constitution which accepts expression of citizens' opinions in a peaceful way".

A Radio Mogadishu commentary said here Wednesday that the organizers of the demonstration were now being followed and investigated and would be required to defend themselves before a court of law.

-30- 1514

#90297d0480 10/24/1990 ~French/German News Agency

SINGAPORE (OCT. 24) - The United States said Wednesday it was hopeful of concluding an agreement with Singapore for the expanded use of military bases here and refused to comment on reported snags in the negotiations.

Sources confirmed that questions of cost and criminal jurisdiction over U.S. servicemen were still being discussed, but said they were part of the normal negotiating process rather than any major obstacle.

There was no indication when an agreement would be finalised to allow the Americans increased use of air and naval facilities for repair, maintenance and berthing to reduce their dependence on U.S. bases in the Philippines.

A U.S. Embassy spokesman said that "very complicated negotiations" were still under way on the Singapore offer first made in August of last year.

The spokesman said the two sides had sat down for four sessions of talks and "a few areas are yet to be settled." He did not elaborate but expressed hope for concluding an agreement "satisfactory to both sides."

The spokesman declined to comment on a report Tuesday in the International Herald Tribune that said the talks had been "slowed" by disagreements over of legal jurisdiction and cost-sharing.

The Americans reportedly balked at paying even a small amount as a direct fee for use of the facilities for fear of creating a precedent.

They were also reported to be concerned over the prospect of U.S. servicemen being tried under local laws that prescribe a mandatory death penalty for drug traffickers.

#90297d0490 10/24/1990 ~French/German News Agency

MASERU (OCT. 24) - Lesotho's exiled King Moshoeshoe II will return to the

southern African country in the near future, the country's military ruler Major General Metsing Lekhanya said here Wednesday.

In an address to Lesotho's National Constituent Assembly, Gen. Lekhanya said recent discussions between himself and the king in Britain, where he has been in exile since March this year, had been "warm and constructive".

Gen. Lekhanya said arrangements were underway for King Moshoeshoe's return to Lesotho.

Gen. Lekhanya stripped the king of his legislative and executive powers on February 21 when he refused to ratify the dismissal of four military council members.

King Moshoeshoe went into "voluntary exile" in London on March 10.

#90297d0510 10/24/1990 ~French/German News Agency

TOKYO (OCT. 24) - Japan is planning new measures to conserve energy this winter, including lower indoor temperatures and more use of public transport, the Ministry of International Trade and Industry (MITI) said Wednesday.

The plan, to be made public next week, is meant to address uncertainties in oil markets during the Gulf crisis. It will come after the government unveiled energy-saving measures in August for the first time since the 1979 oil shock.

MITI plans to call on enterprises, public utilities, stores and hotels to limit indoor temperatures to 20 degrees celsius (68 degrees Fahrenheit), one degree (two degrees) above the 1979 limit, local press reports said.

The authorities will also call on people to limit the use of lights in unoccupied rooms, to use public transport during holidays and to drive no faster than 80 kilometers per hour (50 miles per hour).

Riding bicycles will also be encouraged, the reports said.

MITI was also considering a request to gasoline distributors to lower retail prices with the stronger yen and the cost of oil down since the price surge immediately after the August 2 Iraqi invasion of Kuwait.

-30- 1356

#90297d0530 10/24/1990 ~French/German News Agency

NEW DELHI (OCT. 24) - A one-day general strike to protest at the arrest of a Hindu leader sparked off Hindu-Moslem rioting that killed at least 22 people and scores injured Wednesday.

The strike paralysed life in the Indian capital and forced authorities in several other cities and towns to impose a curfew and call out army troops to quell communal violence.

The worst affected was Jaipur, capital of the northwestern desert state of Rajasthan, where ten people were killed and over 100 injured in police firing as mobs tried to force shops to close and heed the strike call.

The army was later called out to restore order in the area after police failed to quell communal rioting, despite indefinite curfew regulations in Jaipur.

Elsewhere, three people were killed in southern Karnataka, two in West Bengal, one in Andhra Pradesh and six in the western state of Gujarat.

Sporadic incidents of violence, arson and looting were reported from many other areas as police arrested an unspecified number of arrests all over India.

The strike was called by the right-wing Bharatiya Janata Party to protest the arrest of its leader, Lal Krishna Advani, on Tuesday, during a nationwide tour that has upset Indian Moslems.

Educational institutions, markets and business establishments in several places remained closed while banks and government offices reported thin attendance.

#90297d0540 10/24/1990 ~French/German News Agency

BANGKOK (OCT. 24) - A total of 34 people drowned in massive floods in more than 30 provinces in northern, northeastern and central Thailand caused by two tropical storms earlier this month, an Interior Ministry official said here on Wednesday.

Rains from the tropical storms Ira and Lola, which swept across Indochina into Thailand from the South China Sea, had inundated 550,392 hectares (1.36 million acres) of farmland and 2,480 villages, killing more than 3,000 farm animals and damaging 2,514 roads and 113 bridges, he said.

Damage was estimated at around five billion baht (200 million dollars).

Meanwhile, Thai Prime Minister Chatichai Choonhavan on Wednesday flew by helicopter to inspect cracks in the base structure of the La Moon Bon hydroelectric dam in Nakhon Ratchasima province, some 260 kilometres (160 miles) northeast of here.

An official, contacted by telephone at Kon Buri district, a few kilometres (miles) from the dam, said the Prime Minister was shown two holes measuring about one square metre (yard) at the base of the dam, where water from the

reservoir was jetting out and flooding four adjacent sub-districts.

Mr. Chatichai also helped local officials to supervise the evacuation of some 600 villagers on to higher ground, the official said.

#90297d0570 10/24/1990 ~French/German News Agency

MOSCOW (OCT. 24) - Soviet envoy Yevgeni Primakov who arrived in Cairo on Wednesday on a new five-to-six-day Middle East tour will also go to Iraq, Interfax news agency reported.

Mr. Primakov, an advisor to Soviet President Mikhail Gorbachev, will go to Saudi Arabia, Syria and Iraq following his talks in Egypt, the agency added.

On arrival in Cairo the Soviet envoy said there were still options for a negotiated settlement in the Gulf that have yet to be explored.

Mr. Primakov met with Iraqi President Saddam Hussein in Baghdad early this month and has also visited Muscat, Rome, Paris and Washington in a bid to help settle the Gulf crisis triggered by the Iraqi invasion of Kuwait on August 2.

"Not all the approaches to a peaceful settlement (of the Gulf crisis) have been tried," he said in Cairo.

His efforts to date, he added, have yielded "positive results," but he did not elaborate.

Mr. Primakov was Thursday expected to meet President Hosni Mubarak, who is currently on a tour of the Gulf.

#90297d0640 10/24/1990 ~French/German News Agency

TOKYO (OCT. 24) - A Japanese bid to buy out Southland Corp., which operates the world's largest convenience store chain, 7-Eleven, has cleared a major obstacle, Japanese spokesmen said Wednesday.

The Dallas-based U.S. firm has filed a restructuring plan with a bankruptcy court in northern Texas, clearing the way for retail store chains, Ito-Yokado Co. and its subsidiary 7-Eleven Japan Co., to take over Southland, they said.

The Japanese group basically agreed in March to buy 70 percent of Southland for 430 million dollars on condition that the U.S. firm swap about 1.8 billion dollars worth of junk bonds for straight bonds and ordinary shares.

If approved by the court, the restructuring plan will make the swap deal mandatory under the U.S. bankruptcy code, despite objections from some holders

of high-yield junk bonds, the spokesmen said.

"It is highly possible that the court will approve the plan," Masaki Kamata, managing director of 7-Eleven Japan Co., told a press conference. He expects court approval in "three to six months."

Southland owns about 6,900 7-Eleven convenience stores in the United States and 5,900 other licensees and affiliates in the United States and 21 other nations.

LUSAKA (OCT. 24) - The South African government on Wednesday sent President Kenneth Kaunda a telegram of congratulation on Zambia's independence anniversary for the first time in 26 years of nationhood.

The message, marking the changing diplomatic scene in southern Africa, was the only remarkable event in a day of low-key celebrations, reflecting the former British colony's critical economic problems and public apathy towards the ruling United National Independence Party (UNIP).

Sources here say the opening of a South African "trade mission" may be imminent, with Zambia establishing a similar legation in Johannesburg, in contradiction of its long campaign to isolate Pretoria economically and diplomatically.

Mr. Kaunda held a reception and investiture at his official residence but the resounding speeches, military parades and aircraft flypasts which marked the early anniversaries of independence were conspicuously lacking. The country then rode a boom in world prices for copper, almost its sole export.

Members of the powerful Movement for Multi-party Democracy, which is campaigning to end UNIP's 17-year-old single-party rule, stayed at home. Mr. Kaunda has pledged to end UNIP's privileged constitutional status and hold a general election next year.

AMMAN (OCT. 24) - Saudi Arabia has refused to resume oil shipments to Jordan, which it suspended last month, Energy Minister Thabet al-Taher said here Wednesday.

Saudi authorities halted oil deliveries to Jordan on September 19, citing a five-year-old debt of 40 million dollars owed by Amman. Jordan said it believed the debt had been cancelled.

Mr. Taher, quoted by Petra news agency, said he asked the Saudi company Tapline "to resume pumping oil to Amman and to add the interest owed by Jordan on the 40 million dollars, which had been the object of a dispute between Jordan and the company, until the issue is clarified."

But he said Tapline rejected the request, saying it would only resume pumping to Jordan when the debt was settled and if it had sufficient supplies of crude oil at the time of a Jordanian request.

Prior to the cut-off, Jordan received 10 per cent of its oil from Saudi Arabia.

While Saudi authorities justified their decision by citing the financial dispute, most analysts here interpreted it as an expression of Saudi displeasure at Jordan's stand on the Gulf crisis.

Jordan has criticized the Iraqi invasion of Kuwait, although not as forcefully as other Arab states, and has strongly objected to the build-up of Western military forces in the Gulf - notably Saudi Arabia.

PARIS (OCT. 24) - The French state-owned Renault car firm will not give its view of a possible agreement between Japanese Mitsubishi and Swedish Volvo until relations between Europe and Japan have been clarified, Renault president Raymond Levy said on Wednesday.

But in any case the proposed agreement concerned only part of one Volvo factory in the Netherlands "and we cannot for a moment imagine an alliance between Mitsubishi and Volvo comparable to the current alliance between Renault and Volvo", he said.

Repeating that he was opposed to the immediate opening of the European market to Japanese cars, wherever they were built, he said either all market arrangements had to be liberalised, or none at all. "There is no question of fighting on a single battlefield chosen by the Japanese," he said.

Mr. Levy said that Japanese "transplants" in Europe raised clear dangers of excess production capacity, and said that the European steel industry had died of excess capacity after 10 years of agony which cost 100 billion francs (17 billion dollars) and 100,000 jobs.

Regarding an offer by Renault for the Czechoslovakian Skoda firm, Mr. Levy said that he would be "very disappointed" if Czechoslovakia decided instead to do a deal with German Volkswagen.

Mr. Levy made his remarks on his nomination as 1990 manager of the year by the magazine Nouvel Economiste.

#90297d1030 10/24/1990 ~French/German News Agency
STRASBOURG, France (OCT. 24) - European Commission President Jacques Delors urged here Wednesday that the 12 European Economic Community countries agree to set a date for the next phase of economic and monetary union.

Speaking at a press conference to preview an EEC meeting of heads of state and government in Rome at the weekend, he said "one or two countries" should not be allowed to delay the process.

This was a clear reference to Britain, which has opposed setting a date for the start of phase two towards economic and monetary union.

Mr. Delors, president of the executive arm of the EEC, urged that a date for phase two be set, not at this weekend's meeting as expected, but at the next summit in Rome in December. He said such a date should be announced along with a set of "objective criteria".

If these criteria are reached on schedule, he said, the EEC 12 could move from a first phase of economic alignment into phase two - creation of an EEC central bank which would start working, with a common currency, in the third phase.

Most of the 12 are divided on whether phase two should start on January 1, 1993, or a year later. Britain is the only country firmly to reject any date at all.

#90297d1130 10/24/1990 ~French/German News Agency
Kathmandu (OCT. 24) - Over 100 lawyers of the Nepal Bar Association Wednesday staged a silent protest march through the main thoroughfares of the Nepalese capital to protest against what they called the Nepalese royal palace conspiracy against the people.

The march, which began at the Nepalese Supreme Court, was organised to ''alert the people against any conspiracy from any quarter, including the royal palace''.

At a mass meeting held by the lawyers, speakers including the Bar Association President, Kusum Shrestha, lambasted the King Birendra and the Nepalese royal palace, freely using derogatory langauge.

Meanwhile, Nepalese Prime Minister Krihsna Prasad Bhattarai told newsmen that he was unable to say when the new, democratic, multi-party constitution would come into force. Even the king did not know, he added.

In what observers here described as a significant development, the supreme leader of the Nepali Congress, Ganesh Man Singh, Prime Minister Bhattarai, who is also acting president of the Nepali Congress Party, and the party general secretary, Girja Prasad Koirala, collectively met King Birendra Wednesday evening.

For the past four days there has been a virtual deadlock betwen King Birendra and the interim government over the promulgation of the new constitution.

The king, who was given the draft of the constitution - prepared by a panel and further refined by the interim government - wanted what reports said were ''major changes'' in the draft before it was promulgated.

These changes included greater power to the monarch and sovereignty vested jointly in the people and the king.

Except for some minor points, the Nepalese government has rejected the king's proposals, and the deadlock has been the result.

HAVANA (OCT. 24) - A cuban aircraft carrying 24 passengers and seven crew crashed on landing at Santiago de Cuba airport Wednesday, Cuba's Prensa Latina news agency reported.

There was no immediate information on whether anyone survived the crash of the Yak-40 plane belonging to Cubana de Aviacion airline.

The aircraft was on a domestic flight from Camaguey to Santiago de Cuba about 900 kilometres east of the capital Havana.

The government has set up a commission of inquiry.

#90297d1590 10/24/1990 ~French/German News Agency

Ankara (OCT. 24) - Turkish President Turgut Ozal said here Wednesday his country would lose economically after the end of the Gulf crisis because it has been actively supporting the United Nations embargo against Iraq.

Turkey could not hope to regain Iraq as an export market or a source of crude oil because Ankara had cut Iraq's vital oil pipelines to the Mediterranean Sea he told Western businessmen.

The United States, Europe and Japan should therefore help Turkey, he noted. Unrestricted trade would be preferable to aid.

Ozal voiced hopes that the embargo against Iraq would force it to pull out of Kuwait, and he warned that ''disregard for the embargo by a single country would encourage Iraq in its intransigence and aggravate risks of war''.

Meanwhile, a military prosecutor Wednesday indicted a Turk for spying for Iraq.

Ahmet Alver, a former oil industry official, had provided information about Turkish air bases, refineries and oil pipelines to Iraqi military attaches in Ankara in return for money, the prosecutor said.

Alver was arrested in September and reportedly confessed later to secret service officials that he had been trained in Baghdad for two weeks on espionage techniques. Alver's trial is to begin on November 13. He faces up to 24 years in prison if found guilty.

#90297d1610 10/24/1990 ~French/German News Agency

PARIS (OCT 24) - The United Nations Educational, Scientific and Cultural Organisation (Unesco) Wednesday decided here to discuss the alleged Iraqi destruction of Kuwait's culture.

Unesco's executive council accepted a Kuwaiti call to hold a meeting on ''Iraq's destruction of educational, cultural and scientific installations''.

It said the planned gathering would also debate Unesco's possibilities to help implement the U.N.-ordered sanctions on Iraq to force it to withdraw from Kuwait.

Reports said Iraqi troops had been dismantling Kuwaiti school and university installations as well as confiscating artifacts from Kuwait's national museum.

KHARTOUM (OCT 24) - Sudanese government troops fought a fierce battle with the Sudan People's Liberation Army (Spla) near the southern town of Yei, 160 kilometres south-west of Juba, capital of southern Sudan, a military source told the Sudan News Agency (Suna) Wednesday.

The report did not say when the fighting took place but said 22 Spla soldiers were killed and a great number of them wounded in the battle. On the government side, the source said, only one soldier was injured.

The report added that nine rifles, one mortar and many rounds of ammunition were captured from the Spla.

Last monday a military source said the government-supported paramilitary force known as the Friendly Force had killed 37 Spla rebels at Melut, in the Upper Nile region of southern Sudan.

Observers said the reports indicated that that the ceasefire declared by the Sudanese leader, General Omer Beshir, to allow the immunisation of children in the war-affected zones, was not holding.

BUDAPEST (OCT 24) - A summit meeting of the Warsaw Pact scheduled here on November 3 and 4 was indefinitely postponed Wednesday at Moscow's request.

Hungarian Foreign Minister Janos Hermann, who announced the postponement, gave no details of the Soviet request. The meeting had been due to discuss the future of the Soviet-lead Eastern European alliance.

The Hungarian news agency Mti quoted well-informed sources as saying that the summit meeting would be held after the European security conference in Paris from November 19 to 21.

Hermann dismissed suggestions - as did official sources in Prague - that the postponement had been prompted by a recent call by Czechoslovak President Vaclav Havel for the disbanding of the Warsaw Pact.

Prague sources said the postponment was chiefly the result of the unclear political situation in Moscow, especially the position of Soviet Prime Minister Nikolai Ryzhkov.

In Warsaw, newspapers quoted the Polish news Pap as saying that Moscow took the view that the Budapest summit meeting should be held after the Paris conference at which both the Warsaw Pact and the North Atlantic Treaty Organisation (Nato) intended to declare an end of the ''hostile attitude'' towards each other.

WASHINGTON (OCT 24) - President George Bush has asked Israel to cooperate with a U.N. mission charged with probing the deaths of 22 Palestinians killed by Israeli police two weeks ago.

Bush sent the message in a delicately phrased letter Tuesday to Israeli Prime Minister Itzhak Shamir, a State Department spokeswoman said.

The letter offered condolences on the stabbings of at least five Jews in the aftermath of the killings, and restated concerns that Israeli events not divert attention away from Iraq.

The spokeswoman said Bush also made a point of saying he would prefer Israel's cooperation with a mission to be sent by U.N. Secretary-General Javier Perez de Cuellar to probe the incident.

The U.N. Security Council passed a resolution last week condemning Israel for using excessive force in the killings, which occurred October 8 in response to the stoning of Jewish worshippers at the Western Wall.

Shamir's cabinet rejected the resolution and refused to cooperate with a U.N. probe. The Security Council was to meet Wednesday afternoon to consider a second resolution responding to the Israeli refusal.

State Department spokeswoman Margaret Tutwiler said deliberation over the resolutions had ''diverted attention from where we feel attention should be placed, which is on Iraq and on the Gulf.''

She said she also hoped tensions would ''rapidly calm down'' in Israel so borders between Israel and the occupied West Bank and Gaza strip could be reopened.

WASHINGTON (OCT 25) - Israel has rejected an appeal by U.S. President George Bush that it cooperate with a U.N. investigation into the killing of Palestinian protesters in Jerusalem, U.S. officials said Wednesday.

Mr. Bush sent a letter to Israeli Prime Minister Yitzhak Shamir Tuesday asking him to change his position before the U.N. Security Council votes on a resolution deploring his government's refusal to receive the U.N. mission, the White House said.

The U.S. officials, who declined to be named, said late Wednesday that Israel's response to the appeal was negative, setting the state for a U.N. Security Council vote later Wednesday.

The mission appointed by U.N. Secretary General Javier Perez de Cuellar was to investigate a riot on Jerusalem's Temple Mount October 8 in which police opened fire on Palestinian protesters, killing 22. The protestors were throwing stones at orthodox Jews praying at the city's Wailing Wall.

Israel says such a mission would violate its sovereignty.

White House spokesman Marlin Fitzwater said Mr. Bush asked Mr. Shamir in the letter to cooperate with the U.N. mission while expressing his condolences over the deaths of three Israelis killed in a knife attack by a Palestinian.

At the State Department, spokeswoman Margaret Tutwiler said the letter also restated U.S. policy that "it is important for all of us to have the focus back on Iraq."

"And yes, there is a portion of the letter that says, which the president has said publicly, that our preference would be, if they can find a way to let the secretary general's mission come to Israel," she said.

The U.N. Security Council Tuesday gave the United States 24 hours to get Israel to drop its refusal to accept the U.N. mission.

The Security Council was supposed to vote Wednesday on a resolution deploring Israel's position and asking it to receive the mission, which was to report back to the council by the end of the month.

Ms. Tutwiler declined comment on whether the United States would vote in favor of such a resolution.

#90297d3540 10/24/1990 ~French/German News Agency
WASHINGTON, (OCT 24) - President George Bush hosts leaders of 11 Pacific island nations in an unprecedented Honolulu summit Saturday that will focus on environmental issues as well as economic and security cooperation.

A senior administration official said the parley, to be held at the East-West Center of the University of Hawaii, reflected "the president's strong personal interest in the region" and the U.S. "interest in the development of these new democracies in a region that that we consider as part of our extended family."

The official, who spoke on condition of anonymity, was referring to the presence of the U.S. state of Hawaii and the U.S. territories of Guam, American Samoa and the Commonwealth of the Northern Mariannas in a region of great strategic importance to Washington.

The eleven confirmed participants are Prime Minister Geoffrey Henry of the Cook Islands; Prime Minister Ratu Sir Kamisee Mara of Fiji; President Ieremia Tabai of Kiribati; President Amata Kabua of the Marshall Islands; President John Haglelgam of the Federated States of Micronesia; President Bernard Dowiyogo of Nauru; Prime Minister Rabbie Namaliu of Papua New Guinea; Prime Minister Solomon Mamaloni of the Solomon Islands; King Taufa'ahau Tupou IV of Tonga; Prime Minister Bikenibeu Paeniu of Tuvalu; and Prime Minister Tofilau Alesana of Western Samoa.

Premier Sir Robert Rex of Niue declined the Bush invitation while Prime Minister Walter Lini of Vanuatu has yet to respond.

High on the agenda of the four-hour meeting will be the safety of the U.S. chemical weapons destruction facility on Johnston atoll, located about 800 miles (1224 kilometers) south-southwest of Hawaii.

The 15 members of the South Pacific Forum -- a regional grouping -- have expressed concern about the environmental impact of burning the aging U.S. chemical stocks, including some that are being moved from storage sites in West Germany.

To allay these fears, Washington has sent briefing teams to 11 of the 15 South Pacific Forum nations. In September, a delegation of Forum leaders discussed the issue in Washington with senior U.S. officials.

#90297d3740 10/24/1990 ~French/German News Agency
HAVANA (OCT 24) - A Cuban airliner carrying 31 people on a domestic flight crashed in eastern Cuba Wednesday, killing at least ten passengers and injuring 12 others, the Cuban news agency AIN reported.

The Soviet-made, triple-engine (eds. correct) Yak-40 went down as it was preparing to land at Santiago, 960 kilometers (630 miles) east of Havana. It was carrying 24 passengers and a crew of seven.

Five of the dead were five Cubans, four were German tourists and the nationality of the 10th was not immediately known.

The 12 injured were Spaniards, three of them in critical condition, AIN reported.

Helicopters were used in the rescue operation because the rough, hilly terrain around the crash site made it inaccessible to vehicles, AIN said.

The plane had taken off early Wednesday from Camaguey, a city half-way between Havana and Santiago.

#90297d8350 10/24/1990 ~French/German News Agency

BEIJING (OCT. 24) - China is threatened by a new round of inflation unless the central government keeps a firm grip on the economy, the State Statistical Bureau said Wednesday.

The warning came a day after Chen Jinhua, minister of the State Commission for Restructuring the Economy, said Beijing planned to tightened its control over the economy as it leads China into a new era of reforms.

State Statistical Bureau spokesman Zhang Zhongji told a press conference that due to injections of cash into the economy to pull China out of a near-recession, "the potential for inflation will increase."

"Therefore, macro adjustment (of the economy) should be further improved and enhanced," he told a press conference, referring to greater central government control.

While the government would continue to relax the austerity program it began two years ago, "aggregates shall be kept under control in order to avoid another overheated economy, and inflation rebounding," he said.

Retail prices increased by an average 2.3 per cent between January and September compared to the same period last year, a far cry from the double-digit rises that sent China's economy into crisis in 1988.

China careened to the brink of recession as a result of inflation-fighting austerity measures imposed by Premier Li Peng, which included a squeeze on credit and a halt to most capital spending projects.

Mr. Chen told a blue-ribbon group of Chinese and international business leaders Tuesday that China's new Five-Year Plan would see Beijing gradually end price controls, letting market forces take over.

But he made it clear that the central government and its economic planners would retain their control over reforms, to the detriment of provinces that have been seeking greater autonomy from Beijing.

"Central macro-regulation must be made more scientific, authoritative and effective," Mr. Chen was reported as saying by the official New China News Agency.

Diplomats say a fierce debate over the degree of central control is a major reason why the Communist Party central committee has yet to meet to approve the Five-Year Plan.

The plenum now is expected to take place in December.

HONG KONG (OCT. 24) - Hong Kong's Trade Development Council (TDC) will organise its first trade mission to South Africa in January in a bid to diversify its export market, a TDC spokesman said Wednesday.

The spokesman said a score of Hong Kong firms were expected to join the 10-day mission.

Hong Kong lifted voluntary sanctions against South Africa on investments, loans and tourism in August, after the release from jail of African National Congress leader Nelson Mandela, but mandatory sanctions affecting imports of iron and steel and gold coins remain in place.

The mission to South Africa, traditionally one of Hong Kong's top trading partners, is seen as part of a bid to reduce dependency on the U.S. market.

#90297d8390 10/24/1990 ~French/German News Agency
HANOI (OCT. 24) - The Vietnamese government last month approved 11 new foreign investment projects worth a total 104.2 million dollars, the Nhan Dan newspaper reported.

The foreign share in the 11 projects -- including five in the industrial sector, two in the transport sector and one each in tourism, fisheries, agriculture and construction -- was worth 68 million dollars, it said.

Nhan Dan said that excluding oil exploration projects, the ventures set up in September were much larger than those approved in the three previous months.

The newspaper cited as one example a Soviet coffee growing and processing project with a capital of 43 million dollars.

A total 193 projects worth some 1.311 billion dollars -- 822 million dollars of it provided from overseas -- have been approved between December 1987, when a new foreign investment code came into effect, and the end of September 1990.

U.S. firms, however, are still barred from trading with Vietnam under an embargo slapped on Hanoi after the reunification of the communist north with the U.S.-backed south in 1975.

Other Western nations have limited but growing trade with Vietnam.

#90297d8480 10/24/1990 ~French/German News Agency

SINGAPORE (OCT. 24) - Singapore authorities expect a new sharp rise in oil trading in the island republic, which has already become the world's third largest trading center after New York and London.

Trade and Industry Minister Lee Hsien Loong said Tuesday the market here took off after 38 oil firms accepted Singapore's offer to set up trading headquarters under the Approved Oil Trader (AOT) scheme.

The AOT scheme, administered by the Trade Development Board, was introduced in January 1988 and offers a concessionary 10 per cent tax rate on income from international trading activities for five years.

Brigadier General Lee, speaking at an AOT certificate presentation ceremony,

said the firms had committed themselves to substantially increasing their oil trading, physical brokering and futures activities in the republic.

He said oil trading was expected to increase by 120 per cent to 53 billion Singapore dollars (31 billion U.S.), although he gave no time frame.

Physical brokering was expected to rise nearly seven-fold to 5.5 billion dollars (3.5 billion U.S.) and futures trading in Singapore International Monetary Exchange from zero to 6.6 billion dollars (3.9 billion U.S.), he said.

Brig. Gen. Lee, Premier Lee Kuan Yew's son, added that these companies which served markets stretching from the East of Suez to the West Coast of America would generate spin-offs for related sectors of Singapore's economy.

"With its strategic location at the crossroads of the major Asia Pacific trade and shipping routes, Singapore enjoys the natural advantage of a global trading center," he said.

"Any international firm wishing to set up oil trading operations today in Singapore will be able to plug in to our global transport and telecommunication network."

TOKYO (OCT. 24) - Japan will offer to scrap tariffs on an additional 58 products on a mutual basis, on top of a total of 3,152 products already pledged, government officials said Wednesday.

They hoped that the step to be taken on condition that other industrialized countries follow suit will act as a spur toward final agreement in the Uruguay Round of trade-liberalizing talks under the General Agreement on Tariffs and Trade (GATT).

The 58 new items include chemical, steel, aluninium and paper products.

Japan pledged to abolish tariffs on the earlier 3,152 products at a meeting with trade ministers from Canada, the European Economic Community (EEC) and the United States held two weeks ago in St. John's, Canada.

In the latest offer to GATT negotiating groups concerning tariffs and non-tariff barriers, Japan will also offer not to impose any tariffs on 10 items, including such raw materials as manganese and tungsten, keeping their current tariff-free status, the officials said.

But Japan will make it clear that it does not accept the EEC's request that it shoul scrap import quotas on leather products, they said.

#90297d8600 10/24/1990 ~French/German News Agency
HANOI (OCT. 24) - Vietnamese industry is not using investment efficiently and many firms are in a critical shape, the official Nhan Dan newspaper commented Wednesday.

The daily said labor, raw materials and technology were the major factors determining production efficiency, adding that in recent years efficiency had not been studied carefully enough before investment of large sums of money.

As a result "this capital has not been able to increase in value."

Equipment was being used at less than 60 percent of capacity, while costs of materials in the industrial sector had grown from 61.2 percent in 1986 to 71.3 percent in 1989.

Fixed assets had fallen in value and were not being renewed while the sector also suffered from backward technology compared to that in other countries.

The newspaper said that 80-90 percent of industrial establishments at district level, 50-60 percent of firms at provincial level and 15-20 percent of national level companies are in a critical situation.

They are loss-making, in debt and insolvent and "are unable to determine their production orientation," while their products are shoddy and cost prices heavy. The main reason for this was a lack of technology and technical expertise.

"The big lesson for industrial establishments is that to be able to keep running and develop there are no other options, other than overhauling management, than to stress investment in depth to improve and renew... equipment and technology," the newspaper ediorial said.

#90297d8610 10/24/1990 ~French/German News Agency

SEOUL (OCT. 24) - South Korea's top auto maker Hyundai opened its third auto plant in the industrial city of Ulsan, capable of manufacturing annually 240,000 new 1,500-1,600cc passenger cars named Elantras, Hyundai announced Wednesday.

With the operation of the new plant, Hyundai can now annually manufacture one million motor vehicles to become the world's 10th ranking auto maker, the announcement said.

It took two years to complete the construction of the third plant at a cost of 410 billion won (569 million dollars). It will also produce DOHC (double overhead camshaft) engines, the announcement said.

Industrial sources said South Korea's overall annual automobile production capacity now stands at two million units, by taking into account Kia's 530,000, Daewoo's 400,000, and two other small auto makers.

Last year, South Korea produced 1.12 million units, and plans to make 1.32 million units this year, 370,000 of them for export, the sources added.

#90297d8680 10/24/1990 ~French/German News Agency

SANTIAGO (OCT. 24) - Saying that Chile cannot continue as two countries, one rich, the other poor, Finance Minister Alejandro Foxley has announced plans to boost programs for the poor and to spur investment in the private sector.

In a speech broadcast late Tuesday by radio and television networks, Mr. Foxley said that the government of President Patricio Aylwin would persist in its economic belt-tightening to control inflation "without retreats or vacillations."

"In Chile there can no longer coexist two countries, one rich and developed, the other poor and underdeveloped," he said. "This government is virtually

committed to integrate all Chileans in development."

To help the poorest Chileans, he said the government would increase spending in education, health, housing and social programs by 900 million dollars above the 1990 budget inherited in March from Mr. Aylwin's predecessor, General Augusto Pinochet.

"We are dedicating our best efforts to improve the condition of the most poor. We are opening channels for the middle class to rise," he said.

Rising gasoline prices in the wake of the Gulf crisis have complicated Chile's economy, he noted. The price spiral already accounts for an extra 700 million dollars spent this year, since Chile imports 85 percent of the petroleum it consumes, he explained.

Mr. Foxley also announced the goverment would stimulate investment in the private sector to encourage new jobs.

"We are going to push toward the integration of Chile in the world economy. We are going to modernize this country, so that all Chileans may benefit," he said.

He emphasized that the government would not favor any particular group and the importance of maintaining economic order.

"We are not going to spend more than we have. We are not going to give in to any demands that the country cannot rationally finance," he said in an appeal for Chileans to cooperate in the economic plan.

#90297d9170 10/24/1990 ~French/German News Agency

LONDON (OCT. 24) - The price of Brent North Sea oil continued to rise in early trading here on Wednesday supported by U.S. statistics showing a fall in weekly U.S. oil stocks.

The American Petroleum Institute said late on Tuesday that stocks of crude oil held in the United States had fallen by 2.9 million barrels and that stocks of petrol had fallen by 3.3 million barrels.

These figures strengthened the view that the market had been oversold, and the price of Brent for December delivery rose to 28.90 dollars a barrel compared with 28.45 dollars a barrel at the close on Tuesday.

On Monday the price of Brent had fallen by more than five dollars as market traders perceived an easing of the position of Saudi Arabia regarding an Iraqi withdrawal from Kuwait. But Saudi Arabia subsequently published a statement that its policy demanding an immediate and total withdrawal from Kuwait had not

changed.

Barclays de Zoete Wedd analyst Lucy Haskins said that the market was "now waiting for further news from the Gulf" and that "prices would go over 30 doLlars easily if there was a deterioration of the situation in the Gulf".

LONDON (OCT. 24) - Directors of the cash-starved Anglo-Turkish trading group Polly Peck International were under growing pressure to appoint administrators early on Wednesday, sources close to creditors said here.

Meanwhile board members prepared for a progress report on attempts to save the stricken conglomerate.

Asil Nadir, chairman and chief executive of the fresh fruit to electronics company, was due to tell the board later on Wednesday whether he had been successful in raising funds to cover short-term debts on his return from a trip to Turkey and his native Northern Cyprus.

Creditor sources were expecting a report to them from Mr. Nadir soon after the board meeting. No statement on the likelihood of success was available from Polly Peck.

The amount of cash which would satisfy creditors for the time being has not been released, but reliable estimates put the sum at around 30 million pounds (60 million dollars). The company's long-term indebtedness is believed to exceed one billion pounds (two billion dollars).

Failure to convince creditors of the company's long-term viability could result in the board being forced to appoint administrators -- a legal move designed to protect creditors which removes control from a company's directors.

A steering committee of major creditors, mostly banks, recently gave Polly Peck until November 9 to find the cash to cover short-term commitments, but some creditors have already broken ranks.

HANOI (OCT. 24) - Vietnam welcomed Wednesday the decision by the European Economic Community (EEC) to forge diplomatic ties with Hanoi.

"We welcome the EEC decision to establish diplomatic relations with Vietnam and believe such ties are in the interests of Vietnam and the EEC countries as well as the tendency towards strengthening cooperation and development in the world," a Foreign Ministry official said.

French Foreign Minister Roland Dumas told reporters in Luxembourg on Monday that EEC foreign ministers meeting there had decided on "improved diplomatic and economic relations" with Vietnam.

Diplomatic sources said the move was made possible by Vietnam's troop withdrawal from Cambodia 13 months ago and Hanoi's willingness to cooperate with Britain over the problem of boat people in Hong Kong.

Vietnam first requested the establishment of official relations with the 12-state EEC in September 1987.

WINDHOEK (OCT. 24) - Namibian opposition parties Wednesday sharply criticized the appointment of a former guerilla commander, accused of torturing dissidents and alleged spies, as army commander.

The defence ministry on Tuesday announced Major General Solomon "Jesus" Hawala had been named army commander, effective immediately.

Maj. Gen Hawala headed security for military wing of the ruling South West African People's Organisation (SWAPO) before Namibian independence on March 21. He was widely blamed for the murder, torture and disappearance of hundreds of Namibians in SWAPO camps in Angola and Zambia.

He has been dubbed the "Butcher of Lubango", after a town in southern Angola where a SWAPO camp was located.

The opposition Democratic Turnhalle Alliance (DTA) said in a statement that the appointment was "surely not in the best interest of Namibia".

The Alliance recalled that almost every family in Namibia had been touched in some way by the almost 23-year guerilla war waged against the South African occupiers and that "the wounds on both sides are still fresh".

Last month the influential Africa Confidential newsletter said the move to appoint Maj. Gen Halawa had deepened divisions within SWAPO, leading several ministers, including Prime Minister Hage Geingob, to threaten to resign.

In a strongly-worded statement, Namibia's National Society for Human Rights (NSHR) also condemned the appointment, saying "Mr. Hawala is well-known...because of his supervision over the notorious SWAPO security service".

The Society called on "the international community, including donor nations and foreign diplomats in Namibia, to take serious note of this irresponsible

and insensitive move".

Last year a United Nations-backed investigation into missing detainees in Zambia and Angola found that 315 people could not be traced and it called for further investigation.

The SWAPO government has stated repeatedly that it released all detainees.

Revelations by returning exiles last year of torture and murder in SWAPO camps cost the organisation thousands of votes in the independence elections of November.

Maj. Gen Halawa's appointment was also condemned by the opposition National Party and the Namibian Patriotic Front.

KHARTOUM (OCT. 24) - Sudan's military junta has freed 45 political detainees, the armed forces newspaper Al Guwwat al Musalaha reported Wednesday.

They included the number two in the collegial presidency, Idriss el Banna, which was disbanded in last year's June 30 coup, the newspaper said, quoting security services sources.

Mr. Banna, a member of ousted prime minister Sadek el Mahdi's Umma party, was among those immediately jailed when current military ruler General Omar el Beshir took power.

He was subsequently tried for financial irregularities and given a 20-year jail term. When the high court quashed the sentence, the authorities kept him in detention on political grounds.

#90297d9440 10/24/1990 ~French/German News Agency

JAKARTA (OCT. 24) - Indonesian President Suharto promised Wednesday to punish the editor of the tabloid weekly Monitor for publishing a ''poll'' slandering Islam's Prophet Mohammed.

A spokesman for the influential Islam organisation, Muhammadiyah, quoted Suharto as telling leaders of the group that Monitor's editor, Arswendo Atmowiloto, must take the responsibility for publishing a poll which hurt the feelings of the Moslem community.

The poll of ''50 Most Admired Figures'' in Monitor's October 15 issue placed the Prophet Mohammed below Indonesian ministers and pop singers. President Suharto emerged first on the list.

The Ministry of Information revoked Monitor's publication permit Tuesday. Angry Moslem youths had stormed the Monitor office here Monday causing damage and injuring several people.

Seven university students were detained following the incident while Arswendo was picked up for interrogation by the police.

One Islamic leader took the view that the Monitor publication was more serious than Salman Rushdie's book The Satanic Verses because Monitor spelled out the Prophet's name while Rushdie's book does not.

BANGKOK (OCT. 24) - Thai police on Wednesday arrested two members of an organization blamed for instigating protests here aimed at bringing down the government, during which a student committed suicide.

Yongyuth Wattanavikorn and Praderm Butrdee, alleged members of the organization known as the Revolutionary Council, were separately arrested after warrants were issued last week, police said.

The Revolutionary Council has called for the setting up of a socialist-style one-party state.

Police said they were still looking for other members of the council, accused of having masterminded rallies by small groups of radical students which took a dramatic turn when one of the students, Thanawut Klingchua, set fire to himself.

The incident occurred October 14 outside Ramkhamhaeng University, on the outskirts of Bangkok, during a demonstration pressing for the resignation of Prime Minister Chatichai Choonhavan's government. The administration has been shaken by infighting among ministers for the past few months.

Wednesday's arrests brought to nine the number of people detained by police since Mr. Thanawut's self-immolation.

Prime Minister Chatichai is to attend the student's cremation ceremony Thursday at a Buddhist temple in Nakhon Si Thammarat, officials said.

Strict security measures have been mapped out for his visit, an official said.

TEHERAN (OCT. 24) - Iranian spiritual leader Ali Khamenei on Wednesday urged

Moslems to arm Palestinians, congratulated the Palestinian who knifed three Israelis to death in Jerusalem last Wednesday, and condemned Moslems' fear of the United States, Radio Teheran reported.

He called on the "the leaders and peoples of Islamic countries to supply Palestinians with weapons and equipment" and said that "criminal Zionism is the enemy of Islam".

Speaking at a public meeting, he said that "all-out support for the Palestinian Islamic revolt is a religious and imperative duty for all Moslems".

Mr. Khamenei said that "the Islamic comunity must be vigilant in opposing cunning Zionists who have seized part of the territory belonging to Moslems".

If the leaders of Islamic countries and their peoples had been vigilant, the United States would not have been able to save Israel, he said.

The ennemy was not so strong, but Moslems under estimated their strength, he said, and he criticised "the silence of international organisations, supposed defenders of human rights, on the atrocities and crimes committed by the Zionist regime".

He deplored what he termed the fear shown by the leaders of Islamic countries towards America and Israel, and paid tribute to Palestinians who had knifed three Israelis to death in Jerusalem.

"Moslems, wherever they are, must shoulder their responsibilities regarding this important Islamic problem and help those who are fighting against the illegitimate regime in Israel inside and outside Palestine.

Mr. Ali Khamenei said that "Moslems must supply money and arms to the Palestinians and help them with propaganda", adding that "this support is a religious duty until the complete failure of Zionism and of its allies".

DHAKA (OCT. 24) - Brisk trading and price rises marked the 24th Chittagong tea auction, the BSS news agency reported here Wednesday.

The prices were higher Tuesday in comparison to several past auctions, the agency said, quoting market sources, adding that Iran and East Europeon countries dominated the auction.

Green tea was almost sold out with prices ranging between 72.40 taka (two dollars) and 73 taka (2.02 dollar), while leaf stood at 82 taka (2.27 dollar) respectively per kilogram (2.2 pound).

BSS said 7,190 chests of tea were offered for sale, but gave no other details.

ABU DHABI (OCT. 24) - The United Arab Emirates (Uae) and Egypt Wednesday reaffirmed their rejection of Iraq's occupation of Kuwait and called for the withdrawal of Iraqi troops and the reinstatement of the legitimate Kuwaiti government.

The call was made by President Sheikh Zayed Bin Sutlan al Nahyan and Egyptian Presiden Hosny Mubarak during talks on the Gulf crisis and efforts to implement Arab and United Nations resolutions denouncing Iraqs August 2 invasion of Kuwait, the emirates' news agency Wam reported.

''The two leaders reaffirmed their firm and stated stand towards the Iraqi aggression against brotherly Kuwait and their rejection of this aggression and the need for a full and unconditional Iraqi withdrawal and return of the legitimate Kuwaiti government under the leadership of Sheikh Jaber al Ahmed al Sabah,'' Wam quoted a responsible source as saying.

He said Sheikh Zayed expressed appreciation for Egypt's attitude towards the Gulf crisis and described Cairo's its stands as a source of pride for all, according to Wam.

JUBAIL, SAUDI ARABIA (OCT. 24) - Economic sanctions against Iraq are "beginning to bite" and Iraqi forces are having difficulties obtaining aviation fuel and lubricants for tanks, British Air Chief Marshal Sir Patrick Hine said here Wednesday.

"I'm not going to say that the application of sanctions is going to bring Saddam Hussein down in the next few weeks or even months," Sir Patrick, the joint commander of British forces in the Gulf, told reporters.

"But life will get more difficult for him as time goes by if we can enforce the embargo effectively, which we appear to be doing at the moment," he said.

"There is some evidence that (sanctions) are beginning to bite," Sir Patrick said. "I think we can see that the refinement of crude oil to aviation fuel, lubricants to tanks and other vehicles is becoming more of a problem."

Sir Patrick noted there was no guarantee the U.N.-imposed sanctions would bring about an Iraqi withdrawal from Kuwait. He said military and other options were being kept open.

"I can't be confident that the sanctions will work to the extent that they will force him to withdraw from Kuwait," he said. "If after a period of time our political leaders decide they have given him long enough there will be other options open to them."

Sir Patrick said there was no evidence of a partial withdrawal of Iraqi forces from Kuwait.

"He is well dug in in Kuwait," he said. "I can see absolutely no sign at all that he is planning to withdraw from any part of Kuwait.

"There have been fairly regular tactical redeployments of individual units but the overall trend has been toward increasing his military presence in Kuwait and it seems to me that he is determined at the moment to stay there."

#90297d9620 10/24/1990 ~French/German News Agency

BONN (OCT. 24) - The Saudi Arabian ambassador to Germany, Abbas Faig Ghazzawi said Wednesday his country expected a long stalemate in the Gulf crisis that left room for a negotiated settlement.

Ghazzawi, who said chances of war were diminishing day by day, reiterated Saudi Arabia's support for United Nations resolutions on the crisis.

There could be no negotiations with Iraq until it had withdrawn from Kuwait and allowed the restoration of the legitimate Kuwaiti government, he said, contradicting reports that the Saudis were prepared to accept territorial concessions by the emirate.

Ghazzawi also denied that Saudi Arabia had sought German arms in recent years, saying that repeated statements by German politicians that no weapons would be sent to Riyadh were ''actually offensive''.

''The kingdom has made no applications whatsoever for the purchase of weapons or military equipment from the German government,'' said a statement by the Saudi defence ministry that Ghazzawi made available to the press.

The Saudis said they could buy all the weapons they needed on open world markets.

#90297d9630 10/24/1990 ~French/German News Agency

TOKYO (OCT. 24) - Japan and the European Commission begin two days of high-level trade consultations here Thursday, but with little hope of making significant headway on crucial issues, officials said Wednesday.

Officials from both sides said the main issue of Japanese car exports to the European Economic Community (EEC), of which the European Commission is the executive arm, is not even on the agenda of the talks.

The talks will include an overview of the international situation, including the effects of the Gulf crisis, of bilateral ties and of progress made within the framework of the bilateral working group on trade issues.

At the working group's latest meeting in Brussels early this month, the European Commission said it regretted continuing disagreements between the two sides and criticized what it termed persistent Japanese protectionism.

One European official said EEC members were likely to make no secret at this week's meeting of their exasperation with what they see as inertia from Japan, which they expect to "once again hide behind GATT."

Japanese officials have so far persistently referred main points of discord in bilateral trade, such as farm products and leather goods, to the General Agreement on Tariffs and Trade (GATT).

They say it would be useless to deal with such issues before the final meetings in Brussels in December of the Uruguay round of GATT talks.

The Japanese also say the EEC has yet to make suggestions on reducing its own farm subsidies - further reason to reject European accusations of Japanese protectionism.

Japanese officials said, however, that they could make a gesture to the EEC on leather goods, subject to a 60 percent levy by Japanese customs.

But a foreign ministry official here said Tokyo preferred to discuss these matters "once better cooperation is achieved between Japan and the EEC on overall issues."

#90297d9660 10/24/1990 ~French/German News Agency
SUVA (OCT. 24) - Papua New Guinea and Fiji will ask U.S. President George Bush to grant small Pacific island countries freer trade access with the United States, Papua New Guinea's Foreign Minister Michael Somare said here Wednesday.

Sir Michael said that resource-poor island states, which mainly trade with Australia, New Zealand and South East Asia, hoped Washington would give preferential access for manufactured goods such as textiles.

Heads of 13 Pacific states will meet Mr. Bush during a special summit on Saturday in Hawaii.

On a private visit to Fiji, Sir Michael said superpowers could help island states develop trade.

Papua New Guinea had limited trade with the United States although U.S. firms had large mining and oil interests in his country, he said.

"We don't do much trade with them, they don't buy enough from us. We would like to trade more, especially if we're going into industrialisation."

He said Port Moresby viewed Saturday's summit as "an historic occasion. This is the first time an American president will meet our leaders at one time."

United States Information Service spokeswoman Judith Moon in Suva said that while there is "no fixed agenda for the meeting I would assume regional concerns and general global things from the U.S. perspective" would dominate talks.

There may also be "some concerns" of individual heads of states that they could raise with Mr. Bush, she said.

One topic that could feature prominently is the storage and incineration of U.S. chemical weapons on Johnston Atoll, near Hawaii.

#90297d9680 10/24/1990 ~French/German News Agency
MANILA (OCT. 24) - Philippine President Corazon Aquino and congressional leaders agreed at a meeting here Wednesday to implement drastic spending cuts and sell off major state firms to curb the ballooning public sector deficit.

They also agreed in a "budget summit," held against the backdrop of a violent general strike for higher wages, to scrap proposals for new taxes.

Among the firms to be privatized is Philippine Airlines (PAL), the national flag-carrier which last week reported a record profit of 584 million pesos (22.7 million dollars) in its last fiscal year.

"We have decided upon expenditure cuts as the major means by which the consolidated public sector deficit can be reduced," the statement said.

Observers said the agreement appeared to be a defeat for Mrs. Aquino, who had earlier insisted on new taxes rather than slashing government services.

The agreed measures would cut the deficit to 3.4 percent of the gross national product (GNP) for 1991 instead of the projected 5.4 percent of GNP.

In money terms this would cut eight billion pesos (311 million dollars) from the projected deficit for 1990, 55 billion pesos (2.14 billion dollars) from 1991 projections, and lop off 80 billion pesos (3.11 billion dollars) from the "emerging deficit" for 1992.

The statement said the government's privatization program "will be pushed even more vigorously with a specific focus on big-ticket items" such as PAL, Republic Planters Bank, National Steel Co. and two luxury hotels.

SUVA (OCT. 24) - The university lecturer who organised a Hindu ceremony at which a copy of Fiji's new constitution was publicly burned was kidnapped Wednesday, police said.

Assistant Superintendent Romanu Tikotikoca said that senior physics lecturer Anirudh Singh was on his way to teach at the Suva campus of the University of the South Pacific when men aboard a privately registered brown station wagon kidnapped him.

"We had a complaint (from the university) at 9.25 am that this car pulled beside him and the people inside just took off with him," Mr. Tikotikoca said.

Police had mounted a massive search around Suva, he added, "but so far there are no clues."

A spokesman for the university said that security had been stepped up at the campus, but the secretary of the USP Students Association, Alexandra Geabo, said, "If one lecturer can be just picked up by unknown men, anybody can.

"The university has to think seriously about the security and protection of staff and students as well," he said.

The USP Staff Association said it would meet to "consider whether we should

boycott classes until security can promised."

Dr. Singh was one of four lecturers questioned by police after the public burning of the constitution, which guarantees a parliamentary majority and executive power to the country's indigenous Fijian minority.

Dr. Singh told Radio FM96 on Tuesday that "we were exercising our freedom of expression in doing what we did. The only charge that the police can have against us is sedition."

Information Minister Ratu Inoke Kubuabola said after a special cabinet meeting last Friday that the government considered the protest as "treason."

#90297d9730 10/24/1990 ~French/German News Agency

TOKYO (OCT. 24) - The New York Mercantile Exchange (Nymex) expects that a new crude-oil futures contract to be launched next year will particularly appeal to Japanese traders, exchange chairman Lou Guttman said Wednesday.

Mr. Guttman said the new contract along with the development of extended trading hours through electronic trading were being considered to fill a major gap in energy-related futures contracts in the Asia-Pacific time zone.

"This will be of particular benefit to the Japanese oil industry, providing better risk-management tools during local business hours," he said.

Mr. Guttman said the exchange hoped to launch the new crude-oil contract, based on a basket of various sour grades, by around the middle of next year.

Nymex, the world's biggest energy futures exchange, currently trades six energy-related contracts based on prices for crude oil, heating oil, unleaded gasoline, propane, residual fuel oil and natural gas.

But the crude contract is based on West Texas Intermediate Crude and other sweet grades including those from from Mexico, Britain, Norway and Nigeria.

Japan imports most of its crude oil from the Gulf and sour grades such as those from Dubai, the mostly commonly quoted in Tokyo, are not deliverable against the existing contract, making hedging activities more complicated.

Mr. Guttman also said that extended trading hours in New York were preferable to links with exchanges in other time zones where turnover was much lower, citing the example of the Singapore International Monetary Exchange.

The Singapore exchange recently introduced the world's first High Sulphur Fuel Oil futures contract but volume has been low, averaging little more than 1,000 contracts a day. That compares with a daily average of more than 96,000

crude-oil futures contracts on Nymex in the nine months to September.

#90297d9750 10/24/1990 ~French/German News Agency

SEOUL (OCT. 24) - South Korea cannot become "the next Japan" in the U.S. auto market, but it can look toward Eastern Europe and Asia for buyers, the American vice president of the General Motors-Daewoo joint venture said here Wednesday.

The Japanese auto industry in the 1970s capitalized on a number of historic and economic circumstances that came together in the United States, such as a growing market and an oil crisis, said Robert Stramy.

Japanese manufacturers were able to translate them into an advantage, offering U.S. costumers choices that U.S. automakers had not, and gaining the more than 30 per cent market share they have in the U.S. market, he said.

But today the U.S. market is a "mature market - relatively stable, not growing and not falling rapidly. You cannot expect the U.S. market to have the growth that we've seen from the '70s to the '90s," he said.

"Is there a niche for South Korea to take advantage of in the (U.S.) market? I would propose to you there's no niche any longer," Mr. Stramy said at a luncheon at the the Seoul's Foreign Correpondents' Club.

South Korean cars sold extremely well when they entered the U.S. market en masse in 1986, but within two or three years sales almost went back to what they used to be.

Mr. Stramy said the European market also presented some diffulties, as it has a lot of internal competitors and may erect barriers to exports.

Japan, which is "intent on penetrating the European market," will be in for a backlash for their recent two per cent upsurge in the German market, Mr. Stramy predicted.

"The Europeans went to school on what happened in the States from the '70s to today, they certainly are not going to let the same thing happen to them," he said. "I would imagine that barriers are going to go up against penetration."

#90297d9760 10/24/1990 ~French/German News Agency

LONDON (OCT. 24) - British Telecom (BT) called Wednesday on the British government to introduce greater competition and reduce the amount of regulation in the British telecommunications market.

The company announced details of its submission to the Department of Trade and Industry's review of telecoms policy due to start in November.

BT chairman Iain Vallance called for "more customer choice, more price competition and less protectionism".

The telecoms market in Britain is currently a duopoly of BT and Mercury Communications. BT has 97 percent of the market.

BT said its main concern lies in the area of price flexibility.

Under current regulations BT is obliged to charge all customers at the same rate. According to the company this situation prevents it from offering the bulk discounts to big customers in the highly profitable business sector which Mercury is able to provide.

BT describes the current situation as "substitution rather than competition".

Mercury also has the advantage of being able to supply services to customers of its choice, BT said, whereas BT must supply telephone lines to anyone who wants them at whatever cost under rules laid down for it following its privatisation six years ago.

BT does not object to this obligation, but would like it considered in looking at the company's overall performance.

Furthermore, Mercury can provide a cheaper service on main, busy lines, BT said, because the Mercury network is completely digital, whereas the sheer size of BT's national network has so far prevented full modernisation.

Mercury is however dependent on BT's network in order to provide a comprehensive service to its customers.

In a completely unregulated market BT said it could easily swamp any competitors.

The telecomms market is policed by the government body Oftel - BT wants to see the role of Oftel greatly reduced.

LAGOS (OCT. 24) - The Secretary-General of the Organisation of African Unity (OAU) has urged the 16-nation Economic Community of West African States (ECOWAS) to formulate a common position on the Liberian crisis.

"I regret very much that there has not been the consensus which there should be between the ECOWAS countries", Salim Ahmed Salim said in an interview

printed in the latest edition of West Africa, a widely-circulated magazine published in London.

ECOWAS nations needed to overcome differences existing among themselves to ensure the success of any of the community's initiatives, he said.

The organization's decision to send an expeditionary force to Liberia was "timely and very bold", he said, adding that it would be "most unfortunate" to consider the setting up of the force as "simply anglophone against francophone".

Three francophone West African nations -- Burkina Faso, Ivory Coast and Senegal -- have criticised formation of the force, staffed by Nigeria, Ghana, Sierra Leone, Gambia and Guinea.

Their main complaint was that only a full summit of the 16 ECOWAS could create such a body and they have also objected to its offensive role in Liberia.

#90297d9820 10/24/1990 ~French/German News Agency

LONDON (OCT. 24) - About 15 Western hostages held at a military base near Baghdad rioted at the end of last month, according to a British hostage who returned from Iraq Wednesday.

Jim Thompson, 50, was one of the 32 British hostages who returned from Iraq after former British prime minister Edward Heath obtained their release.

Mr. Thompson told a journalist of the respected daily The Times that "we had sadistic guards who would punch the hostages just for the sake of it."

He said "about 15 of us -- Japanese, German, American and British -- rioted on September 29, smashing all the windows, pulling down doors and a fence and chanting 'down, down Saddam'."

Mr. Thompson said they also rioted because "there were no toilets. The food consisted of rice and tomato water, which we discovered we were supposed to use to help soften the stale bread we were fed."

He said the riot surprised the guards, who believed the Westerners were volunteer "human shields." The rioters were returned to their cells by the armed guards, Mr. Thompson said.

He said the day after the riot, an officer asked them why they had demonstrated. Mr. Thompson said a Frenchman replied with an insult. He was taken away by soldiers and was not seen again, Mr. Thompson said, adding he presumed the man was taken to a military court.

TAIPEI (OCT. 24) - Several women legislators proposed castrating repeat sex offenders Wednesday, triggering a heated debate in Taiwan's parliament with their male colleagues, who decided to shelve the issue.

Deputies Hsieh Mei-huey and Chou Chuan of the ruling Kuomintang party suggested revising the Criminal Code to impose mandatory castration of "recidivistic sexual perverts."

Their male colleagues immediately raised objections.

"Castration (of eunuchs) dates back to the Han Dynasty (206 B.C. to 220 A.D.), but we are in the 1990s ... mandatory castration infringes on their human rights," said Chiu Lien-hui, a member of the opposition Democratic Progressive Party.

Ms. Chou retorted: "Women too have rights ... to protect their chastity against incurable sexual perverts."

The male-dominated lawmaking assembly resolved to shelve the proposed revisions and take it up again when the legislature reviews the Criminal Code later this year.

Sex offenders are governed by the section of the Criminal Code dealing with the mentally ill.

PARIS (OCT. 24) - Highly dangerous radioactive plutonium has been detected in the soil at a disused nuclear waste dump outside Paris located close to a recreation centre for children, the French daily Le Parisien reported

Wednesday.

German experts from Bremen university found 2,153 becquerels of plutonium 239 and 240 in soil taken from the dump at St Aubin, south of Paris, and 98.3 becquerels of plutonium 238 per kilo in four kilos of earth which they analysed at the paper's request.

The radiation levels constituted "an enormous dose", said the paper, noting that the danger threshold was set at 20 becquerels per year. In comparison, levels of plutonium 238 close to France's eastern Creys-Malville nuclear plant measured only 10.6 milli-becquerels.

But the government nuclear agency, the Commissariat a l'Energie Atomique (CEA) said Wednesday in a statement that "nothing in the earth" at the dump posed any danger to the population, and announced "new measures to reassure" people.

The CEA said that if all the plutonium traces were inhaled in the atmosphere, "the annual inhalation would be 0.35 becquerels per year, or far from the annual limit" of 20 becquerels.

The paper contacted Bremen university after an independent French laboratory detected other radioactive materials, such as caesium 137 and uranium 235, which had seeped into the ground from cracked nuclear waste containers stocked in the open air at the Saclay Nuclear Studies Centre, south of Paris.

Five hundred out of a total 4,000 containers on the site had cracked from frost, the paper said.

Plutonium, a nuclear fuel, is highly carcinogenic.

According to the CEA, the centre stocked nuclear waste until 1973, after which the disposal site was closed.

DOHA (OCT. 24) - Egyptian President Hosni Mubarak arrived here Wednesday from the United Arab Emirates to discuss the Gulf situation with Qatari leaders, the official news agency QNA reported.

Mr. Mubarak was met at the airport by the emir of Qatar, Sheikh Khalifa bin Hamad al-Thani.

The Egyptian leader during a 24-hour visit to Abu Dhabi in the United Arab Emirates met with the UAE president, Sheikh Zayed bin Sultan al-Nayahan. Both men reiterated an appeal to Iraq to withdraw its troops from Kuwait.

Mr. Mubarak was earlier in Saudi Arabia, where he met King Fahd and inspected

some of the 15,000 Egyptian troops deployed in the kingdom to shore up its defenses against a possible Iraqi attack.

The president was expected to visit Oman later Wednesday and was to return to Cairo for a meeting later in the week with visiting Soviet foreign policy specialist Yevgeni Primakov.

#90297d9970 10/24/1990 ~French/German News Agency

PARIS (OCT. 24) - French President Francois Mitterrand suspects that Washington tried to test his loyalty over his handling of a Soviet double agent who provided France and the United States with vital information, according to a new biography published Wednesday.

"La Decennie Mitterrand" (the Mitterrand Decade), by Agence France-Presse journalists Pierre Favier and Michel Martin-Roland details the "Farewell" affair of 1981, coinciding with the Socialist president's decision to bring Communist ministers into his new government.

At the July 1981 Ottawa summit of the seven leading industrialised nations, Mr. Mitterrand decided to alert Washington to a Soviet KGB agent, baptised Farewell, who had contacted Paris with information revealing Soviet penetration of the U.S. military complex and developments in Soviet space research.

In an interview with the authors in February last year, Mr. Mitterrand said that U.S. President Ronald Reagan considered the affair to be "the biggest such affair" since World War II.

But while "the Farewell affair reassured the Americans" and showed that France had not "sold out to the Reds", "today I have my doubts".

The president said he wondered whether the information provided by Farewell "did not in fact come from the United States who wanted to test Socialist France in this way, and test me personally.

"I have no proof, but if it were the case, we must have looked like a pair of idiots, (foreign minister Claude) Cheysson and me, in front of Reagan and Haig (U.S. Secretary of State Alexander Haig) in Ottawa by revealing the affair," he said.

#90297e0017 10/24/1990 ~Latin America New Agency

Paris (OCT. 23) EFE - French Foreign Minister Roland Dumas Wednesday called for free elections to be held as soon as possible in violence-torn Lebanon, a government spokesman said.

"These elections should be free, clean from force or threats, and be carried out as soon as possible," spokesman Louis Le Pensec quoted Dumas as saying.

The minister said France wanted to see "the free reconciliation of all the Lebanese around the legitimate power".

Dumas added that "himilitias which are challenging the authority and competence of the legal power".

France governed Lebanon from 1920 until independence was declared in 1941, but has continued to play a part in the country's politics.

Lebanon has been ravaged by years of factional violence among Moslems and Christians, while both occupying Syrian and Israeli forces have intervened in the fighting.

Rebel Christian Gen. Michel Aoun was defeated along with his men earlier this month by occupying Syrian forces and Lebanese troops loyal to President Elias Hrawi.

Aoun is now holed up in the French embassy in Beirut. The Lebanese government want the French to hand him over to stand trial for embezzlement but Paris has refused and offered him asylum in France.

BEIJING (OCT. 24) XINHUA - CHINA HAS BEEN ABLE TO KEEP THE UNEMPLOYMENT RATE WITHIN THREE PERCENT THIS YEAR AS INDUSTRIAL PRODUCTION IS IMPROVING.

ZHANG ZHONGJI, SPOKESMAN FOR THE STATE STATISTICS BUREAU, TOLD A PRESS CONFERENCE HERE TODAY THAT THERE ARE ABOUT THREE MILLION JOBLESS PEOPLE IN CHINA, ACCOUNTING FOR THREE PERCENT OF THE TOTAL LABOR FORCE.

HE SAID THAT LAST YEAR'S UNEMPLOYMENT RATE STOOD AT 2.6 PERCENT. HE ADMITTED THAT STATE-OWNED ENTERPRISES ARE MARKED BY INEFFICIENCY, WITH LOSSES TOTALLING 20 BILLION YUAN IN THE FIRST THREE QUARTERS OF THIS YEAR, TWICE THE FIGURE FOR LAST YEAR.

THE NUMBER OF ENTERPRISES RUNNING AT A LOSS ACCOUNTS FOR ONE THIRD OF THE TOTAL, HE SAID.

HE BLAMED THIS ON SLUGGISH MARKETS, POOR MANAGEMENT AND STOCKPILES OF GOODS -- ABOUT 120 BILLION YUAN-WORTH.

THUS, HE SAID, THE STATE SHOULD FURTHER IMPROVE THE MANAGEMENT OF ENTERPRISES AND PERFECT THE PRODUCTION RESPONSIBILITY SYSTEM.

THESE ECONOMIC LOSSES HAVE ALSO AFFECTED THE STATE REVENUE, HE SAID. THE STATE'S FINANCIAL REVENUE WAS UP 13.7 PERCENT WHILE EXPENDITURE WAS UP 16.8 PERCENT IN THE FIRST THREE QUARTERS.

HE ESTIMATED THAT THE FINANCIAL DEFICIT WILL RISE TO 10 BILLION YUAN BY THE END OF THIS YEAR.

QUITO (OCT. 23) XINHUA - EMPLOYEES IN ECUADOR'S JUSTICE DEPARTMENT ON MONDAY DECIDED TO INDEFINITELY SUSPEND THEIR NATIONWIDE STRIKE THAT HAD LASTED 19 DAYS.

A UNION SPOKESMAN ANNOUNCED THAT EMPLOYEES WOULD GO BACK TO WORK TODAY. HE ALSO WARNED HOWEVER THAT THE STRIKE WAS ONLY SUSPENDED FOR THE MOMENT, AND THAT IT WOULD BE DEFINITIVELY CALLED OFF ONLY AFTER CONGRESS APPROVED THE CONSTITUTIONAL GUARANTEES COURT (TGC) RULING.

THE STRIKE WAS LAUNCHED ON OCT. 4 TO PROTEST CONGRESSIONAL APPROVAL OF A RESOLUTION THAT DISMISSED ALL JUDGES AND MAGISTRATES SERVING ON THE NATION'S SUPREME COURT, DISTRICT COURTS AND LITIGATION COURTS.

THE SUSPENSION OF THE STRIKE WAS ANNOUNCED BY A LEADER OF THE NATIONAL FEDERATION OF JUSTICE DEPARTMENT EMPLOYEES AFTER THE PRESIDENT OF THE TGC, EFRAIN ALVAREZ, DECLARED THE CONGRESSIONAL DECISION "UNCONSTITUTIONAL IN FORM AND SUBSTANCE."

FREETOWN (OCT. 24) XINHUA - THE NATIONAL PATRIOTIC FRONT OF LIBERIA (NPLF) CLAIMED YESTERDAY THAT ITS FORCE SHOT DOWN THREE MORE NIGERIAN AIR PLANES THREE DAYS AGO.

A SPOKESMAN OF THE FRONT SAID THE PLANES WERE SHOT DOWN WHEN THEY WERE CARRYING OUT BOMBING RAIDS IN MONROVIA, THE CAPITAL CITY OF LIBERIA. THIS BOUGHT TO FIVE THE NUMBER OF NIGERIAN AIRPLANES DOWNED IN LIBERIA IN THE PAST MONTH.

BUT THERE IS NO CONFIRMATION OF THE LOSSES FROM THE FIVE- NATION WEST AFRICAN PEACE-KEEPING FORCE STATIONED IN MONROVIA. NIGERIA IS ONE OF THE FIVE NATIONS WHICH HAVE SENT TROOPS TO LIBERIA IN AN EFFORT TO END THE 10-MONTH-OLD CIVIL WAR IN THE COUNTRY.

THE NPLF LED BY CHARLES TAYLOR IS OPPOSED TO ANY FOREIGN INTERVENTION IN THE LIBERIA WAR.

#90297h0084 10/24/1990 ~Chinese News Agency

NEW DELHI (OCT. 24) XINHUA - INDO-SOVIET TRADE IS LIKELY TO TOUCH 100 BILLION RUPEES (5.88 BILLION U.S. DOLLARS) MARK BY 1992, IF THE SOVIET UNION IS ABLE TO GENERATE SUFFICIENT RUPEE RESOURCES TO IMPORT GOODS FROM INDIA TO BALANCE ITS BILATERAL TRADE.

AN INDICATION TO THIS EFFECT WAS GIVEN HERE ON MONDAY BY ALEXANDER E. GRANOVSKI, THE USSR ECONOMIC COUNSELLOR IN INDIA AT THE MEETING WITH THE MEMBERS OF ASSOCIATED CHAMBERS OF COMMERCE AND INDUSTRY OF INDIA, LOCAL PRESS REPORTED TODAY.

MANAGING COMMITTEE MEMBER OF THE CHAMBERS SRI NATH, WHO PRESIDED OVER THE MEETING, SAID THAT THE INDIAN BUSINESS COMMUNITY WAS KEEN TO KNOW ABOUT THE KIND OF POLICY FRAMEWORK BEING EVOLVED IN THE SOVIET UNION FOR SWITCHING THE ECONOMY TO MARKET MECHANISM. THIS WAS NECESSARY FOR THE INDIAN ENTREPRENEURS TO TAKE LONG TERM BUSINESS DECISIONS, HE SAID.

GRANOVSKI SAID THE SOVIET UNION WAS NOW IN THE PROCESS OF REPLACING THE CONTROLLED AND COMMAND ECONOMY WITH FREE AND COMPETITIVE MARKET SYSTEM. HE STRESSED THAT "SHATALIN PLAN" AND "GOBACHEV PROGRAM" WERE NOT MERE BRILLIANT UTOPIAS, IN FACT THEY REFLECTED THE PRESENT ECONOMIC REALITIES IN HIS COUNTRY.

REFERRING TO THE IMPLICATION OF LIBERALIZATION ON EXTERNAL ECONOMIC RELATIONS, HE SAID THAT THE NEW POLICY WOULD NOT LAY DOWN ANY CEILING ON FOREIGN EQUITY. THE FOREIGN INVESTOR COULD BUY IMMOVABLE PROPERTY, GET LAND ON LEASE AND WOULD HAVE FREEDOM TO EXPORT GOODS IN COMPETITIVE MARKETS AND ALSO SELL IN THE SOVIET UNION.

TOKYO (OCT. 24) KYODO - JAPAN'S IMPORTS OF CRUDE OIL IN SEPTEMBER ROSE 9.9 PERCENT FROM A YEAR EARLIER TO 108.29 MILLION BARRELS, THE MINISTRY OF INTERNATIONAL TRADE AND INDUSTRY (MITI) REPORTED WEDNESDAY.

"THE LOSSES IN SUPPLY DUE TO THE EMBARGOES ON IRAQI AND KUWAITI EXPORTS WERE COMPLETELY OFFSET BY INCREASES IN IMPORTS FROM IRAN AND SAUDI ARABIA," AN MITI OFFICIAL SAID.

SAUDI ARABIA WAS THE LARGEST CRUDE OIL SUPPLIER IN SEPTEMBER, ACCOUNTING FOR 19.30 MILLION BARRELS, OR 17.8 PERCENT OF JAPAN'S TOTAL IMPORTS, UP 36.8 PERCENT FROM THE YEAR-EARLIER LEVEL. ITS SHARE OF JAPAN'S OIL IMPORTS WAS 13.1 PERCENT IN AUGUST.

IMPORTS FROM IRAN SOARED 51.2 PERCENT TO 14.95 MILLION BARRELS, OR 13.8 PERCENT OF THE TOTAL. IRAN'S SHARE CLIMBED FROM 7.5 PERCENT IN AUGUST.

JAPAN DEPENDED ON MEMBERS OF THE ORGANIZATION OF PETROLEUM EXPORTING COUNTRIES (OPEC) FOR 75.4 PERCENT OF ITS CRUDE OIL SUPPLY.

BEFORE THE CURRENT GULF CRISIS, IRAQ AND KUWAIT COMBINED ACCOUNTED FOR ABOUT 12 PERCENT OF JAPAN'S OIL IMPORTS.

JAPAN'S PRODUCTION OF FUEL OIL IN SEPTEMBER WAS 97.99 MILLION BARRELS, UP 22.4 PERCENT FROM THE SAME PERIOD LAST YEAR.

BUT IMPORTS OF FUEL OIL SLUMPED 20.1 PERCENT TO 20.80 MILLION BARRELS DUE TO SPIRALING PRICES OVERSEAS.

DOMESTIC SALES OF FUEL OIL AMOUNTED TO 110.59 MILLION BARRELS, UP 10.8 PERCENT.

TOKYO (OCT. 24) KYODO - THE FORMER DEPUTY BRANCH MANAGER OF TOKYO-BASED MITSUI TRUST AND BANKING CO. AND THREE OTHERS WERE ARRESTED WEDNESDAY FOR ALLEGEDLY EVADING TAXES OF 1.8 BILLION YEN FOR EARNINGS BY STOCK DEALINGS, OFFICIALS OF THE TOKYO DISTRICT PUBLIC PROSECUTOR'S OFFICE SAID.

THE OFFICIALS SAID THE ARRESTED FOUR GAINED THE PROFITS BASED ON INSIDE INFORMATION FROM MITSUHIRO KOTANI, 53, HEAD OF THE KOSHIN GROUP OF STOCK SPECULATORS, WHO WAS ARRESTED AND INDICTED LAST SUMMER FOR MANIPULATING SHARE PRICES.

THIS IS THE SECOND FINANCIAL IRREGULARITY OF A BANK DISCLOSED BY THE PUBLIC PROSECUTORS IN CONNECTION WITH PROVIDING LOANS TO KOTANI. THE PROSECUTORS HAVE ARRESTED A FORMER BRANCH HEAD OF SUMITOMO BANK LTD. FOR HELPING MEDIATE LOANS

TOTALING 22.9 BILLION YEN TO KOTANI ON OCTOBER 5.

THE ARRESTED WERE TSUNETAKA SETO, 48, A FORMER DEPUTY MANAGER OF THE SHIBUYA BRANCH OF THE MITSUI TRUST AND BANKING, HARUKI MATSUO, 40, A FORMER SHIBUYA BRANCH CLERK, NOBUYUKI ITO, 43, A LICENSED TAX ACCOUNTANT, AND TAISUKE KOBAYASHI, 52, A COMPANY EXECUTIVE, THEY SAID.

SETO DID NOT DECLARE HIS EARNINGS OF 1.16 BILLION YEN IN STOCK TRADING AT A TAX OFFICE BETWEEN 1986 AND 1987 AND EVADED SOME 680 MILLION YEN IN TAXES, THE OFFICIALS SAID.

BETWEEN 1987 AND 1988, THE OTHER THREE ALSO EVADED TAXES ON THEIR PROFITS GAINED IN SHARE TRADING, WHICH TOTALED 1.15 BILLION YEN. THE TOTAL AMOUNT OF TAX EVASION BY THE FOUR CAME TO ABOUT 1.83 BILLION YEN, THE OFFICIALS SAID.

BANK SOURCES SAID THAT THE KOSHIN GROUP ALSO HAD RECIEVED A HUGE AMOUNT OF LOANS FROM THE BANK SINCE 1985 UNDER THE PRETEXT OF OBTAINING LAND AND CONSTRUCTING A BUILDING.

ON OCTOBER 5, A FORMER BRANCH MANAGER OF SUMITOMO BANK WAS ARRESTED, ALONG WITH THE PRESIDENT OF A CONSULTING COMPANY, FOR VIOLATION OF THE INVESTMENT LAW BY FUNNELING 23 BILLION YEN IN LOANS FOR THE KOSHIN GROUP TO USE IN PLAYING THE STOCK MARKET.

SUMITOMO BANK CHAIRMAN ICHIRO ISODA RESIGNED HIS POST TO TAKE RESPONSIBILITY FOR THE SCANDAL AT HIS BANK ON OCTOBER 7.

TOKYO (OCT. 24) KYODO - THE EUROPEAN COMMUNITY (EC) HAS ASKED JAPAN TO REDUCE IMPORT TARIFF RATES ON LEATHER SHOES TO ONE THIRD OF THE PRESENT RATE AT THE MAXIMUM, GOVERNMENT SOURCES SAID WEDNESDAY.

THE EC MADE THE PROPOSAL FOR A TARIFF RATE CUT THROUGH THE URUGUAY ROUND OF MULTILATERAL FREE TRADE TALKS BEING HELD UNDER THE GENERAL AGREEMENT ON TARIFFS AND TRADE (GATT), THE SOURCES SAID.

THE PROPOSAL WAS MADE BY THE 12-NATION EC SHORTLY AFTER AN OCTOBER 15 DEADLINE FOR SUBMITTING PROPOSALS FOR REDUCING PROTECTIONIST MEASURES BY WORLD TRADE NEGOTIATORS.

IN RESPONSE TO THE EC DEMAND, JAPAN WILL MAKE ITS POSITION CLEAR THAT THE COUNTRY WILL NOT COMPLY WITH A PLAN TO DISMANTLE THE TARIFF QUOTA SYSTEM CURRENTLY APPLIED TO LEATHER SHOES AND OTHER LEATHER PRODUCTS, THEY SAID. THE QUOTA IS SET AT 4.12 MILLION PAIRS IN THE CURRENT FISCAL YEAR, ENDING MARCH 31 1991.

THE ISSUE IS LIKELY TO COME UNDER THE SPOTLIGHT WHEN EC AND JAPANESE TRADE NEGOTIATORS MEET IN TOKYO AT A TWO-DAY WORKING-LEVEL SESSION BEGINNING ON THURSDAY, THE SOURCES SAID.

TOKYO (OCT. 24) KYODO - BASEBALL MAGAZINE SHA CO. SAID ON WEDNESDAY IT HAS

FORMED A JOINT VENTURE WITH A MONGOLIAN GROUP TO PROMOTE TOURISM AND SPORTS BETWEEN JAPAN AND MONGOLIA.

THIS IS THE FIRST TIME FOR A JAPANESE COMPANY TO TIE UP WITH A MONGOLIAN CONCERN. THE NEW VENTURE, HASHBALL CO., WILL BE CAPITALIZED AT 200,000 DOLLARS ON A 50-50 BASIS.

THE COMPANY WILL BE BASED IN THE MONGOLIAN CAPITAL OF ULAN BATOR AND PROMOTE BILATERAL EXCHANGE OF SPORTS, SUCH AS THE INTRODUCTION OF JAPANESE BASEBALL IN MONGOLIA AND MONGOLIAN WRESTLING IN JAPAN.

IT ALSO PLANS TO UNDERTAKE PUBLISHING AND SIGHTSEEING VENTURES IN MONGOLIA, AS WELL AS EXPORTS OF WOOL, LEATHER AND STONE PRODUCTS TO JAPAN, THE JAPANESE PUBLISHING FIRM SAID.

MONGOLIA INTRODUCED LAWS THIS YEAR TO INVITE FOREIGN INVESTMENT TO BACK ITS ECONOMIC REFORMS NOW UNDERWAY.

OSAKA (OCT. 24) KYODO - PROSECUTORS ON WEDNESDAY INDICTED A FORMER POLICE OFFICER FOR ALLEGEDLY TAKING BRIBES FROM TWO GANGSTERS IN RETURN FOR TIPPING THEM OFF TO CRACKDOWN OPERATIONS.

THE POLICE CORRUPTION TRIGGERED FIVE DAYS OF RIOTS IN A SLUM AREA OF OSAKA IN EARLY OCTOBER, INJURING 186 PEOPLE.

TSUTOMU HAGA, 39, A FORMER POLICEMAN AT NISHINARI POLICE STATION, WAS CHARGED WITH RECEIVING A TOTAL OF 6 MILLION YEN LAST YEAR FROM KATSUMI AKAI, 47, A LOCAL GANG LEADR, AND KIYOTSUGU WATANABEN A SENIOR MEMBER OF ANOTHER GANG, IN EXCHANGE FOR NFORMATION ON POLICE CRACKDOS ON ILLEGAL BOOKMAKING. PROSECUTORS SAID HAGA AND HE TWO GANGSTERS HAVE ADMITTE THE CHARGES.

TOKYO (OCT. 24) KYODO - TOUGH GOING IS PREDICTED FOR NEGOTIATIONS BY THE ORGANIZATION FOR ECONOMIC COOPERATION AND DEVELOPMENT (OECD) SHIPBUILDING PANEL OVER A REDUCTION OF GOVERNMENT SUBSIDIES TO THE SHIPBUILDING INDUSTRY, GOVERNMENT SOURCES SAID WEDNESDAY.

THE POOR PROSPECTS DEVELOPED AS A RESULT OF A PROPOSAL BY THE EUROPEAN COMMUNITY THAT JAPAN AND SOUTH KOREA LOWER PRICES OF VESSELS BUILT IN THEIR COUNTRIES IN LINE WITH A PROVISION OF THE GENERAL AGREEMENT ON TARIFFS AND TRADE FOR PREVENTION OF DUMPING, THEY SAID.

THE JAPANESE SHIPBUILDING INDUSTRY IS TAKING A WAIT-AND-SEE ATTITUDE ON THE ISSUE, MAINTAINING IT IS A MATTER TO BE DECIDED AT GOVERNMENT-LEVEL NEGOTIATIONS.

THE SOURCES EXPRESSED CONCERN THAT THE UNITED STATES MAY INTENSIFY PRESSURE FOR REDUCTION OF GOVERNMENT SUBSIDIES IF THE NEGOTIATIONS DRAG ON.

THEY SAID IT WOULD BE DIFFICULT TO REACH ACCORD ON THE ISSUE AT THE PANEL'S NEXT SESSION SCHEDULED FOR EARLY NOVEMBER.

THE CURRENT NEGOTIATIONS STEMMED FROM A U.S. REQUEST IN JUNE LAST YEAR THAT OECD MEMBER COUNTRIES SLASH FINANCIAL AID TO SHIPBUILDING INDUSTRIES.

IN RESPONSE TO THE U.S. CALL, THE EUROPEAN COMMUNITY (EC) CALLED FOR SETTING STANDARD PRICES FOR SHIPS TO PREVENT DUMPING BY SHIPBUILDERS.

THE SYSTEM ALLOWS THE EC MEMBER COUNTRIES TO LEVY SURCHARGES ON SHIPS EXPORTED BY JAPAN AND SOUTH KOREA IF THEY LOSE IN INTERNATIONAL BIDDING FOR SHIP CONSTRUCTION.

TRANSPORT MINISTRY OFFICIALS SAID THE EC PROPOSAL WOULD OBSTRUCT FREE COMPETITION BECAUSE SHIP PRICES FLUCTUATE DRASTICALLY ACCORDING TO THE DEMAND-SUPPLY SITUATION.

TOKYO (OCT. 24) KYODO - JAPAN'S PRODUCTION OF MOTOR VEHICLES IN THE FIRST HALF OF THIS FISCAL YEAR INCREASED 5.2 PERCENT OVER THE SAME PERIOD LAST YEAR TO 6,712,238, THE JAPAN AUTOMOBILE MANUFACTURERS' ASSOCIATION ANNOUNCED WEDNESDAY.

THE ASSOCIATION ATTRIBUTED THE INCREASE TO BRISK DOMESTIC DEMAND. IN SEPTEMBER PRODUCTION WAS UP 1.7 PERCENT TO 1,139,698, THE SECOND-HIGHEST AMOUNT FOR THE MONTH AFTER 1,168,003 IN SEPTEMBER 1988, THE ASSOCIATION SAID.

THE SEPTEMBER OUTPUT INCLUDED 834,654 PASSENGER CARS, UP 4.1 PERCENT, A RECORD FOR ANY SEPTEMBER.

PRODUCTION OF TRUCKS DECLINED 4.3 PERCENT TO 301,920, WHILE THAT OF BUSES ROSE 6.4 PERCENT TO 3,124, THE ASSOCIATION SAID.

NAGASAKI (OCT. 24) KYODO - PROSECUTORS WEDNESDAY INDICTED 15 CHINESE STOWAWAYS ON CHARGES OF VIOLATING IMMIGRATION REGULATIONS.

THE 15 WERE AMONG THE 18 CHINESE NATIONALS WHO ARRIVED AT NAGASAKI ON OCTOBER 3 ABOARD A FISHING BOAT ORIGINATING IN FUJIAN PROVINCE IN SOUTHERN CHINA. THE PROSECUTION DID NOT ISSUE INDICTMENT AGAINST THE OTHER THREE WHO WERE MINORS.

THE CHINESE AGED BETWEEN 15 AND 45 HAVE CONFESSED THAT THEY ENTERED JAPAN TO SEEK JOBS, THE PROSECUTORS SAID.

THREE OF THE 15 INDICTED ADULTS ALREADY LANDED IN NAGASAKI PREFECTURE LAST YEAR POSING AS REFUGEES AND WERE REPATRIATED LATER, THEY SAID.

ONE OF THE THREE, A 33-YEAR-OLD MAN, APPARENTLY SERVED AS CHIEF ENGINEER TO GUIDE THE OTHERS TO THE AREA WHERE HE LANDED FOR THE FIRST TIME LAST YEAR, THEY SAID. THE MAN WAS FINED A SUM AMOUNTING TO 3,000 YUAN (ABOUT 90,000 YEN) AFTER BEING REPATRIATED TO CHINA, THE PROSECUTORS SAID.

ANOTHER MAN HAS TOLD JAPANESE INVESTIGATORS THAT THE GROUP PAID AN AVERAGE 9,000 YUAN (ABOUT 270,000 YEN) PER PERSON TO A BROKER WHEN THEY BOARDED THE BOAT IN FUJIAN PROVINCE.

MORE THAN 2,000 CHINESE NATIONALS POSING AS INDOCHINESE REFUGEES ARRIVED IN SOUTHERN JAPAN LAST YEAR TO SEEK JOBS IN JAPAN, IMMIGRATION OFFICIALS SAID.

TOKYO (OCT. 24) KYODO - HONDA MOTOR CO. SAID WEDNESDAY IT WILL PROVIDE AIRBAGS FOR FRONT-SEAT PASSENGERS IN ALL ITS CAR MODELS, INCLUDING SO-CALLED MINIVEHICLES, BY 1994.

IN A RELATED DEVELOPMENT, THE COMPANY UNVEILED A NEW LEGEND FOUR-DOOR SEDAN THAT HAS OPTIONAL AIRBAGS, MAKING THE TOP-OF-THE-LINE PASSENGER CAR ITS FIRST MODEL TO OFFER THE SAFETY DEVICES.

HONDA ALREADY PROVIDES AIRBAGS FOR DRIVERS AS STANDARD OR OPTIONAL EQUIPMENT IN ITS SIX PASSENGER CAR MODELS AND IT HAS ANNOUNCED PLANS TO MAKE THE

CRASH-PROTECTION DEVICES AVAILABLE IN OTHER MODELS BY 1992.

AIRBAGS INFLATE UPON COLLISION TO EASE THE IMPACT. A SENSOR DETECTING A FRONTAL CRASH GENERATES AN ELECTRIC SIGNAL THAT IN TURN TOUCHES OFF A TINY EXPLOSION IN A NITROGEN GAS GENERATION UNIT. THAT UNIT INFLATES THE BAGS.

JAPANESE AUTOMAKERS HAVE COME UNDER FIRE RECENTLY FROM U.S. CONSUMER GROUPS FOR LAGGING BEHIND U.S. AND EUROPEAN AUTOMAKERS IN INSTALLING AIRBAGS.

#90297k0088 10/24/1990 ~Japanese News Agency

TOKYO (OCT. 24) KYODO - THE JAPANESE GOVERNMENT WILL GRANT PARDONS TO ABOUT FOUR MILLION CONVICTS TO MARK THE ENTHRONEMENT CEREMONY OF EMPEROR AKIHITO TO BE HELD NOVEMBER 12, JUSTICE MINISTRY OFFICIALS SAID WEDNESDAY.

AMONG THEM WILL BE AT LEAST 16,000 PEOPLE WHO WERE FOUND GUILTY OF VIOLATING THE PUBLIC OFFICES ELECTION LAW, THE OFFICIALS SAID.

THE GOVERNMENT WILL MAKE THE AMNESTY EFFECTIVE NOVEMBER 12 AFTER THE 21-MINISTER CABINET APPROVES IT EITHER NOVEMBER 6 OR 9, THE OFFICIALS SAID.

ABOUT 85 PERCENT OF THE CONVICTS VIOLATED THE ROAD AND TRAFFIC LAW. IN FEBRUARY 1989, THE GOVERNMENT GRANTED A LARGER SCALE AMNESTY TO ABOUT 10.17 MILLION LAW VIOLATORS, MARKING THE STATE FUNERAL OF EMPEROR HIROHITO, POSTHUMOUSLY CALLED EMPEROR SHOWA.

#90297k0092 10/24/1990 ~Japanese News Agency

SEOUL (OCT. 24) KYODO - A LARGE NUMBER OF JAPANESE BUSINESSMEN ARE TAPPING THE POSSIBILITY OF INCREASING IMPORTS FROM SOUTH KOREA IN AN EFFORT TO IMPROVE THE WORSENING BILATERAL TRADE IMBALANCE LOPSIDEDLY IN JAPAN'S FAVOR.

THE JAPANESE, WHO ARRIVED HERE MONDAY ON A BUYING MISSION, ARE CONTACTING OFFICIALS OF LOCAL GROUPS OF ELECTRONICS, MACHINERY, AND ELECTRICAL APPLIANCE FIRMS, SOME TYPICAL SEGMENTS OF SOUTH KOREAN INDUSTRY WHICH SUFFER LARGE TRADE DEFICITS WITH JAPAN.

THE 163-MEMBER MISSION, LED BY TAIICHIRO MATSUO, CHAIRMAN OF THE JAPAN-KOREA MARKET COUNCIL, REPRESENTS 82 COMPANIES IN FIVE INDUSTRIAL SPHERES.

THE COUNCIL'S KOREAN COUNTERPART, THE KOREA-JAPAN ECONOMIC COUNCIL, HAS LISTED 504 LOCAL FIRMS FOR IMMEDIATE DEALING WITH THE BUYERS.

MOST OF THEM PRODUCE ELECTRICAL AND ELECTRONICS PRODUCTS, MACHINERY, TEXTILES, AND PROCESSED MARINE PRODUCTS, ACCORDING TO PARK YONG HAK, CHAIRMAN OF THE COUNCIL AND OWNER OF THE DAINONG BUSINESS GROUP.

THE DISPATCH OF A JAPANESE BUYING MISSION WAS RESUMED AFTER A THREE-YEAR INTERVAL UNDER AN AGREEMENT REACHED DURING PRESIDENT ROH TAE WOO'S VISIT TO TOKYO IN LATE MAY.

"THE SERIOUS TRADE IMBALANCE IS UNDESIRABLE NOT ONLY FROM AN ECONOMIC VIEWPOINT BUT FOR OVERALL BILATERAL RELATIONS," ROH WAS QUOTED BY HIS SPOKESMAN AS TELLING MATSUO ON MONDAY. ROH TERMED BALANCED TRADE A "KEY TO FRIENDSHIP AND CONFIDENCE" BETWEEN SEOUL AND TOKYO.

JAPANESE PRIME MINISTER TOSHIKI KAIFU SAID IN A LETTER CONVEYED TO ROH BY THE MISSION, "THIS MISSION TESTIFIES TO THE ARDENT AND ENTHUSIASTIC WISH OF OUR BUSINESS QUARTERS TO FURTHER DEVELOP ECONOMIC TIES BETWEEN THE TWO NATIONS," SPOKESMAN LEE SOO JUNG SAID.

ROH PUT SEOUL'S TRADE DEFICIT WITH JAPAN FOR THE FIRST EIGHT MONTHS OF THIS YEAR AT ABOUT 4 BILLION DOLLARS -- ALREADY REACHING THE LEVEL OF LAST YEAR AS A WHOLE -- AND POINTED OUT THAT IT IS ON AN UNINTERRUPTED RISE.

PARK OF THE KOREAN COUNCIL SAID THE MISSION WOULD MAKE A "GREAT CONTRIBUTION" TO THE RECTIFICATION OF THE LONGSTANDING PROBLEM AT A FAVORABLE TIME WHEN THE JAPANESE CURRENCY IS GETTING STRONGER AGAINST THE KOREAN WON IN VALUE.

BUT EXPERTS PLAYED DOWN THE EFFECT OF THE MISSION, BILLING IT AS A TOKEN GESTURE.

"THE TRADE IMBALANCE HAS RESULTED FROM OUR STRUCTURAL DEPENDENCY ON JAPAN. ONE OR TWO BUYING MISSIONS WILL NOT BE ENOUGH TO CURE THE CHRONIC DISEASE," SAID PROF. PARK WOO HEE OF SEOUL NATIONAL UNIVERSITY. "RATHER, JAPAN SHOULD ACCEPT OUR REPEATED CALLS FOR TECHNICAL TRANSFER."

SOUTH KOREA HAD A 3.38 BILLION DOLLAR TRADE DEFICIT WITH JAPAN IN THE FIRST SEVEN MONTHS OF 1990, MORE THAN TRIPLE THE GLOBAL DEFICIT SUFFERED BY THE COUNTRY, ACCORDING TO OFFICIAL DATA.

SEOUL SAW A 3.08 BILLION DOLLAR DEFICIT IN MACHINERY TRADE AND A 1.34 BILLION DOLLAR DEFICIT IN ELECTRONICS TRADE WITH JAPAN DURING THE JANUARY-JULY PERIOD.

"THE FIGURES SHOW THAT NOTHING BUT TECHNICAL TRANSFER WILL REALIZE BALANCED TRADE, FAR FROM ANY FAVORABLE TRADE CIRCUMSTANCES OR ACTIVITIES BY BUYING MISSIONS," PARK SAID. "IF OUR TRADE IS TO INCREASE, OUR IMPORTS OF JAPANESE MACHINERY HAVE TO RISE."

#90297k0093 10/24/1990 ~Japanese News Agency

TOKYO (OCT. 24) KYODO - TOYS 'R' US, THE GIANT U.S. TOY RETAIL CHAIN CURRENTLY FACED WITH STRONG OPPOSITION FROM JAPANESE TOY SHOPS EAGER TO FEND

OFF COMPETITION, WILL OPEN FOUR PLANNED STORES IN JAPAN AS SCHEDULED, THE PRESIDENT OF ITS JAPANESE SUBSIDIARY SAID WEDNESDAY.

SPEAKING TO THE PRESS AT THE TOKYO CHAMBER OF COMMERCE AND INDUSTRY, LARRY BOUTS, PRESIDENT OF TOYS 'R' US JAPAN LTD., SAID THE PROJECT IS GOING WELL.

BOUTS SAID THE COMPANY HAS SCHEDULED STORE OPENINGS STARTING WITH SAGAMIHARA IN KANAGAWA PREFECTURE, IN OCTOBER 1991, FOLLOWED BY STORES IN SHINGU IN FUKUOKA PREFECTURE, KASHIHARA IN NARA PREFECTURE, AND AMI IN IBARAKI PREFECTURE, IN ACCORD WITH THE COMPANY SCHEDULE.

COMPANY REPRESENTATIVES WILL MEET A TOTAL OF 130 DOMESTIC TOY MAKERS IN THE COMING MONTH TO REQUEST A SUPPLY OF GOODS, BOUTS SAID.

BOUTS SAID JAPAN'S LARGE-SCALE RETAIL STORES LAW, WHICH WAS EASED IN MAY, IS NOT SUITED TO THE TIMES AND SHOULD EVENTUALLY BE ABOLISHED.

THE LAW WAS EASED UNDER AN AGREEMENT WITH THE UNITED STATES DURING BILATERAL TALKS ON STRUCTURAL IMPEDIMENTS TO TRADE AND INVESTMENT.

BOUTS LEFT A POST WITH PEPSICO INC. TO TAKE UP THE PRESIDENCY OF THE JAPANESE TOYS 'R' US ON SEPTEMBER 1.

#90297m0001 10/24/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (OCT. 24) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

The COMMERCE DEPARTMENT reports that September durable goods fell 1.7%. Analysts were expecting a rise of 0.1%.

The string of winning sessions ends in Tokyo as the Nikkei drops 421 points. ... In London, the FTSE is off 17 points in early afternoon. changed with the long yield at 8.79%. ... North Sea crude is flat at $28.50. ... PAN AM says it has agreed to sell its routes to London's Heathrow airport to UNITED AIRLINES. ... MOBIL reports third-quarter profits down 29%. ... THE WASHINGTON POST CO. says its third-quarter earnings were off 16% from the year before. ... RJR NABISCO says its third-quarter loss was $86 million compared to a $447 million loss in the same quarter last year. ... MOTOROLA introduces a wireless technology that allows linkage of computers through radio waves rather than wires. ... WARNER BROTHERS says it will pay $125 million for video rights to many MGM-UA films in a cash infusion that will help PATHE COMMUNICATIONS finance its purchase of MGM-UA.

WHAT'S AHEAD:

With spending authority set to expire at midnight tonight, CONGRESS takes up yet another stopgap spending bill today. ... SOUTHLAND CORP. appears poised to move into bankruptcy. ... The CLEAN AIR COALITION is scheduled to release a study of the costs and economic impact of current clean air legislation.

FROM THE BULLS:

The volatility of the market "is a question of perception," says MAX ANSBACHER of BEAR, STEARNS. "The market doesn't seem so volatile when it's going up." Ansbacher says options traders are bearish, which he reads as a contrary bullish indicator. "Short-term, I do foresee a rally taking place, starting early next week," says Ansbacher. He says the market has rallied in the two week period before non-Presidential elections every year since 1934. (FNN "Marketwrap", 10/23)

"I see this as normal profit-taking," says ANDREW ADDISON, who edits his own market letter. He says the correction was needed after the "sharp runup" of the past several days. Addison anticipates some backing and filling to the 2460 to 2540 area, but, "if market breadth holds up well, I'd expect the Dow to rally through the resistance and move to the mid-2600 to mid-2700 area." ("Investor's Daily", 10/24)

FROM THE BEARS:

"If you have stocks, it's probably too late to sell them aggressively since most of the decline, say two-thirds of the decline, is probably over," says BOB JONES of GOLDMAN SACHS. "At the same time, we don't see a big upturn for awhile yet. The bear market has just begun in some sense. A typical bear market actually loses the majority of its value in the first month or two ... and then sort of plays out a sort of long, slow, painful kind of gradual decline for maybe another eight to 12 months. ... It's also too early to buy. We don't think it's ready to go up yet." (CNBC "Market Wrap-Up", 10/23)

STOCK MARKET:

"Those 30 [Dow] stocks are not representative of what the broad market is doing," says KENNETH SPENCE, director of technical analysis for SALOMON BROTHERS. "You're not getting broad-based selling; it's concentrated in the blue-chip stocks." (NYT, 10/24)

"We do not think that the final bottom has been seen," says GEORGE PRICE of the "Price Trend." After a temporary rally lasting a couple of weeks, Price looks for a test of the 2350 bottom within two months. "Be ready to sell when this rally ends." (CNBC "World Business", 10/24)

"My guess is that because the Dow was up over 100 points last week and down over 100 the week before, it has to 'catch its breath' for a while," says PAUL HENNESSEY at the BOSTON CO. "Then it can probably move a little higher."

("The Washington Post", 10/24)

"If there is anything that can kill off a rally it is a big dose of taxes," says THOM BROWN, managing director of RUTHERFORD BROWN & CATHERWOOD. "There's no doubt that a budget will be passed, but the only thing they can agree on right now is higher taxes." (WSJ, 10/24)

"A lot of people [in the stock market] are worried about interest rates," says KEN DUCEY, a trading official at S.G. WARBURG SECURITIES. He believes that the market is focusing on the budget rather than on oil. "There's a lot of confusion" about how the Federal Reserve will respond to a budget resolution from Congress, and investors are anxious to "get that out of the way and have one less thing to worry about." (WSJ, 10/24)

"We had more retail brokers call this week than in the last month or so," says JANE GURKIN, assistant head of OTC trading at MORGAN KEEGAN & CO. in Memphis, Tenn. "I think a lot of them feel [stocks] they want to buy have gotten so cheap, either it's a steal or the downside can't get much worse." (WSJ, 10/24)

"The important positive note is that with this quarter's reporting, we're estimating corporate earnings to be up eight to nine percent versus the quarter a year ago, which will mark the first positive earnings growth in over a year, followed by a fourth-quarter earnings growth estimated at 15 percent," says BEN ZACKS of ZACKS INVESTMENT RESEARCH. (CNBC "Market Wrap-Up", 10/23)

"People are back to questioning whether or not the world is okay," says RICHARD BRUNO, head of OTC marketing for PAINEWEBBER in New York, who sees very little activity among small investors. (WSJ, 10/24)

STOCK TIPS:

STEPHENS INC. recommends buying stock in AMERICAN SOFTWARE INC., an Atlanta-based maker of applications software used in business management. The brokerage says per-share earnings are expected to grow 20% annually for the next two years as the company expands in international markets. ("USA Today", 10/24)

"What we know now, is that there is $967 million in escrow in a bank" that is earmarked for the PATHE buyout of MGM/UA, says PAUL MARSHE of BATEMAN EICHLER, HILL RICHARDS. "What we don't know is where this money's coming from." While the deal looks as if it will soon be closed, given the on-again, off-again past of the deal, Marshe says, "With this particular stock, I think we have to say, 'Let's wait for the fat lady to sing.'" (FNN "Marketwrap", 10/23)

After years of promise, biotechnology firms are finally bringing new products to market and realizing earnings, says TEENA LERNER of LEHMAN BROTHERS. She has been focusing on GENETICS INSTITUTE which will be delivering three new drugs over the next 12 months. Lerner recommends investors buy a package of

biotech stocks which also includes AMGEN, CHYRON and XOMA. These stocks are recession resistant, says Lerner. "If there's a disease that's not being treated today and that drug comes on the market, those people need that medicine." (CNN "Business Morning", 10/24)

Even though he thinks the bear market has several months to run before any sustainable upturn, BOB JONES of GOLDMAN SACHS is buying some of the depressed bank stocks and some "quality growth stocks that are less inclined to be hurt by a recession in terms of earnings." Among the stocks he lists are WELLS FARGO, BANKERS TRUST and JOHNSON & JOHNSON. (CNBC "Market Wrap-Up", 10/23)

"I'm bearish," says K.C. GRAINGER, a portfolio strategist with JESUP JOSEPHTHAL. But Grainger says value is starting to come back into stock prices. Buy secondary issues, he says, "if you can hold your breath and not use margin -- it's going to take a while." Among the names he mentions: NATIONAL INTERGROUP LABS, GABELLI EQUITY TRUST and PEGASUS GOLD. (CNBC "World Business" 10/24)

CITICORP fell 3/8 to 12 5/8 on volume of more than 3.6 million shares. "Everybody's upset that [Citicorp] hasn't cut the dividend or added more to its loan-loss reserves," says ROBERT L. KAHN, partner and manager of equity trading at MONTGOMERY SECURITIES. (WSJ, 10/24)

After rising nearly five points in the previous two days trading, SURGICAL LASER TECHNOLOGY fell 3/4 yesterday. SAMUEL NAVARRO of NEEDHAM & CO. has been bullish on the stock because of interest in the company's new arthroscopic laser system and because of anticipation of a strong earnings report, but says the correction yesterday was due to the feeling that "on a short-term basis, [the stock] was getting ahead of itself." ("Investor's Daily", 10/24)

After announcing much worse than expected earnings, SUN MICROSYSTEMS lost 2 3/4. From London this morning, LEHMAN's MICHAEL BENSON says traders are expecting the stock to come under more pressure today, possibly losing another 3-5 points. Negative sentiment is spilling over into other technology issues - IBM, DIGITAL and COMPAQ are generally off 1/8 in overseas trading. Compaq reports earnings today. (FNN "Business A.M.", 10/24)

US WEST is finding its way onto many analysts' "buy" lists, reports "USA Today." MORGAN STANLEY analyst DANIEL REINGOLD says, "At low cost, they are creating additional sources of long-term earnings growth. ... They are doing the right things." Among the others recommending the stock is GREG SAWERS at SANFORD BERNSTEIN & CO., who estimates that overseas growth will account for half of the company's total annual earnings growth by 1995. ("USA Today", 10/24)

Sell NYNEX, advises ARGUS RESEARCH, and use the proceeds to buy one of the "higher quality Bells" like BELL ATLANTIC or BELLSOUTH. Also on their sell list are BOISE CASCADE, which they call one of the more highly leveraged

forest products companies, and ALCOA which is facing an uncertain demand for aluminum. Argus likes DOW JONES, saying an earnings rebound will cause the price to rise sharply. Buy ARCHER DANIELS where earnings results are likely to be "volatile and surprising." (CNBC "World Business", 10/24)

"The negative effects [of higher oil prices] completely offset the benefits to [oil] stocks," says MICHAEL YOUNG of SMITH BARNEY. "A sinking stock market pulls down all stocks, whether they're oil or not." ("Investor's Daily", 10/24)

-30- 10321

#90297m0002 10/24/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (OCT. 24) MCS -- A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

"Fundamentally the dollar is still not a good buy," says CARL AMENDOLA, vice president at BAYERISCHE HYPOTHEKEN-UND WECHSEL BANK in New York. The U.S. has "a lot of skeletons" in its closets, he says referring to the problems besetting the U.S. economy and banking system. (WSJ, 10/24)

There might be a shift in sentiment that the dollar has "gone down far enough and is now making a bottom," says LILIANA NEALON, vice president of UNION BANK OF SWITZERLAND in New York. While the dollar could blip down to 1.45 marks or even 1.40 marks, the market currently is "living through a bottoming of the dollar ... and in two years when we look back, 1.50 marks" will have been a good time to buy dollars, she says. (WSJ, 10/24)

"The key is how central banks react" to the credit crunch, says NILLY SIKORSKY a managing director of CAPITAL INTERNATIONAL S.A. in Geneva. "They can maintain a restrictive monetary policy, which means very high interest rates and bad bond markets, or print money. One scenario is recession; the other is inflation. Neither one is very tolerable, so cash looks very attractive." (WSJ, 10/24)

Why were bonds down yesterday? BILL WOLMAN blames it all on the budget bog in Washington. "What's really happening in Washington right now is just a total mess," says the chief economist for "BusinessWeek" and "CNBC." "It is an outrageous demonstration of irresponsibility, or a system that doesn't work. Even with this so- called deficit reduction bill, the deficits are $250 billion a year on the assumption of 2 1/2 percent growth ... as far as the eye can see." (CNBC "Market Wrap-Up", 10/23)

"Once a budget pact is announced, the Street will rush to sell securities as a way of preparing for the new supply," says ROBERT BRUSCA, chief economist at

NIKKO SECURITIES INTERNATIONAL. "I think that yields are going to have to go back up quite severely in order for the markets to take on these new securities." (NYT, 10/24)

"The auction calendar is going to be compressed into a frighteningly short period of time," says JOSEPH LIRO, a vice president and money market economist at S.G. WARBURG SECURITIES INC. "As things now stand, roughly $95 billion worth of securities will have to be sold between now and the first full week in November, and the longer the Congress delays the shorter the period to pre-sell those issues 1 becomes." He adds, "The government could end up paying for the delay in a big way." (NYT, 10/24)

THE ECONOMY:

"I'm somewhere between the pearly gates and Dante's inferno" on the economy, says BEAR, STEARNS chief economist LAWRENCE KUDLOW. "Because I'm an optimist, I'm edging toward the pearly gates. Ludlow says the economy "is not headed for the cliff" and will "outperform almost all expectations in the next year or two." ("Investor's Daily", 10/24)

"The [real estate] situation is getting worse, not better," says FEDERAL DEPOSIT INSURANCE CORP. CHAIRMAN WILLIAM SEIDMAN in an address to the AMERICAN BANKERS ASSOCIATION. He predicts more bank failures in the Northeast. COMPTROLLER OF THE CURRENCY ROBERT CLARKE told the bankers yesterday: "The image of your industry today is more tarnished than it has been in half a century. ("USA Today", 10/24)

Primarily as a result of the Gulf crisis, companies have decided to "cut costs now and ask questions later," says STEPHEN ROACH, a senior economist at MORGAN STANLEY. "I'm not saying that costs have not been cut in response to sluggish demands," says Roach, "but there was a tremendous heightening of cost reduction that occurred after the oil shocks." ("Investor's Daily", 10/24)

IN WASHINGTON:

"It looks like we're back on square one [in budget negotiations]," says TRUDE LATIMER at JESUP, JOSEPHTHAL. "Our brave members of Congress are probably going to wait until after the elections to stick out their brave necks." ("USA Today", 10/24)

#90297p8685 10/24/1990 ~PR Newswire

SUMMIT, NJ (OCT. 24) PR NEWSWIRE - In an agreement reached on Oct. 12, 1990, two of The Summit Bancorporation's (NASDAQ: SUBN) subsidiary banks will purchase two retail banking branch offices from Anchor Savings Bank, FSB (NASDAQ: ABKR).

Anchor's Hamilton Township branch, located in Mercer County, N.J., will become a part of the Princeton-based Trust Company of Princeton, and will operate under that name. The Hamilton office will join the two branches presently operated by The Trust Company of Princeton which was organized in 1986.

The Deal branch office, located in Monmouth County, N.J., will become a part of Ocean National Bank, headquartered in Point Pleasant Beach, and will operate under that name. Ocean National Bank, organized in 1901, operates 18 retail branch offices in southern Monmouth and Ocean counties. An additional Ocean National branch office is scheduled to open in Jackson, N.J., in 1990.

The transaction between The Summit Bancorporation and Anchor Savings Bank is subject to state and federal regulatory approval and is expected to take place in the last quarter of 1990 or the first quarter of 1991.

At that time, Summit's assets will increase from $3.7 billion to approximately $4.2 billion, based upon the Anchor acquisition and the recently announced agreement to purchase five retail banking branches from Carteret Savings Bank, FA.

"We are very pleased that Summit's strong capital position allows us to expand into these highly desirable markets in Deal and Hamilton, New Jersey," stated Thomas D. Sayles Jr., Summit's chairman and chief executive officer.

"Deal and Hamilton are well established communities," he added. "We welcome the opportunity to serve each area's banking requirements and to become active and supportive members of their respective communities."

James M. Large Jr., Anchor's chairman, stated, "We are very pleased that our Deal and Hamilton office customers will continue to enjoy the same caring service they have come to expect." He went on to state, "The sale of the Deal and Hamilton offices is another positive step in Anchor's efforts to achieve capital compliance under its recently approved capital plan."

Both The Trust Company of Princeton and Ocean National Bank are members of The Summit Bancorporation, a $3.7 billion holding company operating 81 branch offices in 11 New Jersey counties. Other Summit member banks include The Summit Trust Company, The Chatham Trust Company, The Maplewood Bank and Trust Company, Bay State Bank, and Somerset Trust Company. The Summit Mortgage Company Inc., Summit Leasing Corporation and Beechwood Insurance Agency Inc., are Summit non- bank affiliates that provide specialized financial services.

#90297p8687 10/24/1990 ~PR Newswire

DALLAS (OCT. 24) PR NEWSWIRE - Lomas Financial Corp. (NYSE: LFC) announced

today that Hal Hillman has been named president of Lomas Administrative Services.

In his new position, Hillman will oversee all corporate level support functions for the entire Lomas Financial Group, including purchasing, security and other general and administrative services necessary for the day-to-day operations of the business.

Prior to his appointment as president of Lomas Administrative Services, Hillman served as vice president of Lomas Mortgage USA and as executive assistant to Lomas Financial Corp. Chairman and Chief Executive Officer Jess Hay. Hillman succeeds H.H. "Buddy" Miller who died last month after 21 years with the company.

Hay stated that Hillman "has developed a unique and profound knowledge of the daily needs of our people and our businesses and has been successful in the completion of a wide range of assignments during his tenure at Lomas Mortgage USA. He is intimately familiar with the internal and external operations of Lomas and is the ideal choice to assume these responsibilities."

Hillman joined Lomas in 1983 and has served as divisional controller for residential production, executive assistant to the president of Lomas Mortgage USA and as department manager for Lomas Mortgage Acquisitions. He was an integral member of the management team that last year negotiated the sale of Lomas Securities to Fleet Mortgage.

#90297p8690 10/24/1990 ~PR Newswire

OMAHA, NEB. (OCT. 24) PR NEWSWIRE - America First Financial Fund 1987-A (NASDAQ: AFFFZ) reported earnings of approximately $14.5 million for the nine months ended Sept. 30, 1990, ($4.8 million for the quarter ended Sept. 30, 1990). The Fund's net income is generated from its investment in EurekaBank. EurekaBank, which is located in Foster City, Calif., is a $1.8 billion organization with 35 branches located in the Greater San Francisco Bay Area.

The third quarter earnings are consistent with the $4.8 million net income posted during the third quarter of 1989 and the results posted in the prior two quarters in 1990.

When EurekaBank was purchased, management adopted a very high standard of credit quality. We (The Company) are pleased to report the strong credit performance of the Bank's loan portfolio. Delinquencies of 30 or more days were .56 percent of loans outstanding at Sept. 30, 1990, and no commercial or multifamily real estate loans were delinquent. This delinquency level is well

below industry standards. In addition, loan loss reserves were 245 percent of non-performing assets at quarter-end. These ratios underscore the excellent performance of the portfolio and the prudent reserve practices employed by management.

Earnings for the first nine months of 1990 represent an annualized return on investment of approximately 16 percent to investors, based on the initial capital of $120 million. Investors earned $2.35 per beneficial unit certificate for the nine months ended Sept. 30, 1990, (76 cents for the quarter ended Sept. 30, 1990). Investors continue to receive monthly distributions of 7.5 percent with additional earnings retained at EurekaBank to enhance the ultimate return to investors in the Fund. The book value per unit was $20.81 at Sept. 30, 1990.

#90297p8708 10/24/1990 ~PR Newswire

HARLEYSVILLE, PA (OCT. 24) PR NEWSWIRE - Harleysville Group Inc. (NASDAQ: HGIC), a regional insurance holding company, today reported record third quarter revenues and earnings.

Net income increased 17 percent to $7.3 million in the third quarter, compared with $6.2 million during the third quarter of 1989. For the first nine months of 1990, net income rose 14 percent to $18.7 million, compared with $16.4 million in 1989. On a per-share basis, third quarter net income climbed 15 percent to $0.92, compared with $0.80 in the same period of 1989. For the corresponding nine-month periods, net income per share increased 12 percent to $2.37, compared with $2.12 per share in 1989. As a result of the 5 percent stock dividend paid on Sept. 28, 1990, per-share earnings have been retroactively adjusted to reflect the greater number of shares outstanding. The higher earnings were achieved despite a $0.04 per share after-tax charge in each quarter of 1990 resulting from auto insurance legislation enacted in New Jersey earlier this year. Realized investment gains had virtually no impact on net income in the 1990 periods, while producing income of $0.02 and $0.03 per share in 1989's third quarter and nine month results, respectively.

"Our third quarter results were paced by the continued strong growth of our investment income, combined with a significant improvement in underwriting results in the property lines of business," commented Bradford W. Mitchell, chairman of the board and chief executive officer of Harleysville Group. Property losses in the third quarter of 1989 were higher as a result of Hurricane Hugo.

Third quarter investment income was up 16 percent to $11.1 million, compared with $9.6 million in 1989. For the nine months, investment income climbed 20 percent to $32.1 million in 1990 from $26.7 million in 1989. The growth in

investment income is attributable to continued strong cash flow.

Earned premiums rose 3 percent to $74.1 million in the third quarter, compared with $71.8 million during 1989's third quarter. For the first nine months, earned premiums increased 7 percent to $219.2 million in 1990 from $205.8 million in 1989.

Total revenues increased 4 percent to $85.7 million, compared with $82.1 million in the third quarter of 1989. For the corresponding nine- month periods, total revenues were up 8 percent to $252.8 million in 1990 from $234.7 million in 1989.

Stockholders' equity rose 11 percent to $178.7 million ($22.36 per share) at Sept. 30, 1990, up from $160.3 million ($20.48 per share) at Dec. 31, 1989. The trailing 12-month return on stockholders' equity at Sept. 30, 1990, was 15.0 percent.

Harleysville Group's statutory combined ratio was 102.4 percent in the third quarter, compared with 103.5 percent posted in the third quarter of 1989. The lower combined ratio for the quarter is due primarily to lower property losses but the improvement was offset somewhat by the taxes and assessments related to New Jersey's new auto insurance law. The third quarter combined ratio also compares favorably with the 103.6 percent ratio reported in the second quarter of 1990. For the first nine months, the combined ratio was 104.0 percent, compared with the 102.7 percent ratio during the same period of 1989.

Much of the company's attention continues to be focused on Pennsylvania's new auto insurance law enacted in February. "During the past three months," explained Mitchell, "we reached a compromise with the Pennsylvania Insurance Department on our personal auto insurance rates and we made progress toward isolating the impact of the Pennsylvania personal auto line from Harleysville Group. Harleysville Mutual Insurance Company has formed a separate company -- Pennland Insurance Company -- which is expected to only write Pennsylvania personal auto insurance. Steps are being taken to make the company operational in early 1991. It is anticipated that Pennland will not participate in the pooling arrangement with Harleysville Group.

"Based upon our financial results for the first nine months, 1990 will prove to be another outstanding year for Harleysville Group. We are proud of our past achievements and look forward with great optimism to our future challenges," Mitchell concluded.

Harleysville Group Inc. is a regional holding company for four property and casualty insurers whose marketing territory encompasses the entire East Coast. The companies include: Atlantic Insurance Company of Savannah, Harleysville Insurance Company of New Jersey, Huron Insurance Co., and Worcester Insurance Co. Harleysville Group also manages the operations of Berkshire Mutual Insurance Group, headquartered in Pittsfield, Mass., the financial results of

which are not consolidated into Harleysville Group at the present time.

SAN DIEGO (OCT. 24) PR NEWSWIRE - BSD Bancorp (AMEX: BSD) today announced that its board of directors, at a regularly scheduled meeting, declared a $.10 cash dividend payable Nov. 20, 1990 to holders of record as of Nov. 6, 1990. The dividend represents an increase of 25 percent over the most recent dividend of $.08 per share paid in May 1990. The $.18 per share dividend paid this year represents an 80 percent increase over 1989's $.10 per share.

Commenting on the announcement, Chairman James S. Brown, said, "This action underscores the Board's continued confidence in BSD Bancorp's outlook."

On October 11, BSD Bancorp announced record third quarter 1990 earnings of $1,157,000, up from 1989 third quarter earnings of $1,056,000. Both 1989 and 1988 were also record nine-month earnings periods for BSD Bancorp, and Brown believes the third quarter results point to another record year in 1990.

BSD Bancorp Inc. is a diversified holding company serving banking and trust markets predominately in Southern California.

SAN DIMAS, CALIF. (OCT. 24) PR NEWSWIRE - Vestar Inc. (NASDAQ: VSTR) announced today that revenues were $1.3 million and $2.6 million for the third quarter and nine months ended Sept. 30, 1990, respectively. Revenues were primarily from European sales of AmBisome, which exceeded $1 million in the third quarter.

Dr. Roger J. Crossley, president and chief executive officer, said, "We are

pleased by Ambisome's continued revenue momentum in Europe which contributed to Vestar's best quarterly performance in terms of total revenue."

Vestar reported that revenues for the 1990 third quarter were $1.3 million compared to $1.0 million in the 1989 third quarter. The company reported a loss of $1.7 million, or $0.26 per share in the 1990 third quarter compared to a loss of $2.0 million, or $0.31 per share, for the 1989 third quarter.

For the 1990 first nine months, revenues were $2.6 million versus revenues of $3.1 million last year. The company reported a loss of $5.1 million, or $0.79 per share, for the first nine months of 1990 compared to a loss of $5.4 million, or $0.85 per share, for the same period last year.

The 1989 third quarter and first nine months' revenues included collaborative agreement revenues of $653,000, and $2,049,000, respectively, associated with the joint venture with Lyphomed. 1989 results also included charges of $500,000 and $1,364,000 for the third quarter and first nine months, respectively, reflecting Vestar's equity in the net loss of the Lyphomed-Vestar joint venture.

Vestar Inc. is a pharmaceutical company focused on the development of therapeutic and diagnostic agents for cancer, AIDS and related diseases. AmBisome is the trade name for the intravenous liposomal formulation of amphotericin B, a broad spectrum, anti- infective agent used to treat potentially fatal systemic fungal infections that often occur in immune-compromised patients who have undergone cancer therapy, post-organ/bone marrow transplants and AIDS patients.

ANN ARBOR, MI (OCT. 24) PR NEWSWIRE - MEDSTAT Systems, Inc. (NASDAQ: MDST) announced today an agreement-in-principle for a three- year contract with NASCO to license MEDSTAT database and cost management systems, and to remarket them to Blue Cross and Blue Shield Plans. NASCO, National Account Service Company, headquartered in Atlanta, is a joint venture of five of the nation's largest Blue Cross Blue Shield Plans. It provides health claims processing for 1.6 million subscribers (3.5 million members), through operating agreements with 10 Blue Cross Blue Shield plans, and participating agreements with 35 other plans.

Under the terms of the agreement, NASCO will license MEDSTAT software and provide large scale database management and health claims analysis to BCBS plans and, through these plans, to their accounts. The license agreement provides for a minimum of 250,000 subscribers. Further, NASCO, under the terms of the agreement, may market MEDSTAT software to Blue Cross Blue Shield plans

for local installation.

The participants in NASCO are Blue Cross and Blue Shield of Connecticut, Blue Cross and Blue Shield of Michigan, Blue Cross and Blue Shield of New Jersey, Empire Blue Cross and Blue Shield (New York) and Blue Shield of California. These plans currently provide healthcare coverage to over 30 million people.

"Under this agreement, MEDSTAT products may be offered as an integrated component of the NASCO service package," said Ernest G. Ludy, MEDSTAT chairman and chief executive. "The agreement's remarketing provisions, combined with NASCO's established industry relationships, creates a significant distribution channel to key players in this important sector of the health insurance market." The agreement is expected to be executed within 60 days.

MEDSTAT Systems is a healthcare information company serving corporations, insurance, healthcare and consulting organizations with specialized databases, software and consulting services for controlling medical costs and measuring healthcare markets.

#90297p8723 10/24/1990 ~PR Newswire

HOUSTON (OCT. 24) PR NEWSWIRE - Compaq Computer Corporation (NYSE: CPQ) today announced sales for the quarter ended Sept. 30, 1990 rose to $863 million, a 26 percent increase over sales of $683 million for the third quarter of 1989.

Net income for the third quarter was $124 million, a 42 percent increase over net income of $87 million in the third quarter of 1989. Earnings per share rose to $1.38 from $1.01 in the corresponding period a year ago (adjusted for a two-for-one stock split effective June 29, 1990).

Net income for the first nine months of 1990 was $320 million, or $3.62 per share, compared with $254 million, or $2.96 per share on a fully diluted basis in the first nine months of 1989.

Sales for the nine-month period were $2.6 billion, compared with $2.1 billion during the corresponding period last year.

Net income for the quarter ended Sept. 30, 1990 includes a non-recurring, pretax gain of $27.1 million resulting from an increase in the carrying value of the Company's investment in Conner Peripherals, Inc. Net income for the quarter ended Sept. 30, 1989 included a similar gain of $13.7 million. In each instance, the gains resulted from Conner's issuance of additional common stock at prices higher than the carrying value of Conner common stock owned by the company. These gains, after giving effect to income taxes, increased earnings per share in the respective period by $.20 in 1990 and $.10 in 1989.

In the third quarter of 1989, the company also realized a gain of approximately $7.6 million, having an after-tax effect of $.06 per share,

through the sale of one million of its Conner shares.

Compaq third quarter 1990 unit shipments in North America increased by 20 percent over the same quarter last year, while the market's unit growth during this period was 5 percent. Sales growth in North America was 5 percent during third quarter 1990 vs. third quarter 1989. European and International sales comprised 53 percent of Compaq revenue during the quarter and grew by 54 percent compared with the same period last year.

Compaq Computer Corporation is a world leader in the manufacture of PC systems and desktop, portable, laptop and notebook personal computers. COMPAQ products are sold in 64 countries through more than 3,000 Authorized COMPAQ Computer Dealers.

Founded in February 1982, Compaq has consistently set business and industry growth records. This year, Compaq achieved "Global Fortune 500" status, as ranked (No. 438) in Fortune Magazine's 1990 listing of the world's largest companies.

NEW YORK (OCT. 24) PR NEWSWIRE - Citicorp (NYSE: CCI) announced it will raise the dividend rate cap to 200 percent of the 60-day AA commercial paper rate for today's auction of its $100 million of Series 5A auction rate preferred stock to facilitate the orderly continuation of the auction pricing process. The cap on this series of preferred stock has been 120 percent, lower than other more recent issues of similar preferred stock of other corporations because the program was one of the earliest of its kind.

The dividend rate cap will be raised to 200 percent through an exchange offer for a new series of auction rate preferred stock that will have identical terms with the Series 5A preferred stock, except for the terms relating to the cap. The exchange offer will be completed prior to the Series 5A's next regularly scheduled dividend payment date following today's auction.

#90297p8727 10/24/1990 ~PR Newswire

CINCINNATI (OCT. 24) PR NEWSWIRE - The Procter & Gamble Company (NYSE: PG) today announced that net earnings for the July-September period, the first

quarter of the fiscal year, were $555,000,000. This is a 15 percent increase over comparable net earnings of $483,000,000 in the same quarter a year ago after excluding last year's one-time favorable Duncan Hines cookie litigation settlement. The increase was primarily due to strong unit volume growth. Including the favorable litigation settlement, earnings in July-September 1989 were $564,000,000.

Earnings per share in July-September were $1.57, a 15 percent increase compared with $1.36 a year ago excluding the favorable litigation settlement. Earnings per share a year ago including the litigation settlement were $1.59 per share.

Worldwide net sales for the July-September period were $6,652,000,000, an increase of 16 percent over net sales of $5,717,000,000 for the same three months a year ago. The increase in sales was primarily due to the growth in unit volume.

QUARTERLY RESULTS
Millions of Dollars Except per Share Amounts

3 Months Ended September 30	1990	1989
Net Sales	$6,652	$5,717
Net Earnings	555	564
Net Earnings Per Common Share	1.57	1.59
Net Earnings Per Common Share Assuming Full Dilution	1.49	1.51

Notes to Quarterly Results 1. July-September 1989 results have been restated to include the operations of Noxell which was merged with the company in November 1989.

2. July-September 1989 results include a one-time favorable Duncan Hines cookie litigation settlement of $81 million after-tax, $.23 per share, and $.22 per share assuming full dilution.

Excluding this litigation settlement, July-September 1989 results would have been net earnings of $483 million; net earnings per common share of $1.36; and $1.29 per common share assuming full dilution. July-September 1990 earnings and earnings per common share were up 15 percent versus these comparable base period results.

#90297p8730 10/24/1990 ~PR Newswire

BRISTOL, TENN. (OCT. 24) PR NEWSWIRE - The Communications Workers of America (CWA) Tuesday denounced what it called United Inter-Mountain Telephone's

attempt to "strong-arm" workers into accepting health care cutbacks, and circumvent the bargaining process.

CWA said the company sent a letter directly to workers threatening to cut off all health care benefits by Nov. 1, if workers did not agree to the company's cutbacks proposal.

"We are appalled by the coercive tactics that United Telephone has resorted to in these negotiations," said CWA Vice President Gene Russo. "United is refusing to bargain in good faith. CWA has repeatedly requested information which is essential to evaluate the company's proposal on health care, and consistent with the union's duty to represent its workers. This is information to which the union is legally entitled, but which they have refused to produce. They have stalled and delayed, and now are using fear and intimidation and making a mockery of collective bargaining process."

"What's at stake here is whether corporate headquarters in Kansas City can dictate to the people of east Tennessee and southwest Virginia how we meet our families' health care needs," said Darrell Freeman, president of CWA Local 3871. "Ratepayers and United's workers should not be held hostage to plans dictated by Kansas City carpetbaggers.

"Believe me," Freeman continued, "if a profitable company like United carries out its implied threat and locks us out of our jobs because we refuse to be intimidated and take drastic cuts in health benefits, CWA members are not the only ones who will suffer. Our entire community will feel this blow, first in disruptions in telephone service, and second, in the loss of income for 670 families and the local businesses they patronize."

CWA is filing charges of unfair labor practices with the National Labor Relations Board (NLRB) because of what the union called United's illegal changes in the terms and conditions of work, and withholding relevant and necessary information critical to the bargaining process.

The union contract at United Telephone expired on Aug. 23; workers have stayed on, working under the terms of the previous contract, while negotiations have continued.

CWA represents more than 670 workers at United Inter-Mountain Telephone, and several thousand workers at other United Telephone companies.

#90297p8732 10/24/1990 ~PR Newswire

LOS ANGELES (OCT. 24) PR NEWSWIRE - Unocal Corp. (NYSE: UCL) today reported

third quarter 1990 net earnings of $121 million, up 53 percent from $79 million for the same period a year ago. Earnings per share for the quarter were 52 cents, up from 34 cents for the third quarter 1989.

For the first nine months, Unocal's net earnings were $363 million, or $1.55 per share. This was 27 percent higher than 1989 earnings of $286 million, or $1.22 per share.

Richard J. Stegemeier, Unocal chairman, president and chief executive officer, said the increase in third quarter earnings was largely the result of sharply higher crude oil prices, partially offset by lower earnings from West Coast refining and marketing operations.

"Our worldwide price for crude oil averaged $20.22 per barrel in the third quarter, an increase of $6.30 a barrel from 1990's second quarter and $4.60 a barrel higher than a year ago," Stegemeier said. "On the other hand, earnings from Unocal's West Coast refining and marketing operations were down because market conditions prevented a full pass through of higher crude oil costs to consumers."

The third quarter and nine-month earnings also reflected higher natural gas production, improved shale oil operations, and lower net interest expense. These were partially offset by lower domestic crude oil production, higher domestic petroleum production expense, increased provisions for litigation and expenses associated with environmental programs. The quarter and year-to-date results also reflected the benefits of lower deferred income taxes.

The nine-month 1990 results included a $132 million after-tax gain from the sale of the company's wholly owned oil and gas subsidiary in Norway. The nine-month results in 1989 included gains from various natural gas contract settlements, the sale of surplus properties in Southern California and the settlement of certain pension obligations.

Cash flow from operations and asset sales, before working capital changes, were $373 million for the quarter, compared with $331 million a year ago. For the nine months, cash flow totaled $1.25 billion, compared with $1.03 billion a year ago.

#90297p8742 10/24/1990 ~PR Newswire

LAWRENCEVILLE, NJ (OCT. 24) PR NEWSWIRE - Imo Industries Inc. (NYSE: IMD) today reported net income for the third quarter ended Sept. 30, 1990, of $2.1 million, or $.12 per share, down from the $5.6 million, or $.31 per share reported for the third quarter of 1989.

Sales for the third quarter were $240.4 million, compared with $188.6 million reported for the third quarter of last year.

For the first nine months of 1990, net income was $14.7 million, or $.81 per share, down from the $22.6 million, or $1.26 per share reported for the same period a year ago. Sales for the most recent nine months were $743.9 million, compared with $567.7 million.

"Weakness in the economy affecting some of the company's markets, and internal actions reported during the first half of this year, negatively impacted third quarter earnings compared with those of a year ago," said W.J. Holcombe, IMO chairman and chief executive officer. "The timing of a number of deliveries on major programs should result in a substantial rebound in earnings for the fourth quarter from the third quarter.

Bookings in the third quarter increased 22 percent from those reported for the same period last year, and were up 2 percent on a pro forma basis.

Instrument Group sales were up 4 percent in the third quarter compared with a year ago, but operating income was down 26 percent. Income was impacted by adjustments made in the second quarter that set a substantial part of the electro-optical operation's backlog for the balance of the year to break even at the gross profit level. A portion of operating expenses were therefore not adequately covered resulting in Group operating margins below historic levels. Deliveries by the electro-optical operations scheduled for the fourth quarter, primarily to customers outside of the United States, should result in significant operating income improvement.

Third quarter sales of the Controls Group were more than double last year's level and operating income gained 32 percent, due to the inclusion of Roltra-Morse, acquired in September 1989. Further improvement in operating results was hampered by the continued depressed condition of the pleasure marine market and a generally less favorable mix of lower margined shipments. Competitive pressures, production- schedule reductions by Roltra-Morse's major automotive customer and a continuation of weak pleasure marine markets both in the United States and Europe, will depress performance somewhat in the fourth quarter.

The move of the Power Transmission Group's Boston Gear production activities from Quincy, Mass., to a modern, efficient facility in Charlotte, N.C., was largely completed during the third quarter as planned. Expenses related to this move were the primary reason operating income was below last year's level. Overall sales and income gains from the Group's pump operations were offset by the general softness in the defense and industrial sectors.

Sales of the Power Products and Services Group were up sharply from last year, primarily from increased unit shipments of rotating machinery. Operating

income was down from last year in part because of a less favorable mix of aftermarket maintenance and repair work, and because we are still in the startup phase of our new "Seawolf" submarine condenser program. Major turbomachinery units with favorable profit margins are scheduled for shipment in the fourth quarter.

IMO supplies analytical and optical instruments, electronic and mechanical controls, engineered power products and their support services to industrial and defense customers worldwide.

#90297p8744 10/24/1990 ~PR Newswire

NORTH PALM BEACH, FLA. (OCT. 24) PR NEWSWIRE - FPL Group, Inc. (NYSE: FPL), the holding company for Florida Power & Light Company, today reported third quarter results and said that it was writing down its investment in its insurance subsidiary, Colonial Penn Group, Inc., and three other non-utility subsidiaries.

This action reflects the depressed conditions in the insurance, real estate and financial sectors of the economy and is consistent with FPL Group's previously announced strategy of focusing on energy-related businesses.

The third quarter after-tax charges totaled $752 million, of which $689 million represented reserve strengthening and write-downs related to Colonial Penn. This resulted in a net loss for FPL Group of $569 million, or ($4.19) per share for the quarter. In addition to the after-tax charges associated with Colonial Penn, the third quarter results include a write-down of $63 million reflecting FPL Group's decision to exit the real estate, cable television, and environmental remediation businesses.

Excluding the $752 million charge, the company's net income increased to $183 million, or $1.35 per share, from $159 million, or $1.20 per share, in the third quarter a year ago.

Earlier in the year, FPL Group retained the investment banking firm of Goldman Sachs & Co. to seek a buyer for Colonial Penn, and to investigate other alternatives for its insurance business. Although no agreement has been reached, discussions are continuing with potential buyers and it remains FPL Group's desire to exit the insurance business as soon as practicable, according to Broadhead. He added that, in the interim, actions are being taken to improve Colonial Penn's performance.

For the first nine months of 1990, FPL Group had a net loss of $432 million, or ($3.20) per share, reflecting the charges. Excluding the $752 million charge, FPL Group's net income was $319 million, or $2.36 per share, for the

first nine months of 1990. In the same period of 1989, the company reported net income of $340 million or $2.59 per share.

Florida Power & Light Company's contribution to FPL Group's net income for the first nine months of 1990 was $344 million, or $2.54 per share, compared with $340 million, or $2.59 per share, for the same period last year.

FPL Group's common stock is traded on the New York, London and Tokyo stock exchanges.

WAYNE, PA. (OCT. 24) PR NEWSWIRE - Orthopedic Services, Inc. (NASDAQ: OSII), announced record revenues and earnings for the third quarter 1990. Revenues of $9,228,000 for the three months ended Sept. 30, 1990, increased 60 percent over the third quarter 1989. Gross profit of $5,048,000 increased 54 percent over the third quarter of 1989 and operating profit of $1,127,000 increased 46 percent over operating profit for the same period a year ago. Net income for the quarter was $563,000 compared to a net loss of $85,000 for the same period in 1989. Earnings per share were 8 cents compared to a 2 cent loss per share in the third quarter 1989.

On a quarter-to-quarter basis, compared to the second quarter ended June 30, 1990, net sales, gross profit, and operating profit increased 5 percent, 7 percent and 16 percent respectively. Gross profit margins increased from 54 percent to 55 percent and operating profit margins increased from 11 percent to 12 percent. Net income for the quarter was $563,000 compared to a net loss of $74,000 for the prior quarter.

Since the beginning of 1990, OSI has acquired 11 companies, including three in the third quarter. President Jeffrey S. Levitt stated, "We are in a strong financial position and will continue to expand our business through selected acquisitions and internal growth."

OSI is the largest provider of patient care services in the orthotic and prosthetic rehabilitation segment of the healthcare services industry. OSI currently provides services through 56 patient care centers in 13 states.

Orthotic rehabilitation is the fitting, design and fabrication of custom-made braces and support devices for the treatment of conditions resulting from illness, injury or congenital abnormalities. Prosthetic rehabilitation is the fitting and fabrication of custom-made artificial limbs required by people who have suffered the loss of a limb from vascular disease, diabetes, cancer or traumatic injuries.

#90297p8751 10/24/1990 ~PR Newswire

DALLAS (OCT. 24) PR NEWSWIRE - Commercial Metals Company (NYSE: CMC) today reported net earnings of $25.9 million or $2.27 per share on sales of $1.1 billion for the year ended Aug. 31, 1990. This compares with earnings of $28.5 million or $2.46 per share, on sales of $1.3 billion for the same period last year. Cash flow from operations was $48 million compared to the record $50 million last year.

CMC President and Chief Executive Officer Stanley A. Rabin said, "It was another fine performance, the second best year ever and close to last year's record earnings, and constituted the third consecutive strong year. Net earnings were $3.0 million higher (26 cents per share) because of the LIFO effect on inventory valuation. Conversely, profits were reduced by startup costs at several plant." According to Rabin, "It was another record year for the CMC Steel Group with sharply higher earnings whereas copper tube manufacturing was down. The Secondary Metals Division's results were significantly lower than last year's record; however, earnings in the Marketing and Trading Segment were higher than last year."

The company also announced that the board of directors has authorized the repurchase of an additional 750,000 shares of the company's common stock. Rabin said, "The company bought over 856,000 shares, amounting to $17 million,

last year and we believe CMC stock is significantly undervalued and an excellent investment."

Rabin concluded, "The outlook for Commercial Metals Company continues to be generally favorable although uncertainty has increased somewhat in recent weeks. The steel and metal markets are sluggish and we have observed some slowing overseas. Houston continues to lead the recovery in the Southwest. Our emphasis for increased profitability continues to be on the expansion of our manufacturing base and product line and an even larger presence in recycling."

Commercial Metals Company and subsidiaries manufacture, recycle and market steel and metal products, related materials and services through a network of over 70 locations including steel minimills, steel fabrication plants, a copper tube mill, recycling facilities and trading offices in the United States and trading and representative offices in strategic overseas markets.

#90297p8752 10/24/1990 ~PR Newswire

MELBOURNE, FLA. (OCT. 24) PR NEWSWIRE - Harris Corporation (NYSE: HRS) reported that net income in the first quarter ended Sept. 28 was $17.5 million compared with $25.6 million in the first quarter of last year. Earnings per share were 44 cents on 39.8 million shares outstanding, compared with 66 cents on 38.8 million shares. Sales for the quarter were $719.3 million vs. $717.0 million last year.

Total orders increased over the year-earlier period, due primarily to good order growth in the Electronic Systems Sector and strong bookings in the Communications Sector. Total orders exceeded shipments in the quarter.

John T. Hartley, Harris chairman and chief executive, said, "The first-quarter results of our four business sectors were in line with the outlook statement released in September. Electronic Systems and Lanier Worldwide posted good increases in earnings on slightly higher sales. The Communications Sector reported lower sales and a decline in earnings, primarily as a result of lower domestic business. Semiconductor sales were relatively flat, and the sector reported a small loss compared with strong earnings in last year's first quarter. Results in this sector were negatively impacted by pricing pressures and higher-than-planned restructuring costs."

Looking ahead, Hartley said, "There is an unusually high degree of uncertainty and instability in the world economic and political environment, and it is difficult to predict what effect this will have in the months ahead. Our two largest business sectors, Electronic Systems and Lanier Worldwide, are off to a good start, and we expect these businesses to show earnings gains for the

year as a whole. Our present outlook for the Communications Sector is for earnings to be somewhat lower for the year, but we are encouraged by incoming order strength, particularly in international orders."

"In the Semiconductor Sector, we believe that second-quarter results will be close to the breakeven mark, followed by a return to profitability in the second half of the year," Hartley continued. "We are cautiously optimistic that we will see modest growth in the domestic semiconductor market in the second half, which could alleviate some of the current pressure on selling prices. Also, we are well along with the restructuring of the Semiconductor Sector, and we expect that the benefits from plant consolidations, headcount reductions, and the discontinuance of marginal products will start to appear in the second half."

#90297p8754 10/24/1990 ~PR Newswire

FORT LAUDERDALE, FL (OCT. 24) PR NEWSWIRE - Alamo Rent A Car, Florida's and the nation's largest independently owned and operated car rental company, has been awarded one of the consumer world's most prized professional honors for developing 1990's "outstanding consumer service training program," the company announced today.

The Florida-based car rental company took top honors in the 14th annual nationwide competition sponsored by the Society of Consumer Affairs Professionals in Business.

The society is the major national organization of consumer affairs executives for the country's largest consumer products and services companies. Previous winners of the prestigious award include such blue-chip firms as the Quaker Oats Company, the Reader's Digest organization, and Nissan Motors.

Acknowledging the first-place honor bestowed on the Fort Lauderdale headquartered car renter, President Charles D. Platt said: "This is an especially significant award for Alamo because vacation travel is such a service-driven industry and so important to Florida. I accept it with pride on behalf of all of our superbly trained 5,000 employees in Florida, 34 other states and overseas."

Society Vice President Russell E. Schmuhl, a consumer affairs executive with the Polaroid Corporation, made the presentation to Platt at the organization's just-concluded 1990 convention. He lauded the winning program for its "outstanding success in enhancing Alamo employees' ability to provide quality consumer service at every level."

The society's award went specifically to Alamo's unique "Best Friends"

employee training project launched in May 1989, to rigorously train every one of the car rental firm's employees from top management down. Phase one of the training project, completed one year ago, was aimed at achieving what Platt called, "Alamo's single most important objective: to be first in service in the car rental industry."

The unique undertaking was designed to motivate employees to demonstrate the highest levels of courtesy, concern, and friendliness in their dealings with the approximately five million consumers Alamo currently serves annually.

Its implementation was supported by a comprehensive, on going program of training, counseling, instruction, and rewards that quickly produced unprecedented new levels of consumer satisfaction for the company.

SHELTON, CT (OCT. 24) PR NEWSWIRE - The Forschner Group, Inc. (NASDAQ: FSNR), today announced changes on the board of directors, including a new chairman and three new directors. William L. Bennett, president and chief executive officer of Noel Group, Inc., in New York, is the new chairman, succeeding Harry R. Thompson.

Thompson, who is chairman and chief executive officer of Telesphere Communications, Inc., in Chicago, a provider of interactive 900 telephone services and long distance services to hotels, stepped down as chairman, but will remain a director, because of increasing business commitments. Telesphere recently completed the acquisition of National Telephone Services Inc.

The three new directors are O.J. Simpson, NBC Sports commentator and Hall of Fame professional football player, John Spencer, Ph.D., holder of the African Studies Professorship at Middlebury College, and Karen Brenner Stein, vice president of Noel Group.

Commenting on the changes, James W. Kennedy, president and chief executive officer of Forschner, said, "I'm delighted by the range of talents that the new board members bring to Forschner. A growing marketing company in a difficult economy wants and needs experienced board-level judgment to ensure the future.

"I'm also very pleased that Harry Thompson will continue as a director. His counsel on new product introductions and the depth of his marketing skills are invaluable. The increased participation in Forschner by Bill Bennett is also very welcome. His financial and management background are important assets for the company."

Bennett was with Rockefeller & Company, Inc., for two years and previously was a partner of Bain & Company in Boston for five years before joining Noel, a private company with substantial interests in the energy, ophthalmic, and real estate development fields. He is a director of Taunton Technologies, Inc., Global Natural Resources, Inc., and Xenejenex Inc.

Simpson was the Heisman Trophy winner at USC in 1968 and went on to become pro football's second leader rusher in NFL history with the Buffalo Bills. He started his sportscasting career in 1977 and has worked with ABC as well as NBC. He has produced films and been a personality on a number of television specials. He is active as a spokesman in television and print commercials for a variety of consumer companies.

Spencer has been at Middlebury since 1974 and has served as dean of the college and chairman of the history department. He worked as a Peace Corps evaluator in Africa, as a program officer for the Ford Foundation, and as a fellow in the Institute of Current World Affairs in East Africa. He is now chairman of the Institute of Current World Affairs.

Ms. Stein operated her own management and financial consulting business, specializing in turnaround situations, before joining Noel in 1989. She is a director of Noel and Taunton Technologies, Inc.

#90297p8757 10/24/1990 ~PR Newswire

NEW YORK, NY (OCT. 24) PR NEWSWIRE - Norfolk Southern Corporation (NYSE: NSC) today reported third quarter net income of $142.9 million, or 89 cents per common share, down 5.0 percent from the $150.5 million, or 87 cents per common share earned in 1989. Per-share earnings for the quarter increased 2.3 percent over last year, reflecting Norfolk Southern's continuing stock purchase program.

Net income for the first nine months of 1990 was $439.0 million, or $2.68 per common share, down 4.1 percent from the $458.0 million, or $2.61 per common share, earned in the 1989 period. Nine-month earnings per share, up 2.7 percent, also reflect the effects of the continuing stock purchase program.

"Income from operations for the quarter was up 6.5 percent," said Arnold B. McKinnon, chairman, president and chief executive officer, "even though diesel fuel expense was up 24.7 percent, mostly because of higher prices. Other income-net, however, was reduced 53.7 percent, the result of a combination of investment-related transactions and increased interest expense on debt incurred to finance the stock purchase program.

"In the third quarter, a $35.0 million gain resulting from the sale of

securities of RF&P Corporation was more than offset by a $40.0 million write-down reflecting the reduced market value of certain securities held for investment purposes," McKinnon said,.

Transportation operating revenues for the third quarter were $1.18 billion, up 2.9 percent compared with the $1.14 billion in the 1989 period. Railway operating revenues of $936.8 million were 3.7 percent higher than the $903.3 million in the third quarter of 1989. Motor carrier revenues were down 0.3 percent, from $238.8 million in 1989 to $238.2 million this year.

Coal revenues increased 9.8 percent in the third quarter. General merchandise revenues remained essentially flat, although automotive revenues increased 6.5 percent and intermodal revenues increased 3.0 percent.

For the first nine months of 1990, total transportation operating revenues of $3.49 billion were 1.9 percent higher than the $3.43 billion the previous year. Railway operating revenues of $2.86 billion for the first nine months of 1990 increased 2.6 percent over the $2.78 billion in the previous year, while, in the same period, motor carrier revenues of $637.7 million declined 1.3 percent from $646.0 million last year.

Total transportation operating expenses for the third quarter of 1990 were $961.3 million, up 2.1 percent from the $941.4 million last year. Railway operating expenses for the quarter increased 2.1 percent, while motor carrier expenses increased 2.3 percent. For the first nine months, total transportation operating expenses increased 1.7 percent over the comparable 1989 period, with railway expenses up 2.1 percent and motor carrier expenses up 0.7 percent.

The railway operating ratio -- the percentage of revenues that goes into operating the railroads -- was 77.6 for the third quarter, compared with 78.9 in 1989, and was 77.4 for the first nine months, compared with 77.8 in 1989.

BURBANK, CA (OCT. 24) PR NEWSWIRE - Summit Health Ltd. (NASDAQ: SUMH) today announced earnings of $1.6 million, or $.05 per share for the first fiscal quarter ended Sept. 30, 1990. The results represent an increase of 56.4 percent over 1990 first quarter earnings of $1.1 million, or $.03 per share, on 31,250,000 average shares outstanding for both quarters.

There were four dominant trends which contributed to improved earnings: seven percent growth in outpatient services; increasing demand for critical care services; an increased intensity of both inpatient and outpatient services; and improved financial operating systems.

First quarter revenues were $92.8 million compared to $93.3 million last fiscal year. For facilities in operation during the first quarter of both fiscal years, net revenues increased by six percent, from $87.4 million to $92.8 million.

Summit Health Ltd. is an investor-owned health care company, which operates 12 hospitals with a total of 1,648 licensed beds and 17 nursing facilities with a total of 2,230 licensed beds in California, Texas, Arizona and Iowa. The company also operates medical office buildings, retirement hotels and substance abuse centers.

NEW YORK (OCT. 24) PR NEWSWIRE - The boards of directors of Financial News Network Inc. (NASDAQ-NMS: FNNIE) and Infotechnology, Inc. (NASDAQ-NMS: ITCH), which owns 47 percent of FNN, today announced that they have appointed Alan J. Hirschfield and Allan R. Tessler interim co-chief executives, effective immediately.

Hirschfield and Tessler will serve as a restructuring team to address FNN's and Infotech's financial problems and analyze and present options for consideration by the boards of the two companies. Such options may include restructuring of debt and lease obligations and sale of some or all of the companies' businesses.

Dr. Earl W. Brian, who has been chief executive officer of both companies, will continue as non-executive chairman of both boards and as a director of both companies.

Hirschfield, formerly chief executive officer of both 20th Century Fox and Columbia Pictures, is currently a managing director of Wertheim Schroder & Co. Inc. Tessler is presently chairman of International Financial Group, Inc., Ameriscribe, Inc. and International Controls Corp.

They have been involved in several business restructurings and have broad experience in corporate finance and, in Hirschfield's case, with media companies. Tessler also has had substantial experience as a lawyer with a large New York law firm. Tessler, who has been an Infotech director since mid-1989, has relinquished that position to assume his new post.

As previously reported, FNN has been unable to date to complete and file its annual financial reports with the Securities and Exchange Commission (SEC), for the fiscal year ended June 30.

Infotechnology, Inc. is an integrated communications and information company positioned to meet the needs of businesses and consumers with fast, easy-to-use information products of economic value to its customers.

Financial News Network provides three services to more than 35 million homes on 3,500 cable systems throughout the United States and Canada. The television programming services are FNN:BUSINESS (business news and personal financial management) and FNN:SPORTS (sports information and news). And the market data service is FNN:Data Broadcasting (stock quotes and market information to personal computers).

FNN also operates a business radio service, owns 49 percent of Shark Information Services Corporation. (supplying investment professionals with quotes and market data), and owns, together with Infotech, a majority position in The Learning Channel, Inc.

BEDFORD, MA (OCT. 24) PR NEWSWIRE - Millipore Corporation (NYSE: MIL) announced today that its earnings per share were 37 cents in the third quarter up from 36 cents per share last year. While net income rose 3 percent in the third quarter, pretax income was up 15 percent. Tax rates were 13 and 22 percent for the third quarters of 1989 and 1990, respectively. Millipore reduced its tax rate in the third quarter of 1989 to achieve an annual rate of 22 percent for the full year 1989, the same rate as applied for 1990.

Earlier in the month, Millipore reported that sales grew 18 percent for its ongoing business in the third quarter of 1990 and 14 percent for the first nine months of the year. Compared with reported 1989 results, which included the revenues of Millipore's process water business sold later that year, third quarter 1990 sales were up 9 percent and 5 percent for the first nine months of 1990.

If currency exchange rates had been constant in 1989 and 1990, the growth in Millipore's sales from its ongoing business would have been 12 percent in the third quarter and 11 percent for the first nine months.

Millipore is a high technology growth company that leads the $3.1 billion separations industry. Millipore products are used for analysis, synthesis and purification in life science research, pharmaceutical production, environmental testing, beverage processing, semiconductor manufacturing, health care, and other applications.

INDEPENDENCE, OH (OCT. 24) PR NEWSWIRE - Robert C. Savage, president and chief executive officer of Savage & Associates, a Toledo insurance, estate planning and financial planning organization, has been elected to the board of directors of the Centerior Energy Corporation (NYSE: CX).

The election of Savage at yesterday's regular board meeting brings to 14 the number of directors of the electric utility holding company. Savage has been a member of the advisory committee of a Centerior operating subsidiary, Toledo Edison. Toledo Edison and Centerior Energy's other operating subsidiary, Cleveland Electric Illuminating, provide electric service to about one million retail customers in Northern Ohio.

With his brother, John, Savage formed the Savage Insurance Agency in 1959. Today, Savage & Associates employs nearly 100 people. In 1963, at the age of 25, Savage was elected to the Toledo City Council-the youngest member in its history. He concluded his council career in 1969, serving as vice mayor the last two years.

Savage serves on the boards of the University of Toledo and Notre Dame Academy (Toledo) and is a member of the advisory board to the superintendent of Catholic schools. He is active in numerous community organizations, including the Committee of 100. He serves on the board of directors of 11 business organizations and is the immediate past chairman of the board of St. Vincent Medical Center and the Toledo Opera Association.

CONTACT: Lee Bailey of Centerior Energy, (216) 447-3235, or (216) 623-1060 after work hours.

BELLEVUE, WA (OCT. 24) PR NEWSWIRE - Edmark Corp. (OTC Pink Sheets) announced today significantly improved sales and results for its first quarter.

Sales for the first quarter totaled $1,149,083, up 11 percent from a strong first quarter in 1989. Net income for the quarter was $126,560, or $0.07 per share, up strongly from the net income of $14,474, or $0.003 per share, in the year earlier period. 1989 per share results are adjusted for the 1-for-3 reverse stock split which occurred in November 1989.

"The first quarter is always a seasonally strong quarter for Edmark," said Sally Narodick, chief executive officer, "but the results for this period also reflect the progress that has been made in restoring our TouchWindow margins."

Narodick attributed part of the improved performance to the resolution of previously reported supply and cost problems on the TouchWindow which had adversely impacted the year ago quarter. "Strong sales of new and existing products and continued emphasis on expense control also contributed to the improvement," she reported.

Edmark Corp. publishes print and software curriculum materials to teach basic skills to special education and remedial market segments. Copies of Edmark's 1990 educational materials catalog and software catalog are available from Edmark Corp., P.O. Box 3903, Bellevue, WA 98009-3903.

MINNEAPOLIS (OCT. 24) PR NEWSWIRE - LifeCore Biomedical, Inc. (NASDAQ: LCBM), today announced a revenue increase of 46 percent during the first quarter ended Sept. 30, 1990. Revenues increased to $1,451,000 during the current period compared to $997,000 for the same period last year. The company also reported a net loss of $267,000, or five cents per share compared to a loss of $206,000, or four cents per share last year.

LifeCore indicated that overall financial results were in line with management's expectations. The gain in revenues was primarily attributed to increased sales in the Orthomatrix Division's oral restorative product line. Sales of the company's recently introduced SUSTAIN(TM) HA-Biointegrated Dental Implant System grew substantially, indicating increasing acceptance of the new product by dental and oral surgical clinicians. The aggressive marketing and sales effort in support of the introduction of SUSTAIN continues to be the principal reason for recent quarterly losses.

James W. Bracke, LifeCore's president stated that while the costs associated with the introduction of SUSTAIN are affecting short-term financial performance, sales growth for the new dental implant line is occurring at a rapid rate.

LifeCore develops, manufactures and markets high purity biomaterials and medical devices used in orthopedic, ophthalmic and dental surgery. The company has aligned itself with large, well-established medical companies to broaden the commercial applications for its proprietary products. Those companies include Biomet, Inc. and divisions of Nestle SA, Johnson and Johnson and United States Gypsum Company.

#90297p8778 10/24/1990 ~PR Newswire

MCLEAN, VA (OCT. 24) PR NEWSWIRE - Vie de France Corporation (NASDAQ-NMS:

VDEF) announced today the results of its first quarter which ended Sept. 22, 1990.

For the quarter, the company's sales increased 3 percent to $22,920,000 from $22,306,000 in the first quarter and the previous year. Net loss for the period was $1,297,000 (-10 cents per share), versus $286,000 (-3 cents per share) for the first quarter of 1990. Operating loss before interest and taxes of $758,000 compares to an operating income of $30,000 for the same period a year ago.

Jean-Louis Vilgrain, chairman, reported that the loss for the quarter is a result of continuing losses in the restaurant division and costs associated with the Culinary Division sous vide start-up. As compared to the prior year, most of the increase in the loss was a result of this new venture. Slightly higher interest costs associated with capital spending for new plants and equipment also contributed to the loss. While the prior year quarter's net loss was reduced by an income tax carryback benefit of $207,000, the company has since fully utilized all available tax loss carrybacks, and therefore had no tax benefit to offset the current quarter's loss.

He further stated that at the end of the first quarter the company has begun to see significant volume increases in sous vide shipments as several prominent hotel chains have become customers. Culinary Division losses are expected to be substantially reduced in coming months and this division is expected to be operating at breakeven by fiscal year end. Management continues to be more and more optimistic about its sous vide entry into the marketplace. In a few short months since the plant was opened Vie de France has become recognized as the highest quality producer of sous vide.

The results of the Bakery and Restaurant Divisions were impacted by the slowdown in the economy; however, the Bakery Division was able to improve its results due to the consolidation of facilities, increased efficiencies, and the impact of new items introduced such as European Hearth Breads, which have been well received in the marketplace. The Restaurant Division, although it has lowered its operating costs and improved its efficiency is also experiencing the direct result of the economic slowdown, which is clearly evidenced by fewer mall customers in recent weeks. While the restaurant business is soft, aggressive marketing and operations efforts are minimizing the sales losses. Several menu changes, including dinner entrees, value priced additions at lunch, and children's menus, are planned in the near future. In mid- November the first two Vie de France Express Cafe franchises operated by the Marriott Corporation will open in Phoenix Airport, which is the start of the Marriott franchise program. As a continuing part of its strategy to sell restaurants outside of Washington and Chicago, the company reported that two restaurants in Orange County, Calif., will be sold shortly and offers are pending on restaurants in several other areas. Vilgrain stated that the company is carefully reviewing additional solutions to its restaurant operational problems in the face of increasing economic pressure.

In summary, he concluded that the company is committed to take serious action to reduce restaurant losses and to continue to increase significantly its market presence in its wholesale bakery and sous vide operations.

#90297p8782 10/24/1990 ~PR Newswire

HOUSTON (OCT. 24) PR NEWSWIRE - Sysco Corporation (NYSE: SYY) today reported results for the first quarter of fiscal 1991 which ended Sept. 29, 1990.

Sales for the quarter rose eight percent to $2.03 billion as compared to the $1.88 billion of the previous year. Net income of $37.6 million, or $0.41 per share, was 19 percent more than the $31.6 million, or $0.35 per share, earned during the initial quarter of fiscal 1990.

In commenting on the company's results during the quarter, John Woodhouse, chairman and chief executive officer of Sysco, stated, "Operating performance for the quarter was in line with our expectations as solid sales and profit growth was experienced across most of the country.

"We are especially pleased by the results achieved during the quarter by Sysco's traditional foodservice companies which, after adjusting for the effects of acquisitions and nearly three percent annualized food price inflation, attained real sales growth in excess of 8.5 percent - a continuing improvement over the 7.5 percent rate of the preceding quarter."

Woodhouse said the company expects food price inflation to trend upward to between three and five percent during the remainder of fiscal 1991, in part due to the delayed impact of recent rising petroleum costs.

The company is maintaining an extensive capital expenditure program to enlarge distribution capacity and improve operating efficiencies. Sysco estimates that it will likely invest approximately $180 million in facilities, fleet and other fixed assets during fiscal 1991.

Major new facilities are currently under construction in New Orleans, La., and Portland, Ore. In addition, Sysco's two operating companies in the San Francisco Bay Area will expend significant amounts on new distribution centers in fiscal 1991 in order to support strong sales momentum in northern California.

In conclusion, Woodhouse commented, "We are gratified with the company's progress during the first quarter and look forward to the remainder of the fiscal year with optimism. Sysco is committed to achieving ongoing real double-digit sales growth in its markets by offering appropriate products and

the highest level of service to our valued customers."

Sysco is the nation's largest foodservice marketing and distribution organization. The company provides its products and services to approximately 230,000 customers located across the United States and western Canada. The Sysco distribution network currently covers virtually the entire continental United States including all of its 150 largest cities.

DALLAS (OCT. 24) PR NEWSWIRE - Income Opportunity Realty Trust (AMEX: IOT) today announced it will record a $6.3 million provision for losses in its third quarter ended Sept. 30, 1990.

The trust will record a $4.6 million loss provision representing its entire investment in a mortgage receivable related to an office building in Walnut Creek, Calif. The trust has a second mortgage on the property and expects the holder of the first mortgage to foreclose. Income Opportunity will record a $1.7 million loss provision representing its entire joint venture interest in a California industrial warehouse development. The trust had been funding operating deficits since 1988, incurring substantial losses on this investment and had seen improvements in the property's negative cash flow. However, it has determined to stop funding these deficits as a result of increased vacancies and collection problems. These two investments accounted for 21 percent of the trust's gross assets at June 30, 1990. The trust has not previously taken any provisions for losses on these assets.

"This is a substantial loss provision, as it will represent approximately $1.70 per share, but one we believe is necessary to continue to carry our real estate assets at net realizable value," said a spokesperson for the trust. "We will continue to evaluate our portfolio on an ongoing basis and expect that further losses in the mortgage portfolio may be unavoidable."

Income Opportunity Realty Trust is a combination mortgage and equity real estate investment trust which operates nationwide.

#90297p8786 10/24/1990 ~PR Newswire

NEW YORK (OCT. 24) PR NEWSWIRE - Reginald F. Lewis, chairman and chief executive officer of TLC Beatrice International Holdings, Inc., today announced that net income from continuing operations for the first nine months

of the year, aided by a strong third quarter, exceeded $40 million, higher than the total amount, $15.6 million, reported for all of 1989.

Net income from continuing operations for the first nine months of 1990 increased by 121.9 percent to $41.1 million compared to $18.5 million in the same period last year.

Sales for the first nine months of this year increased by 29.8 percent to $1.12 billion compared to $862.6 million for the same period in 1989 and $1.14 billion for all of 1989. Operating income for the first nine months of 1990 was $84.6 million, 47.1 percent higher than the $57.5 million reported for the same period in 1989.

The company's third-quarter results were also strong. Net income from continuing operations in the third quarter of 1990 increased by 99.2 percent to $23.5 million compared to $11.8 for the same period last year.

Sales in the third quarter of this year advanced by 38.1 percent to $405.5 million compared to $293.7 million in the third quarter of 1989. Operating income in the third quarter of 1990 rose by 62.5 percent to $47.4 million compared to $29.2 million in the same period last year.

"I am pleased by our nine-month and third-quarter results because, by and large, they reflect across-the-board gains by all of our units despite operating in highly competitive environments. Though favorable exchange rates helped us, particularly in the third quarter, these results show real unit gains from our operations," Lewis said.

Lewis added that, while 1990 will be a record year, efforts to improve fourth-quarter results over a year ago remain a top priority.

TLC Beatrice International's results in the third quarter benefited from sharp increases in sales and earnings by its operations in France, southern Europe and Germany. Its results were also helped by the favorable impact of foreign currencies strengthening against the dollar.

TLC Beatrice International is a multinational food company that is based in New York with division offices in Paris and Brussels, Belgium. Its operations include wholesale and retail food distribution in France and the manufacture and marketing of ice cream, processed snacks and other grocery products throughout Western Europe.

#90297p8788 10/24/1990 ~PR Newswire

SKOKIE, ILL. (OCT. 24) PR NEWSWIRE - Brunswick Corporation (NYSE: BC) today

reported net earnings of $53.8 million, or 61 cents per share, for the quarter ended Sept. 30, 1990, versus a net loss of $103.1 million, or $1.17 per share, in the same period of 1989. This year's third quarter results include a pretax gain of $84.2 million ($46.7 million after-tax, or 53 cents per share) from dispositions of the company's non-defense, technical businesses. The 1989 third quarter results include a $100 million pretax restructuring charge ($79.2 million after-tax, or 90 cents per share) primarily for the reorganization and consolidation of operations in the company's marine segment. Net sales for the quarter of $587.9 million were down six percent from sales of $627.7 million in 1989.

For the nine months ended Sept. 30, 1990, net income was $88.0 million, or $1.00 per share, as compared to a net loss of $65.4 million, or 74 cents per share, in the same period last year. Net sales for the nine-month e?riod were $1.94 billion, a decrease of 11 percent from sales of $2.19 billion in 1989.

The company's technical segment showed a 25 percent sales decrease, but operating earnings were $4.9 million during the third quarter versus an operating loss of $1.8 million in 1989. "The results in this segment are not comparable between years; the 1990 results have been affected by the dispositions of the businesses of the industrial products and Technetics divisions, and 1989 results include a $9.5 million pretax restructuring charge. Although defense division sales declined by 13 percent during the quarter, the division's operating earnings, exclusive of the restructuring charge in 1989, increased by four percent as the result of improved performance on several contracts which were in a start-up phase last year," Reichert explained.

Headquartered in Skokie, Ill., Brunswick Corporation serves worldwide markets in the marine power, pleasure boating, recreation and defense/aerospace areas. Its stock is traded on the New York, Tokyo, London and Pacific Stock Exchanges.

#90297p8789 10/24/1990 ~PR Newswire

CHICAGO (OCT. 24) PR NEWSWIRE - Sears, Roebuck and Co. (NYSE: S) today reported third-quarter consolidated net income of $179.2 million or 53 cents per share, compared with $257.5 million or 75 cents per share a year ago. Revenues rose 5.9 percent to $13.96 billion from $13.18 billion in 1989.

For the nine months ended Sept. 30, Sears' consolidated net income was $523.4 million or $1.53 per share, compared with $906.4 million or $2.56 per share in the same period of last year. For the nine months, discontinued operations contributed net income of $10.5 million, compared with $62.7 million in 1989.

Nine-month revenues rose 4.7 percent to $40.41 billion from $38.62 billion last year.

Sears Merchandise Group reported third-quarter net income of $89.2 million, compared with $82.9 million a year ago. Revenues were $7.83 billion, compared with $7.59 billion in 1989. The domestic merchandise segment's third-quarter loss of $2.3 million decreased slightly from last year's loss of $6.9 million. Brennan said the performance of several merchandising businesses -- including home appliances and electronics, automotive and women's apparel -- was encouraging, reflecting the effectiveness of those merchandising strategies. Performance remained sluggish in catalog, home fashions, home improvements, and children's and men's apparel.

Allstate Insurance Group reported third-quarter income of $108.7 million, compared with $126.1 million a year ago. Revenues rose 10.4 percent to $4.66 billion, compared with $4.23 billion in 1989.

For the nine months, Allstate income totaled $444.1 million, compared with last year's $569.8 million. Group revenues for the period this year totaled $13.59 billion, compared with $12.57 billion a year ago.

Dean Witter Financial Services Group reported third-quarter income of $57.2 million, compared with $35.7 million in 1989. Securities business produced income of $24.9 million, compared with $18.2 million last year. Discover Card operations continued its strong performance with income of $29.5 million, compared with $23.3 million in 1989. Discover Card's gross receivables balance now exceeds $10 billion, compared with $7.2 billion a year ago. Group revenues increased 16.3 percent to $1.15 billion, compared with $993.0 million a year ago.

Coldwell Banker Real Estate Group reported third-quarter income of $1.8 million, compared with $81.2 million last year. The decline was the result of the timing of property sales as well as the soft residential market. This year's after-tax gain from the sale of properties was $18.1 million, compared with $87.2 million a year ago. Revenues totaled $356.0 million, compared with $395.3 million in 1989.

#90297p8797 10/24/1990 ~PR Newswire

MT. KISCO, NY (OCT. 24) PR NEWSWIRE - Those travelers looking for great value in a British Isles vacation should be referred to the TWA Getaway Britain and Ireland 1991 brochure, released on Oct. 15, 1990: the program offers terrific low prices - starting at just $199 for a week in London - with two West End theater tickets included.

Cost-conscious travelers will find three new itineraries designed particularly with them in mind, bringing this year's collection - a compendium of all British Isles tours from the 1991 Europe and Budget Europe programs - up to 23. Vacations range from four-day mini-tours to three-week grand tours in four price categories.

And as with other Getaway programs, all vacations in the 52-page brochure are backed by the TWA Getaway Tour Warranty, which guarantees all tour elements will be as described in the brochure.

The new tour in the budget category is the 16-day escorted Britain and Ireland. The tour begins in London, moves swiftly on to Wales and across the Irish Sea to Ireland: among the sights visited are Blarney Castle, the Killarney lakelands and the Cliffs of Moher, plus Dublin.

Returning to Wales, the route continues across the Lake District to Edinburgh before turning south for visits to Abbotsford, Harewood House, York, and Stratford, on the way back to London. With continental breakfasts with juice daily, dinners on six evenings, and comfortable accommodations in budget class hotels, it is a very good value at just $1,298 to $1,338 plus air fare.

The Top Value category, using a combination of officially rated first class and superior tourist class hotels, offers two new itineraries in 1991. Bonnie Scotland concentrates closely on the Lowlands and Highlands of Scotland, offering clients a two-night stay in Edinburgh, plus visits to the famed golf course at St. Andrew, the distillery of Glenfiddich, the Isle of Skye and Loch Lomond. It's a 12-day adventure from just $1,038 plus air fare.

England, Ireland, and Scotland is a leisurely, three-week tour of Great Britain and the Republic of Ireland, starting at just $1,929 plus air fare. Highlights of this in-depth itinerary, sure to be popular, include a visit to Harewood House (a stately home), the Peak District, views of the Royal Family's wooded glens at Balmoral, and a full-day scenic drive around Ireland's Ring of Kerry.

The tour swings through Devon and Cornwall - pausing in Glastonbury to see the

Abbey and in Plymouth for a cruise on the Sound - before returning to London. Full breakfasts (continental-style in London) are included daily and included three-course Getaway tours in Britain and Ireland, groups are accompanied by experienced tour directors, with helpful hostess service in London.

#90297p8798 10/24/1990 ~PR Newswire

WEST CHESTER, PA. (OCT. 24) PR NEWSWIRE - Roy F. Weston Inc.'s (NASDAQ: WSTNA) (WESTON), Asbestos and Indoor Quality Practice, headquartered in Auburn Ala., has received several new contracts and task orders under existing contracts valued at over $2.9 million with the U.S. Army Corps of Engineers, U.S. Naval Facilities Engineering Command and Department of Veteran Affairs.

The contracts for the U.S. Army Corps of Engineers, totaling $1,560,000, provides engineering and industrial hygiene services to support the Army's asbestos management and environmental programs. Specifically, the Louisville District of the U.S. Ao?rps of Engineers has issued two contracts totaling $620,000 for asbestos surveys and management plans at Selfridge Air National Guard Base in Michigan and Fort Knox in Kentucky. Additionally, the Kansas City District of the U.S. Army Corps of Engineers has awarded a $600,000 contract for similar work at Fort Leonard Wood in Missouri.

Also, the Mobile District of the U.S. Army Corps of Engineers has issued new task orders totaling $340,000 for consulting services at Fort McClellan in Alabama; and Tyndall Air Force Base and Eglin Air Force Base in Florida.

WESTON has performed asbestos surveys and asbestos management training services for the U.S. Army Corps of Engineers worldwide, including Korea, Germany and Central America.

The Naval Facilities Engineering Command's Atlantic Division headquartered in Norfolk, Va., has renewed its relationship with WESTON's Asbestos Practice by awarding it a second contract for professional services with a maximum authority of $1,000,000 over two years. The Navy has already issued several orders totaling $690,000 under this authority.

In addition to the Corps and Navy contracts, WESTON has been awarded four contracts totaling $386,000 by four different VA Medical Centers. These are for professional consulting services for management or abatement of asbestos in hospitals under the jurisdiction of the Department of Veterans Affairs. The VA Medical Centers awarding contracts to WESTON are: VA Medical Center in Albuquerque, N.M.; VA Medical Center in Buffalo, N.Y.; VA Medical Center in Southhampton, Mass. and VA Medical Center in Big Springs, Texas.

WESTON has provided engineering and industrial hygiene services to 30

different VA Medical Centers to assist them with their asbestos management program.

WESTON is a full-service environmental and health and safety firm, providing nationwide analytical laboratory services, consulting and engineering, remediation, facility construction and operations, technical information management and major program management services.

WESTON is headquartered in West Chester, and operates a network of four analytical laboratories and 44 offices, including Los Angeles, Houston, Chicago, Atlanta, Boston, New York and Washington, D.C.

MT. KISCO, N.Y. (OCT. 24) PR NEWSWIRE - As the face of Europe changes with every passing day, TWA Getaway is proud to announce the launch of its Europe 1991 program on Oct. 15, 1990. With 80 vacation options, including seven innovative new itineraries, it promises to offer Americans plenty of choice -- and the destinations highlighted are more interesting and accessible than ever before. All vacations in the 196-page brochure are backed by the TWA Getaway Tour Warranty which guarantees all tour elements will be as described in the brochure.

"Unity" was the watchword of Europe in 1990. The old Iron Curtain satellites united in their efforts to oust their communist governments, most graphically symbolized in the destruction of the Berlin Wall, culminated in the autumn reunification of Germany. Even in the Soviet Union, changes that would have seemed impossible a year or two ago are receiving approval at the highest level. The western countries are themselves concentrating on ironing out national differences before the European Community becomes a united entity in 1992. According to Lene Hildebrand, director of Getaway's international division, "Getaway has made a special effort to introduce several itineraries that will bring these changes into focus for Americans, and at guaranteed prices which should satisfy any traveler wary of currency fluctuations."

Two new 10-day Freestyle itineraries concentrate on Eastern Europe, but in very different ways. The Berlin-Prague-Vienna tours travels between the capitals of Germany, Czechoslovakia and Austria by private motorcoach, accompanied during the drive by an experienced tour director; it uses First Class hotels exclusively and costs from $1,198 per person plus air fare. As it must cover greater distances between Germany and the Soviet Union, the Berlin-Moscow-Leningrad tour travels by air, but it is still very reasonably priced ($958 throughout the season, including Moscow to Leningrad air fare). This Freestyle itinerary also includes full-day sightseeing in each city, plus a farewell dinner party on the last night in Leningrad. To open up a new

Freestyle region -- Scandinavia -- 1991 introduces a nine-day Stockholm-Oslo-Copenhagen itinerary to explore these three popular capitals. Land prices begin at only $869 per person.

All Freestyle tours -- there are 19 in the 1991 program -- include round-trip airport transfers, the services of a hostess and a half-day guided sightseeing tour in each city, while offering the visitor plenty of free time to explore on their own. Most use First Class accommodations, others (in cities such as Paris, Amsterdam, Rome and Madrid) offer a choice of First Class or Top Value or Superior First Class hotels; in London, four hotel categories are offered, including Budget. (TWA Getaway's low-cost holidays to other destinations are covered in the Budget Europe 1991 program, also currently open for bookings.)

For 1991, the First Class program remains basically unchanged, though several itineraries have been amended to take advantage of new or improved circumstances. All continue to offer the best value -- dollar for dollar -- available on escorted tours to Europe, with many money- saving features on every departure. Among them are included entrance fees to sights visited, bonus highlight events such as dinner parties, wine tastings and evening entertainment, discounts on air travel and on consecutive tours. The brochure contains brief descriptions of all hotels used in the program, giving agents and passengers a clear idea of the excellent accommodations available.

JOHNSTOWN, PA (OCT. 24) PR NEWSWIRE - Johnstown Savings Bank, FSB, (NASDAQ: JSBK) today announced consolidated earnings of $259,639 or $0.13 per share for the quarter ended Sept. 30, 1990.

This compares with earnings of $123,902 or $0.06 per share for the third quarter of last year. Consolidated earnings for the nine months ended Sept. 30 1990, were $522,396 or $0.27 per share as compared to earnings of $16,388 or $0.01 per share for the same period of last year. The net earnings increase of $506,008 over the corresponding nine-month period in 1989 was due to reduced additions to the allowance for loan losses and other reductions in overall operating expenses. Net interest income for the quarter ended Sept. 30, 1990, was $1,757,784, which is a 2.21 percent increase over the $1,719,770 reported for the third quarter of 1989.

At Sept. 30, 1990, total assets were $278,928,769, compared to $304,299,857 at Sept. 30, 1989, which reflects a planned restructuring of the bank's deposit and loan balances to reduce the bank's overall cost of funds. Total assets grew $5,017,732 (1.83 percent) during the third quarter from $273,911,037 at June 30, 1990. The bank's equity to assets ratio at Sept. 30, 1990, was 7.13 percent, compared to 8.69 percent at Sept. 30, 1989, and 6.48 percent at Dec.

31, 1989. The bank's capital position remained well above regulatory requirements.

Non-accrual loans, restructured loans and real estate owned decreased by $427,093 or 2.2 percent, from $19,426,745 at Sept. 30, 1989, to $18,999,647 at Sept. 30, 1990. The bank continued to strategically increase its provisions for loan losses and losses associated with real estate acquired by foreclosure with the addition of $180,000 in the third quarter of 1990. At Sept. 30, 1990 the bank's allowance for loan losses stood at $4,085,455 or 2.2 percent of the total loan portfolio, excluding mortgage-backed securities. The bank also has an allowance for losses on real estate acquired through foreclosure of $1,347,499 as of Sept. 30, 1990. This compares to an allowance of $583,937 at Sept. 30, 1989.

Patrick J. Coyne, president and chief executive officer, stated that the bank successfully implemented initial stages of its business restructuring strategy during the third quarter. The bank's management will continue to concentrate on the enhancement of the bank's basic banking services within its traditional market areas. Coyne further stated that the bank is exploring various programs to reduce operating expenses while remaining focused on providing exceptional levels of customer service. These measures are designed to improve the bank's long-term profitability and stockholder value, he noted.

Coyne also noted that Johnstown Savings Bank celebrated its 120th anniversary during the third quarter of 1990. Johnstown Savings has the distinction of being the first and oldest financial institution in Cambria County, Pa. Coyne stated that the bank's long tradition of excellence in customer service, its well-positioned branch offices and the loyalty of its established customer base were key factors in ensuring the bank's continued prosperity.

Johnstown Savings Bank is a federally chartered, FDIC-insured savings bank which conducts its business through five offices in the Greater Johnstown area and through its wholly owned subsidiary, Standard Mortgage Corporation of Georgia, located in Atlanta.

#90297p8807 10/24/1990 ~PR Newswire

TROY, MI (OCT. 24) PR NEWSWIRE - Energy Conversion Devices, Inc. ("ECD") (OTC: ENER) announced today that it received $7.2 million from a leading Soviet energy company, which is its joint venture partner in the U.S.S.R. Earlier this year ECD and the Soviet company formed a joint venture, Sovlux, to manufacture in the U.S.S.R. ECD's proprietary photovoltaic solar products and systems and sell them worldwide except for Japan and India.

ECD will construct for the 50-50 Sovlux joint venture a proprietary fully integrated spectrum splitting cell and module assembly plant (2MW) for approximately $8.7 million, which is now fully paid. Earlier this year ECD received $2 million under this agreement.

In addition, the parties are discussing plans to construct a large- volume (100-150MW), fully automated photovoltaic plant to achieve economies of scale thereby reducing the cost of solar energy so that it can become competitive with conventional fuels such as coal, gas and oil, as well as uranium.

In September 1990, ECD and its 95-percent-owned subsidiary, Ovonic Battery Company ("OBC"), expanded its Sovlux joint venture agreement with the Soviet company, which is also a battery manufacturer. Under this expanded agreement, OBC granted Sovlux an exclusive, 3-percent royalty-bearing manufacturing license for the U.S.S.R., and non- exclusive sales rights worldwide under ECD's proprietary Ovonic metal hydride batteries. The Soviet partner is contributing its existing battery manufacturing facilities and know-how and will fund Sovlux's new battery manufacturing operation. Approximately $500,000 of the funds received today provide the initial funding for the expansion of the Sovlux joint venture into the battery field.

ECD's president, Stanford R. Ovshinsky, stated that an overall energy policy must include generation as well as storage. ECD and its Soviet partner are moving ahead in the storage battery business to produce various types of industrial and consumer batteries with particular emphasis on ECD's proprietary large batteries for electric vehicle applications.

Ovshinsky further stated that the historic Sovlux joint venture is intended to provide alternative energy sources to address the serious problems posed by the world's dependence on conventional fossil fuels, the resulting global pollution and the ever-present danger of war over these resources.

In addition to ECD's prior licensing of its photovoltaic technology in Japan, ECD has recently formed a joint venture, United Solar Systems Corp., with Canon Inc. of Japan to expand the manufacturing of solar cells in the United States, and also established a joint venture, SuryOvonics Ltd., in India.

ECD, based in Troy, is the pioneer in amorphous materials technology. The company and its subsidiaries form joint ventures, license technology and manufacture and sell products in the fields of energy, information and synthetic materials based upon technology ECD and its subsidiaries have developed in these areas. ECD's photovoltaic and battery products are environmentally safe and address such environmental problems as atmospheric pollution, protecting the ozone layer, reducing hazardous waste and the greenhouse effect.

#90297p8810 10/24/1990 ~PR Newswire

WALTHAM, MASS. (OCT. 24) PR NEWSWIRE - Researchers at GTE Laboratories have developed a semiconductor laser that operates at 24 billion cycles-per-second, the highest speed ever attained for such a device. The new laser tops the previous best performance of 22 billion cycles-per-second achieved by GTE in 1988.

Lasers of the type developed at GTE Labs are essential components in communications systems that can carry voice, data, graphics and full- motion video signals over fiber-optic networks. Because lasers generate the stream of light pulses that carry these signals, the faster the pulse rate, the more information that can be transmitted over a given fiber link.

"This advance represents a significant step toward full realization of the enormous information-carrying capacity of optical fiber," said Robert Lauer, manager of the optoelectronic devices and materials department at GTE Laboratories, based here.

Innovative Fabrication Process

The GTE laser achieved its record-setting performance after researchers made several important refinements in the way it is built.

Semiconductor lasers emit light from an "active area" at their core. By making this area smaller and by insulating it from energy leakage, GTE researchers were able to increase the intensity of light within the core, thus increasing the rate at which the light is released from it.

"It is extremely difficult to build these lasers with the right interior dimensions because they are so small -- typically less than one-ten-thousandth of a centimeter wide," said Roger Holmstrom, member of technical staff and head of the group that built the new lasers. "The advances we've made allow us to control the size and shape of their internal structures to within one-one-hundred-thousandth of a centimeter during fabrication."

The light-emitting region of the GTE laser is a composite of four elements: indium, gallium, arsenic and phosphorous. When electrons are introduced into this region, they transfer some of their energy to particles of light, which are released at a wavelength suitable for carrying signals over optical fiber.

High-Speed Services Over the Telephone Network

The new ultra-fast lasers generate lightwaves that can make accessible hundreds of channels of high-quality video, output from the world's fastest supercomputers, and data needed to produce today's most sophisticated scientific analyses.

Said GTE's Lauer, "With the help of these lasers, educational programs, medical images, symphonies, financial analyses and more can be delivered simultaneously over a single fiber."

Such information, known collectively as "broadband services," can be accessed through high-speed networks such as those GTE is currently testing in Cerritos Calif., and the Durham/Chapel Hill, N.C., area. These experimental networks use the public telephone system to provide interactive-entertainment and medical-imaging services "on demand" -- that is, by dialing-up the desired service whenever it is wanted.

GTE Laboratories is the central research and development facility for GTE Corp.

HARTFORD, CONN. (OCT. 24) PR NEWSWIRE - The Travelers Corporation (NYSE: TIC) announced today that it has signed a letter of intent to purchase privately held, California-based U.S. Behavioral Health (USBH), a major provider of managed psychiatric and substance-abuse services. The transaction remains subject to regulatory approvals and financial negotiation of definitive purchase documents. Financial terms were not disclosed.

"U.S. Behavorial Health has earned an excellent reputation because of its use of state-of-the-art technologies and procedures, high-caliber personnel and extensive base of knowledge and experience," said Joseph T. Brophy, president of Travelers' Managed Care and Employee Benefits Operations (MCEBO). "Travelers is committed to the managed care business, and this acquisition will strengthen further our ability to help customers control costs while providing superior quality managed care products and services for their employees."

Through its managed care networks, USBH provides a full spectrum of psychiatric and substance-abuse services, including patient assessment, diagnosis and a wide range of inpatient and outpatient treatment options.

Travelers plans to unite USBH with Travelers' PsychSystems, Inc., (PSI), a nationwide, network-based managed care program for psychiatric and substance-abuse disorders. Through USBH and PSI, which combined will serve over 4 million members this year, Travelers' customers will have access to 64 local, specialized managed care networks. The integration of USBH and PSI will significantly expand and enhance Travelers' capacity to provide superior quality, managed care programs to new and existing customers nationwide.

Following the acqusition, USBH will retain its own management, which will report to senior officers of Travelers' Managed Care and Employee Benefits Operations. "We are very pleased to become part of Travelers," said Eugene Hill, president and chief executive officer of USBH. "It is a major step toward fulfilling our vision of building the most comprehensive, highest-quality managed behavioral health company in the country."

Spending on employee health care has been increasing by 15 percent annually for the past 12 years and psychiatric and substance-abuse costs have been rising at two to three times that rate. According to A. Foster Higgins & Co. a benefits consulting firm, psychiatric and substance-abuse costs increased 47 percent in 1989 and 27 percent in 1988.

Travelers is one of the world's largest multiline financial services companies focusing on insurance, managed health care and investments.

HOUSTON (OCT. 24) PR NEWSWIRE - Continental Airlines today vigorously denied published reports that it may file for Chapter 11 in light of the nationwide fuel crisis.

"This company has no intent to seek protection under these codes. We have streamlined our management, and like the rest of the industry, are considering other prudent business steps to assist during the fuel crisis. However, chapter 11 is not one of the means we intend to take," said a Continental spokesperson.

"Speculation that efforts to contain costs might include a major downsizing of the airline is just that...speculation," said the spokesperson.

"The company, like other carriers, continues to examine ways to streamline operations in a prudent manner in face of the unprecedented fuel crisis. We have seen jet fuel costs rise by as much as 125 percent," the spokesperson said.

The company said Continental will continue to operate a normal schedule.

NIAGARA FALLS, NY (OCT. 24) PR NEWSWIRE - Sevenson Environmental Services Inc. (NASDAQ-NMS: SEVN) reported record revenues and earnings for the nine-month period ended Sept. 30, 1990.

Revenues for the nine months were $47,145,213, up 25 percent from $37,590,527 in 1989. Net earnings were $5,577,667, an increase of 13 percent from $4,957,312 in 1989. Earnings per share were $.85 on 6.6 million shares outstanding. Earnings per share for the same nine-month period last year were $.83 on .6 million fewer shares.

Revenues for the third quarter ended Sept. 30 rose 8 percent to $22,707,456 from $20,977,791 in the third quarter of 1989. Net earnings for the quarter were $3,321,309, about the same as the third quarter last year when the company earned $3,424,875. Comparable earnings per share for the third quarter just ended and the same quarter last year are $.50 and $.52, respectively, both on 6.6 million shares outstanding.

Michael A. Elia, president of Sevenson, stated, "Management is very pleased with results for the first nine months. The fourth quarter is developing very satisfactorily, encouraging us to be optimistic about results for the year as a whole."

Sevenson provides a comprehensive range of field services for the remediation of sites and facilities contaminated by hazardous materials. The company, which is headquartered in Niagara Falls, N.Y., operates in the United States and Canada. Since entering the site remediation business in 1979, the company has performed over 250 projects, including projects at the Love Canal and at other Superfund sites.

OYSTER BAY, NY (OCT. 24) PR NEWSWIRE - Continuing to build on its strength as an international entertainment company, Acclaim Entertainment, Inc. (NASDAQ: AKLM) announced today it is shipping three of its highly successful video games for the Nintendo Entertainment System(R) to the European market for this holiday season. Established hits in the United States, Acclaim's expanded European lineup includes "Double Dragon II: The Revenge(TM)," "Total Recall(TM)" and "BIGFOOT(R)," which will be supported by an extensive marketing program that ranges from major print advertising throughout the EEC to a TV ad campaign featuring "Double Dragon II: The Revenge," scheduled to kick off in France.

"As in the United States, sales in the European market continue to be strong and we expect them to increase significantly this holiday season," says Robert Holmes, president of Acclaim. "The combination of titles that are already proven Acclaim hits in the United States, powerful marketing support, and the growth of Nintendo sales throughout Europe, provides a winning international marketing strategy."

Acclaim Entertainment, Inc. is a leading publisher, marketer and distributor of home entertainment products under the Acclaim and LJN labels. These include Nintendo Entertainment System software, Nintendo Game Boy compact video system software, wireless remote controllers and hand-held electronic video games.

ST. LOUIS (OCT. 24) PR NEWSWIRE - Wetterau Incorporated (NASDAQ: WETT) achieved record sales and earnings for the second quarter and first six months of the company's 1991 fiscal year, it was announced today by Ted C. Wetterau, chairman of the board, president and chief executive officer.

For the quarter ended Sept. 29, 1990, the company reported net sales of $1.4 billion, an increase of 7.0 percent compared with sales of $1.3 billion for the same period the prior year. Net earnings for the quarter reached $11.8 million, an increase of 10.0 percent compared with earnings of $10.7 million

the previous year. Earnings per common share were 51 cents, an increase of 13.3 percent compared with earnings per share of 45 cents the year before.

For the first six months of fiscal 1991, the company reported net sales of $2.8 billion, an increase of 6.8 percent compared with sales of $2.6 billion for the same period the previous year. Net earnings for the six months reached $24.2 million, an increase of 11.1 percent compared with earnings of $21.8 million the prior year. Earnings per common share for the six months were $1.05, an increase of 14.1 percent compared with earnings per share of 92 cents the year before.

Commenting on the company's financial results through the first half of the fiscal year, Wetterau stated, "We are particularly pleased with the company's progress to mid year - sales for the second quarter and first six months eclipsed any previous quarter or six-month period in company history; net earnings and earnings per share advanced at double-digit percentages for both the quarter and six months. The return on shareholders' equity, 23.3 percent for six months, continues to run well ahead of the prior year."

IRVINE, CALIF. (OCT. 24) PR NEWSWIRE - Allergan Inc. (NYSE: AGN), one of the world's leading eye care companies, announced that Howard E. (Ted) Greene, Jr. Chairman and Chief Executive Officer of Amylin Corporation, has been appointed to its board of directors. Greene's appointment, effective immediately, will increase the number of Allergan directors to twelve.

Commenting on Greene's appointment, Gavin S. Herbert, Chairman and Chief Executive Officer of Allergan, said, "We are extremely pleased to have Ted join our board. His experience in health care and technology management will enhance Allergan's research and development activities."

Greene is a co-founder of Amylin Corporation, a developmental stage pharmaceutical company pursuing research in the treatment of diabetes. He has had extensive experience in helping finance and establish medical startup companies through his previous experience with Biovest Partners, a seed venture capital firm Greene founded which funded five other firms in addition to Amylin.

Prior to his work with Biovest, Greene served as Chief Executive Officer of Hybritech Incorporated, the first company to commercialize monoclonal antibody technology. Greene was co-inventor of a critical patent involved in monoclonal antibody research, and was also instrumental in negotiating the successful sale of Hybritech to Eli Lilly & Co. in March of 1986. Greene

also has experience in international marketing and strategic planning from his work at the Hyland Diagnostics Division of Baxter Healthcare Corporation.

"I am honored to have this opportunity to serve on the Allergan board. There are many opportunities in the future of health care, both inside and outside of the United States, and I am glad to contribute my experience to help capitalize on these future challenges," Greene remarked.

Green received his B.A. in physics from Amherst College, and has a Masters in Business Administration from Harvard University. He is currently a member of the Board of Trustees of Scripps Clinical and Research Foundation in La Jolla, Calif.

Allergan, Inc. is comprised of six business units: Allergan Pharmaceuticals -- prescription and nonprescription eye care products; Allergan Optical -- contact lenses and lens care products; Allergan Medical Optics -- surgical ophthalmic products and services; Allergan Humphrey -- microprocessor-based ophthalmic diagnostic instruments; Herbert Laboratories -- prescription and nonprescription skin care medications; and Allergan International, which markets Allergan products in more than 90 countries around the world.

Allergan employs over 6,500 people worldwide, and is headquartered in Irvine.

HOUSTON (OCT. 24) PR NEWSWIRE - NaTec Resources, Inc. (NASDAQ: NATC), today reported operating results for the third quarter of this year. For the three months ended Sept. 30, NaTec had a loss of $1.4 million on revenues of $464,000 compared with a loss of $39,000 on revenues of $579,000 for the same period last year.

For the first nine months of this year, NaTec had a loss of $3.7 million on revenues of $2.0 million compared with a year-earlier loss of $353,000 on revenues of $1.8 million.

Socrates S. Christopher, chairman and CEO, said the results are consistent with the company's 1990 business plan. He noted that the anticipated costs are associated with research and development and an aggressive marketing program aimed at establishing NaTec as the market leader in sodium injection technology.

Operating highlights of the quarter, he added, were: -- Groundbreaking ceremonies for NaTec's nahcolite mining and processing facility, the world's

first, located northwest of Rifle, Colo. Commercial operation is expected during the first quarter of 1991, with an initial capacity of 125,000 tons of the naturally occurring sodium bicarbonate per year.

-- The acquisition of AER(asterisk)X, formerly a division of RMT, Inc. AER-X is the nation's only company specializing in emission credit trading and also provides services in air permitting, air toxic issues, rule development and pollution control technology assessments. The emission credit trading market is expected to be in excess of $250 million by 1995. AER-X, based in Washington, D.C., operates as a wholly-owned subsidiary of NaTec Resources, Inc.

-- Approval in principle by NaTec Resources and CRSS Inc. (NYSE: CRX) for the sale and purchase, respectively, of up to $10.0 million of NaTec Class A redeemable convertible preferred stock. Proceeds from the proposed sale would be used by NaTec to fund continuing operations and other general corporate purposes, and to complete its nahcolite mining and processing facility.

NaTec Resources is committed to the control of pollutants commonly associated with acid rain. The company provides consulting engineering, injection system installation, operations and maintenance services, and processed sorbent supply. Primary markets are utility, industrial power generation, pulp and paper, refining and municipal solid waste.

#90297p8828 10/24/1990 ~PR Newswire

MIAMI (OCT. 24) PR NEWSWIRE - Knight-Ridder, Inc. (NYSE: KRI), earned $36,588,000 in the third quarter of 1990, a gain of 7.7 percent from continuing operations over the $33,980,000 earned in the same period last year. Earnings per share from continuing operations rose 12.3 percent to $.73 from $.65 a share earned last year.

Operating income grew 9.5 percent to $75,068,000 from $68,582,000 in last year's third quarter. These results were favorably impacted by one Sunday more in the quarter than in the third quarter of 1989. Total revenue was up 5.5 percent to $570,548,000. Total costs rose 4.9 percent.

Through the first three quarters, total operating revenue was up 3.4 percent to $1,717,202,000 from $1,660,417,000 and operating income rose 1.6 percent to $220,912,000 from $217,372,000 in the first three quarters of 1989.

Excluding the gain from the sale of the Pasadena Star News in 1989, net income from continuing operations for the first three quarters of 1990 was up 12.8 percent to $107,046,000 from $94,865,000.

Knight-Ridder's Newspaper Division reported an operating profit of $82,369,000 vs. $78,428,000 a year ago, a gain of 5.0 percent. The division's revenue rose 4.1 percent to $493,634,000 from $474,088,000 a year ago.

The Business Information Services Division had an operating profit of $3,931,000 vs. $2,499,000 a year ago, a gain of 57.3 percent. Revenue was $76,914,000 vs. $66,885,000 in 1989, a gain of 15.0 percent.

"Newspaper Division results were aided by one more Sunday in the quarter than we had last year," said Robert F. Singleton, Knight-Ridder's chief financial officer.

"But in general, newspaper operations were softer than we had expected. We experienced noticeable shortfalls in retail and classified revenue, particularly in Philadelphia and some of our other larger markets.

"Nevertheless, we managed to show reasonably good bottom line results with additional help from softer newsprint prices, improved bottom line performance in Detroit, an increase in capitalized interest associated with the new plant we are building in Philadelphia, fewer shares outstanding and continuing good growth from our Business Information Services Division."

Knight-Ridder is an international information and communications company engaged in newspaper publishing, business news and information services, electronic retrieval services, news graphics and photo services, cable television and newsprint manufacturing. Around the world, news, advertising and information from Knight-Ridder reach more than 100 million people in 129 countries.

NEW YORK (OCT. 24) PR NEWSWIRE - MANO Holdings Corporation announced today that its subsidiary MANO Acquisition Corporation has commenced an offer to purchase all outstanding shares of the common stock, no par value per share, of The B. Manischewitz Company at $800 net per share in cash. MANO Acquisition Corporation stated that its offer is being made pursuant to a previously announced acquisitions agreement with Manischewitz and that the Manischewitz board of directors has recommended that its stockholders accept the offer. MANO Acquisition Corporation said that, under the terms of the acquisition agreement, following completion of the offer MANO Acquisition Corporation will merge into Manischewitz pursuant to which all remaining Manischewitz shares will be converted into $800 in cash. Shearson Lehman Brothers, Inc., Manischewitz's financial advisor, has rendered its opinion that the $800 consideration is fair to Manischewitz stockholders from a

financial point of view.

MANO Acquisition Corporation stated that its offer will expire at midnight, New York City time, on Wednesday, Nov. 21, 1990, unless extended, and that the offer is conditioned upon, among other things, a minimum of 35,380 shares being tendered prior to the expiration of the offer.

MANO Acquisition Corporation announced that it has appointed First Fidelity Bank, N.A., New Jersey, as depositary and D.F. King & Co., Inc., as information agent for the offer.

MANO Acquisition Corporation stated that the offer is being made only by its offer to purchase dated Oct. 24, 1990 and related letter of Transmittal, copies of which may be obtained from D.F. King & Co., Inc.

MANO Holdings Corporation and MANO Acquisition Corporation were formed by Kohlberg & Co., a private merchant banking firm.

#90297p8830 10/24/1990 ~PR Newswire

PHILADELPHIA (OCT. 24) PR NEWSWIRE - Meritor Savings Bank (NASDAQ: MTOR) today reported a third quarter net loss of $22.6 million, or 64 cents per share, compared to a net loss of $12.8 million, or 36 cents per share during the same quarter last year.

"Although we posted a loss for the third quarter, much has been accomplished over the past few months. We completed the capital enhancement phase of our restructuring program during the quarter and as a result, the primary capital ratio climbed to 9.82 percent at the end of the quarter," said Chairman Roger S. Hillas. "In addition, the balance sheet was strengthened through the recapitalization of the Florida subsidiary at the beginning of the quarter which helped to increase shareholders' equity to $211 million, an improvement of over $75 million from the end of the second quarter," he added.

Net interest income was $17.6 million for the quarter, compared to $32.5 million in the third quarter of 1989. The strategic downsizing of the bank to improve regulatory capital ratios has negatively impacted net interest income through the decline of $6.5 billion in average interest-earning assets. The average net yield on interest-earning assets was 1.17 percent for the quarter, compared to 1.07 percent in the third quarter of 1989.

The provision for possible credit losses was $13.5 million for the quarter compared to $8.3 million in the third quarter of 1989. A higher level of nonperforming assets, particularly real estate related loans, prompted the

increase in the provision. Total nonperforming assets increased from $323.3 million at year-end 1989 to $400.4 million at Sept. 30, 1990.

"The higher level of nonperforming assets reflects the continued deterioration of the economy," said Hillas. "Obviously, this has hampered our goal of achieving operating profitability within the next year."

Noninterest expense declined to $34.0 million. For the year-ago period, noninterest expense stood at $45.5 million. An $8.4 million gain from the settlement of a portion of the company's pension plan obligations was recorded as a reduction of salaries and benefits expense in the third quarter of 1989.

Total assets at the end of the third quarter were $6.6 billion, compared to $12.6 billion at the end of 1989. Meritor's shareholders' equity totaled $211 million at Sept. 30, 1990.

Meritor Savings Bank is a financial services institution. Its flagship operation, the Philadelphia Savings Fund Society, provides financial services to nearly 200,000 households in the Philadelphia area through its network of 29 branches.

#90297p8835 10/24/1990 ~PR Newswire

MINNEAPOLIS/ST. PAUL (OCT. 24) PR NEWSWIRE - AirTran Corporation (NASDAQ: ATCC), parent company of Mesaba Aviation, Inc., today reported earnings of $2,745,000 or 71 cents per share for the quarter ended Sept. 30, 1990, as compared to net income of $1,612,000 or 39 cents per share for the same quarter last year.

Earnings for the six months ended Sept. 30, 1990 were $3,185,000 or 81 cents per share, compared to $2,326,000 or 58 cents per share for the same period one year ago.

Operating revenues totaled $24,869,000 for the quarter, an increase of 29 percent from 19,334,000 in the second quarter of last year. For the six months ended Sept. 30, 1990, operating revenues increased 33 percent to

$45,310,000 compared to 34,105,000 in the first half of the prior year.

Revenue passenger miles were up 15 percent to 57.9 million for the current quarter compared to 50.4 million during last year's second quarter. Available seat miles for the quarter rose 17 percent to 102.6 million from 87.8 million flown last year. The Twin Cities-based carrier's second quarter system-wide load factor was 56.4 percent, compared to 57.5 percent last year.

Robert D. Swenson, president and chairman of AirTran, said he was pleased with the results of the second quarter, a quarter which is historically the company's strongest. He said, "In addition to record traffic levels, the company's earnings performance this quarter reflects measures initiated earlier in the year to streamline our workforce, strengthen our passenger yield and increase load factor by shifting capacity from Milwaukee to our Detroit system. These improvements are enabling Mesaba to post the type of results that we initially forecast for our major Detroit expansion."

Mesaba operates its services as Northwest Airlink under a marketing agreement with Northwest Airlines at Minneapolis/St. Paul and Detroit. The regional carrier currently provides scheduled airline service to 37 cities in 10 states.

AirTran's common stock is traded on the NASDAQ National Market System under the symbol ATCC.

#90297p8837 10/24/1990 ~PR Newswire

ANNANDALE, VA. (OCT. 24) PR NEWSWIRE - Ameribanc Investors Group (NASDAQ-NMS: AINVS) today reported net loss for the quarter ended Sept. 30, 1990, of $4.4 million as a result of the pretax addition of $7.4 million to its loan loss reserves.

This compares to net income of $0.6 million for the year earlier quarter. For the nine months ended Sept. 30, 1990, Ameribanc had a net loss of $7.3 million compared to earnings of $5.8 million for the same period of 1989. The 1989 results included $7.3 million of after-tax gains from the sale of Federal Home Loan Mortgage Corporation preferred stock.

John J. Houseman noted that the overriding factor in the decision to increase loss reserves was the continued deterioration of the mid-Atlantic region real estate market and the uncertainties facing local and national markets. General economic activity levels, the disruptions caused by the Persian Gulf crisis, and the lack of a resolution of the budget deficit by Congress all influenced management to conclude that the real estate markets were not capable of a meaningful recovery in the near term and, therefore, additional reserves were necessary to provide for the impact of these factors. Houseman

stated that management and the board of trustees believe this action is a prudent and necessary step to assure the continued financial strength of Ameribanc. These additional reserves bring the ratio of general reserves to non-earning loans to 19 percent and to total loans, excluding residential one-to-four family real estate loans and mortgage-backed securities, to 3.0 percent.

Management has continued its aggressive expense control program, reducing compensation expense by $259,000 for the third quarter of 1990 as compared to the same quarter of 1989. For the nine months ended Sept. 30, 1990, total expenses decreased by $620,000 from the same period of 1989. Net interest revenue before the provision for possible losses increased by $357,000 for the nine month period; and service fee income increased by $256,000 for the third quarter and $587,000 year to date. Houseman stated that the efforts to produce higher core income have been successful, excluding the impact of the lost earnings resulting from the increase in non-earning loans. Further efficiencies are expected from combining the operations of six branches into three modern new facilities over the next five months.

Ameribanc Investors Group is the holding company for Ameribanc Savings Bank, a $1.3 billion bank headquartered in Annandale operating 36 branch offices in Northern Virginia, Hampton Roads and Charlottesville, Va.

This compares to net income of $0.6 million for the year earlier quarter. For the nine months ended Sept. 30, 1990, Ameribanc had a net loss of $7.3 million compared to earnings of $5.8 million for the same period of 1989. The 1989 results included $7.3 million of after-tax gains from the sale of Federal Home Loan Mortgage Corporation preferred stock.

John J. Houseman noted that the overriding factor in the decision to increase loss reserves was the continued deterioration of the mid-Atlantic region real estate market and the uncertainties facing local and national markets. General economic activity levels, the disruptions caused by the Persian Gulf crisis, and the lack of a resolution of the budget deficit by Congress all influenced management to conclude that the real estate markets were not

capable of a meaningful recovery in the near term and, therefore, additional reserves were necessary to provide for the impact of these factors. Houseman stated that management and the board of trustees believe this action is a prudent and necessary step to assure the continued financial strength of Ameribanc. These additional reserves bring the ratio of general reserves to non-earning loans to 19 percent and to total loans, excluding residential one-to-four family real estate loans and mortgage-backed securities, to 3.0 percent.

Management has continued its aggressive expense control program, reducing compensation expense by $259,000 for the third quarter of 1990 as compared to the same quarter of 1989. For the nine months ended Sept. 30, 1990, total expenses decreased by $620,000 from the same period of 1989. Net interest revenue before the provision for possible losses increased by $357,000 for the nine month period; and service fee income increased by $256,000 for the third quarter and $587,000 year to date. Houseman stated that the efforts to produce higher core income have been successful, excluding the impact of the lost earnings resulting from the increase in non-earning loans. Further efficiencies are expected from combining the operations of six branches into three modern new facilities over the next five months.

The bank had sufficient capital to provide for the addition of the reserves with no significant adverse impact on its compliance with regulatory capital ratios. The bank exceeded all of the current capital requirements as of Sept. 30, 1990, as shown below.

	Requirement	Actual
Tangible	1.50 pct.	2.82 pct.
Core	3.00 pct.	4.25 pct.
Risk-based	6.40 pct.	6.64 pct.

The risk-based capital requirement will increase to 7.20 percent as of Dec. 31 1990. Based on the current business plan, management anticipates that this higher level will be met, largely as a result of sales of mortgage loans, the disposition of certain parcels of foreclosed property, and the sale of other assets. Tentative agreements have been reached to sell $90 million of mortgage loans and approximately $12 million of foreclosed properties. These actions are consistent with the bank's business plan to restructure the balance sheet and reduce in size, thus increasing its margin of compliance with regulatory capital requirements. However, the bank's ability to reach these future levels may be hampered by continued deterioration of the real estate market.

Ameribanc Investors Group is the holding company for Ameribanc Savings Bank, a $1.3 billion bank headquartered in Annandale operating 36 branch offices in Northern Virginia, Hampton Roads and Charlottesville, Va.

#90297p8839 10/24/1990 ~PR Newswire

SAN DIEGO (OCT. 24) PR NEWSWIRE - IRT Corp. (AMEX: IX) today announced revenues of $5,139,000 and earnings from operations of $245,000 for the second

quarter of its 1991 fiscal year ended Sept. 30, 1990. After preferred dividend and other expense, net income was $158,000, or three cents per share. For the comparable period in the prior fiscal year, IRT reported revenues of $4,743,000, earnings from operations of $252,000, a loss from now discontinued operations of $29,000, and $780,000 of other income, relating primarily to settlement of a patent-infringement suit, for total earnings of $1,003,000, or 18 cents per share.

For the first six months of its current fiscal year, the company reported revenues of $10,355,000 and earnings from operations of $388,000. After preferred dividend and other expense, net income was $280,000 or five cents per share. During the first half of the previous fiscal year, the company had revenues of $9,794,000, earnings from continuing operations of $679,000, a loss from now discontinued operations of $69,000 and $830,000 of other income, for total earnings of $1,440,000, or 27 cents per share. The company said that operating expenses were higher than those of the previous year because of increased expenditures relating to expanded sales and marketing efforts and product research and development.

The financial results for fiscal 1990 have been restated to reflect the disposal of discontinued operations.

IRT's contract backlog grew by 54 percent during the second quarter to $3,769,000, from $2,453,000, at the end of the first quarter. Following the close of the quarter, the company was awarded a quantity purchase agreement by Delco Electronics, a subsidiary of GM Hughes Electronics, valued at more than $5 million for at least 13 electronics inspection units to be delivered over the next 15 months.

IRT Corp. is a major supplier of industrial real-time X-ray systems, with more than 500 systems installed, and is the technology leader in automated X-ray inspection systems with computerized defect recognition capability. The company develops and manufactures inspection and process monitoring systems, including integrated systems for electronics, automotive, aerospace and defense applications. IRT also operates a commercial radiation processing facility that provides high-energy electron-beam processing for a number of commercial applications. Company headquarters are in San Diego.

CONTACT: Vicki L. Foote, 619-450-4343, ext. 402, or John W. Battin, president and CEO, 619-450-4343, ext. 403, both of IRT Corp.

#90297p8842 10/24/1990 ~PR Newswire

SCARBOROUGH, ME (OCT. 24) PR NEWSWIRE - Hannaford Bros. Co. (NYSE: HRD), northern New England's largest food retailer, today announced increased sales and earnings for the third quarter and nine months ended Sept. 29, 1990.

For the third quarter, Hannaford achieved net sales and other revenues of $441,437,150, an increase of 11.9 percent over the $394,367,418 reported for the same period last year. Consolidated net earnings for the quarter amounted to $11,503,790, as compared to $10,278,431 for the same quarter in 1989, an increase of 11.9 percent. Consolidated net earnings per common share for the third quarter this year were 58 cents, as compared to 52 cents last year.

During the first nine months of 1990, net sales and other revenues increased by 12.4 percent from $1,115,518,842 in 1989, to $1,253,708,468 this year. Consolidated net earnings for the first three quarters were $33,505,444. This represents an increase 13.3 percent over last year's nine month earnings of $29,568,873, before the cumulative effect of a change in inventory accounting. Consolidated net earnings per common share were $1.69 this year as compared to $1.51 last year before the effect of the accounting change.

This year's net earnings represented an increase of 6.6 percent from net earnings of $31,442,873 in the first nine months last year. Last year's nine-month net earnings reflected $1,874,000 (net of income taxes of $1,239,000) for the cumulative effect of an inventory accounting change for periods prior to 1989.

Consolidated net earnings per share were $1.69 for the first three quarters this year as compared to $1.61 last year after reflecting 10 cents per share for the inventory accounting change.

James L. Moody, Jr., chairman and chief executive office, said, "Our third quarter results were very good considering the sluggish economic picture in Maine, New Hampshire, and Massachusetts. General economic uncertainty, the mid-East crisis and escalating oil and gasoline prices are contributing to a more cautious buying attitude on the part of consumers.

"We are encouraged that our same store sales continue to increase faster than the inflation rate, indicating continued real growth. Earnings continue to be good despite the economic slowdown and increased expenses associated with the opening of new stores.

Our expansion plans for the remainder of 1990 and for 1991 are well underway. We are looking forward to a good holiday season and expect 1990 to be another record year in both sales and earnings."

#90297p8846 10/24/1990 ~PR Newswire

HOUSTON (OCT. 24) PR NEWSWIRE - Union Texas Petroleum Holdings, Inc. today reported $9 million in net income, resulting in a loss of three cents per

common share, for the third quarter of 1990, compared to $21 million, or 10 cents per share, of net income for the same period a year ago.

The decrease was attributed primarily to a higher effective tax rate, due to increased production in the U.K. North Sea and the favorable resolution of certain tax issues in the prior year, and lower U.S. natural gas prices. The company's results for the third quarter of 1990 also were affected by higher operating expenses for safety and maintenance work in the North Sea, which required a shutdown of production for eight days, and higher volume-related expenses in Indonesia. These items more than offset increased North Sea oil and Indonesian liquefied natural gas (LNG) volumes and improved worldwide crude oil prices.

For the first nine months of 1990, the company had $56 million, or 24 cents per share, in net income, compared to $156 million, or $1.44 per share, in 1989's corresponding period. The company's performance in 1989's first nine months benefited from the business interruption insurance settlement concerning the Piper incident in the North Sea and its related impact on the effective tax rate. As a result of the settlement, Union Texas recorded $58.6 million of net income in the second quarter of 1989 for payments to be received through 1990 in addition to business interruption insurance proceeds that had been accrued monthly since the incident in July 1988. The independent oil and gas producer's results for the first nine months of 1990 also were affected by lower prices for ethylene and U.S. natural gas, partially offset by higher North Sea oil volumes, improved Indonesian LNG volumes and prices, and increased U.S. oil prices and natural gas volumes.

Revenues for 1990's third quarter totaled $324 million, up from $232 million a year ago, reflecting higher oil sales in the North Sea and increased Indonesian LNG prices and volumes. For the first nine months of 1990, revenues were $897 million, down slightly from $906 million for the same period in 1989. The decline in revenues for the first nine months of 1990 was attributed to the recognition of $155 million of revenues under the business interruption insurance settlement in 1989, which was substantially offset by increased operating revenues in the first nine months of 1990.

One of the nation's largest independent producers, Houston-based Union Texas Petroleum Holdings, Inc. (NYSE: UTH) explores for and produces oil and gas in the U.S. and overseas and has petrochemicals and natural gas processing interests.

#90297p8847 10/24/1990 ~PR Newswire

NEWTON, IA (OCT. 24) - A major reorganization has been announced by Daniel J. Krumm, chairman and CEO of Maytag Corporation (NYSE: MYG), in an effort to

improve efficiencies and profitability at its Hoover manufacturing operations in the United Kingdom.

Speaking before employees at Hoover production facilities in Wales, Scotland, and England, Krumm announced the installation of a special task force to facilitate a plan for the "rebirth, rejuvenation, stability and a return to profitability" of Hoover UK operations. Krumm stated that the main goal of the task force will be to facilitate organizational improvements and implement production efficiencies.

"While economic conditions in the United Kingdom have had a decidedly negative impact on Hoover UK, Maytag Corporation does not intend to allow the decline of this historically strong company, and the great name of Hoover in the United Kingdom," he stated.

"We are committed to Hoover UK, its employees, and our plant communities for the long term. It's time for positive creative action and we are going to help Hoover UK become everything it can possibly be."

The special task force will be headed by William R. Foust, senior vice president of human resources for Maytag Corporation, who will succeed Anthony V. Williamson as managing director of Hoover UK. Williamson, who has more than 30 years with the Hoover organization, has announced his intent to retire although he will continue to serve as director and represent Hoover with various industry associations.

In addition, a technical team to consult with Hoover management has been established to be led by Edward O. McCartney, director of manufacturing planning for Maytag Corporation. Denis Jessopp, currently technical director for Hoover UK, will no longer continue in that capacity, but will function as a company director and a technical advisor.

Joining the technical team will be Ralph Gause, who retired last year as director of production for Jenn-Air Company. Joining Maytag Company in 1949, Gause was superintendent of Maytag's automatic and dishwasher line assembly department before being named director of production for Jenn-Air in 1984.

In his new responsibility, Foust will spend full time in South Wales but will return to Maytag's Newton headquarters upon completion of his special assignment.

A native of Alabama, he held several positions with Magic Chef Company in Cleveland, Tenn., including manager of labor relations, director of human resources and vice president of human resources before joining Maytag Corporation in 1987 as vice president of human resources. He was named to his current position as senior vice president of human resources in 1989.

#90297p8851 10/24/1990 ~PR Newswire

GOTEBORG, SWEDEN (OCT. 24) PR NEWSWIRE - SKF (NASDAQ: SKFRY), the world's largest manufacturer of bearings today reported interim results for the nine months period ended Sept. 30, 1990. SKF Group income after financial income and expense for the nine months of 1990 amounted to Swedish kronor (SEK) 1.778 billion, compared with SEK 1.786 billion in the corresponding period a year earlier.

Sales increased 14 percent to SEK 21.077 billion, from SEK 18.465 billion for the first nine months of 1989. SEK 1.211 billion of the sales increase of SEK 2.612 billion was attributable to Chicago Rawhide.

Return on capital employed for the most recent 12-month period was 17.9 percent, compared with 19.2 percent for the period ended Sept. 30, 1989.

The tense situation in the Middle East, which has resulted in sharply increased oil prices and related uncertainty, has further dampened industrial production. Major customers have reduced their production, which has had an adverse effect on demand for rolling bearings, tools and component systems. The decline in general business conditions, which applied to most markets, became increasingly noticeable during the period.

The sharp decline during the Spring in the Brazilian market caused a decrease in income for SKF of about SEK 100 million for the first nine months of 1990. A slight recovery can now be seen.

Bearings Sales of rolling bearings during the first nine months increased 8 percent to SEK 16.823 billion (SEK 15.571 billion for the similar period in 1989). Income, after financial income and expense rose to SEK 1.495 billion (SEK 1.444 billion).

Demand for rolling bearings, which account for approximately 75 percent of group sales, declined during the third quarter. The decline affected both consumer and investment goods. Measures to adjust manufacturing capacity to demand were initiated during the period.

Dymac, an American high-technology company that manufactures and markets vibration measurement equipment, was acquired during the third quarter. The company has annual sales of approximately SEK 60 million, with 100 employees.

Tools SKF Tools increased its sales by 11 percent during the period to SEK 1.016 billion (SEK 915 million). Income after financial income and expense amounted to SEK 69 million (SEK 94 million). The development primarily reflects the situation in Brazil, which accounts for almost the entire decline.

Since the German cartel authorities have now given their approval, the merger between SKF Tools and Gunther & Co. will take place shortly.

Component Systems Sales by SKF Component Systems rose 17 percent to SEK 2.817 billion during the period (SEK 2.399 billion). Income after financial income and expense amount to SEK 245 million (SEK 248 million).

With the exception of aircraft components operations, whose trends remained favorable, the weaker demand during the third quarter also had an adverse impact on SKF Component Systems.

Earnings SKF Group operating income, after depreciation according to plan, amounted to SEK 1.912 billion (SEK 1.895 billion). Net financial expense amounted to SEK -134 million (SEK -109 million). Income per share, after taxes but before extraordinary items, was SEK 8.75 (SEK 10.00). Income per share after extraordinary items amounted to SEK 9.80 (SEK 11.65).

Capital expenditures in plant and equipment during the period amounted to SEK 937 million (SEK 805 million). At the end of September, inventories accounted for 34 percent of sales for the year (33 percent). The average number of employees at work at the end of the nine months was 49,775 (46,718), which includes 2,906 from Chicago Rawhide.

Forecast The weakened demand means that SKF will reduce production with ensuing cost increases. Group income for the fourth quarter will be lower than that for 1989.

At Sept. 28, 1990, 5.7675 Swedish kronor equaled one U.S. dollar.

#90297p8854 10/24/1990 ~PR Newswire

NEW YORK (OCT. 24) PR NEWSWIRE - Alliance Capital Management L.P. (NYSE: AC) today announced a distribution of 44 cents per unit for the third quarter. The partnership distributed 40 cents per unit for the third quarter of 1989.

The distribution is payable on Nov. 9, 1990, to holders of units at the close of business on Nov. 2, 1990.

Revenues increased from $40,370,000 to $46,959,000 for the quarters ended Sept. 30, 1989 and 1990, respectively, and from $113,464,000 to $137,839,000 for the nine months ended Sept. 30, 1989 and 1990, respectively. Assets under management as of Sept. 30, 1990, were approximately $43 billion, down approximately $4.2 billion from June 30, 1990.

Net income for the third quarter of 1990 was $10,184,000, or 36 cents per unit compared to $7,756,000, or 27 cents per unit, for the third quarter of 1989. Net income for the nine months ended Sept. 30, 1990, was $23,099,000, or 81 cents per unit, compared to $17,355,000, or 61 cents per unit, for the nine months ended Sept. 30, 1989.

The partnership is required to distribute its available cash flow, which was $12,438,900, or 44 cents per unit, for the quarter ended Sept. 30, 1990. Because expenses deducted in determining net income include non-cash items and certain employee compensation and benefits expenses that are funded by the partnership's general partner through capital contributions, available cash flow was significantly in excess of net income per unit.

Alliance Capital Management L.P. is a leading international investment adviser providing investment management services to institutions, primarily pension funds and endowments, and to individual investors through a broad line of

mutual funds and cash management products. The partnership's general partner and majority unitholder is a wholly owned subsidiary of The Equitable Life Assurance Society of the United States.

LANSING, Mich. (OCT. 24) PR NEWSWIRE - Cade Industries, Inc. (NASDAQ-NMS: CADE), a major manufacturer of advanced composite gas turbine engine components, aircraft structures, test nacelles and bellmouths used in large commercial jet engine applications, announced today significantly improved results for the third quarter ended Sept. 30, 1990.

-- Net income of $642,000 vs. $365,000 for 1990 and 1989, respectively. -- Net income per share of $0.04 vs. $0.02 for 1990 and 1989, respectively.

-- Sales of $6,917,000 vs. $5,485,000 for 1990 and 1989, respectively. Third-quarter sales and net income increased 26 percent and 76 percent over the same period a year ago.

Richard A. Lund, Cade's president, said that "demand for the company's advanced composite components continues to be strong. We have strengthened our sales backlog with confirmed orders through 1992, now in excess of $48 million."

Cade Industries plays a major worldwide role in design, development and manufacture of high technology composite components for the aerospace and air transport industries.

WILMINGTON, DE (OCT. 24) PR NEWSWIRE - Hercules Inc. (NYSE: HPC) today reported third quarter net income of $29.5 million, equal to $.62 per share.

This compares with 1989 third quarter net income of $44.1 million, equal to $.94 per share, including $13.6 million, or $.28 per share, of net nonrecurring income.

Nine month 1990 net income was $93.4 million, equal to $1.98 per share, compared with $130.5 million, equal to $2.78 per share, exclusive of a $15 million ($.32 per share) credit for the cumulative effect on prior years of changes in accounting, for the first nine months of 1989. The 1990 nine month results include a net nonrecurring charge of $6.4 million, or $.14 per share, while the 1989 nine month results include net nonrecurring income of $22.2 million, or $.45 per share.

Sales for the third quarter of 1990 were $812 million, compared with $787 million in the third quarter a year ago. Sales of $2.379 billion for the first nine months of 1990 compare with $2.318 billion for the corresponding period in 1989.

#90297p8859 10/24/1990 ~PR Newswire

BOULDER, Colo. (OCT. 24) PR NEWSWIRE - Cell Technology, Inc. (NASDAQ-NMS: CELL), the Colorado-based biotechnology firm specializing in the development of biologic response modifier (BRM) technology, today presented significant pre-clinical anti-viral data concerning the use of its anti-viral BRM application, Aviron, at the 30th Interscience Conference on Antimicrobial Agents and Chemotherapy in Atlanta. The company announced that Aviron has shown promise as a treatment for cytomegalovirus disease, a serious opportunistic infection which often accompanies AIDS and other ailments compromising the immune system.

The drug significantly reduced the severity of cytomegalovirus infections in mice, a model often used for studying potential therapies for the human disease, says Robert W. Sidwell, director of the Antiviral and AIDS Research Programs at Utah State University in Logan, Utah. Sidwell reported his findings today at this conference held in Atlanta.

Aviron, produced from the bacteria Serratia marcescens, augments certain immune functions, including natural killer cell activity, K cell and monocyte-mediated antibody-dependent cellular toxicity, and cytotoxic T cell activity. The drug also stimulates the production of interferon. The natural killer and T cell effects, suppressed in cytomegalovirus infections, apparently were sufficiently reversed by Aviron to inhibit the viral infection. The sooner the drug was administered to cytomegalovirus-infected mice, the more effective it was against the infection.

Cell Technology, Inc. is a biotechnology company specializing in the field of immunotherapy. The company's innovative BRM products are being developed to activate the body's own immune response to fight cancer, viral infections, and to act as a general immunomodulating agent.

#90297p8865 10/24/1990 ~PR Newswire

WICHITA, KAN. (OCT. 24) PR NEWSWIRE - Brite Voice Systems Inc. (NASDAQ: BVSI) reported revenues of $3,000,000 for the third quarter of 1990 ended Sept. 30. Revenues for the like period in 1989 were $3,364,000. A net loss of $33,000 (1 cent per share) was recorded in the third quarter of 1990 compared to a net income of $577,000 (16 cents per share) reported in 1989.

For the nine months ended Sept. 30, 1990, Brite Voice reported revenues of $8,415,000 compared to $12,041,000 for the like period in 1989. Net income for the first nine months of 1990 was $531,000 (12 cents per share). The company reported net income of $1,977,000 (56 cents per share) for the first nine months of 1989.

According to Stan Brannan, president and CEO at Brite, "Two factors adversely affected our third quarter results. The first continues to be the lack of large system orders which favorably impacted 1989 results. The second was the settlement of our litigation with 900 Services Inc. which caused us to take a pre-tax charge of approximately $463,000 in this quarter. Our operating income would have been approximately $286,000 and we would have shown a modest profit had this charge not been taken."

Brannan added, "We have continued to add managers and staff throughout this period of soft sales, even though this has resulted in lower earnings than we might otherwise have achieved. We believe that this action is necessary if we are to achieve our goal of positioning the company as one of the leading providers of voice processing equipment."

#90297p8869 10/24/1990 ~PR Newswire

MANCHESTER, NH (OCT. 24) PR NEWSWIRE - BankEast Corporation (NASDAQ: BENH), a New Hampshire-based bank holding company, announced today that it has filed voluntary Chapter 11 reorganization proceedings to protect the company from the demands of two out-of-state noteholders. This action was prompted when the noteholders filed suit against the holding company on Oct. 5, seeking to secure $13 million in subordinated debentures issued by BankEast Corporation in 1988.

"As far as BankEast depositors and other customers are concerned, it continues to be business as usual," said W.N. DeWitt, chairman and chief executive officer of the company. Deposits of BankEast are FDIC-insured to the maximum extent permitted under applicable law.

"This is the prudent step for us to take, given that the noteholder chose to press their demands in the courts. We are committed to this action, recognizing that it is better to act early when many options still exists than to wait until the last minute when perhaps no options will exists."

DeWitt emphasized that these developments should have no effect on the conduct on business by the holding company's subsidaries: BankEast, its FDIC-insured banking subsidiary; BankEast Mortgage Corp; or BankEast Trust Company. These subsidiaries are separate legal entities and are not responsible for the holding company's obligations to the noteholders.

With this development, DeWitt also announced that the board of directors of the holding company have been reorganized. "Eight of the board members will now serve on the bank's board of directors, focusing their attention strictly on bank-related issues. The other five board members will remain on the holding company board and concentrate on the Chapter 11 reorganization process " said DeWitt.

The out-of-state noteholders, Phoenix Mutual Life Insurance Company of

Hartford, Conn., and John Alden Life Insurance Company of Miami, Fla., initiated their demand for accelerated payment of the debt while the holding company was in technical default of some terms of the notes. The holding company noted that it had made all scheduled payments when due, and that principal payments were not to begin until November 1992.

"We don't belive it appropriate, or in the best interests of any of our customers, for us to stand by while two institutional investors take steps to increase the problems that need to be faced in New Hampshire. It's important that we do whatever is necessary, and available to us by law, to assure that the best interests of our stockholders, other creditors, and all our customers are protected.

"We intend to file a plan of reorganization promptly, come out of Chapter 11, and pay all our creditors," DeWitt concluded.

BankEast Corporation is a New Hampshire-based holding company with $1 billion in assets.

#90297p8870 10/24/1990 ~PR Newswire

CRYSTAL LAKE, ILL. (OCT. 24) PR NEWSWIRE - Sun Electric Corp. (NYSE: SE) announced today that it has purchased that portion of the business of Murray Corp. related to the design, manufacture, marketing, sale and distribution of products for the automotive air conditioning market consisting of refrigerant recovery, purification, charging and diagnostic equipment.

This acquisition will enable Sun Electric to manufacture, market and sell a complete line of vehicle air conditioning products throughout the world. As part of the agreement, Sun Electric will manufacture and service equipment for Murray to sell into its existing distribution channels in the United States and Canada.

Gerald A. Kien, Sun Electric's chairman, president and chief executive officer stated, "It is estimated that there are currently over 140 million vehicles in the world equipped with automotive air conditioning systems. It is also widely held that the release of CFCs (chlorofluorocarbons) contained in such systems into the atmosphere is a potential contributor to the depletion of the earth's protective ozone layer. Consequently, virtually every automobile and truck manufacturer in the world has endorsed the use of refrigerant recovery equipment and has authorized the use of recycled refrigerants under their new vehicle warranties.

"The acquisition of this product line will complement our current line of

vehicle emissions analyzers, diagnostic, test and service equipment and is consistent with our strategy to participate fully in the area of environmental protection, particularly as it relates to the automotive industry. We also welcome the opportunity to use our worldwide distribution channels to make products available to the automotive service industry which can have a direct and dramatic impact on reducing CFC emissions into the atmosphere."

Sun Electric Corp. is primarily engaged in the design, manufacture, marketing and service of diagnostic, test and service equipment for the motor vehicle service industry and motor vehicle manufacturers in more than 100 countries.

THOMASTON, GA. (OCT. 24) PR NEWSWIRE - In reporting on the results of first quarter fiscal year 1991, Neil Hightower, president and CEO of Thomaston Mills (NASDAQ: TMSTA TMSTB), stated that general economic conditions have caused a slowing of textile markets.

Sales decreased 10.3 percent to $43,684,235 compared to the same quarter last year, and the company lost $318,333 for the quarter.

Capacity is being increased for the manufacture of comforters, and plans call for starting a second shift in early 1991.

Other capital improvements are on schedule with additional sewing capacity for sheets and pillowcases being constructed.

Hightower stated that Thomaston Mills continues to take a long-term view of business and will be well positioned to take advantage of improved economic conditions when they occur.

#90297p8872 10/24/1990 ~PR Newswire

FAIRFAX, VA (OCT. 24) PR NEWSWIRE - ERC Environmental and Energy Services Co. Inc. (NASDAQ-NMS: ERCE) today announced revenues and earnings for the third quarter and nine-month period ended Sept. 30, 1990.

Third quarter revenues rose by 21 percent to $23.1 million from $19.1 million in the third quarter last year. Net earnings increased at a faster pace -- up 35 percent to $1.5 million, while fully diluted earnings per share (EPS) were up 30 percent to 26 cents per share from 20 cents.

ERCE's environmental consulting, engineering and testing business continued to have strong growth in revenues and operating profits in the third quarter due to continuing strong demand for the company's environmental expertise as well as high labor utilization and ongoing cost control. After a sluggish first half, the company's energy consulting business grew in the third quarter by 7 percent over the same period in 1989 with operating profits up by 44 percent due to an increase in the level of consulting activity and higher labor utilization.

For the first nine months of the year, revenues grew by 19 percent to $62.8 million from $52.9 million during the same period in the prior year. Earnings from continuing operations increased 25 percent to $3.6 million from $2.8 million, while fully diluted EPS from continuing operations grew by 21 percent to 64 cents per share from 53 cents.

J. Mark Elliott, president, stated: "We continue to grow in line with our plan and budget for the year. We are especially pleased with the growth in our operating profits, which showed an increase of 17 percent in our environmental consulting, engineering, and testing business, and 44 percent in our energy business. Looking ahead, we have seen no indication of a downturn in our business as a result of current economic conditions. We are encouraged by the signs of strong momentum in our business."

On Oct. 23, 1990, Ogden Corporation (NYSE: OG), which owns approximately 68 percent of the outstanding shares of common stock of ERCE, offered to acquire the remaining interest for a cash consideration of $14.75 per share. ERCE has appointed a special committee of its board of directors, consisting of three non-management directors, to consider the fairness of the proposal to the public stockholders of ERCE.

ERCE is a professional and technical services firm providing a comprehensive range of environmental, infrastructure and energy consulting, engineering and analytical services to industrial and commercial companies and governmental agencies. The company has principal operating offices in Fairfax; Nashville, Tenn.; and San Diego.

PITTSBURGH (OCT. 24) PR NEWSWIRE - Pitt-Des Moines Inc. (AMEX: PDM) today reported net income of $2.7 million ($1.08 per share) on earned revenue of $96.3 million for the three months ended Sept. 30, 1990. These results compare with net income of $336,000 ($0.14 per share) on earned revenue of $90.7 million for the same period last year.

Results for the current quarter represent an increase of $3.6 million in income from operations from $786,000 in 1989 to $4.3 million in 1990. The increase in earned revenue of $5.6 million was primarily attributable to increased earned revenue at the Standard Plate Products profit center.

This profit center, along with the turnaround measures implemented at the Chicago Steel Construction facility, contributed significantly to the increase in gross profits during the current quarter.

For the nine months ended Sept. 30, 1990, the company reported net income of $5.7 million ($2.32 per share) on earned revenue of $275.0 million compared to net income of $2.2 million ($0.87 per share) on earned revenue of $274.7 million for the nine months ended Sept. 30, 1989. Operating income for the first nine months of 1990 was $9.4 million compared to $3.1 million the previous year.

Bookings for the nine months ended Sept. 30, 1990, aggregated $272.6 million compared to $258.1 million for the same period in 1989. At Sept. 30, 1990, the company's backlog was $181.2 million.

Pitt-Des Moines Inc. and its subsidiaries operate four basic business units: Standard Products, Technology Products and Services, Steel Construction, and Service Centers.

PDM(R) provides a wide range of custom engineered products, structures, and facilities for commercial, industrial, municipal, and governmental customers in addition to processing and distributing a general line of carbon steel products.

PDM has facilities in the following locations: Atlanta; Cedar Rapids, Iowa; Chicago; Columbus, Ohio; Costa Mesa, Calif.; Des Moines, Iowa; Fresno, Calif.; Fullerton, Calif.; Houston; Morristown, N.J.; Pittsburgh; Sacramento, Calif.; Santa Clara, Calif.; Spanish Fork, Utah; Sparks, Nev.; Stockton, Calif.; Tenio Wash.; Tualatin, Ore.

THE WOODLANDS, TX (OCT. 24) PR NEWSWIRE - Mitchell Energy & Development Corp. (AMEX: MND) today reported the acquisition for $3 million of varying working interests in 13 wells and 2,620 net acres of leases in North and Southeast Texas.

The purchases, which involved three separate transactions, add more than 2.3 billion cubic feet of natural gas and approximately 52,000 barrels of oil to the company's proved and probable reserves. The company said the newly acquired leases are believed to have significant remaining development potential.

In the largest acquisition, Mitchell paid Tex-Am Petroleum Corporation $1.8 million for two natural gas producers and 266 net acres of associated leases in Eastland County in North Central Texas. With the purchase, Mitchell owns 100 percent of the working interests in the wells.

Mitchell also acquired ten oil and gas producers and 2,216 net acres of associated leases in Palo Pinto and Jack counties from Cromeens Petroleum, Inc., and others, for $988,000. With the purchase, Mitchell received 100 percent of the working interests in nine of the producers and 50 percent of the working interests in the remaining well.

In a third acquisition, Mitchell paid a total of $210,000 to four separate parties for 33 percent of the working interests in a producing oil well in Colorado County and 347.6 net acres of associated leases.

In the last two years, Mitchell has spent in excess of $32 million in more than 70 separate transactions to acquire producing oil and gas properties. Mitchell Energy & Development Corp. is one of the nation's largest independent energy companies. The company also has sizable real estate interests in the Houston-Galveston area.

MINNEAPOLIS (OCT. 24) PR NEWSWIRE - FSI International, Inc. (NASDAQ: FSII) today reported lower sales and a loss for the fiscal year and quarter ended Aug. 25, 1990.

For the year, sales were $54.3 million, compared with $61.6 million in 1989. The company had a net loss of $1.7 million, or $.44 per share, versus net income of $3.2 million, or $.84 per share, the prior year. Approximately $1.1 million of the loss, after-tax, or $.27 per share, stemmed from several one-time charges.

For the fourth quarter, sales decreased to $13.4 million from $18.5 million in the year-earlier period. The company had a net loss of $1.1 million, or $.28 per share, compared with net income of $1.1 million, or $.27 per share, last year.

According to FSI President and Chief Executive Officer, Richard Jackson, "The sales decline in fiscal 1990 occurred primarily in two of our five product lines. We had very few multiple unit orders for FSI's spray processing systems, coupled with customers continuing to delay purchase commitments for chemical management and delivery systems." The approximately $1.1 million, after-tax, or $.27 per share, in one-time charges related to relocation of FSI's southern California division, termination of the Convac relationship for photoresist equipment and establishing greater reserves for inventory obsolescence and rework. Jackson said, "The current industry softness means that a more cautious approach to inventory is prudent."

"We are continuing our strong efforts in sales and marketing to increase incoming orders," continued Jackson. "We are proceeding with key new product development programs but have taken various steps to reduce costs and improve future performance. We are still encouraged by the stronger industry outlook for semiconductor equipment companies in 1991 and 1992."

FSI International, Inc. is a leader in producing automated surface conditioning equipment for processing silicon wafers. The company develops, manufactures, markets and services centrifugal spray processing systems, photoresist processing equipment, gas processing systems, and chemical management and delivery systems for use in the fabrication of advanced semiconductor integrated circuits. FSI's customers include semiconductor manufacturers located throughout North America, Europe, Japan and the Far East.

HOUSTON (OCT. 24) PR NEWSWIRE - CRSS Inc. (NYSE: CRX) today announced consolidated operating results for the first quarter of fiscal 1991. Net earnings for the first quarter ended Sept. 30, 1990, were $2.8 million, or $0.19 per share, on $69.2 million operating revenue. This compares to net income of $4.1 million, or $0.33 per share, on $70.7 million operating revenues for the corresponding quarter of the prior fiscal year.

The decrease vs. prior year of 33 percent in net income and 42 percent EPS, on essentially flat operating revenues, is attributable to a 17 percent increase in the number of shares outstanding, a 19 percent increase in the effective tax rate and additional expenditures related to achieving CRSS' aggressive five-year growth objectives.

These additional expenditures related primarily to further penetration of the power markets, both as a provider of engineering design and construction management services, and as an independent owner/operator; further development of privatization as a niche in the transportation and infrastructure markets; further expansion internationally through efforts to develop various strategic alliances, and development of internal systems supporting CRSS' capability to provide value added engineering design services.

Gross revenues for the first quarter of fiscal 1991 were $117.7 million compared to $140.5 million for the same quarter of the prior fiscal year, a 16 percent decrease. This decrease in gross revenues reflects a decrease in the mix of projects with relatively higher levels of subcontract and procurement pass-through costs on which the company earns little or no profit.

Operating revenue backlog at Sept. 30, 1990, was $215.8 million which included the effect of a $28 million adjustment associated with decreases in CRSS scope on two unrelated projects. This compared with $237.1 million operating revenue backlog at June 30, 1990, and $243.4 million operating revenue at Sept. 30, 1989.

Gross revenue backlog at Sept. 30, 1990, was $450.3 million compared to $462.6 million at June 30, 1990, and $458.9 million at Sept. 30, 1989. Operating revenue new orders for the first quarter of fiscal 1991 totalled $62.4 million and consist of various projects in the engineering and architectural design, program management, transportation/civil and power sectors.

In August, CRSS Capital, Inc., a majority-owned subsidiary of the company, announced that its Hopewell cogeneration facility achieved commercial operation on July 27, 1990. The largest non-utility power project in commercial operation on the East Coast, and one of the largest of its kind in the United States, the $200 million cogeneration facility generates enough electricity to supply 250,000 homes.

CAMBRIDGE, MA (OCT. 24) PR NEWSWIRE - Polaroid has introduced a time-saving accessory for its 600 Series hand-held cameras, facilitating photography of the vehicle identification number (VIN) used to positively identify every vehicle for insurance and registration purposes.

The new device, called Polaroid VIN/Close-Up Hood, provides close-up framing to enable clear photography of the VIN, printed on the EPA sticker permanently affixed to a vehicle's door jamb.

The VIN/Close-Up Hood attaches easily to Polaroid 600 Series cameras (Spirit 600, 600 LMS, 635CL and OneStep).

To date, in response to skyrocketing auto insurance rates and staggering statistics of reported thefts, four states (Massachusetts, New York, New Jersey and Florida) have adopted laws requiring a photograph of the VIN for registration of a motor vehicle.

Automobile inspectors, garage personnel, and other field photographers typically use a Polaroid instant camera and film to produce and verify the required VIN photograph. The new VIN attachment aids fast, simple and accurate documentation on the spot. Previously, some field photographers had difficulty maneuvering cameras into position on the car's door jamb to obtain a satisfactory photograph of the VIN on the first try. Proper use of the Polaroid VIN/Close-Up Hood produces legible photographs instantly.

Shielding the EPA sticker from stray light, the VIN/Close-Up Hood also provides a .85 magnification at 5.5-inch focal distance and an optical wedge, correcting for parallax between the camera lens and photometer. The device also incorporates light-baffling, light distribution modulators for uniform exposure, and a mounting clip for attachment to the camera. Tips for VIN photography

Once the Polaroid VIN/Close-Up Hood is mounted on the camera, the photographer places the hood directly over the vehicle's EPA sticker, centering it over the printed VIN.

Polaroid technicians offer the following photography tips:

1. Make sure the EPA sticker is clean and dry.
   A wet surface may cause reflection.
2. Be careful to center the hood over the VIN.

3. Adjust the camera's lighten/darken control to
   the center position.
4. Always use flash.

The Polaroid VIN/Close-Up Hood may be purchased through any Polaroid professional dealer. For the name of the dealer nearest you, call toll free 1-800/343-9000. Suggested list price of the VIN/Close-Up Hood is $89.95.

Polaroid Corporation, with sales of almost $2 billion, is the worldwide leader in high-quality, hard copy instant imaging.

CHICAGO (OCT. 24) PR NEWSWIRE - Ameritech (NYSE: AIT) today announced plans to test new communications services that could make it easier and more affordable for people to stay in touch -- wherever they go.

In a request to the Federal Communications Commission (FCC), the company asked for a license to develop and test a technology that makes possible new wireless telephone services called personal communications services (PCS). The radio-based, digital technology will let consumers communicate using portable telephones smaller and less expensive than those available today.

''Personal communications services will represent a revolutionary change in the way we will be able to communicate,'' said Michael Hansen, Ameritech director of corporate strategy. ''People are demanding more convenient ways to stay in touch. In a few years, these new wireless services may be one of the most popular means of communication.''

The technology behind PCS is similar to the technology that makes possible mobile communications. Both divide an area into cells that are powered by central transmitters. PCS technology, however, uses cells which are much smaller, allowing telephones to be small, low- powered and lightweight.

''These telephones are likely to be small enough to fit in a shirt pocket and as lightweight as a wallet,'' Hansen said. ''Compared to today's portable telephones, these new phones will offer improved transmission quality and in time will be less expensive -- probably less than $100 each.''

He added that the services can be used while stationary or walking, not while traveling in a car.

For the trial, Ameritech will partner with a manufacturer that can develop the new phones, which will be similar to those being used elsewhere in the world, but not in the U.S.

If Ameritech's request to the FCC is approved, the company plans to trial PCS next year in metropolitan Chicago, birthplace of mobile telephone service in the U.S. The company will deploy up to 1,000 PCS telephones and 100 cell sites, each capable of providing service in an area up to 200 yards in diameter using radio spectrum in the 1850 to 1990 MHz range.

The company plans to evaluate the technical and marketing aspects of PCS and test how well the technology can interconnect with the existing public telephone network.

Ameritech's request for the license comes at a time when the FCC is studying carefully personal communications services. Of particular concern to the FCC is how to properly allocate radio spectrum, a limited resource that is in demand given the growth of wireless communications in recent years.

Ameritech is the Chicago-based parent of the Bell companies serving Illinois, Indiana, Michigan, Ohio and Wisconsin, as well as several other companies providing mobile communications, directory publishing, lease financing and audiotex services. Its 1989 revenues were $10.2 billion.

#90297p8897 10/24/1990 ~PR Newswire

MIDLAND, MI (OCT. 24) PR NEWSWIRE - Dow Corning Corporation reported today that for the third quarter of 1990, sales were $434 million, up 11 percent over the $390 million reported for the same period in 1989. Net income was $43.5 million, up 18 percent over the $36.9 million reported in 1989.

For the nine months ended Sept. 30, sales were $1,269 million and profits were $126.4 million. Sales were up 7 percent from the $1,190 million reported in 1989, while net income increased 4 percent from the $121.9 million reported for the same period in 1989.

"Our performance in this quarter showed good growth relative to both the current economic environment and last year's quarterly results," said Edward Steinhoff, vice president for finance and chief financial officer.

"Revenue growth was broad-based across most market segments," stated Steinhoff. "We anticipate, however, this rate of sales growth will not be sustained in the near future due to deteriorating world economic conditions."

Steinhoff added, "Third-quarter profits benefited from both our sales growth and a more favorable tax provision rate. Future profitability is threatened, however, by rising costs which cannot be completely offset by productivity

improvements. Price increases on Dow Corning products are being announced in most parts of the world."

During the third quarter, Dow Corning dedicated major research centers in Midland and Yamakita, Japan. Additionally, the company broke ground on a new $16 million pilot plant in Winnipeg, Manitoba, to pioneer a new and more cost-efficient way to produce silicon metal, a basic raw material for silicones.

Steinhoff added, "These global investments in research and development demonstrate our long-term confidence for the future despite the current atmosphere of economic uncertainty."

MELROSE PARK, ILL. (OCT. 24) PR NEWSWIRE - Leonard H. Lavin, chairman and chief executive officer of Alberto-Culver Company (NYSE: ACV), today announced that the company achieved double-digit percentage increases in both sales and earnings for its fourth quarter and 1990 fiscal year.

Sales for the year ended Sept. 30, 1990 were a record $795.8 million compared to $717.4 million for fiscal 1989, an increase of 10.9 percent. Net earnings were a record $35 million versus $29.4 million last year, an increase of 18.9 percent. Earnings per share in fiscal 1990 increased to $1.30 from last year's $1.12.

For the fourth quarter ended Sept. 30, sales increased 16 percent to $223 million, compared to $192.2 million for the fourth quarter last year. Net earnings for the quarter increased 21.1 percent to $11.4 million versus last year's $9.4 million, while earnings per share increased to 41 cents, compared to 36 cents in the fourth quarter of 1989.

"Alberto-Culver ended the fiscal year with the highest sales and earnings and the strongest balance sheet in its 35-year history," Lavin said. "Profit margins were also up, achieving their highest level since 1970."

PHILADELPHIA (OCT. 24) PR NEWSWIRE - Maritrans Partners L.P. (NYSE: TUG) today announced net income for the quarter ended Sept. 30, 1990, of $5.9 million compared to $2.9 million for the quarter ended Sept. 30, 1989, on revenues of $40.7 million and $34.2 million, respectively.

Included in net income for the quarter ended Sept. 30, 1990, were $4.1 million in income from continuing operations and an extraordinary item of $1.8 million. The extraordinary item was due to the reversal of certain reserves. As a measure of cash-generating capability, a critical factor for master limited partnerships such as Maritrans, net income before interest, depreciation and amortization for the quarter ended Sept. 30, 1990, was $12.1 million compared to $8.6 million for the quarter ended Sept. 30, 1989.

Net income for the nine months ended Sept. 30, 1990, was $10.6 million compared to $9.6 million for the nine months ended Sept. 30, 1989, on revenues of $112.5 million and $100.7 million, respectively. Included in net income for the nine months ended Sept. 30, 1990, were $8.8 million from continuing operations and the extraordinary item of $1.8 million.

Stephen A. Van Dyck, chairman and chief executive officer of Maritrans GP Inc. commented: "Our growth in income from continuing operations is encouraging. These results indicate that our long-term approach of positioning Maritrans as a high quality marine transportation company, though increasing our costs, is achieving some success. We intend to continue to work with our customers to provide quality operations which meet safety standards and result in monies for investment in further service and safety improvements."

The board of directors of Maritrans GP Inc., the managing general partner of Maritrans Partners L.P., declared a cash distribution of $.2875 per outstanding limited partnership unit with respect to the quarter ended Sept. 30, 1990. The distribution will be payable on Nov. 21, 1990, to unitholders of record at the close of business on Nov. 5. Since going public in April 1987, Maritrans is making its 14th consecutive quarterly distribution without distribution support from Sonat Inc., the former owning company. For the five-year period ending March 31, 1992, Sonat is obligated (subject to specified terms and conditions) to make contributions to Maritrans, if necessary, in order to support its ability to make cash distributions.

Maritrans Partners L.P. is a master limited partnership formed in 1987 to purchase and operate, through Maritrans Operating Partners L.P., a fleet of tugboats and oceangoing tank barges along the Gulf and Atlantic coasts. Maritrans is the largest independent U.S. flag marine transporter of petroleum products in the coastal trade.

DALLAS (OCT. 24) PR NEWSWIRE - Dorchester Hugoton, Ltd. (NASDAQ-NMS: DHULZ) announced today net earnings for the third quarter ended Sept. 30, 1990 of $372,000 or three cents per unit compared to $601,000 or six cents per unit for the previous year. Revenues were $1,499,000 and $1,386,000, respectively. The partnership's earnings were adversely affected this quarter in part by severance and related payments approximating $216,000 to Howard C. Wadsworth or his account as a result of his resignation as general manager.

Earnings for the nine months ended Sept. 30, 1990 were $1,957,000 or 18 cents per unit compared to $2,225,000 or 21 cents per unit for the previous period last year. Revenues were $4,564,000 and $4,412,000, respectively.

DORCHESTER HUGOTON, LTD.

Periods ended	Three Months		Nine Months	
Sept. 30;	1990	1989	1990	1989
Revenues	$1,499,000	$1,386,000	$4,564,000	$4,412,000
Net earnings	372,000	601,000	1,957,000	2,225,000
Earnings per unit	3 cents	6 cents	18 cents	21 cents

Despite decreased third quarter and year-to-date net earnings, revenues from the partnership's natural gas properties less production taxes and lease operating expenses exclusive of legal costs continued to improve. This amounted to $1,194,000 during 1990's third quarter compared to $1,012,000 last year and $3,708,000 for the nine months ended Sept. 30, 1990 compared to $3,449,000 in 1989.

The partnership also announced the completion of the Clowdus I-2 infill well in the Hugoton gas field in Stevens County, Kan. The Clowdus I-2 was completed at 2,915 feet in the Chase Group with 98 net feet of gas pay and a calculated open flow potential of 7.4 million cubic feet of gas per day. This well is part of the partnership's Kansas infill drilling program which began in 1987.

Dorchester Hugoton, Ltd., is a Dallas-based producer of natural gas and its depositary receipts are traded on the NASDAQ National Market System.

#90297p8908 10/24/1990 ~PR Newswire

ATLANTA (OCT. 24) PR NEWSWIRE - On Oct. 24, the directors of IRT Property Co. (NYSE: IRT) declared a quarterly dividend of 20 cents per share payable on Dec. 1 to shareholders of record on Nov. 9.

This represents a reduction of 9 cents per share from the previous quarterly dividend and the first reduction in regular quarterly cash dividends in 12 years.

Donald W. MacLeod, president and chairman of IRT Property Co., stated: "The decision to reduce the IRT dividend at this time was dictated primarily by the current market price of IRT stock. There is no concern about the viability of the company or its investment portfolio.

"Our shopping centers continue to be 95 percent leased and we continue to make leasing progress on new and replacement leases. Cash flow from operations in 1990 is projected to be comparable to our $1.06 per share cash flow from operations in 1989. In 1991, we would expect an increase in this figure as new leases are signed and new tenants take occupancy.

"The reduced dividend, now representing 75-80 percent of the company's cash flow from operations, also affords the company an opportunity to retain funds for modernization programs, general capital improvements, tenant improvements and other expenditures which can be expected to result in enhanced property values and increasing cash flows.

"As a result of this decrease in our quarterly dividends, we now meet all the criteria of research analysts and institutional investors for qualification as a superior real estate investment trust: a sound real estate portfolio, a concentration in types of investments (shopping centers), a geographic concentration (southeastern United States), self-management of our properties and a dividend supported by cash flow from operations."

IRT Property Co., the southeastern shopping center REIT, is a Real Estate Investment Trust which invests primarily in shopping centers in the southeastern United States. The company owns in excess of 5 million square feet of retail space in its portfolio of 90 investments.

CONTACT: W. Benjamin Jones III, senior vice president and secretary of IRT Property Co., 404-955-4406

#90297p8911 10/24/1990 ~PR Newswire

VALLEY FORGE, PA (OCT. 24) PR NEWSWIRE - The trustees of Vanguard Real Estate Fund I (NASDAQ: VREOS) and Vanguard Real Estate Fund II (NASDAQ: VRETS) today approved share repurchase programs and reported reductions of 4.3 percent and 1 percent in estimated market values per share for the respective funds.

The repurchase programs provide for Fund I and Fund II to purchase in the open market, from time to time, up to 500,000 and 300,000, respectively, of their outstanding shares. Fund I currently has 11.4 million outstanding shares, while Fund II has 6.7 million outstanding shares. The trustees determined that a share repurchase program currently represents a sound investment considering each fund's resources, the discount from underlying net asset value at which each fund's shares are trading, and other factors.

The funds also reported that, as a result of an interim review of the market values of each fund's investments performed by the adviser (Aldrich, Eastman & Waltch Inc.), it is expected that appraised values would be moderately reduced. According to the adviser's estimates, the present market value per share of Fund I's investments is approximately $9.50, or $0.43 (4.3 percent) lower than the $9.93 reported at year-end in Fund I's 1989 Annual Report. For Fund II, the current estimated market value per share of the fund's investments is approximately $9.65, or $0.10 (1 percent) lower than the $9.75 reported at year-end in the Fund II's 1989 Annual Report. The results of each fund's annual investment appraisals -- which are performed by independent appraisers -- will be completed by December 1990; nonetheless, the trustees agreed that providing this information, at this time, was in the best interest of current and prospective shareholders.

Reflecting these changes, Vanguard Real Estate Fund I established a reserve for possible losses of $2.5 million or $0.22 per share, based upon the adviser's estimates of market value and the fund's accounting policies. Prior to giving effect to the reserve for possible losses, Fund I had income in the amount of $0.14 per share, for the quarter ended Sept. 30, 1990. While recognition of the reserve will cause Fund I to incur a loss of $0.08 per share for the quarter ended Sept. 30, 1990, neither the fund's cash flow nor its taxable income is affected by the reserve. Accordingly, as previously reported, the fund has declared and will pay a cash dividend in the amount of $0.15 per share for the quarter ended Sept. 30, 1990. (Fund II has also declared and will pay a $0.15 cash dividend for the quarter ended Sept. 30, 1990.)

"Cleary, commmercial real estate markets have weakened over the past year," said John C. Bogle, chairman of the funds. "These reductions in estimated market value per share and the establishment of an allowance for possible losses in Fund I are simply designed to fully recognize the impact of these changes in our Portfolios. We remain confident that the funds represent sound investments for long-term investors, and believe that the share repurchase programs illustrate our confidence."

MEDIA, PA (OCT. 24) PR NEWSWIRE - At Sept. 30, 1990, Elmwood Federal Savings Bank (NASDAQ: EFSB) reported net operating income of $220,000 for the third quarter, compared to $320,000 for the comparable period the previous year.

After tax income for the first nine months was $620,000 compared to $1,096,000 reported for the same period in 1989. During the first nine months of 1990, the bank charged in excess of $125,000 to operations representing

non-recurring costs attendant to the terminated Susquehanna Bancshares acquisitions.

Commenting on the terminated acquisition, Lewis W. Walters, president and chief executive officer of Elmwood Federal, explained that in the current climate of the industry, there are comparatively few mergers or acquisition discussions culminating in completed transactions. He stated that the bank's management will continue to explore the potential of that particular strategy to enhance shareholder value.

To date, the bank's management efforts to reduce controllable expenses has resulted in a 10 percent reduction in staff complement and a 17 percent reduction in compensation expenses, on an annualized basis. The bank is continuing to seek further operating economies while maintaining a market presence, and a competitive level of quality service to customers.

The bank's asset quality continues to improve. Of $178 million in net loans receivable at Sept. 30, 1990, $139 million, or 78 percent, represent mortgage loans. Of that amount, $130 million are first mortgage loans on one to four family residences, of which approximately $109 million have adjustable rates. At that date, net construction loans accounted for approximately $14 million of net loans outstanding, compared to $25 million at Sept. 30, 1989, a reduction of 46 percent. Consumer loans amounted to approximately $23 million at Sept. 30, 1990. $20 million of these are secured by second mortgages on local residences.

Elmwood Federal continues to maintain a strong capital position, stringent loan underwriting standards, and a management commitment to directing the institutions' resources to the local markets with which the bank is familiar. A $227 million asset institution, Elmwood Federal has nine offices in suburban Philadelphia serving Chester, Delaware and Philadelphia counties. The bank's common stock is traded on NASDAQ over the counter under the symbol EFSB.

#90297p8929 10/24/1990 ~PR Newswire

ARDMORE, OK. (OCT. 24) PR NEWSWIRE - Noble Affiliates, Inc. (NYSE: NBL) today reported net income of $5,660,000, or 13 cents per share, for the third quarter of 1990, more than double its net income of $2,406,000, or 5 cents per share, in the same period a year ago.

Revenues for the 1990 third quarter were $54,173,000, up 15 percent from $47,267,000 in the previous year's third quarter.

Net income for the first nine months of 1990 was $17,875,000, or 41 cents per share, on revenues of $166,860,000, compared with net income of $29,638,000, or 68 cents per share, on revenues of $160,971,000, in the first nine months of 1989. Net income in the first nine months of 1989 included a credit of $8,825,000, or 20 cents per share, as a result of the company's adoption of Statement of Financial Accounting Standards No. 96, "Accounting for Income Taxes."

Robert Kelley, president and chief executive officer of Noble, credited the third quarter operating gains primarily to increases in oil production and prices, which were offset in part by a drop in gas production and prices.

During the 1990 third quarter, oil production averaged 12,836 barrels per day, 37 percent above the 9,345 average barrels per day recorded during the same period of 1989. Prices received during the 1990 period averaged $22.59 per barrel, up 29 percent from the average of $17.52 in 1989's third quarter.

Gas production in the 1990 third quarter averaged 131.7 million cubic feet per day, which represented a drop of nine percent from 1989's third quarter average of 144.5 million cubic feet per day. Gas prices also fell by 21 percent, from an average of $2.19 per thousand cubic feet in the 1989 third quarter to $1.74 per thousand cubic feet in the 1990 third quarter.

Noble Affiliates, Inc. is an independent energy company with exploration and production operations throughout major basins in the United States, including

the Gulf of Mexico and offshore California, as well as foreign operations primarily in Canada, Tunisia and Indonesia. Its common stock is listed on the NYSE under the symbol "NBL."

#90297p8930 10/24/1990 ~PR Newswire

LOUISVILLE, KY (OCT. 24) PR NEWSWIRE - LG&E Energy Corp. (NYSE: LGE) earned $1.49 per share of common stock for the quarter ended September 30, 1990, compared with $1.45 per share for the comparable quarter of 1989. Earnings per share for the nine months ended September 30, 1990 were $3.86 per share, compared with $3.21 for the same period last year. For the year ended September 30, 1990, earnings per share were also $3.86, compared with $3.61 for the year ended September 30, 1989.

The four-cent increase in earnings per share for the quarter ended September 30, 1990, compared with the same period of 1989, is primarily attributable to increased electric sales. Revenues from sales to other utilities were a record $14.1 million for the quarter, compared with $9.6 million for the quarter ended September 30, 1989. In addition, hot weather during the period boosted electric sales for the quarter.

Revenues for the three and nine-month periods ended September 30, 1990 were $187.2 million and $529.3 million respectively, compared with $176.1 million and $518.7 million for the same periods ended September 30, 1989. For the year ended September 30, 1990, revenues were $697.6 million, compared with $676.0 million for the year ended September 30, 1989.

Louisville Gas and Electric Company also changed its accounting method as of January 1, 1990, to more closely match revenues with expenses by recording revenues in the month that the service is rendered. As a result of this change in accounting, a one-time adjustment to earnings of 86 cents per share has been recorded for the year.

#90297p8932 10/24/1990 ~PR Newswire

OKLAHOMA CITY (OCT. 24) PR NEWSWIRE - Fleming Companies, Inc. (NYSE: FLM) reported today that net earnings increased 21.8 percent for the third quarter which ended Oct. 6. The company earned $21.7 million, compared with $17.8 million for the third quarter of 1989.

Fully diluted earnings per share showed an 18.2 percent increase, reaching 65 cents per share compared with 55 cents for the same period in 1989. Sales were essentially flat at $2.76 billion versus $2.77 billion a year ago, a decrease of .4 percent.

For the year to date, 40 weeks ended Oct. 6, net earnings increased 19.1 percent to $70.6 million, compared with $59.2 million for three quarters of 1989. Fully diluted earnings per share improved 15.8 percent to $2.13, compared with $1.84 a year ago. Sales were $9.01 billion, a 1.8 percent decrease from the previous year.

"Fleming's earnings performance during the third quarter was very gratifying," said Dean Werries, chairman and chief executive officer. "Productivity improvement, stringent cost control and disposition of underperforming assets were instrumental in the company's progress."

Within Fleming's distribution system, productivity as measured in tons per hour was up 7.2 percent in the third quarter and 6.7 percent for the full year. Selling, administrative and interest expenses have been reduced substantially and are running well below 1989.

Although sales decreased slightly during the quarter, Werries anticipates an increase in the fourth quarter. Fleming has added more than $600 million in new business, including 117 supermarkets in Missouri, Arkansas, Oklahoma, Kansas and Texas, and most of that will be reflected in fourth quarter sales.

Affiliated retailers served by Fleming have opened 91 stores this year, representing 2.8 million square feet of new retail space. In addition, there are 57 stores under construction totaling 2.3 million square feet.

Increased sales of perishables such as fresh produce, meats and dairy products also contributed to the improved earnings performance, Werries said. "Perishables have become increasingly important to consumers and retailers, and we have expanded our facilities and product lines accordingly. As a result, our perishables mix has risen to 39 percent of sales compared with 37 percent a year ago."

Fleming is the nation's largest wholesale food distributor, serving more than 5,000 stores in 36 states from coast to coast.

#90297p8937 10/24/1990 ~PR Newswire

NEW YORK (OCT. 24) PR NEWSWIRE - The American Stock Exchange announced that Eco Corporation of Mississauga, Ontario, Canada, the third Canadian company to list this year, began trading 4,671,865 common shares today. Eco is a

leading global environmental products and consulting services company that produces and markets products such as photodegradable resins, waste solutions and heavy metal recovery systems through joint ventures and licensees. The company also trades on the Toronto Stock Exchange.

Trading under ticker symbol "ECG," the common stock opened on 500 shares at 3-7/8.

Eco invents, tests, manufactures and markets products that provide solutions to environmental problems such as household waste management control, photodegradable and photo-controlled release resins, sorbents, and metal recovery systems.

The company's environmental products include its Green Cone(R) food waste composter that is marketed in Canada by Rubbermaid Industries Canada, Inc.; in the United Kingdom and Ireland, and soon to be marketed in the United States.

As a part of the EcoSystem, the Green Cone is a backyard food, organic and garden waste digester for single-family residential use that transforms the residue into fertile garden compost, reducing the amount of waste going to landfill sites.

Eco's other environmental products include photodegradable Ecolyte(R) resins to address single use container and plastic packaging litter problems, and controlled release resins that are modified for geographic location and use; an oil spill absorbent capable of controlling both new and existing oil spills; and a metal recovery system used by the metal finishing industry to remove toxic metals from effluents.

ST. LOUIS, MO (OCT. 24) PR NEWSWIRE - Anheuser-Busch Companies, Inc. (NYSE: BUD), achieved record sales and earnings during the third quarter and first nine months of 1990, it was announced today by August A. Busch III, chairman of the board and president.

The company's continued excellent performance is due primarily to the ongoing growth of Anheuser-Busch, Inc., the company's brewing subsidiary, and higher profitability of Campbell Taggart, Inc., and Metal Container Corporation.

Financial results for the third quarter of 1990 include the following: Gross sales of $3.12 billion, an increase of 15.5 percent over gross sales of $2.70 billion for the third quarter of 1989.

Net income of $260.7 million, an increase of 9.4 percent compared with $238.3

million for the same period a year ago.

Fully diluted earnings per share of 91 cents, an increase of 9.6 percent, compared with 83 cents for the third quarter of 1989.

Financial results for the first nine months of 1990 include: Gross sales of $8.71 billion, an increase of 11.9 percent over gross sales of $7.79 billion for the first nine months of 1989.

Net income of $700.7 million, an increase of 9.6 percent compared with $639.1 million for the same period a year ago.

Fully diluted earnings per share of $2.45, an increase of 9.9 percent, compared with $2.23 for the first nine months of 1989.

The 1990 results reflect the Dec. 1, 1989, acquisition of Sea World. Fully diluted earnings per share assume the conversion of the company's 8 percent convertible debentures due 1996.

Anheuser-Busch, Inc., reported record beer volume sales during the third quarter and first nine months of 1990. Sales to wholesalers were 22.9 million barrels for the third quarter and 65.4 million barrels for the first nine months, an increase of 7.1 percent and 4.8 percent, respectively, over the comparable periods of 1989. The company's third quarter volume gain of 1,523,000 barrels is the highest in the industry and widens the company's lead over its competitors.

For the first nine months of 1990, Anheuser-Busch beer sales accounted for 43.0 percent of total brewing industry sales (including imports), according to estimates from the Beer Institute. This market share compares with 41.9 percent for the first nine months of 1989.

WILMINGTON, DE. (OCT. 24) PR NEWSWIRE - Du Pont (NYSE: DD) today declared a fourth quarter common stock dividend of 42 cents per share payable Dec. 14 to stockholders of record Nov. 15.

This dividend represents an increase of 5 percent over the 40 cents paid in the third quarter. This will bring the full year dividend to $1.62 which is 12 percent higher than the $1.45 paid in 1989.

Board Chairman Edgar S. Woolard Jr. said, "This is Du Pont's sixth dividend increase in the last five years and is in line with our policy of frequent

increases which contribute toward maximizing shareholder value."

Regular quarterly dividends of $1.12-1/2 per share on the $4.50 series preferred stock and 87-1/2 cents per share on the $3.50 series preferred stock also were declared, both payable Jan. 25, 1991, to stockholders of record Jan. 10, 1991.

VICTORIA, BRITISH COLUMBIA (OCT. 24) PR NEWSWIRE - Battery One-Stop Inc. (Alberta Stock Exchange: BTS; NASDAQ: BATTF), specialty retailer of over 1,000 types of batteries and battery powered electronic products, announced today that its wholly owned subsidiary, Battery One-Stop Ltd., a New York corporation, is arranging a secured loan in the amount of U.S. $1,450,000 with various shareholders of Battery One-Stop or their affiliates, for the purpose of financing Christmas season inventory. The amount of U.S. $850,000 has been advanced to date. The aforesaid loans are repayable in April, 1991, and are secured by the assets of Battery One-Stop Ltd. and guaranteed by Battery One-Stop.

Battery One-Stop also announced that Battery One-Stop Ltd. is arranging for a rescheduling of the payment of the U.S. $2,000,000 line of credit established with The Dollar Savings & Trust Co., of Youngstown, Ohio, until April, 1991.

Battery One-Stop is currently seeking suitable equity financing to retire the current outstanding indebtedness of Battery One-Stop Ltd. and to finance the opening of an additional 20 stores during the calendar year ending Dec. 31, 1990.

The Alberta Stock Exchange has neither approved nor disapproved the contents of this press release. For further information, please contact Edward Geric, vice president, finance, Battery One-Stop Inc., 200, 2046 Oak Bay Avenue, Victoria, British Columbia, V8R 1E4, 604-598-2222.

MELVILLE, N.Y. (OCT. 24) PR NEWSWIRE - Arrow Electronics, Inc. (NYSE: ARW) reported strong gains in both earnings and sales for the third quarter and the nine months ended Sept. 30. In addition, September's record daily shipment rate, the highest for any month in the company's history, contributed to an advance in third quarter sales over sales in the immediately preceding quarter defying the normal seasonal pattern.

Net income for the three months ended Sept. 30 was $2.7 million ($.13 per common share), compared with a loss of $825,000 ($.18 per common share) in last year's third quarter. Third quarter sales of $246 million advanced 11 percent over last year's third quarter sales of $222 million and surpassed second quarter 1990 sales by $4 million.

The company recorded its highest quarterly operating income in two years, reflecting both higher sales and a significant decrease in operating expenses as a percentage of sales, which declined to 17.3 percent from 18.9 percent in the year-earlier quarter.

For the nine months ended Sept. 30, net income increased more than 400 percent to $8.2 million ($.37 per common share) on sales of $735 million, compared with net income of $1.5 million (for a loss of $.22 per common share after deducting preferred stock dividends) on sales of $686 million in the year-earlier period.

Arrow Electronics is one of the world's two largest distributors of electronic components, systems, and related products. In addition to its North American distributor network Arrow is actively engaged in expanding its role in European electronics distribution.

LEXINGTON, Mass. (OCT. 24) PR NEWSWIRE - Dennis J. Picard was today elected chairman and CEO of Raytheon Company (NYSE: RTN), effective March 1, 1991.

He will succeed Thomas L. Phillips, 66, who retires effective that date after 42 years with the company. Phillips has been the chief executive officer for the last 22 years.

Picard, 58, has been president of Raytheon since Aug. 1, 1989. Prior to that he was senior vice president and general manager of the Missile Systems Division, Raytheon's largest division.

Named to succeed Picard as president, effective March 1, 1991, is Max E. Bleck president of Beech Aircraft Corporation, Raytheon's largest subsidiary. Bleck, 63, has been president of Beech Aircraft since May 1987. In addition, Bleck was elected to the Raytheon board of directors effective immediately.

In announcing these elections by the board of directors, Phillips said, "These steps will complete the transition of senior management at Raytheon. Dennis Picard will become CEO after leading our efforts to become an acknowledged

leader in defense electronics. Max Bleck will assume the presidency after turning Beech Aircraft Corporation around to a steady growth in profitability. Both men have outstanding leadership qualities with a strong business acumen. Raytheon Company will be in good hands."

The board noted that Bleck would be expected to serve a minimum of five years and go beyond the normal retirement age of 65. He will relocate from Kansas to Massachusetts during a transition period in the next four months.

#90297p8951 10/24/1990 ~PR Newswire

JACKSON, MS (OCT. 24) PR NEWSWIRE - First Mississippi Corporation (NYSE: FRM) reported net earnings of $4.3 million or $.22 per share for the first quarter ended Sept. 30, 1990, up from $0.9 million or $.05 per share first quarter fiscal 1990. The increase was due to higher operating profits in fertilizer and oil and gas.

Pretax operating profits for the first quarter were $11.3 million on sales of $134.9 million, up from $5.5 million on sales of $102.5 million last year. Better fertilizer and oil and gas results more than offset lower profits in chemicals, gold and coal.

Fertilizer pretax operating profits were $4.0 million, up from a loss of $1.5 million last year. The improvement was due to higher ammonia and urea prices and increased volume.

Oil and gas pretax operating profits were $2.7 million, up from $1.0 million last year on higher volume of captive production and higher prices for oil, plant products and sulphur.

Pretax operating profits for chemicals were $5.0 million versus $5.9 million last year. Gold pretax operating profits for the quarter were $0.9 million, down from $1.2 million last year. Coal pretax operating profits were $0.1 million versus $0.2 million last year.

Other - Technology and New Ventures had a pretax operating loss of $1.4 million compared with a loss of $1.2 million for the same quarter last year.

Corporate expenses, interest expense, taxes and other income and expenses were a net expense of $7.0 million versus $4.7 million last year. The increase was due to higher income taxes and net interest expense.

First Mississippi Corporation, headquartered in Jackson, is a resource and technology company with established operations in chemicals, fertilizers, energy and gold, and emerging operations in technology-based ventures.

In commenting on these results, William E. Willoughby, chairman and president, stated, "We are pleased with our improved sales and operating income figures which reflect continued growth in our core business. Net income is off when compared with the prior period results, due primarily to the company reporting a substantial favorable lawsuit settlement in last year's second quarter and increased interest costs associated with financing the four new plants that came on line this year, which are not yet operating at capacity."

Wedco further announced that it intends to purchase company stock in accordance with its previously announced Stock Repurchase Program. Under this program, the company is authorized to repurchase up to 146,000 shares of its common stock in the open market.

#90297p8959 10/24/1990 ~PR Newswire

TECUMSEH, MI (OCT. 24) PR NEWSWIRE - Following is the text of the report to shareholders of Tecumseh Products Company (NASDAQ: TECU) for the quarter and nine months ended Sept. 30, 1990:

To Our Shareholders: As we announced last month, our 1990 results include a special third-quarter charge to provide for estimated costs associated with clean up of certain PCB contamination of the Sheboygan River and Harbor Superfund site in Wisconsin. This special charge of $30 million (equivalent to $19.2 million or $3.51 per share after income taxes) has resulted in a third quarter loss and has significantly impacted nine month results as well. In the absence of this special charge, net income in the third quarter of 1990 would have been $4.5 million or $.81 per share as compared with net income of $16.7 million or $3.05 per share in the third quarter of 1989. Similarly, nine month net income this year would have been $31.5 million or $5.75 per share vs. net income of $63.9 million or $11.68 per share in the same period of 1989.

Our U.S. compressor business has been hurt by a very poor season for air conditioning products as well as exceptionally high industry inventories. Our production schedules were substantially curtailed in the third quarter and will remain at low levels through at least the end of the year.

We are pleased to report that our Brazilian subsidiary, SICOM, returned to modest profitability in the third quarter after having incurred substantial losses in the first half of the year. Nonetheless, the fundamental political and economic changes being forged in Brazil make it unlikely in the foreseeable future that SICOM will return to the high levels of profitability

enjoyed in 1989.

We expect to see fourth quarter softness in our European manufacturing operations as the result of waning demand and price pressures relating to the weakness of the U.S. dollar. As we expect no fundamental change in the U.S. and Brazilian operations, the fourth quarter will be a particularly difficult one.

We are proceeding on schedule with the tooling of our new SF and AW high efficiency compressors and continue to believe that we are well postured to serve the rapidly changing needs of our industry as some degree of normalcy returns to the marketplace.

#90297p8962 10/24/1990 ~PR Newswire

CHARLOTTE, NC (OCT. 24) PR NEWSWIRE - Piedmont Mining Company, Inc. (NASDAQ: PIED) reported net income of $302,489, or $0.02 per share in the third quarter ended September 30, 1990, compared with a loss of $411,925, or $0.03 per share in the third quarter of 1989. This marks Piedmont's fourth consecutive profitable quarter. Net sales increased to a record $2,504,177 in the third quarter, compared with $1,058,326 in the same period last year.

For the first nine months of 1990, Piedmont reported record net income of $944,159, or $0.07 per share, compared with a loss of $399,583 in the first nine months of 1989. Net sales also increased to a record $6,948,810, compared with $3,953,539 in the first nine months of 1989. Piedmont received an average of $382 per ounce of gold sold in the third quarter of 1990, compared with $363 per ounce in the second quarter and $368 per ounce in the third quarter of 1989. Net cash provided by operating activities increased to $2,374,518 in the first nine months, compared with $213,546 in the same period last year.

Gold production more than doubled in the third quarter to 6,296 ounces, compared with 3,074 ounces in the third quarter of 1989. Gold production in the first nine months totalled a record 18,067 ounces, compared with 11,005 ounces in the first nine months of 1989. Piedmont processed and stacked 334,170 tons of mineralized rock during the first nine months with an average AA (atomic absorption) grade of 0.054 ounces of gold per ton containing a recoverable 18,045 ounces of gold, compared with 284,228 tons with an average AA grade of 0.050 ounces per ton in the same period last year.

"In the third quarter we set new production and net sales records for Piedmont " said Robert M. Shields, Jr., Chairman and Chief Executive Officer. "But the most encouraging development for our future has been the dramatic increase in our mineral inventory during the first nine months of 1990 and the positive results of the preliminary feasibility study reported in our press release on September 28."

Last month Piedmont reported that its proven and probable mineral inventory

now totals 14,485,000 tons with an average grade of 0.048 ounces of gold per ton containing a total of 700,000 ounces of gold. A preliminary feasibility study by American Mine Services, Inc. of Aurora, Colorado, has shown that under one scenario 6,404,000 tons with an average grade of 0.063 ounces per ton could be mined from several open pits with an average strip ratio of 3.5 to 1 yielding about 60,000 ounces per year for more than 6 years and a cash flow of about $45,000,000 for the project at a gold price of $400 per ounce. Additional drilling, metallurgical testing and engineering studies will be needed. Piedmont is studying financing alternatives to evaluate and develop the potential of the mineral inventory at the Haile property. These alternatives may include a private placement of new equity capital, a joint venture or business combination with another mining company.

Ned Goodman announced that he has substantially retired from his activities at Corona Corporation to pursue other interests. Accordingly, he has resigned most of his outside directorships and has resigned from Piedmont's Board of Directors as well.

Piedmont is engaged in exploration, mining and production of gold in the southeastern United States. Piedmont pioneered the resumption of gold mining in the Southeast in 1985 at its Haile Gold Mine near Kershaw, South Carolina. Piedmont's wholly-owned subsidiary, Mineral Mining Company, Inc., is also engaged in mining and processing white, fine-grained Mineralite(R) mica at its facility near the Haile Mine.

#90297p8964 10/24/1990 ~PR Newswire

PITTSBURGH (OCT. 24) PR NEWSWIRE - National Intergroup Inc. (NYSE: NII) today reported a net loss for the second quarter of fiscal year 1991 of $1.0 million or $0.11 per share after preferred dividends, compared to net income of $8.6 million, or $0.33 per common share after preferred dividends, in the second quarter last year.

The loss in the current quarter is mainly the result of NII's $4.2 million settlement with certain shareholders relating to expenses incurred during recent consent solicitation and proxy contests.

NII's net loss in the first half of fiscal year 1991 totaled $282.7 million, or $13.12 per share, compared to net income of $21.6 million, or $0.87 per share, during the first six months last year. As previously announced, reserves totaling $239.5 million established in the first quarter to cover anticipated losses on the sale of NII's Ben Franklin and Permian Corp. subsidiaries, a $26.7 million charge associated with the closing of its Pittsburgh office, and a $14.8 million non-recurring charge reflecting the market value of the preferred stock and expenses related to its National Steel

transaction, principally affected reported results for the first half of the year. The $4.2 million consent solicitation and proxy contest settlement recorded in the second quarter also impacted six-month results. The losses were partially offset by a $12.0 million gain on the sale of the company's Genix Enterprises Inc. subsidiary.

FoxMeyer Drug Co.: FoxMeyer Drug Co.'s operating income for the second quarter of fiscal 1991, before goodwill, totaled $8.5 million on sales of $700.8 million, while operating income for the six months totaled $18.5 million on sales of $1.4 billion. In the comparable periods of the previous fiscal year, operating income at FoxMeyer Drug totaled $8.9 million and $16.0 million, on sales of $561.6 million and $1.1 billion.

Operating profits in the quarter were adversely affected by shifts in customer mix and higher expenses for systems development, litigation settlements, advertising and accident claims. However, operating profits for the six-month period increased by 15.3 percent as a result of strong independent and institutional sales along with significant increases in chain store sales from existing and newly added accounts.

Equity Investment in National Steel Corp.: As a result of the recent transaction with NKK, NII's equity investment in National Steel Corp. (NSC) resulted in net income of $2.6 million, vs. net income of $6.3 million in the second quarter last year. For the first half of fiscal 1991, NII's equity investment in NSC generated a net loss of $9.1 million, vs. net income of $22.5 million in the same period last year. The second quarter results relating to NII's equity investment in NSC include a full quarter of net preferred income and the six-month results include a $14.8 million loss on the exchange by NII of 20 percent of its common stock interest in NSC for preferred stock. The three- and six-month results also reflect reduced equity earnings in NSC due to a smaller common ownership by the company. The above results also include the company's share of NSC's extraordinary gains from utilization of tax net operating loss carryforwards.

Discontinued Operations: NII recorded losses from discontinued operations for the second quarter and six months of fiscal 1991 totaling $0.8 million and $234.0 million, respectively, vs. income of $4.6 million and $10.4 million in the previous fiscal year's comparable periods. Discontinued operations include the results of Ben Franklin Stores Inc., The Permian Corp. (and the company's interest in Permian Partners, L.P.), and the results of Genix Enterprises Inc. and National Aluminum Corp. The prior year's results of operations have been restated to reflect these operations as discontinued.

NII is currently pursuing the sale of Ben Franklin and is conducting a tender offer for the publicly-held preference units of Permian Partners, L.P., so that it may dispose of the recombined Permian operations. Genix was sold by the company in the first quarter of fiscal 1991 and the operations of National Aluminum were disposed of during fiscal 1990.

The consolidated income statement and summarized balance sheet data follow.

#90297p8966 10/24/1990 ~PR Newswire

HOUSTON (OCT. 24) PR NEWSWIRE - Stewart Information Services Corp. (NASDAQ: SISC) earned $1.2 million, or 29 cents per share, in the third quarter of 1990 compared to $1.4 million, or 33 cents in the third quarter of 1989. For the first nine months of 1990, Stewart earned $0.5 million, or 12 cents per share, compared to a loss of $1.4 million, or 35 cents per share, for the same period last year. Last year's results included a second quarter after-tax gain of $1.1 million on the sale of municipal bonds.

Orders have been in a downward trend, although they increased slightly (less than 1 percent) in the third quarter of 1990 over the same period a year ago. Orders were down 9 percent for the first 15 working days in October.

Although real estate activity in several of the company's markets is improving the overall outlook for real estate, as seen by most economists, is for a downturn for the rest of this year and 1991. The crisis in Kuwait, the decline in consumer confidence, increasing inflation and the tightening of real estate loans are clouds on the future.

The company believes it will be profitable for the current year and for next year. However, the company may not earn sufficient profits to pay its dividends at the current rate, while at the same time reinvesting the funds necessary for future growth.

Stewart's primary business is title insurance. The company issues policies on homes and other real property in all 50 states, the District of Columbia and Canada through over 2,650 issuing locations. In issuing a policy, and as one process, the title is first searched, examined and then closed. Stewart's customers include homebuyers and sellers, attorneys, builders, developers, lenders and real estate brokers. The company also sells computer-related services and information to the real estate industry. Additionally, the company produces photogrammetric engineering products and geographic information systems for government and private entities, both domestic and foreign.

#90297p8967 10/24/1990 ~PR Newswire

PITTSBURGH (OCT. 24) PR NEWSWIRE - L.N. Short Jr., chairman and chief executive officer of Mine Safety Appliances Co. (NASDAQ: MNES), announced today that consolidated sales for the third quarter of 1990 were $115,259,000, compared to $100,247,000 for the third quarter of 1989.

Sales for the nine months ended Sept. 30, 1990, were $345,392,000, compared to $304,595,000 for the same period in 1989. The 1990 sales are the highest third quarter and nine-months' sales in the company's history.

Third quarter 1990 earnings were $6,550,000 or $1.01 per share as compared to third quarter 1989 earnings of $6,026,000 or $.93 per share. This marks record third quarter earnings and the 12th consecutive quarter where earnings have exceeded the same quarter of the previous year. Earnings for the nine months ended Sept. 30, 1990, were $20,844,000, or $3.20 per share as compared to $19,278,000, or $2.94 per share in 1989.

The sales increases are attributed to increased shipments of commercial products in the United States and international markets, along with higher shipments under U.S. government contracts. r?nings in the United States have increased from higher sales volumes. International earnings are also higher than in 1989, even though they have been adversely affected by start-up costs of a joint venture in Germany.

The results from operations for the three-month and nine-month periods ended Sept. 30 are as follows:

(Note: Amounts in thousands, except earnings per share and shares outstanding.)

MINE SAFETY APPLIANCES CO.

Period	Three Months		Nine Months	
Ended Sept. 30	1990	1989	1990	1989

#90297p8968 10/24/1990 ~PR Newswire

HARRISBURG, PA (OCT. 24) PR NEWSWIRE - AMP Incorporated (NYSE: AMP) today reported the following:

Third Quarter Sales up 10 percent to $750 million Earnings up 6 percent to 68 cents/share from year-earlier 64 cents/share

Nine Months Sales up 7 percent to record $2.27 billion Earnings up 5 percent to $2.07/share Backlog Up $12 million during quarter to record $521 million Up from $470 million one year ago Employment -- Down 100 during quarter to 24,700 Capital Expenditures -- Record $242 million. Should reach $350 million for year compared to $252 million in 1989 and $220 million in 1988

Declares regular quarterly dividend of 34 cents/share stock repurchase program continues.

Third quarter sales of $750 million, up 10 percent year-to-year, were down slightly from the $752 million in the second quarter and the record $764 million in the first quarter of this year. The usual summer seasonal softening in our international sales did occur, but was largely offset by the effect of the recent weakening of the U.S. dollar against other major currencies and the recovery of our Brazilian sales from a sharp drop in the second quarter when the new government economic program began there.

U.S. sales have held steady during the first three quarters. Down 6 percent year-to-year for the first half, they were down only 4 percent for the first

nine months because the year-to-year comparison becomes more favorable last year sales declined each quarter from their high in the first quarter. For the entire year 1990, we expect good sales growth in the United States in our distributor and networking markets; modest growth in the automotive market; flat in aerospace/military and industrial/commercial electronics; and a small decline in sales to our computer/office equipment and consumer goods markets.

International sales were up 12 percent in local currencies and up 17 percent in U.S. dollars for the first nine months. The changes in exchange rates during the past year have added $55 million to international sales so far this year. For the first nine months, European sales were up 10 percent in local currency terms and 24 percent in U.S. dollar terms, while Asia/Pacific sales were up 16 percent in local currencies and 8 percent in U.S. dollars. Salesr?owth continues to be broad based with some growth in nearly all countries and market categories. Best growth continues to be in the automotive and networking markets. Slowest growth is in the computer/office equipment sector which has been affected somewhat by the two year slowdown in that market in the United States.

Earnings rose to 68 cents/share from 64 cents/share in the second quarter, but were below the 75 cents/share in the first quarter. The worldwide pre-tax profit margin improved to 15.5 percent in the third quarter from 14.6 percent in the second quarter partly due to a return to profitability in Brazil, but was still below the 16.8 percent first quarter and the 16.3 percent for full year 1989.

Harrisburg-based AMP Incorporated is the world's leading producer of electrical/electronic connection devices. It has 24,700 employees in nearly 160 facilities in the United States and 27 other countries. AMP stock is listed on the New York, Pacific and other regional stock exchanges (Symbol "AMP").

#90297p8970 10/24/1990 ~PR Newswire

WELLESLEY, MA (OCT. 24) PR NEWSWIRE - EG&G, Inc. (NYSE: EGG) announced that it plans to purchase up to a total of 650,000 shares of its common stock during 1991. The 1991 plan was voted and authorized on Oct. 24, 1990 by the company's board of directors and will be accomplished through periodic purchases on the open market. The shares that EG&G buys next year will be applied to the company's employee stock purchase and stock option plans and other corporate purposes.

The board also voted to increase the company's regular quarterly dividend from 19 cents to 21 cents per share of common stock, equivalent to an annual rate of 84 cents for 1991. This increased dividend is payable on Feb. 8, 1991 to

all shareholders of record at the close of business on Jan. 18, 1991. EG&G has paid cash dividends to its stockholders, without interruption, for 26 years, and has increased its dividends every year since 1974.

EG&G is a Fortune 300 company with annual sales in excess of $1.6 billion. It employs more than 30,000 people in the design and manufacture of laboratory and field-test instruments and electronic and mechanical components for commercial customers worldwide.

EG&G also provides systems engineering, precision component manufacturing, and test-site operating and management services to many agencies and laboratories of the U.S. government. The company's shares are traded on the New York Stock Exchange under the symbol EGG.

#90297p8972 10/24/1990 ~PR Newswire

MADRID, SPAIN (OCT. 24) PR NEWSWIRE - ENDESA (NYSE: ELE), the major electric utility in Spain, today reported consolidated earnings per share of Pesetas 223.98 ($2.29 per ADR), for the nine months ended Sept. 30, 1990, an 11.2 percent gain over Pesetas 201.48 ($2.06 per ADR) for the same period in 1989. One ADR is equivalent to one common share of ENDESA stock.

Consolidated revenues during the period were Pesetas 429.01 billion ($4.38 billion), up 5.6 percent over Pesetas 406.17 billion ($4.15 billion) for the previous year. High rainfall and low demand growth are the major factors in this increase.

Net debt reduction during the nine months was Pesetas 37.10 billion (378.73 million), equivalent to 5.3 percent of total outstanding debt at the beginning of the year.

Capital expenditures during the period were Pesetas 52.82 billion ($539.10 million), a 19.4 percent increase over the first nine months of 1989.

Consolidated figures are unaudited and calculated in accordance with Spanish GAAP, Conversion into U.S. dollars is based on the Federal Reserve Bank noon buying rate, on Sept. 28, of $1 equals Pasetas 97.97.

BEAVERTON, ORE. (OCT. 24) PR NEWSWIRE - The board of directors of Tektronix Inc. (NYSE: TEK) announced today the election of Jerome J. Meyer as president, chief executive officer and director. Meyer comes to Tektronix from Honeywell Inc. in Minneapolis where he has been president of its Industrial Business.

Tektronix chairman Robert Lundeen commented, "We are indeed fortunate to have Jerry Meyer join our company as its chief executive. He has had a distinguished 30-year industrial career in several high technology American companies, is an outstanding personal leader, and brings an optimum balance of business skills and experience to Tektronix. We look forward to welcoming him when he joins us in Beaverton on Nov. 6th."

A native of Minnesota, Meyer, 52, was graduated from the University of Minnesota in 1960 with a BA in mathematics and economics. After a short period at Firestone Tire and Rubber, he joined Sperry Univac in 1961 as a systems designer, rising to vice president and general manager of its commercial minicomputer division in 1978. In 1979 Meyer went with Honeywell as vice president for minicomputers and terminal products and became group vice president of its systems group in 1983. From 1984 to 1986, he served as president and chief operating officer of Varian Associates in Palo Alto, returning to Honeywell in 1986 as a vice president. He served for two years as president and chief executive of Honeywell Bull before being named president of Honeywell's Industrial Business in 1988.

Meyer and his wife, Sandra, were married in 1960 and have three grown children one son and two daughters.

Tektronix Inc. is a leading manufacturer of electronic products and systems in

the areas of test and measurement, computer graphics and communications. Sales in fiscal 1990 totaled $1.4 billion.

MINNEAPOLIS (OCT. 24) PR NEWSWIRE - Honeywell announced today that Jerome J. Meyer has resigned as president of Honeywell's Industrial business, effective Nov. 6. Meyer is leaving to become president and chief executive officer of Tektronix, Inc. based in Beaverton, Ore.

"We congratulate Jerry on his new appointment at Tektronix, but we are sad to see him leave Honeywell," said James J. Renier, Honeywell chairman and chief executive officer. "Jerry has been a key contributor at Honeywell. We wish him the very best on this new phase of his career."

Meyer joined Honeywell in 1979 and by 1983 had become group vice president of the company's information systems group. From 1984 to mid- 1986, Meyer was president and chief operating officer of Varian Associates Inc. of Palo Alto, Calif. Meyer returned to Honeywell in 1986 as corporate vice president and staff executive, before he became president and chief executive officer of Honeywell Bull 1/8now called Bull HN Information Systems Inc.3/8. Meyer rejoined Honeywell in August 1988 as president of the Industrial business.

Prior to joining Honeywell in 1979, Meyer served in various positions at Sperry Univac.

Tektronix, Inc. is a leading manufacturer of electronic products and systems in the areas of test and measurement, computer graphics and communications. Sales in fiscal 1990 totaled $1.4 billion.

Honeywell is a global controls company that provides products, systems and services for homes and buildings, industry, and aviation and space. The company had 1989 sales of $6.1 billion.

MILWAUKEE (OCT. 24) PR NEWSWIRE - Harley-Davidson, Inc. (NYSE: HDI) today announced sales and earnings for its third quarter and nine-month periods ended Sept. 30, 1990.

Net sales for the quarter totaled $203.1 million, an increase of $20.6 million or 11.3 percent, over the comparable year-ago quarter. Income from continuing operations and related earnings per share were $7.2 million and $.41, respectively, on 17.8 million shares outstanding, compared to $7.3 million and $.42 on 17.3 million shares in the year-ago quarter. Net income and related earnings per share totaled $6.5 million and $.36 versus $6.3 million and $.36 in the year ago quarter.

Extraordinary expense of $.8 million (net of tax) reflects the net loss associated with the retirement of the company's long-term debt during the quarter. The repurchase of $42.4 million of the company's 12 1/2 percent subordinated debt required the write-off of $2.1 million (net of tax) of associated deferred financing and premium costs. This was offset by a $1.3

million net gain realized from the repurchase of $14.9 million of the company's 7 1/4 percent convertible debentures during the quarter.

The third quarter net sales increase is due primarily to a 28.4 percent sales increase in the company's Motorcycle and Related Products segment.

Worldwide unit shipments of motorcycles exceeded the comparable year-ago quarter by 1,384 units.

The decrease in income from continuing operations is due principally to the decline in recreational and commercial vehicle sales at the company's Transportation Vehicles (Holiday Rambler Corporation) subsidiary caused by the downturn in the economy and fuel concerns associated with the Middle East crisis, according to Richard F. Teerlink, president and chief executive officer, Harley-Davidson, Inc.

Harley-Davidson's Defense and Other Businesses segment reported sales of $7.3 million, compared with $5.4 million in the year-ago quarter.

DETROIT LAKES, MINN. (OCT. 24) PR NEWSWIRE - Dynamic Homes, Inc. today reported sales of $1,896,000 for the third quarter of 1990, an increase of 22 percent from $1,554,000 a year ago. The company's earnings came to $36,000 or $0.02 per share, compared to a net loss of $99,000 or $0.05 per share in the third quarter of 1989.

For the first nine months of 1990, sales rose 7 percent to $4,494,000, while the company's net loss totaled $81,000 or $0.04 per share, down significantly from the net loss of $379,000 or $0.19 per share last year.

David K. Knudson, Dynamic's president, attributed the company's third quarter earnings to strong single-family construction as well as continued cost control efforts. He said multi-family/commercial construction also contributed to the improved third quarter results.

Knudson said the company expects to achieve its 1990 goal of being at or near the breakeven point for the full year, which would represent a major turnaround in Dynamic's performance. He said the quarter-ending construction backlog was up 69 percent from the year-earlier level, making him believe the fourth quarter should be a good period for Dynamic.

The company's working capital should strengthen to a positive position in the fourth quarter, Knudson continued, reflecting the recent approval of a $400,000 economic development funding package from state, regional and local

agencies and its board of directors. These funds, which Dynamic expects to receive before Dec. 31, 1990, will be used to upgrade transportation equipment and finance growth.

Dynamic Homes is a leading regional builder of modular single-family homes, multi-family dwellings and commercial structures. The company's products are marketed through a network of builder-dealers in Minnesota, Iowa, North Dakota South Dakota, Wisconsin and Wyoming. The company's common stock is traded on the local over-the-counter market.

ROCKVILLE, MD (OCT. 24) PR NEWSWIRE - CRI Insured Mortgage Association, Inc. (NYSE: CMM), know as CRIIMI MAE, and its affiliate, AIM Liquidating REIT, Inc. today announced they are improving their exchange offer to investors in four "AIM" insured mortgage investment funds sponsored by bankrupt Integrated Resources, Inc.

The first change, as described in a revised prospectus filed today with the Securities and Exchange Commission, reduces AIM Liquidating REIT's annual recurring payments for fees, compensation and preferred dividends to 1.10 percent of invested assets. The previous proposal would have continued those payments at the level of the existing AIM funds, which currently ranges from 1.25 to 1.75 percent of assets.

The second revision, which reduces the CRIIMI MAE solicitation fee from 2.00 percent to 0.50 percent of the exchange value, equalizes CRIIMI MAE's fee with the fee paid when investors choose AIM Liquidating REIT.

Under the exchange offer, scheduled to continue through Tuesday, Dec. 18, 1990 unless extended, CRIIMI MAE and AIM Liquidating REIT offer investors the right to exchange interests in each of the four AIM funds for a deferred cash payment, plus shares in either CRIIMI MAE or AIM Liquidating REIT. Ten percent of the exchange value per unit will be paid in the form of the deferred cash payment and 90 percent will be paid in shares.

Investors holding a majority of interests of each AIM fund must tender their units for that fund to participate in the exchange offer. Approval of a majority of the outstanding shares of CRIIMI MAE is also required for the consummation of the offer.

The four Integrated-sponsored AIM funds are American Insured Mortgage Investors (AIM 84), Integrated Resources American Insured Mortgage Investors-Series 85, A California Limited Partnership (AIM 85), American Insured Mortgage Investors L.P.-Series 86 (AIM 86) and American Insured

Mortgage Investors L.P.-Series 88 (AIM 88).

CRIIMI MAE is a New York Stock Exchange-listed REIT which invests in and manages a portfolio of federally insured multifamily mortgage investments. CRIIMI MAE was formed in 1989 through the merger of three publicly traded funds.

AIM Liquidating REIT, Inc., a corporation created specifically for this transaction, intends to qualify as a REIT. It will retain the finite-life, self-liquidating, unleveraged characteristics of the AIM funds. Its assets will consist solely of the assets of the AIM funds it acquires and its investment objectives and policies will be substantially similar to those of the AIM funds.

MAYWOOD, NJ (OCT. 24) PR NEWSWIRE - National Community Banks, Inc. (NASDAQ-NMS: NCBR) today reported a net loss of $9.9 million for the third quarter of 1990 and a profit of $97,000 for the first nine months. Robert M. Kossick, president and chief executive officer, stated, "The third-quarter loss resulted from the recording of a $32.9 million loan loss provision taken due to a rise in the bank's non-performing loans and continuing softness in economic conditions." The third-quarter loss was $.96 per share and earnings per share for the first nine months were $.01. NCBR's net income for the first nine months of 1989 was $35.9 million, or $3.44 per share.

Non-performing loans totaled $120 million, or 3.98 percent of total loans, at the end of September 1990 as compared with $56 million, or 1.94 percent, at September a year ago. In order to keep pace with this increase, the bank over the first nine months of 1990 added $58.5 million to the loan loss reserve. After net charge-offs of $17.1 million for the first nine months, the loan loss reserve totaled $72.6 million, 2.41 percent of total loans, and 60.4 percent of non-performing loans. These figures compare with a loan loss reserve of $30.8 million and 1.06 percent of total loans for September of 1989.

"These decisions," stated Kossick, "must be balanced against positive developments in the areas of deposit growth, control of non-interest expenses, increased levels of fee-based or non-interest income, and retention of NCBR's traditionally solid core earnings -- i.e., earnings before loan loss provisions and taxes. Control of non-interest expense has been achieved by reduced staffing, leveling of officer salaries, and reduction in the growth of all controllable operating expenses."

At Sept. 30, NCBR's total assets were $4.1 billion, total deposits were $3.6 billion, shareholders' equity was $215 million, book value per share was $20.51, and the ratio of primary capital to assets was 6.87 percent.

National Community Banks is a one-bank holding company with 114 banking facilities serving 12 New Jersey counties.

#90297p9009 10/24/1990 ~PR Newswire

BUFFALO, NY (OCT. 24) PR NEWSWIRE - Occidental Chemical's attorneys, during

opening statements in U.S. Federal Court, questioned New York State's selective use of hindsight to judge the conduct of people 40 years ago by today's standards and asked the court to place itself back to the period of the 1940s and 1950s in order to judge decisions made then in proper historical context.

Thomas H. Truitt, OCC's lead attorney, asked the court to "Assess Hooker's conduct in the context of the time the conduct was undertaken. The standards of today's environmental consciousness and public policy cannot be applied retroactively to punish a company for actions which occurred in the 1940s and 1950s that reflect the knowledge of those times."

Attending the trial's opening day, J. Roger Hirl, OCC's president and chief operating officer, expressed the company's apology for the circumstances and events which are generally described under the heading Love Canal. Hirl said, "OCC regrets and is genuinely sorry that anyone was put in fear or anxiety concerning property loss or injury." This was echoed in Truitt's opening also.

Hirl also said the Love Canal trial "Signals the beginning of a much needed healing process." He added, "If the trial serves any remedial purpose itself...it's because the complete story will be told and judged by a neutral party for the first and hopefully the last time."

He noted that Occidental Chemical and Hooker have been responsible corporate neighbors for more than 80 years with an enviable record of supporting activities that benefitted the community and region.

Truitt said Hooker was a major supporter of the war efforts in 1940 and 1950 through its production of essential chemicals and received numerous commendations for their efforts. He asked the court to remember how "different the world was then," describing the 1940s as a decade of survival. "All industry," Truitt added "was totally mobilized towards a single objective, winning the war and preserving our way of life."

The selection of Love Canal to dispose of the residence resulting from the war effort Truitt said was "thoughtfully chosen...because the clay soils were believed to be impermeable to contaminant migration. He also noted that Hooker consulted with city officials in 1942 about the site before initiating disposal operations and State and Federal officials in 1949 about the chemical residues buried at Love Canal.

In the early 1950s, a period of explosive growth, Truitt told the court, Hooker was repeatedly approached by the Niagara Falls School Board to sell the Love Canal property to them.

#90297p9018 10/24/1990 ~PR Newswire

COLUMBIA, S.C. (OCT. 24) PR NEWSWIRE - SCANA Corporation (NYSE: SCG) today reported the following consolidated earnings for the three months and twelve months ended September 30, 1990:

Comparative Consolidated Earnings Summary

	3 Months Ended		12 Months Ended	
	9/30/90	9/30/89	9/30/90	9/30/89
Operating Revenues (000)	$308,025	$300,319	$1,140,620	$1,108,799
Net Income (000):				
From On-Going Operations	$54,765	$45,430	$137,758	$122,046
From Sale of Telecom USA	46,150		46,150	
Reported Net Income	$100,915	$45,430	$183,908	$122,046
Number of Common Shares Outstanding (000)	40,296	40,296	40,296	40,296
Earnings Per Share:				
From On-Going Operations	$1.35	$1.13	$3.41	$3.03
From Sale of Telecom USA	1.15		1.15	
Reported Earnings Per Share	$2.50	$1.13	$4.56	$3.03

William B. Timmerman, senior vice president and chief financial officer, noted that the current quarter and twelve months ended earnings include a one-time gain of $46.1 million, or $1.15 per share on the Company's investment in Telecom USA, whose merger with MCI Communications Corporation was completed in August 1990.

In its recurring operations, a 7.4 percent increase in consolidated Kilowatt-hour sales of electricity by South Carolina Electric & Gas Company (SCE&G), SCANA's principal subsidiary, contributed to the improved financial results compared to the third quarter of last year. The higher electric sales were primarily attributable to abnormally hot weather, which resulted in record peak demand on SCE&G's system in July and August.

The Company also announced that its Board of Directors, at a meeting held today, declared the regular dividend of 63 cents per shar of common stock for the quarter ending December 31, 1990. The dividend is payable January 1, 1991 to common stockholders of record at the close of business on December 10, 1990.

The Board of Directors also declared the regular quarterly dividends on the following classes of SCE&G's cumulative preferred stock for the quarter ending December 31, 1990: 62 1/2 cents per share on the 5 percent Series; 56 1/4 cents per share on the 4.50 percent Series; 57 1/2 cents per share on 4.60 percent Series; 57 1/2 cents per share on the 4.60 percent Series A; 57 1/2 cents per share on the 4.60 percent Series B; 64 1/16 cents per share on the 5.125 percent Series; 75 cents per share on the 6 percent Series; $1.175 per share on the 9.40 percent Series; $2.03 per share on the 8.12 percent Series;

$1.925 per share on the 7.70 percent Series; $2.10 per share on the 8.40 per cent Series; $1.09 per share on the 8.72 percent Series.

Dividends on the preferred stocks are also payable January 1, 1991 to SCE&G's preferred stockholders of record on December 10, 1990. The 5 percent Series cumulative preferred stock is listed on the New York Stock Exchange -- the ticker symbol is "SAC Pr."

Scana Corporation, headquartereed in Columbia, S.C., is a diversified holding company engaged, through subsidiaries, in regulated electric and natural gas utility businesses and other non-regulated businesses.

#90297p9022 10/24/1990 ~PR Newswire

BLOOMFIELD, CT (OCT. 24) PR NEWSWIRE - In one of the largest efforts of its kind in the nation, about 175 Hartford, Conn., children are being bused to Cigna Corporation's Connecticut offices during the workday for one-on-one weekly tutoring sessions with company employees. More than 350 Cigna people - from senior vice presidents to secretaries - are volunteering to work on a team basis with the children.

"We are delighted that Cigna has chosen the Hartford school system for this project and I am confident that the tutors will become a meaningful and fundamental part of our children's educational lives," says Hartford School Superintendent Hernan LaFontaine.

The children are students in Hartford's Dominick F. Burns elementary school, which has a 99 percent minority enrollment. About 96 percent of the students are from families receiving state and federal assistance.

"Teachers are always seeking ways to motivate children and make learning exciting. The Cigna program, with its stimulating new environment and mentor-style approach, helps generate that motivation and excitement," says Burns Principal Herbert F. Shedroff.

"Our people benefit as much from the program as the children do," explains Cigna Executive Vice President G. Robert O'Brien. "Tutoring the children makes our people feel good about themselves and where they work. Because the program draws from every level of the company, it also builds a sense of teamwork."

"What's more, these students represent our future workforce. We have a stake in how they develop and plan to work with them as long as we can," says O'Brien.

Called "My Friend Taught Me," the new program links Cigna tutors with

fourth-and fifth-graders for one hour every Wednesday from October through May to work on improving reading and math skills.

"Cigna's program is one of the largest of its kind in the nation," observes Daniel Merenda, executive director of the National Association of Partners in Education, Inc., a Virginia-based, nonprofit organization that represents and serves the schools, business, community groups, educators, and individuals who work together as partners to help students achieve educational excellence. The association also works to foster the development of such business and education collaborative programs as mentoring and tutoring programs.

"It contains all the ingredients of an effective program: top-level support, an on-site program manager, a training course for tutors, plus a strategy to evaluate the program's effectiveness," says Merenda.

OVERLAND PARK, KS (OCT. 24) PR NEWSWIRE - George E. Powell III, president and chief executive officer of Yellow Freight System Inc. of Delaware (NASDAQ:YELL) reported to shareholders today that operating revenue in the third quarter was up 4 percent to $587,105,000 compared to the third quarter of 1989. Net income for the quarter nearly doubled, increasing to $22,298,000 or 79 cents per share, compared to $11,487,000, or 40 cents per share, earned in the like quarter last year. According to Powell, "This increase reflects the success of the company's ongoing policy of price restraint augmented by its cost control efforts and improvements in operating efficiency."

For the nine months ended Sept. 30, 1990, operating revenue totaled $1,724,611,000, a 4 percent increase over the like period of last year. Net income was $52,178,000, or $1.84 per share, up from $45,708,000, or $1.59 per share, earned in the first three quarters of 1989. Results for 1989 do not include the impact of adopting the Financial Accounting Standards Board's Statement No. 96, Accounting for Income Taxes, which increased net income by $29,200,000, or $1.01 per share, for the first quarter of 1989.

Less-than-truckload (LTL) tonnage was down 3 percent and total tonnage was down 2 percent in the third quarter compared to the third quarter last year. Shipments handled in the quarter were 5 percent lower than last year while weight per shipment was up. The decline in shipments and tonnage is the result of the slow growth in the nation's industrial production and the company's resistance to additional price discounting. For the first nine months of 1990, both LTL and total tonnage were up about 1 percent compared to the like period of 1989.

Powell also told shareholders, "Fuel prices rose dramatically during the last

two months of the quarter. By the end of September a gallon of diesel fuel cost almost 50 percent more than it did at the end of July. Effective Aug. 27 the company was forced to implement a fuel surcharge to offset these higher costs. The company reviews fuel prices each week and adjusts the surcharge based on actual costs incurred. Customers have generally accepted the surcharge as fair and reasonable under these difficult circumstances. As a result, operating margins have not been significantly impacted.

The board of directors declared a quarterly dividend of 23 1/2 cents per share to be paid Nov. 19 to shareholders of record on Nov. 5. In announcing the 3 cents per share increase, George E. Powell, Jr., chairman of the board, said the higher dividend is made possible by the improvement in operating results and the completion of a period of accelerated capital spending. Therefore, it seems a good time to bring dividends to a more appropriate payout level. Powell added, "This action also reflects the confidence of the board in the long-term outlook for the company."

#90297p9026 10/24/1990 ~PR Newswire

DENVER, (OCT. 24) PR NEWSWIRE - MinVen Gold Corp. (AMEX; TORONTO: MVG) today announces that it has arranged to refinance the amounts outstanding under its US$14.5 million bank line of credit. The company's principal lender, Citibank, N.A., has agreed to extend the term of MinVen's revolving line of credit to Jan. 31, 1992. In addition, a major shareholder group of the company has agreed to provide MinVen with US$4 million of convertible note financing.

Under the extended revolving bank line, MinVen may draw up to US$10 million until Jan. 31, 1991 and US$7 million thereafter and until Jan. 31, 1992.

MinVen has agreed to sell a US$4 million, three year, unsecured, subordinated, convertible note at 94 percent of par to the VenturesTrident group of Denver. Interest on the Note will accrue at the rate of Citibank, N.A.'s Prime plus 1-1/2 percent during the first year and 8 percent thereafter and is payable in either cash or common shares of MinVen.

During the first year, the Note is not convertible but may be prepaid at par at MinVen's option without a cash fee upon the issuance of a warrant to purchase one share of MinVen at a price of US$1 for each US$4 of face value of the Note so prepaid. During the second and third years, $US3.76 million of the face value of Note may be converted at the option of the holder into MinVen shares at the price of US$1 per share. The conversion price may be reduced if MinVen completes an equity offering at a price less than US$1 per share during the first year and does not redeem the Note. Pursuant to the Note, the maximum number of MinVen shares which the VenturesTrident group may

receive for either conversion of principal or payment of interest is limited to 5 million shares.

The refinancing is subject to approval of the stock exchanges on which MinVen shares are traded, but has already been approved in principal by the Toronto and American stock exchanges.

James A. Anderson, president and chief executive officer, said "The refinancing of MinVen's short-term debt into two longer term arrangements gives the company maximum flexibility in timing its debt repayments and minimizes the potential dilution to our existing shareholders. The refinancing comes at an opportune time as MinVen heads into the detailed planning and permitting for the expansion of the Gilt Edge Mine."

MinVen Gold is a publicly held, Denver-based gold mining company with interests in five operating mines in the United States and Canada. Its shares are traded on the American, Toronto, and Vancouver stock exchanges under the symbol MVG.

#90297p9027 10/24/1990 ~PR Newswire

DETROIT (OCT. 24) PR NEWSWIRE - The Board of Directors of MCN Corporation (NYSE: MCN) today declared a regular quarterly dividend of 41 cents ($.41) per share on the company's common stock.

This represents an annual dividend rate of $1.64 or a 4.1-percent increase from the prior annual rate of $1.575. The dividend is payable Nov. 23, 1990, to shareholders of record Nov. 12, 1990. This is the first dividend increase since the company became public in mid-1988, following a spinoff from Primark Corporation.

According to MCN Chairman and Chief Executive Officer Alfred R. Glancy III, "Although earnings for the current year are expected to be down because of the weather and losses from our Genix Corporation subsidiary, this dividend increase indicates our confidence in the future of MCN and its business prospects."

Record-breaking, warm weather during the first six months of the year has resulted in lower gas sales in MCN's gas utility subsidiaries. The effect of this warmer-than-normal weather will impact earnings per share by approximately $.50 in 1990.

Genix Corporation, a computer services subsidiary acquired in June 1990, is expected to incur losses which will adversely affect MCN's earnings per share by approximately $.10 in 1990.

MCN Corporation is the holding company for Michigan Consolidated Gas Company, a natural gas distribution, transmission and storage company serving more than one million customers in 465 communities throughout Michigan; for Citizens Gas Fuel Company, a natural gas utility serving customers in Lenawee County, Michigan; and for MCN Investment Corporation which owns subsidiaries in the natural gas technology, data processing and energy services businesses.

#90297p9030 10/24/1990 ~PR Newswire

ATLANTA (OCT. 24) PR NEWSWIRE - BMR Financial Group Inc. (NASDAQ: BMRG) today reported a net loss of $1.4 million, or $.49 cents per share for the third quarter compared to net income of $618,000, or $.22 per share in the third quarter of 1989.

Losses for the first nine months of 1990 totaled $488,000, or $.17 per share compared with earnings of $1.8 million, or $.63 per share for the same period in 1989. Losses for the quarter were the result of additions to reserves for possible loan losses and uncollectible receivables.

The company set aside a reserve of $1.1 million in the third quarter in the company's consulting division for potentially uncollectible revenues that were previously recognized. These revenues are largely related to one major contract now being disputed. The company's member banks recorded $870,000 in provision for loan losses in the third quarter, as a result of the company's assessment of the uncertain economic environment in the company's markets.

Approximately $315,000 in expenses related to the termination of the company's agreement to acquire First Chattanooga Corp. was recorded in the third quarter. Third quarter results reflected $108,000 in severance costs related to staff reductions at both the consulting company and the parent company.

The common stock of BMR Financial Group is traded in the Over-The-Counter market and is quoted on the NASDAQ National Market List under the symbol "BMRG."

#90297p9037 10/24/1990 ~PR Newswire

WORCESTER, MASS (OCT. 24) PR NEWSWIRE - BankWorcester Corporation (NASDAQ: BNKW) today reported net income of $73,000 or 1 cent per common share for the third quarter ended Sept. 30, 1990, compared to a net loss of $1.6 million or 23 cents per weighted average common share for the same quarter last year. Management provided approximately $3.4 million for possible loan losses, charged off approximately $4.1 million of loans, net of recoveries, and wrote down other real estate owned by approximately $609,000. After the provision and charge-offs, the loan loss allowance is approximately $13.7 million, or 1.4 percent of loans outstanding, and non-performing assets totaled approximately $48.2 million. Net interest and dividend income for the quarter was approximately $9.7 million compared to approximately $10.1 million in 1989.

Deposits at Sept. 30, 1990, were approximately $868.4 million, compared to

$843.1 million on the same date last year. Net loans were approximately $980.1 million vs. approximately $1.0 billion a year ago. Assets at Sept. 30, 1990, of $1.1 billion were approximately the same as last year.

For the nine months ended Sept. 30, 1990, the net loss was approximately $6.2 million or 94 cents per common share compared to net income of approximately $3.4 million or 48 cents per weighted average common share in 1989.

On Feb. 16, 1990, BankWorcester signed a definitive agreement to merge with Citizens Financial Group, subject to a number of significant conditions. One condition is that if the level of non-performing assets plus other certain items (the "specified amount") exceeds $50 million, after all regulatory approvals are received, Citizens may choose not to consummate the merger. After reported charge-offs, the specified amount was approximately $68 million at Sept. 30, 1990. It is anticipated that the specified amount will fluctuate from time to time. The point in time at which the specified amount is to be measured is after the receipt of all required regulatory approvals.

#90297p9041 10/24/1990 ~PR Newswire

BOULDER, CO (OCT. 24) PR NEWSWIRE - NBI Inc. (NYSE: NBI) today announced that it has reached agreements with several leading national and regional software resellers to market Legacy, the company's recently introduced integrated word processing, page layout and graphics package for Windows 3.0. The new resellers include the nation's largest software reseller, Egghead Discount Software, as well as Micro Warehouse, Computerland Mid-Atlantic, Computerware,

Softmart, and 800 Software.

With the addition of these national and regional resellers to NBI's recently announced distribution agreement with Ingram Micro D and ongoing reseller agreement with Nynex Business Centers, NBI continues to expand its ability to offer Legacy through various distribution channels to the rapidly expanding Windows market. NBI will be participating with these companies in joint marketing activiites focused on corporate seeding opportunities.

"These new resellers further our strategic objective of delivering Legacy to three key market segments," stated James Pachak, NBI's vice president of sales. "Softmart and Computerware will sell Legacy to the government market; Egghead Software, Nynex, Micro Warehouse, 800 Software and Computerland Mid-Atlantic will fulfill demand in large and small businesses and corporations; and Ingram Micro D will meet product demand in the reseller channel."

Legacy is a comprehensive word processing, page layout and graphics package. Compared with other Windows word processing packages, Legacy's depth of page layout and typographical controls and its reliable underlying architecture enable easier, faster creation of high-impact documents containing text, graphics and data.

Legacy is available through authorized resellers at a suggested retail price of $495. It requires Microsoft Windows 3.0 and MS-DOS 3.2 or higher; an IBM AT or compatible (80282 or 80386 CPU) or IBM PS/2; 640K of RAM (1-2 MB recommended); EGA, VGA or other Windows-compatible display; and a Windows-compatible mouse. For more information, users can call 800-NBI-1111.

Based in Boulder, NBI designs and markets advanced word processing software packages. A leader in the word processing industry for more than a decade, NBI also provides customer service and support to a wide base of system users in domesitc and international locations.

#90297p9045 10/24/1990 ~PR Newswire
BIRMINGHAM, AL. (OCT. 24) PR NEWSWIRE - Energen Corp. (NYSE: EGN) today reported a 13 percent increase in fiscal 1990 earnings per share from continuing operations.

Contributions from Energen's two major lines of business -- gas distribution and oil and gas exploration and production -- improved; and Energen's proved oil and gas reserves increased significantly.

For the year ended Sept. 30, income from continuing operations and net income totaled $13,185,000, or $1.35 per share. This compares with income from continuing operations of $11,121,000, or $1.19 per share, and net income of $8,586,000, or 92 cents per share, for last year. Fiscal 1989 net income results include a $2,535,000, or 27 cents per share, loss from the disposal and discontinued operations of Energen's specialty drilling unit.

Earnings from Alagasco, Energen's natural gas distribution business, increased primarily due to higher margins on certain emergency gas sales, higher gas usage due to more customers, and improved rate relief. Weather in Alagasco's service area was 8 percent warmer than normal in 1990 and 1989.

Increased coalbed methane production and the recognition of accompanying tax

credits were primarily responsible for the increased contribution from Taurus Exploration, Energen's oil and gas exploration and production business.

Basin Pipeline Corp., Energen's intrastate transmission company, generated increased earnings due to pipeline construction consulting services provided during the construction of a 55-mile intrastate pipeline which will provide major market access to coalbed methane produced in the southwest portion of Alabama's Black Warrior Basin.

"With improved financial performances by our two major lines of business, plus a substantial contribution from one of our other activities, Energen's success in 1990 is a clear reflection of our long-term strategic plan for enhancing shareholder value," said Rex J. Lysinger, chairman and chief executive officer.

PROVED RESERVES INCREASE At Sept. 30, Energen had 60 billion cubic feet (Bcf) of proved oil and gas reserves booked on its ownership interest in 766 wells, compared with 31 Bcf on 531 wells at Sept. 30, 1989. Coalbed methane reserves totaled 45 Bcf on Energen's portion of 554 wells at year-end 1990, compared with 17 Bcf on 298 wells for the prior year.

"The excellent potential of our coalbed methane activities makes us particularly excited about Energen's prospects for 1991," Lysinger said. "By December 31, 1990, we will have interest in 850 to 875 coalbed methane wells. All of the wells drilled in 1990 are expected to be producing by mid-1991 and reach peak production during 1992 and 1993."

QUARTERLY DIVIDEND DECLARED At its regularly scheduled meeting on Wednesday, the Energen board of directors declared a quarterly cash dividend of 23.5 cents per share payable Dec. 3 to shareholders of record on Nov. 15.

Energen Corp. is a diversified energy holding company engaged primarily in gas distribution and oil and gas exploration and production.

HIGHLAND PARK, MI (OCT. 24) PR NEWSWIRE - Chrysler Corporation (NYSE: C) today announced a gift of $4,654,574 to Detroit's 1990 United Way Campaign.

The announcement was made by E. Thomas Pappert, Chrysler Corporation vice president-sales and chairman of the company's employee drive, at a United Way luncheon at the Westin Hotel. Pappert said the gift consists of employee pledges of $3,904,574 and $750,000 from the Chrysler Corporation Fund.

"The job we do here benefits so many of our neighbors in the Greater Detroit community," Pappert said. "In fact, all of us, directly or indirectly, are touched by the good things produced by our campaign dollars." The average annual contribution per Chrysler employee amounted to $118 at the close of the drive.

"As in past years, a major element contributing to our success has been the support received from unions representing company employees," Pappert said. He cited Stan Marshall, UAW vice president and head of the Chrysler Department, for his active role as labor co-chairman of the company's drive. Pappert also expressed his appreciation to the company's dedicated solicitors and to all employees supporting the United Way through their contributions.

ROCHESTER, NY (OCT. 24) PR NEWSWIRE - Bausch & Lomb (NYSE: BOL), with its joint venture partner Montari Industries Ltd. (member Ranbaxy Group), has begun construction of an $11 million manufacturing plant in India, the company announced today. Scheduled for completion in the 1992 first quarter, the plant will produce contact lenses, lens care products and metal frames for use in prescription and UV-protection sunglasses for the Indian market and other nations in that region of the world.

India, with a population of 830 million, represents a substantial market opportunity for Bausch & Lomb. By providing an integrated system of high-quality contact lenses and related care products to the Indian population the company will hasten the major improvement in the delivery of vision care services which is already underway in that country. Bausch & Lomb's brand names are well known among India's discriminating consumers and its products should experience very brisk demand once they become available to the local market.

This joint venture project continues a systematic geographic expansion of Bausch & Lomb's international operations into developing nations in the Far East. In the past few years major manufacturing facilities and attendant marketing programs have been established in the People's Republic of China, Indonesia and South Korea. Bausch & Lomb's sales in the Far East have grown at a compound annual rate of approximately 30 percent over the past five years.

Bausch & Lomb and Montari are equal partners in the joint venture; a minority interest will be available for sale to the Indian public. In addition to its financial investment, Bausch & Lomb will provide state- of-the-art manufacturing technology to the joint venture. Contact lenses, and lens care products will be manufactured in accordance with FDA approved standards and procedures, making international quality eye care products available to the Indian consumer for the first time.

The manufacturing plant is being constructed in Bhiwadi, Rajasthan, about 80 km from New Delhi. It is expected to employ approximately 400 people when operating at capacity. The Ranbaxy Group, which has controlling interest in Montari Industries Ltd. is the third largest pharmaceutical company in India.

CHAPEL HILL, N.C. (OCT. 24) PR NEWSWIRE - J. Allen Fine, President and Chairman of the Board of Investors Title Company (NASDAQ-NMS: ITIC), announced that for the three months ended September 30, 1990, premiums written increased 8 percent from $2,085,837 to $2,261,409, investment income increased 13

percent from $206,727 to $233,482, revenues increased 10 percent form $2,296,176 to $2,519,948 and net income increased 6 percent from $402,917 to $425,833, all compared to the same quarter in 1989. Net income per share totaled $.15 for the third quarter, compared to $.14 per share in the third quarter of 1989.

For the nine months ended September 30, net income increased 7 percent from $1,059,420 to $1,128,417 and net income per share increased 8 percent from $.37 to $.40 for the same period in 1989. Premiums written increased 12 percent from $5,799,397 to $6,512,203 and revenues increased 12 percent from $6,446,262 to $7,243,610, compared to the same nine-month period in 1989.

"Premiums written and net income held up extremely well in the third quarter, given the difficult operating environment," Fine said. "Premiums written in our core markets have been consistently higher over the past nine month period and have been enhanced by inroads we've made into new markets. On balance, we continue to be pleased with the operating results of the Company."

Investors Title Company is a publicly-held company whose stock is traded on the NASDAQ National Market (Symbol: ITIC). The Company's two title insurance subsidiaries write title insurance in the States of North Carolina, South Carolina, Virginia, Tennessee, Illinois, Oklahoma, New York, Florida, Pennsylvania, Louisiana, and Indiana.

Another subsidiary, Investors Title Exchange Corporation, provides assistance to attorneys and certified public accountants in structuring delayed tax-free exchanges for their clients.

#90297p9068 10/24/1990 ~PR Newswire

NEW YORK (OCT. 24) PR NEWSWIRE - Metropolitan Life Insurance Company today provided a real incentive to Americans to look for their old MetLife "industrial" insurance policies. The policies could, the company said, be worth three to four times their original insurance value.

The big insurer made the announcement as it launched its national "Family Reunion" program in New York City. The program is a search for owners and beneficiaries of MetLife "industrial" policies purchased at least 26 years ago when MetLife agents went door-to-door collecting premiums of as little as a nickel a week. Issued for amounts of less than $1,000 before 1965, these policies were generally purchased by hard-working families.

"We want to reestablish contact with these customers to let most of them know that their MetLife coverage is greater than they thought," said MetLife CEO Robert G. Schwartz. "This is our way of saying 'thank you' to the people

whose business built our company."

The Family Reunion program will consist of direct mail, nostalgic advertising, public information efforts through the news media and community outreach and personal contacts by both active and retired sales force representatives -- supported by teleservicing centers.

"Our program, we hope, will bring millions of Americans good news," said Robert J. Crimmins, executive vice-president of MetLife. Nationally, the company is looking to contact approximately five million industrial insurance policyholders. The policies have a combined insurance value of more than $4.2 billion, according to Crimmins.

Crimmins explained that New York State, with its high percentage of MetLife policyholders, will be the first state to roll out under the national program. It is a key area in the national Family Reunion search, with an estimated 475,000 policies worth more than $427 million of insurance value.

Since a pilot program began in Connecticut last year, MetLife has reestablished contact with more than 100,000 customers and paid out more than $3 million to beneficiaries, many of whom were unaware that an insurance policy existed. Without this proactive effort, some of these benefits might one day have been added to the nation's spiraling unclaimed property pool, which today stands at more than $11 billion.

With its Family Reunion effort, MetLife, the largest provider of personal insurance to the nation's retirees, hopes to provide another example of its commitment to quality service. Schwartz pointed to a much more mobile generation and the fact that many industrial policies came into existence before owners could be recorded on computers or tracked by systems such as Social Security as possible reasons individuals did not realize they had this insurance protection. Since many policyholders may have moved and not notified MetLife, the company is anticipating that the program will allow it to enhance the accuracy of its files.

To gain more public awareness of this issue, MetLife announced that Willard Scott, TV personality, will make public appearances on behalf of the program.

MetLife, one of the nation's largest insurance and financial service companies provides or administers insurance coverage for more than 45 million people in the United States, Canada and other countries around the world.

#90297p9069 10/24/1990 ~PR Newswire

ANN ARBOR, MI (OCT. 24) PR NEWSWIRE - Durakon Industries, Inc. (NASDAQ-NMS: DRKN) announced today that its net income for the first nine months of 1990 was $4,814,000 ($.78 per share) compared to $2,409,000 ($.39 per share) for the same period in 1989. Net income for the first nine months of 1990 includes a gain of $1,955,000 ($.32 per share) associated with the sale of DFM Corporation in June of this year. Further, the company reported an operating profit for the third quarter of 1990.

Net sales for the three month period ended Sept. 30, 1990, from on- going operations were $25,829,000 compared to $27,247,000 for the same period in 1989 after excluding DFM sales. Net income for third quarter of 1990 was $681,000 ($.11 per share) compared to $1,768,000 ($.29 per share) in 1989. For the nine month periods ended Sept. 30, 1990 and 1989, net sales from on-going operations were $81,705,000 and $86,635,000, respectively.

The third quarter of 1990 marked the divestiture of a major portion of the company-owned distribution network to independent sources, as previously announced, and the further reduction of inventory. In addition, the company has incurred production and operating expenses associated with start-up of the General Motors contract. Sales to date for the factory installed truck-bed liner program with General Motors have not been significant.

"Forecasts by industry analysts earlier this year for 1990 earnings will not be achieved due primarily to the effects of a slowing economy and reduced truck sales. The company anticipates remaining profitable for the year," stated David Laro.

Durakon is the world's leading producer and distributor of pick-up truckbed liners and roll-back car carriers. Headquartered in Ann Arbor, Mich., it has manufacturing facilities in Lapeer and Clare, Mich.; Brentwood, Tenn., and Greencastle, Pa. A publicly traded company, it is listed on the NASDAQ National Market System.

GRAND RAPIDS, MICH. (OCT. 24) PR NEWSWIRE - Knape & Vogt (NASDAQ-NMS: KNAP) today announced that its board of directors has authorized management to repurchase, in the open market, up to $1 million worth of its common stock contingent upon market conditions. An identical authorization announced Aug. 24, 1990, has been utilized to repurchase 62,000 shares for approximately $830,000.

Raymond E. Knape, chairman and president, said the board authorized the repurchase program because the company's stock is attractively priced and because of its confidence in Knape & Vogt's near- and long- term growth prospects. The board did not set a time limit for the repurchase program.

Knape & Vogt manufactures wall-attached shelving, a wide variety of home furnishing items and also derives about one-third of its sales from drawer slides for kitchen and utility cabinet manufacturers.

#90297p9073 10/24/1990 ~PR Newswire

PHILADELPHIA, PA (OCT. 24) PR NEWSWIRE - Most older Americans would prefer to purchase long-term care insurance through the work place, while only one in five want to rely on the government to pay for long-term care, according to a marketing study commissioned by Cigna Direct Marketing Division's Employer/Employee unit.

The survey of more than 400 Americans ages 50 to 74 showed that 67 percent would prefer to purchase long-term care insurance through payroll or pension

deductions at group rates, even if their employers or former employers did not help pay the premiums.

Only 19 percent wanted to rely on the government to cover the expenses of long-term care - which includes nursing home, community-based and home health care for the chronically ill or severely disabled - despite calls in some quarters for federally funded long-term care programs similar to Medicare and Medicaid.

The numbers signal a growing interest in employer-sponsored group long-term care, which now accounts for only about three percent of the long-term care insurance, according to John Langenus, president of Cigna Direct Marketing Division. Its Employer/Employee unit entered the group long-term care market earlier this year with an employer-sponsored voluntary plan.

The marketing study, which was conducted by Abt Associates of Cambridge, Mass. found that 62 percent of those surveyed had at least some interest in purchasing long-term care insurance.

Consumer demand is not the only argument for selling long-term care through the work place, Langenus said. "Our study also showed that interest in long-term care is almost twice as strong in consumers who are knowledgeable about long-term care costs and the need to plan ahead," he noted.

"The employer can help employees and retirees immeasurably - without added benefit costs - simply by providing the conduit for information and the opportunity to buy group long-term care coverage." Langenus added that employers' pre-retirement planning sessions and employee assistance programs could help educate consumers about long-term care costs.

Employers also may find that a plan covering parents of employees would ease the burden on current employees - those trapped in the so-called "sandwich generation" - who must care for children and parents. On average, 25 percent of all employees provide some form of elder care, Langenus noted. These caregivers miss, on average, 9.3 hours of work per month.

"Our information shows that caregivers also give up overtime and training opportunities because of their responsibilities," said Langenus. "A program that offers help in finding and coordinating long term care would free these employees from a great burden that could be limiting their productivity."

#90297p9074 10/24/1990 ~PR Newswire

LA CROSSE, WI (OCT. 24) PR NEWSWIRE - First Federal Capital Corp (NASDAQ: FTFC) announced today a loss of $7.2 million or $3.80 per share for the three

months ended Sept. 30, 1990, as compared to net income of $349,000 during the three months ended Sept. 30, 1989. Losses for the nine months ended Sept. 30, 1990 amounted to $9.5 million or $5.03 per share, as compared to a loss of $560,000 in the nine months ended Sept. 30, 1989. Per share figures are not provided for 1989 because the company's banking subsidiary, First Federal Savings Bank La Crosse- Madison, did not convert to stock form until November 1989.

The loss in the current quarter was primarily a result of aggressive actions by the company to reduce problem assets, as previously announced. These actions included additional provisions and charge-offs on various loans and investments in real estate which are intended to reduce the carrying value of such assets to fair market value under current economic conditions. Substantially all of these provisions and charge-offs relate to previously disclosed loans and investments in real estate and are in certain cases reflective of current negotiations relating to the potential sale of these assets.

Thomas W. Schini, president and chief executive officer of the company, stated that "The efforts to reduce the company's exposure to problem assets were in anticipation of actions that likely would have been necessary in future periods given the difficult economic environment. It is our belief that these actions will improve the company's results of operations in future periods. The core operations of the Bank have shown continuous improvement throughout the year and have been in line with the Bank's projections for integration of operations in La Crosse and Madison. We are optimistic about the future, barring further weakening in the national and regional economy."

The company's tangible, core and risk-based capital ratios amounted to 5.16 percent, 5.16 percent and 8.86 percent at Sept. 30, 1990, respectively. These ratios are in compliance with all currently applicable regulatory capital requirements.

Provisions for losses on loans and real estate amounted to $8.2 million during the three months ended Sept. 30, 1990. At Sept. 30, 1990, the company's total allowances for losses on loans and real estate owned, after charge-offs, amounted to $6.8 million and $2.4 million, respectively, and combined amounted to approximately 60 percent of the company's non-performing assets at such date. Non performing assets amounted to $15.5 million or 2.0 percent of the company's total assets as of Sept. 30, 1990. Exclusive of these assets are loans which are performing in accordance with their terms but which are being closely monitored by management for potential problems.

The company's banking subsidiary, First Federal Savings Bank La Crosse-Madison conducts business from its headquarters and main office in La Crosse, Wisconsin and 22 consumer banking offices and four loan origination facilities in western and south central Wisconsin.

#90297p9078 10/24/1990 ~PR Newswire

NEW YORK (OCT. 24) PR NEWSWIRE - After learning of the New York State Supreme Court Justice Elliot Wilk's decision in the Anneka DiLorenzo case, Bob Guccione, publisher of Penthouse Magazine, issued the following statement:

"We definitely intend to appeal this decision, and are confident that an unbiased review of the record as a whole will result in dismissal of the entire case.

The only evidence in which the Court could base its decision is the plaintiff's word -- which was uncorroborated and continually contradicted by the documentary proof. Penthouse presented evidence that DiLorenzo was a former prostitute, a drug abuser and a three-time felon who violated her probation. She also was proven to have lied repeatedly under oath so that her word could not reasonably support even a nominal award of damages.

After reviewing the decision in the Anneka DiLorenzo case, where the Court dismissed eight of the plaintiff's nine claims, we are convinced that the Judge based his award of damages on a patently erroneous interpretation of the Human Rights Law as well as a misconstruction of the facts. The legislative history of the Human Rights Law, which was not cited by the Court, does not permit the award of punitive damages.

In addition, there was no sexual coercion in the work place because DiLorenzo allegedly began an affair with a Penthouse financial adviser at a time when she was not even employed by Penthouse, as proven by uncontradicted documentary evidence. Moreover, any alleged sexual demands imposed upon the plaintiff could not possibly have constituted an implicit condition of continued employment because after DiLorenzo discontinued the alleged affair, she remained on the Penthouse payroll and received both a raise and a steady income."

CONTACT: Dane Hall of Penthouse International, 212-496-6100, ext. 1520; or Raina Grossman or Alyssa Bernstein of Markham/Novell Communications, 212-687-1765, for Penthouse International

#90297p9081 10/24/1990 ~PR Newswire

EDISON, NJ (OCT. 24) PR NEWSWIRE - Engelhard Corporation (NYSE: EC) today reported net earnings for its third quarter ended Sept. 30, 1990 were $16.0 million, or 36 cents per share, compared to $39.0 million, or 87 cents per share, for the third quarter of 1989. Last year's results included a one-time gain of $21.5 million, or 48 cents per share, from the public sale of shares

in the company's Japanese affiliate.

The maker of specialty chemical products and engineered materials recorded net earnings for the first nine months of 1990 of $48.9 million, or $1.09 per share, compared to $68.5 million, or $1.52 per share, last year which included the one-time gain.

Net sales for the third quarter were $874.6 million, versus $586.4 million for the same period in 1989. Year-to-date net sales were $2.28 billion, compared to $1.78 billion for the first nine months of 1989. The increase in 1990 net sales is due predominantly to the significant rise in prices for certain precious metals, which Engelhard purchases for customers and uses in the manufacture of a variety of products.

Orin R. Smith, president and chief executive officer, noted that earnings before taxes for the quarter increased 15 percent before accounting for last year's third quarter one-time gain. He attributed the earnings increase to higher profit from both Engelhard's Engineered Materials and Precious Metals Management segment and Pigments and Additives segment, which more than offset a decrease in earnings from the Catalysts and Chemicals segment.

Operating earnings for the company's Engineered Materials and Precious Metals Management segment were up nearly threefold to $12.1 million for the quarter. Continued improvement for Engelhard's Precious Metals Management services, resulting from favorable precious metals market conditions and an expanded business base, more than compensated for lower sales and profit for industrial fabricated products.

The Pigments and Additives segment posted a seven percent increase in third quarter operating earnings to $15.6 million. Higher profit from the sale of pigments and extenders to the paints and plastics markets more than offset a decline in profit from products sold to the paper industry.

Third quarter operating earnings for the company's Catalysts and Chemicals segment declined 51 percent to $5.7 million. Lower sales of petroleum catalysts and delays in the shipment of chemical catalysts were the principal causes of reduced profit. Profit from the sale of environmental catalysts increased slightly in the quarter.

Engelhard Corporation is a world leading provider of specialty chemical products, engineered materials and precious metal management services.

#90297p9083 10/24/1990 ~PR Newswire

NEW YORK (OCT. 24) PR NEWSWIRE - In the third quarter of 1990, Credit

Suisse's total assets grew by 1.8 percent to Sfr 126.6 billion, the company announced today.

Over the first nine months of this year, total assets have therefore risen by Sfr 8.9 billion or 7.6 percent. The increase would have been Sfr 4.4 billion higher were it not for the effect of the dollar.

Total lendings to customers were 3.5 percent higher in the third quarter; in the first nine months loans increased by 9.6 percent to Sfr 77.3 billion. Loans abroad accounted for roughly half of this growth. Mortgage business rose by one percent during the period dealt with by the report to Sfr 28.6 billion. Securities fell by 14 percent to Sfr 7.4 billion.

The major part of customer deposits is concentrated in high-interest, short-term time deposits. Time deposits expanded again in the third quarter, by 2.9 percent; they stood at Sfr 43.3 billion at the end of September, 13.9 percent higher than at the end of 1989. By contrast, overall growth in customer deposits was only 4.9 percent or Sfr 3.7 billion; they now total Sfr 80.3 billion.

Third quarter earnings were lower than in the previous quarter; overall profits for the first nine months of 1990 are therefore perceptibly lower than last year, when results were very good.

All the main earnings components were adversely affected by market trends. Interest business is suffering as a result of unsatisfactory margins, particularly in the mortgage sector. Earnings from interest differentials did not increase in spite of the much higher volume of lendings.

The massive fall in prices on the world's stock markets had a negative effect on off-balance sheet business. Appropriate adjustments have had to be made in respect of the company's own securities holdings.

Costs are rising at about ten percent, largely as a result of comparatively high inflation. It has to be assumed that, even if the situation on the financial markets improves, cash flow in 1990 will not reach last year's level.

DALLAS (OCT. 24) PR NEWSWIRE - Business Records Corp. Holding Co. (NASDAQ: BRCP) announced third quarter earnings of $1,096,000 or 23 cents per share today. This compares to earnings of $686,000, or 14 cents per share during the same period last year. During the quarter, the company recorded revenues of $16,835,000 which reflect a 5.3 percent decrease from the revenues of $17,782,000 reported during the same period last year.

P. E. Esping, president and chief executive officer of the company, stated that third quarter earnings were enhanced as a result of receiving $450,000 in proceeds from a settlement. Esping also stated that the company has repurchased a total of 231,000 shares during the year. As a result of these repurchases, the company currently has 4,568,822 shares outstanding.

The Dallas-based company provides land records, election services, and other information services to governmental customers throughout the United States.

#90297p9091 10/24/1990 ~PR Newswire

COLUMBUS, OH (OCT. 24) PR NEWSWIRE - An extremely rare consolidation of interrelated, multiple bankruptcies was approved here today in an order issued by U.S. Bankruptcy Judge Barbara Sellers, based on her ruling from the bench Tuesday authorizing the "substantive consolidation" of all of the assets and liabilities of Cardinal Industries and all but two of its 33 subsidiaries. Eighteen of the Cardinal subsidiaries have been operating under individual bankruptcy proceedings.

Judge Sellers' decision came after just two days of testimony. All of the more than 40 parties that had originally objected to Cardinal Operating Trustee Jay Alix' motion for substantive consolidation had withdrawn their objections before the hearings began Monday after reviewing the trustee's case for consolidating the entities for bankruptcy purposes. Notice of the motion had been sent to more than 50,000 possible claimants early in the summer.

Not included in the trustee's motion were two Cardinal subsidiaries that are holding companies for limited partnership properties or Cardinal's more than 800 affiliated limited partnerships, of which 230 are operating under individual bankruptcy proceedings.

Alix said combining the Cardinal corporate entities into one of the largest substantive consolidation estates in U.S. bankruptcy history clears the way for the developer of more than $2 billion in syndicated and unsyndicated real estate holdings to present a plan of reorganization within a year.

In her ruling from the bench Tuesday immediately after closing arguments, Judge Sellers said, "The cost to these estates to untangle and verify entries and results on the enterprise's books and records on an entity-by-entity basis would consume whatever estate there may be for the benefit of unsecured creditors.

"The enterprise ... presented itself to lenders and vendors as one company," she said, "therefore, reliance by parties of these cases was not on the unique

financial status of any single entity.

"The enterprise functioned as a unit, held itself out as a unit and kept its books and records ... with little regard for the legal organization of individual entities," she said from a prepared opinion. "Likewise, the ownership of certain assets is unclear based upon the company's books and records."

Cardinal was the nation's largest manufacturer of modular homes and second-largest residential and apartment developer before filing May 15, 1989, for reorganization under Chapter 11 of the federal bankruptcy code, and was general partner of more than 800 limited partnerships controlling 1,000 apartment complexes, Knights Inn and Arborgate Inn motels and retirement villages worth more than $2 billion.

SMITHTOWN, NY (OCT. 24) PR NEWSWIRE - Quantronix Corporation (NASDAQ: QUAN) of Smithtown, has announced that, in response to the FDA- approved expansion of clinical testing of the USCI Spears Laser Balloon angioplasty catheter for emergency treatment of abrupt closure, additional laser systems will be placed in five more clinical sites in the United States. This will increase the number of U.S. investigators involved in the program to 15, with seven more systems in off-shore facilities. Installation of these new systems is expected to be complete over the next several months.

The USCI Spears Laser Balloon emits laser energy through an inflated angioplasty balloon to remodel and "weld" diseased coronary vessels. The unique device was created by J. Richard Spears, M.D., of Harper Hospital in Detroit, and scientists at the USCI Division of C.R. Bard, Inc. Precisely controlled laser energy is provided to the device by the Quantronix System 1500, designed, manufactured and marketed exclusively for this application by Quantronix. These systems have potential application in the approximately 1500 hospital catheterization laboratories around the world.

Quantronix Corporation manufactures laser-based systems and other electro-optic products for industrial, scientific and medical applications which are sold throughout the Far East. The company has manufacturing, sales and service facilities in Smithtown, Orlando, Fla., and Oxnard, Calif., and sales/service facilities in Santa Clara, Calif., and Darmstadt, Germany.

ALLENTOWN, PA (OCT. 24) PR NEWSWIRE - Stephen J. Furst, president of Hess's, has named Dean J. Kratzer vice president of real estate for the 75-unit department store chain.

As vice president of real estate, Kratzer will be responsible for all Hess's existing real estate, the location and negotiation of all new stores in accordance with Hess's long-term strategic expansion plans.

Kratzer brings 30 years of retail real estate experience to this new position. Before joining Hess's, he served as vice president for Paramount Group, Inc., overseeing the acquisitions of development of property and all department store negotiations.

He has also served as real estate manager for Federated Department Stores, Inc., where he was responsible at various times for site selection, acquisition and predevelopment of projects for Bloomingdale's, Lazarus, Goldsmiths, Rich's, Filene's, Burdine's, Shillito's, Rike's, Boston Store and I. Magnin.

He was also involved in the West Coast real estate expansion of I. Magnin, Bullock, Bullock's Wilshire, and Levy's. In addition, he spent 19 years as a regional real estate manager of Sears, Roebuck & Co., where he gained extensive experience in the Northeast.

Hess's is a wholly owned subsidiary of Crown American Corporation, one of the nation's leading real estate developers, which is based in Johnstown, Pa. Today, Hess's has 75 locations throughout Pennsylvania, New York, New Jersey, Maryland, Virginia, West Virginia, Tennessee, Kentucky, Indiana, Georgia, and North Carolina. Furst said that Kratzer's expertise will greatly benefit Hess's in its future expansion endeavors.

CHARLOTTE, N.C. (OCT. 24) PR NEWSWIRE - The Board of Directors of NCNB Corporation (NYSE: NCB) today approved a 6-percent increase in the quarterly cash dividend on its common stock.

The dividend will increase to 37 cents per share from 35 cents. It is payable December 28 to shareholders of record December 7.

"Even in the face of difficult economic conditions, this action by our board continues our philosophy of sharing earnings with our shareholders," said Hugh L. McColl Jr., chairman.

"Our company earned $334.5 million in the first nine months of this year," McColl said. "Today's action demonstrates both the ongoing fundamental strength of our company and management's confidence that NCNB's diversity and market position will enable us to emerge from this economic cycle even stronger than ever."

For the year 1990, NCNB's dividend on common stock is 29-percent higher than 1989.

In addition, NCNB directors declared the regular quarterly preferred stock dividend of $1.00 per share, payable January 1, 1991, to shareholders of record December 7, 1990.

NCNB Corp. is the seventh largest bank holding company in the U.S. with more than $69 billion in assets and full-service banks in seven states.

#90297p9110 10/24/1990 ~PR Newswire

PITMAN, NJ (OCT. 24) PR NEWSWIRE - K-Tron International Inc., (NASDAQ: KTII), today announced that revenues in the third quarter ended Sept. 29, 1990, were a record $16.4 million, up 22 percent from the $13.4 million for the same period in 1989.

While pre-tax earnings were up 18 percent, a higher effective tax rate resulted in net earnings of $0.929 million or $0.32 a share, slightly better than last year's $0.913 million, or $0.31 a share.

For the first nine months of 1990, revenues were a record $47.2 million, up 13 percent from the $41.9 million in 1989. Earnings before taxes increased 16 percent for the period, while an increase in the effective tax rate resulted in net earnings of $2.719 million, or $0.93 a share, compared to $2.681 million, or $0.91 a share, for the same period last year. Reduced utilization of tax loss carryforward benefits resulted in a significant increase in income taxes.

Chairman and Chief Executive Officer Leo Beebe said, "In spite of a slowdown in the economy and concerns about a recession, particularly in the United States, K-Tron's presence in worldwide markets and our expanding and diversified product mix has helped us maintain our momentum. Our results in 1990 have been bolstered by good market acceptance of our new gravimetric blender equipment, strong feeder shipments in Europe, and the weaker U.S. dollar. On the other hand, we have been adversely impacted by reduced equipment shipments to the Far East and the effects of a third quarter refurbishing program which resulted in the reduced delivery of new security systems to R.J. Reynolds Tobacco."

Beebe added, "K-Tron's product mix and worldwide market penetration have enabled the company to achieve solid results for the first nine months despite a weakening U.S. economy. While the fourth quarter presents greater economic uncertainties, we expect our results for 1990 to compare favorably to 1989."

On a separate matter, the company said that it expects to complete its previously announced acquisition of Hasler Freres International SA in the near future.

K-Tron International Inc., through its subsidiaries, is a major producer of gravimetric feeders, blenders and security systems with facilities in the United States, Europe and the Far East and customers throughout the world.

#90297p9112 10/24/1990 ~PR Newswire

HOUSTON (OCT. 24) PR NEWSWIRE - Team Inc. (AMEX: TMI) today announced that its board of directors declared a $.035 per share dividend payable on Nov. 30, 1990 to stockholders of record Nov. 15, 1990. This dividend is for the quarter ended Aug. 31, 1990.

In addition, Team announced today that its board of directors had adopted a plan designed to protect the interests of the company's stockholders in the event the company is confronted with a hostile takeover on terms and conditions detrimental to the company. The plan is not intended to prevent any business combination or transaction on terms that are favorable and fair to Team's stockholders.

In connection with the adoption of the Plan, Team's board declared a dividend distribution of one preferred stock share purchase right (a Right) for each outstanding share of the company's common stock, par value 30 cents per share (Common Stock), to stockholders of record at the close of business on Oct. 24,

1990.

Each Right entitles the registered holder to purchase from the company one one-hundredth of one share (a Unit) of Series A Preferred Stock, $100.00 par value, at a cash purchase price of $100.00 per Unit, subject to adjustment.

Until the occurrence of certain circumstances, Rights will be transferable only in connection with the transfer of shares of Common Stock. In addition, after situations arise indicating a potential, proposed or actual change of control of the company, the Rights may permit certain holders (other than the proponent of the transaction) to purchase shares of company Common Stock (or the proponent's common stock) at 50 percent of the then-market value of such shares.

The description and terms of the Rights are set forth in a Rights Agreement, dated as of Oct. 24, 1990, between the company and Ameritrust Co. N.A. as Rights Agent.

Team Inc. provides repair, specialty and transportation services primarily to industrial customers and privatized services to governmental entitites. The company has 54 operating locations in 24 states and serves the international market through licensee arrangements in 12 countries. Team, Inc. is traded on the American Stock Exchange under the symbol TMI.

#90297p9116 10/24/1990 ~PR Newswire

COLORADO SPRINGS, CO (OCT. 24) PR NEWSWIRE - Cray Computer Corp. (NASDAQ: CRAY) reported a net loss of $12,667,000, or 70 cents per share, for the third quarter ended Sept. 30, 1990. This compares with net loss of $9,569,000, or 59 cents per share for the quarter ended Sept. 30, 1989.

Net loss for the first nine months of 1990 was $38,336,000 or $2.17 per share compared with a net loss of $30,083,000 or $1.84 per share for the first nine months of 1989.

Neil Davenport, president and chief executive officer, stated that expenditures for the quarter were in line with expectations. "We had hoped to record the sale of the CRAY-2/8 processor system during this quarter, however, contract negotiations were tangled with Budget issues in Washington and not completed in time. The contract is expected to be signed before too long and the revenue for the CRAY-2/8 processor system should therefore be included in the fourth quarter results.

During the third quarter of 1990, good progress was made on the CRAY-3 project. The redesign of the gallium arsenide logic circuits proceeded

satisfactorily and the in-house gallium arsenide foundry was successfully relocated to Colorado Springs and is currently delivering test wafers. The first test wafer was delivered on Aug. 31st which was well ahead of schedule."

Cray Computer is engaged in the design and development of the CRAY-3 computer system.

#90297p9117 10/24/1990 ~PR Newswire

ATLANTA, (OCT. 24) PR NEWSWIRE - HBO & Co. (NASDAQ: HBOC) today reported its financial results from the third quarter ended Sept. 30.

Revenue in the third quarter of 1990 was $46 million, down 13 percent from the prior year's period. Net income was $1.5 million, compared to the $5.3 million reported last year and earnings per share were $.11 vs. $.34 reported for the third quarter of 1989.

For the nine months ended Sept. 30, earnings per share were $.18, compared with $.58 for the same period in 1989. Revenue for the year to date totaled $135 million and net income $2.6 million.

Holcombe T. Green Jr., chairman of the board, provided the following commentary on the company's performance for the first nine months of the year. "HBO's operating performance for the first nine months of 1990 is significantly below management's initial forecasts and last year's results. A primary reason for the decline is the weakness in software sales in HBO's HealthQuest subsidiary, which delivers IBM mainframe software products and services to hospitals. For the first nine months of 1990, HealthQuest had software revenue of just $2.4 million, less than one-half of the $5.7 million software revenue for the comparable period of 1989.

"In HBO's core minicomputer business, hardware and software revenue from the installation of new systems was less than the comparable prior period. For the first nine months of 1990 hardware and software revenue from the installation of minicomputer systems totaled $33 million, compared to $43 million last year. Despite the lower aggregate revenue year to date in HBO & Company of Georgia, customer service fee revenue continues to grow and sales of the new STAR Financial System are growing steadily. HBO has now completely installed 13 STAR Financial Systems and has 11 others underway.

"HBO's equipment maintenance subsidiary, MSSI, has performed substantially in line with plan. To enhance the profitability of MSSI, HBO has decided to concentrate on hospital information systems and cease servicing and refurbishing hospital clinical equipment. This action will lower MSSI's revenue for the year, but will enhance the company's profitability on its core

business.

"We now expect HBO & Company's results for 1990 to decline from 1989. We expect the fourth quarter to be critical for sales activity, especially in HealthQuest. Our prospective business in all areas is strong, and we do anticipate a successful fourth quarter. We have also made a number of strategic decisions that will decrease expenses and increase revenues in 1991 and beyond."

During the third quarter the company completed its 2 million share stock purchase program. Subsequent to quarter-end, the company's board of directors approved an additional 1 million shares for purchase.

#90297p9118 10/24/1990 ~PR Newswire

BLUE SPRINGS, MO. (OCT. 24) PR NEWSWIRE - Harmon Industries Inc. (NASDAQ: HRMN) of Blue Springs, the nation's most fully integrated supplier to railroad companies, reported increased sales and a profit for the third quarter ended Sept. 30, 1990.

Sales increased almost 13 percent from $18.7 million in 1989 to $21.1 million for the three months ended Sept. 30, 1990. Earnings for the period increased from a loss of $142,000 or 3 cents (-$0.03) per share in 1989 to a profit of $85,000 or 2 cents per share in 1990.

For the nine months ended Sept. 30, 1990, sales increased from $54.9 million in 1989 to $57.8 million in 1990. Net earnings for the period declined from $841,000 or 18 cents per share in 1989 to a loss of $1.67 million or 36 cents (-$.36) per share in 1990.

Included in the results of the third quarter is a one-time expense of approximately 7 cents per share which reflects the merging of Modern Industries Inc., Griffin, Ga. operations into other existing company facilities.

"Our comprehensive business plan has been to strengthen our established subsidiaries along with our start-up ventures," said Robert E. Harmon, chairman and chief executive officer for Harmon Industries. "Cedrite is improving slowly. Harmon Electronics and Electro Pneumatic Corp. are experiencing excellent years with sales continuing to be strong in our core business area. I am especially pleased with the progress of Consolidated Asset Management Co. Inc. (CAMCO), a new concept of warehouse service, which has exceeded their plans for both sales and profits and are continuing to grow."

COLUMBIA, SC (OCT. 24) PR NEWSWIRE - Scana Corporation (NYSE: SCG) announced that its Board of Directors today elected Bruce D. Kenyon as President and Chief Operatinag Officer of South Carolina Electric & Gas Company (SCE&G), Scana's principal subsidiary, effective November 12, 1990.

He succeeds Thomas C. Nichols, Jr., who will retire as President and Chief Operating Officer of SCE&G and a Director of Scana Corporation on October 31, 1990.

Kenyon, a native of Middleton, Ohio, was formerly Senior Vice President for Division Operations at Pennsylvania Power & Light Company of Allentown, PA. He has an extensive electric utility background going back to 1970 with Northeast Utilities.

At PP&L he served as Vice President-Nuclear Operations and Senior Vice President-Nuclear before assuming his role as Senior Vice President for Division Operations in 1988. He served in the U.S. Navy for five years, with assignments at nuclear power school, submarine school, and aboard the USS George Washington.

In announcing the Board's action on Wednesday, Scana Chairman and Chief Executive Officer Lawrence M. Gressette, Jr. said, "Mr. Kenyon is an organized and proven leader with 20 years of utility experience. He is well versed in virtually every aspect of utility operations from nuclear production of energy to company-wide marketing and customer services. He is a team player and a strong worker in his community. He will be an asset to our company, our city, and our state."

Nichols, first employed by SCE&G in 1952 as a Junior Engineer, moved through a variety of engineering and management positions before being named President and Chief Operating Officer of SCE&G in 1985.

Commenting on Nichols' retirement, Gressette said, "Tom has been a loyal and dedicated employee whose leadership was heavily relied upon, particularly during construction of our nuclear plant. He actions always demonstrated a concern and commitment to employees, customers and shareholders of SCE&G and Scana."

Scana Corporation, headquartered in Columbia, S.C., is a diversified holding company engaged, through subsidiaries, in utility and non-utility businesses. SCE&G is a regulated utility providing service to approximately 443,000 electric and 204,000 natural gas customers in South Carolina.

#90297p9128 10/24/1990 ~PR Newswire
ALLENTOWN, PA (OCT. 24) PR NEWSWIRE - Pennsylvania Power & Light Co. (NYSE: PPL) today reported earnings of $365.37 million ($4.22 per share of common stock) on revenues of $2.43 billion for the 12-month period ended Sept. 30. This compares to earnings of $321.14 million ($3.62 per share of common stock) on revenues of $2.25 billion in the same period last year.

The new high in earnings is 60 cents a share, or 17 percent, above the level recorded during the same period a year ago, and it is 17 cents higher than the earnings reported at the end of 1989.

The company reported net income of $82.86 million (95 cents per common share) on revenues of $578.94 million in the fourth quarter, versus net income of $79.4 million (89 cents per common share) on revenues of $548.58 million for the fourth quarter last year.

Charles E. Russoli, PP&L executive vice president and chief financial officer, said the earnings improvement is tied to increased system sales reflecting the company's marketing and economic development programs, effective cost management, a reduction in interest expense and dividends on preferred and preference stock, and the effects of several capacity-related and transmission-entitlement transactions with other electric utilities.

The transactions with other utilities, which began in mid-1989, occurred because of the company's strong generating capacity. They resulted in additional revenues of about $28 million, or higher earnings of 23 cents per share of common stock, when compared with the 12-month period ended Sept. 30, 1989.

Russoli also pointed out that weather influenced recent earnings performance. "If normal weather had occurred during the past 12 months, earnings would have been about nine cents per share higher," he said. "The extremely cold weather in December of last year was followed by unseasonably mild weather during the first quarter of 1990, which adversely affected sales."

Total energy sales to service-area customers increased 2.2 percent for the

12-month period ended Sept. 30. If the weather had been normal during that period, sales growth would have been 2.5 percent.

The actual sales gain reflected a 3.2 percent increase in residential sales and a 4.4 percent increase in commercial sales. Industrial-sector sales, however, were down four-tenths of one percent, with the greatest decline occurring in steel manufacturing.

PP&L supplies electric service to a 10,000-square-mile area of 29 counties of Central Eastern Pennsylvania. Among the communities it serves are Allentown, Bethlehem, Harrisburg, Hazleton, Lancaster, Scranton, Wilkes-Barre and Williamsport.

#90297p9131 10/24/1990 ~PR Newswire

MINNEAPOLIS, (OCT. 24) PR NEWSWIRE - Endotronics, Inc. today announced the introduction of three new instruments, the ACUSYST- Maximizer(TM) 500, the ACUSYST-Maximizer 1000 and the ACUSYST-Xcell(TM). ACUSYST technology is successfully being used worldwide for the production of monoclonal antibodies and recombinant proteins used for diagnostic and therapeutic applications.

The two ACUSYST-Maximizer (ASM) instruments are automated cell culture systems designed to support a wide variety of cell lines using various bioreactors to provide maximum flexibility of application and production scale. The ASM systems combine the patented ACUSYST cycling process with a wide selection of bioreactor sizes and molecular weight cutoff membranes to meet the needs of pilot scale production. For typical monoclonal antibody applications, the ACUSYST-Maximizer 500 will produce 500 milligrams per day and the ACUSYST-Maximizer 1000 will yield 1 gram per day.

The ACUSYST-Xcell system is designed to meet the needs of very large scale production. Total system output exceeds four kilograms of monoclonal antibodies annually. The system incorporates process automation, advanced data acquisition and control technology with the inherent advantages of hollow fiber cell culture as optimized using the patented ACUSYST cycling technology.

"The ACUSYST-Maximizer and ACUSYST-Xcell systems represent Endotronics' ongoing efforts to apply its mammalian cell culture expertise and technology to a full line of scalable instruments to keep pace with the rapidly growing bioprocessing market needs. Endotronics continues to maintain its leadership position in automated cell culture technology," said Richard E. Sakowicz, president and chief operating officer of Endotronics. "These instruments are sold worldwide to pharmaceutical, diagnostic and biotechnology companies, as well as university, government and hospital research laboratories."

The new instruments are featured this week at the International Biotechnology Expo in San Francisco and will be available for shipment in January 1991.

Endotronics, Inc. is a Minneapolis-based company which supplies products and services for the processing of mammalian cells to biotechnology, pharmaceutical, diagnostics companies and research centers worldwide.

MANKATO, Minn. (OCT. 24) PR NEWSWIRE - Winland Electronics today announced that net income for the quarter ended Sept. 30, 1990 increased to $31,460 or $.016 per share compared with a net loss of $212,804 or $.18 per share for the same period last year.

Sales for the third quarter ended Sept. 30, 1990 increased 141.7 percent to $1,046,291 from $432,873 for the third quarter ended one year ago.

For the nine months ended Sept. 30, 1990, net income increased to $11,816 or $.006 per share on sales of $2,665,481 compared with a net loss of $208,886 or $.17 per share on sales of $2,086,373 for the period ended Sept. 30, 1989.

Winland noted that gross profit as a percentage of sales increased from 20 percent for the nine months ended September 1989 to 24 percent for the same period this year. The company also said that as a percentage of sales, marketing expenses decreased from 10 percent to 6 percent and research and development expenses decreased from 5 percent to 3 percent for the nine months ended Sept. 30, 1990 compared to the same period last year. Management pointed out that decreased marketing expenses were due in part to a one-time change in accounting procedures.

W. Kirk Hankins, president and CEO, stated, "We feel that it's significant that the company's expenses were reduced during a period in which both gross profit and sales increased substantially."

Located in Mankato, Minn., Winland Electronics, Inc. designs, manufactures and markets electronic and electro-mechanical products and assemblies. The company's common stock is traded over-the-counter in Minneapolis/St. Paul.

NEW YORK (OCT. 24) PR NEWSWIRE - Alva O. Way, chairman of IBJ Schroder Bank & Trust Company, today announced that the board of directors of the bank has today appointed Norihide Yoshioka as vice chairman. Yoshioka is the successor to Takeo Kani who will be joining Morgan Stanley shortly.

Yoshioka, 60, has been with The Industrial Bank of Japan since 1956 and will come to IBJ Schroder from his position as a Managing Director of IBJ in Tokyo. Yoshioka is familiar with American business through his long-term experience as the head of IBJ branches both in New York and Los Angeles. He has also previously served on the Board of IBJ Schroder.

Way said, "In the five years that we at IBJ Schroder have had the opportunity to work with Mr. Kani, we have all developed the deepest admiration and respect for him. We wish him the best of luck and success in his new position.

"Mr. Yoshioka is a very talented and understanding executive whose background in American business makes him an excellent choice for IBJ Schroder. He will be a tremendous asset to the bank in achieving its long-term goals."

CONTACT: Harry Arnold of IBJ Schroder Bank & Trust Company, (212) 858-2269; or Jeffrey Z. Taufield of Kekst and Company, (212) 593-2655, for IBJ Schroder.

BELLEVUE, WA. (OCT. 24) PR NEWSWIRE - Momentum Distribution Inc. (OTC: MMDI), which became a public company through a tax-free spin-off from VWR Corp. (NASDAQ: VWRX) on March 1, today reported a loss of $317,000, or 28 cents per share, on sales of $39,543,000 for the third quarter ended Sept. 30. These results represent a significant improvement over the same quarter last year, when the businesses that now form Momentum Distribution had a third-quarter net loss of $814,000 on sales of $47,005,000.

Both the Graphics and Textiles segments of Momentum's business reported combined profitable operating results of $610,000 for the third quarter versus a combined loss of $673,000 for the same period last year. The company continues to report a loss after interest and corporate expenses for the third quarter.

After corporate expenses, the combined third-quarter loss from operations of $245,000 represents a $836,000 improvement versus the same quarter last year. Borrowing and interest expenses also declined versus last year. A tax benefit is reported only for the two months ended prior to the spin-off from VWR Corp. last March. As a newly formed corporation, Momentum has no past profits to offset its current losses.

For the first nine months of the current fiscal year, Momentum experienced a net loss of $809,000 on sales of $122,361,000. In the same period last year,

the company lost $1,085,000 on sales of $164,720,000.

Momentum Chief Executive Officer Richard E. Engebrecht expressed satisfaction with the company's improved operating results. "Our gross margin percentage in the Graphics business continues to increase on a year-to-date basis," he said. "This increase, coupled with continued monitoring of expenses, has contributed to modest but improved operating performances each quarter.

"Our decline in sales for the third quarter versus 1989 is due to the loss last year of several graphics supplier distribution agreements. Sales in both segments of our business also were affected by the weakening of the national economy. We face a challenge in the remaining quarter to meet our goal of being profitable by the end of 1990."

The company also announced the relocation of Momentum Graphics' general headquarters from Oak Brook, Ill., to Bellevue, Wash., to accommodate consolidation of Momentum Graphics' staff operating group with Momentum Corporate staff. Momentum Graphics President John Goddard and other key personnel will relocate to Bellevue by the first of the year.

"Due to the timing of a number of major projects, Momentum Graphics staff personnel have been operating out of four different offices in three different geographic regions. This consolidation will provide increased efficiencies and reduced expenses, and is in line with our commitment to improve operating efficiencies," Engebrecht said.

Momentum Distribution Inc. distributes supplies and equipment to printers, furniture and bedding manufacturers, and related businesses throughout the United States.

BRANCHBURG, N.J. (OCT. 24) PR NEWSWIRE Air & Water Technologies Corporation

(AMEX: AWT), a leading environmental treatment and services company, today announced that it has signed a letter of intent to purchase the analytical services division of Laser Precision Corporation (NASDAQ: LASR). The purchase price is approximately $5 million subject to adjustment.

Laser Precision Analytical, also known as Analect Instruments, is the worldwide leader in on-line Fourier Transform Infrared (FT-IR) analyzers. They are based in Irvine, Calif.

Through this acquisition, the Analect Instruments Analyzers will be used in KVB Continuous Emission Monitoring Systems (CEMS). KVB is a worldwide leader in supplying and servicing top quality CEMS for industry and utility clients. It is one of seven operating units of Research-Cottrell Companies, the air pollution control arm of Air & Water Technologies.

"This acquisition allows Air & Water Technologies to enhance and expand the type of service we provide to industry," said Eckardt C. Beck, chairman, president and chief executive officer of Air & Water Technologies. "This technology will enable us to assist our clients in measuring the production of chemicals and petrochemicals, as well as controlling pollutants."

"The vertical integration of the Analect Instrument with the KVB CEM allows us to offer the marketplace a more competitive product," said Donald A. Deieso, president and chief executive officer, Research- Cottrell Companies. "Analect's reputation for reliability is as strong as KVB's making it a perfect fit."

Air & Water Technologies Corporation, through its operating units, Research-Cottrell, Inc., Metcalf & Eddy Companies Inc. (NASDAQ: METC), and Residuals Management Group, provides a broad range of environmental services in the areas of air pollution control, water resource management, and waste by-product disposal and reuse.

#90297p9146 10/24/1990 ~PR Newswire

HOUSTON (OCT. 24) PR NEWSWIRE - Seagull Energy Corp. (NYSE: SGO) today reported significantly improved results for the third quarter and nine months which ended Sept. 30, 1990.

For the third quarter, Seagull's earnings applicable to common stock improved to $3.0 million, or 30 cents per share, from a loss of $1.1 million, or 16 cents per share, in the same quarter of 1989.

Year-to-date in 1990, Seagull's earnings applicable to common stock total

$14.7 million, or $1.69 per share, on revenues of $144.9 million. During the first three quarters of 1989, earnings applicable to common stock were $6.0 million, or 89 cents per share, on revenues of $128.0 million.

Operating profit improved to $8.9 million for the third quarter and $31.8 million for the first nine months of 1990, versus $2.9 million and $23.3 million in the same periods of the prior year.

Two of the company's three business segments -- exploration and production and pipeline operations -- registered substantial year-to-year gains in operating profit for both the quarterly and nine-month periods, noted Seagull Chairman Barry J. Galt.

"In exploration and production, we benefitted from sharply higher gas and oil production, due primarily to first-time contributions from two recent acquisitions, one completed at the end of 1989 and the other in mid-1990," he said. "During the last half of this year's third quarter, prices received for crude oil and condensate also increased significantly.

"In pipeline operations," he added, "our improvement was a result of profits realized from two pipeline construction projects, as well as higher natural gas liquids prices."

Galt said the higher gas and oil production levels will continue on into 1990's fourth quarter, but that one of the two pipeline construction projects has been substantially completed. He noted further that results from the company's Alaska utility division will return to their normally strong seasonal levels in the fourth quarter as winter sets in there.

He added that the underwritten Common stock offering of nearly 2.9 million shares successfully completed during 1990's third quarter also led to marked improvement in the company's balance sheet. "We completed the third quarter with long-term debt at just $55.2 million, our lowest level in more than five years," he remarked.

Houston-based Seagull is engaged in gas and oil exploration and production; the transportation, distribution and marketing of natural gas, liquids products and petrochemicals, and natural gas processing.

DENVER (OCT. 24) PR NEWSWIRE - Cyprus Minerals Co. (NYSE: CYM) today reported earnings for the third quarter of $42.2 million, or 95 cents per share, on revenues of $493.1 million, compared with third quarter 1989 earnings of $68.2 million, or $1.68 per share, on revenues of $463.5 million.

In the first nine months of 1990, Cyprus earnings were $97.7 million, or $2.12 per share, on revenues of $1,387.9 million. For the nine month period in 1989 Cyprus earned $210.9 million, or $5.12 per share, on revenues of $1,352.8 million. Copper sales volumes were higher, but sales of produced copper were down requiring copper purchases to meet customer commitments. Thus, lower earnings from produced copper coupled with higher copper and molybdenum costs and generally lower metals realizations contributed to the lower earnings. Also, the second quarter write-down of the Kanawha coal mine in West Virginia impacted earnings significantly.

Cyprus Minerals, headquartered in Englewood, Colo., is a major producer of copper, coal, molybdenum, lithium, and talc. Cyprus also produces zinc, iron ore, and gold.

LINTHICUM, MD. (OCT. 24) PR NEWSWIRE - Noise Cancellation Technologies, Inc. (NASDAQ: NCTI) today announced that it will temporarily reduce the exercise price of 2,385,913 of its outstanding common stock purchase warrants from $1 per share to $.40 per share for the period commencing on Oct. 24, 1990, and ending on Nov. 23, 1990, which period may be extended by the company for up to an additional 18 days (the warrant exercise price reduction offer period). Each warrant is exercisable to purchase one share of the company's common stock.

During the warrant exercise price reduction offer period, holders of warrants will be able to exercise their warrants at a reduced warrant exercise price of $.40 per share. At the conclusion of the warrant exercise price reduction offer period, the warrant exercise price will revert to $1 per share through expiration of the warrants at varying dates through December 1992. Any shares of common stock issued upon exercise of the warrants subsequent to Oct. 31, 1990, may not be registered under the Securities Act of 1933, as amended, and as a consequence would be subject to investment restrictions.

Between June 4, 1990 and July 2, 1990 (the first exercise period), the company temporarily reduced the exercise price of the same class of warrants from $1 per share to $.40 per share (the first warrant exercise price reduction offer). Of the 3,817,972 warrants outstanding on June 4, 1990, 1,324,296 warrants were exercised pursuant to the first warrant exercise price reduction offer during the first exercise period, resulting in the company's issuance of a like number of shares of its common stock and its receipt as a consequence thereof of an aggregate consideration of $529,718.40

Between Aug. 7, 1990, and Oct. 14, 1990 (the second exercise period), the company temporarily reduced the exercise price of the same class of warrants from $1 per share to $.40 per share (the second warrant exercise price reduction offer). Of the 2,493,676 warrants outstanding on Aug. 7, 1990, 57,763 warrants were exercised pursuant to the second warrant exercise price reduction offer during the second exercise period, resulting in the company's issuance of a like number of shares of its common stock and its receipt as a consequence of an aggregate consideration of $23,105.20.

As a result of lower stock prices in general as well as the bid price for the company's common stock during the second exercise period as compared to the first seven months of 1990, the company has determined to again lower the warrant exercise price during the warrant exercise price reduction offer period to provide its warrantholders with another opportunity to exercise their warrants. The company believes that the exercise of the warrants will be in the best interest of the company by increasing stockholders' equity.

The closing bid price for the company's common stock, as reported by NASDAQ, was $9/16 per share on Oct. 23, 1990.

#90297p9166 10/24/1990 ~PR Newswire

NEW YORK (OCT. 24) PR NEWSWIRE - Metropolitan Life Insurance Company today provided a real incentive to Americans to look for their old MetLife "industrial" insurance policies. The policies could, the company said, be worth three to four times their original insurance value.

The big insurer made the announcement as it launched its national "Family Reunion" program in New York City. The program is a search for owners and beneficiaries of MetLife "industrial" policies purchased at least 26 years ago when MetLife agents went door-to-door collecting premiums of as little as a nickel a week. Issued for amounts of less than $1,000 before 1965, these policies were generally purchased by hard-working families.

"We want to reestablish contact with these customers to let most of them know that their MetLife coverage is greater than they thought," said MetLife CEO Robert G. Schwartz. "This is our way of saying 'thank you' to the people whose business built our company."

The Family Reunion program will consist of direct mail, nostalgic advertising, public information efforts through the news media, and community outreach and personal contacts by both active and retired sales force representatives - supported by teleservicing centers.

"Our program, we hope, will bring millions of Americans good news," said Robert J. Crimmins, executive vice-president of MetLife. Nationally, the company is looking to contact approximately five million industrial insurance policyholders. The policies have a combined insurance value of more than $4.2 billion, according to Crimmins.

Crimmins explained that New York State, with its high percentage of MetLife policyholders, will be the first state to roll out under the national program. It is a key area in the national Family Reunion search, with an estimated 475,000 policies worth more than $427 million of insurance value.

Since a pilot program began in Connecticut last year, MetLife has reestablished contact with more than 100,000 customers and paid out more than $3 million to beneficiaries, many of whom were unaware that an insurance policy existed. Without this proactive effort, some of these benefits might one day have been added to the nation's spiraling unclaimed property pool, which today stands at more than $11 billion.

With its Family Reunion effort, MetLife, the largest provider of personal insurance to the nation's retirees, hopes to provide another example of its commitment to quality service.

PETERSBURG, VA (OCT. 24) PR NEWSWIRE - At its monthly meeting on Oct. 22, 1990, the Board of Directors of Brenco, Incorporated (NASDAQ: BREN) elected Frederic W. Yocum a director of the corporation.

Frederic W. Yocum is currently President, Pittsburgh and Lake Erie Acquisition Corporation. This company is affiliated with Railroad Development Corporation in Pittsburgh, Pa., and was established for the purpose of buying the Pittsburgh and Lake Erie Railroad Company. Upon RDC's purchase of the P&LE, Mr. Yocum would become its President and CEO.

Prior to joining RDC this year, Mr. Yocum spent seventeen years with CSX-Transportation and predecessors. CSX-Transportation is the rail component of CSX Corporation, a large transportation and holding company. Mr. Yocum held several jobs with CSX-T and its predecessors at the vice presidential level, including Vice President - Transportation, Vice President - Service and Vice President - Car Management. During his tenure at CSX-T he had responsibility at various time for day-to-day field operations in transportation, mechanical, and engineering as well as staff activities including cogeneration, industrial development, customer service, and plant rationalization. Mr. Yocum chaired internal committees with responsibility for setting policy and direction for data processing and hazardous materials.

Mr. Yocum also worked for Chicago and North Western Transportation Company in various transportation and operations capacities for four years. During the period 1977-1979, Mr. Yocum served as Vice President - Operations and Marketing of the United States Railway Association. He was responsible for USRA's monitoring of Conrail in all areas except for finance. In that capacity he also testified extensively to congressional subcommittees with transportation responsibility.

A graduate of Ursinus College (BS-Chemistry), Mr. Yocum also holds an MA in Science, Technology, and Public Policy from Case Western Reserve University. He has served as a Director of the Terminal Railroad Association of St. Louis, the Toledo Terminal Railway, and the Illinois Terminal Railroad. He has also served as a member of the committee on Car Service and of the Freight Equipment Management Program of the Association of American Railroads.

#90297p9172 10/24/1990 ~PR Newswire
HOUSTON (OCT. 24) PR NEWSWIRE - Sterling Chemicals Inc. (NYSE: STX) reported revenues and earnings for its fourth quarter and its 1990 fiscal year each ended Sept. 30, 1909.

Revenues for the fourth quarter were $161.8 million compared to revenues of $103.1 million for the fourth quarter of fiscal 1989, an increase of 56.9 percent. Net income was $25.0 million for the quarter vs. $7.6 million for the same quarter of the previous fiscal year, an increase of 228.9 percent. On a per share basis, net income was 45 cents for the fourth quarter of fiscal 1990 vs. 14 cents for the fourth quarter of fiscal 1989, an increase of 221.4 percent.

Revenues for Sterling's 1990 fiscal year ended Sept. 30, 1990 were $506.0 million compared to revenues of $580.8 million for fiscal 1989, a decrease of 12.9 percent. Net income was $59.1 million for the 1990 fiscal year vs. $103.9 million for the previous fiscal year, a decrease of $43.1 percent. On a per share basis, net income was $1.07 for the 1990 fiscal year vs. $1.77 for the 1989 fiscal year, a decrease of 39.5 percent.

Sterling's earnings from operations for the quarter just ended improved significantly over those of the same quarter in 1989, primarily because of the strong performance of styrene monomer. For the quarter, styrene and related product volumes increased 13 percent and gross margins were more than twice those experienced in the quarter ended Sept. 30, 1989.

Styrene was in relatively tight supply compared to a year ago, primarily as a result of lower than normal inventory levels following the severe weather conditions and resulting plant outages that occurred last winter and industry operating problems which have continued to plague manufacturers since the spring. Market conditions for acrylonitrile have improved slightly from the same quarter last year, allowing the company to move greater volumes. However margins have not improved significantly because of a weak synthetic fibers market and rapid increases in raw material prices, principally propylene, after Iraq's invasion of Kuwait.

Sterling Chemicals is a major producer of seven intermediate petrochemical products -- styrene monomer, acrylonitrile, acetic acid, plasticizers, lactic acid, tertiary butylamine and sodium cyanide. Sterling Chemicals is headquartered in Houston. The company's stock trades on the New York Stock Exchange under the symbol STX.

CINCINNATI (OCT. 24) PR NEWSWIRE - The Kroger Co. (NYSE: KR) said today that the settlement of shareholder lawsuits filed around the time of the company's 1988 corporate restructuring has been overturned by a state appellate court on procedural grounds.

The settlement agreement was approved on March 30, 1989, by the Hamilton County, Ohio, Court of Common Pleas, but this approval was then appealed by two plaintiffs who had objected to the settlement.

As a result of the court's decision, the original terms and conditions on the company's junior subordinated discount debentures remain in effect. The debentures were issued to Kroger shareholders as part of the special dividend paid in the restructuring.

They were issued as 20-year bonds, with no cash interest paid in the first five years after issuance. After five years, the debentures pay cash interest semi-annually at a 15-1/2 percent annual rate. The bonds are callable at face value at any time with no premium.

In the settlement, Kroger had agreed to make certain changes in the terms of the discount debentures, contingent upon final judicial approval of the settlement, including shortening the maturity date of the debentures by two years and adding a call premium for redeeming the debentures before seven years from the date of issue.

The Company said it was reviewing the Court's decision. Noting that the ruling was based entirely on procedural grounds, Kroger said that it continues to believe that the shareholder suits are totally without merit.

NEW YORK (OCT. 24) PR NEWSWIRE - Pfizer's Specialty Minerals Group today announced plans to construct a headquarters building in Bethlehem, Pa., to house its rapidly expanding precipitated calcium carbonate satellite plant operations.

Watson Hart, design/construction manager, said ground for the 30,000-foot headquarters will be broken in November at Bethlehem Industrial Park close by Pfizer's Minerals Research Center, which opened there in 1988. Scheduled for occupancy next July, the two-story structure will include administrative, sales and marketing offices as well as design, engineering and construction space.

Precipitated calcium carbonate (PCC) is a specialty pigment used for coating and filling premium quality paper. Satellite plants built at paper mill sites produce a slurry form of PCC, which is piped directly into the adjacent mills. In the computerized process, locally sourced lime is reacted with water and carbon dioxide recovered from the mill's stack gas, thereby reducing air emissions while cutting shipping costs.

Since the satellite program was launched in 1986 at Consolidated Paper in Wisconsin Rapids, Pfizer has built 17 PCC plants in the United States and at major mills in Canada and Japan. By the end of 1991, Pfizer said, 13 more satellites will be "on line" in the United States with additional units scheduled for construction in Europe and Asia.

According to Paul MacDonald, director of PCC Satellite Operations, the building will house some 75 current employees and is designed to allow further expansion "well into the 90s."

Pfizer's PCC technology has facilitated a major paper industry trend away from its traditional acid-based process to a more cost-effective alkaline system, MacDonald said, adding that key environmental benefits are also driving the transition to alkaline paper in U.S. and foreign markets.

The alkaline system produces a brighter, stronger sheet with improved opacity and an "almost endless" shelf life, he said. Unlike the acid process, it permits substitution of a mineral pigment for wood fiber and reduces requirements for titanium dioxide and other chemicals. At the same time, it is less corrosive and generates less effluent than the acid method.

"The PCC satellite program has enjoyed phenomenal industry acceptance from the beginning," MacDonald said. The first satellite unit at Consolidated Paper in Wisconsin Rapids is now in its third expansion to keep pace with the growth of the paper industry in and around Wisconsin. New plants will go on-stream this fall at the James River Communication Papers Group in Camas, Wash., and at Weyerhaeuser Paper Company in Plymouth, N.C.

Pfizer Inc. is a diversified, research-based health care company with businesses in pharmaceuticals, hospital products, animal health, consumer products, specialty chemicals and specialty minerals. The company reported sales of approximately $5.7 billion for 1989.

WAYNE, PA (OCT. 24) PR NEWSWIRE - SunGard Data Systems Inc. (NASDAQ-NMS: SNDT) announced today that it completed the previously announced acquisition of Phase3 Systems Inc. on Oct. 22, 1990.

In the transaction, Phase3's stockholders received approximately 837,000 shares of SunGard common stock for all of the stock of Phase3.

Phase3 is a leading provider of investment support software and processing services to commercial banks, brokerage firms and other financial

institutions. Its principal product, the Phase3 System(TM), is a fully integrated, real-time securities transaction processing system for both equity and fixed income instruments. The company currently has about 35 customers nationwide and employs about 100 professionals at its offices in Waltham, Mass. John H. Harkins, president, and the other three founders of Phase3 will continue to manage the company, which has joined the SunGard Financial Systems Group.

James L. Mann, SunGard chairman, president and chief executive officer, said of the acquisition: "Phase3 is a strong and strategic addition to our investment support product offerings. The Phase3 System has developed an excellent reputation in the marketplace, recently having added some impressive money center bank names as customers. In addition to strengthening our position in the high end of the bank capital markets area, Phase3 also brings to SunGard a strong product for market niches we have targeted but not yet addressed. Phase3's management team has achieved an impressive record, and the company's emphasis on recurring revenues fits the SunGard profile very well."

SunGard Data Systems Inc., based in Wayne, is the only large specialized provider of proprietary investment support systems to the financial services industry, including portfolio management, investment accounting, performance measurement, employee benefit reporting, trust accounting, and securities and derivative instrument trading systems. SunGard is also the pioneer and a leading provider of comprehensive computer center disaster recovery services. Its common stock is reported on the NASDAQ National Market System under the symbol SNDT.

#90297p9189 10/24/1990 ~PR Newswire

MEDIA, PA (OCT. 24) PR NEWSWIRE - VWR Corp. (NASDAQ: VWRX) today reported that income from operations for the third quarter was $4,842,000 up 33 percent over the last year.

Sales of $112,316,000 for the quarter increased 21 percent, a record for the company. Net income from continuing operations of $2,020,000 (38 cents per share) represented an improvement of 35 percent over third quarter 1989 results.

For the nine-month period, income from operations rose 17 percent, sales were up 20 percent, and net income from continuing operations increased 10 percent, compared to the same period in 1989. Earnings per share from continuing operations for the nine months were $1.05, compared to 94 cents for the same period in 1989.

The company noted that the record sales gain for the third quarter was a result of growth in VWR's core scientific business and positive effects from the acquisitions of Sargent-Welch Scientific Co. and Oxford Scientific Laboratories of London, Ontario, Canada. The companies were acquired, respectively, in September 1989 and April 1990.

"All segments of the company showed solid sales gains," said Jerrold B. Harris president and chief executive officer of VWR Corp. "Our core scientific business had a strong third quarter with improvements in both market share and selling margins. Order rates for Sargent-Welch science/education products have substantially improved. This business is now meeting our goal of regaining its market position as a result of positive reaction by our high school through junior college customers to significant improvements we have made in service."

Harris also noted that VWR had announced the implementation of an ESOP (Employee Stock Ownership Plan) during the quarter. "The plan, which will

eventually provide for up to 6 percent employee ownership, supports our company's commitment to strong employee involvement," Harris said. "We also believe it will have a positive impact on long- term shareholder value."

Looking to the future, Harris said that the company had not experienced any downturns as a result of the current economic uncertainty. "While remaining cautious, we are proceeding with planned investments and commitments which will provide long-term benefits for VWR Corp."

VWR Corp., headquartered in Media, is the nation's second largest distributor of laboratory supplies and equipment, with annual sales in excess of $400 million.

HOUSTON (OCT. 24) PR NEWSWIRE - NeuroGenesis, Inc. (traded in Pink Sheets as NeuroGenesis) today announced that Robert W. Baldwin has been appointed president of the company. He replaces Albert Bieser.

Robert W. Baldwin, 69, holds a bachelor of science degree in chemical engineering from the University of Houston (1949). Between 1975 and 1981, Baldwin served as president of Gulf Oil Refining and Marketing Company, a subsidiary of the Gulf Oil Corporation. Since retiring from Gulf in 1981, Baldwin has worked principally as an independent oil and gas consultant and served as president of American Completion and Development Corporation, an oil and gas investment company, from 1982 through 1984. Baldwin presently serves as a member of the board of directors of the Rowan Companies, Inc., and as an advisory director of Harken Energy Corporation. Baldwin is also a member of the board of directors of Mitchell Energy & Development Corporation.

NeuroGenesis, Inc. and its subsidiary, Matrix Technologies, Inc., are Houston-based pharmaceutical companies developing and marketing amino acid food supplements for the specific needs of people suffering from addictive and compulsive behaviors.

MILWAUKEE (Oct. 24) PR Newswire - WICOR, Inc. (NYSE: WIC), the Milwaukee-based parent of Wisconsin Gas Company and Sta-Rite Industries, Inc., reported a third-quarter loss of $8 million, or 58 cents per share, compared with a loss of $5.4 million, or 39 cents per share, for the quarter last year. The third quarter traditionally is a period of loss for WICOR because

Wisconsin Gas Company's sales are at their lowest during the summer, according to Stuart W. Tisdale, president and chief executive officer of WICOR.

WICOR's third-quarter operating revenues were $113.3 million vs. $115.1 million in 1989. Quarterly earnings declined at both subsidiaries.

As part of Sta-Rite's long-term strategy to strengthen its water products operations, Tisdale announced plans to pursue the potential divestiture of two of the manufacturing firm's business units, the Fluid Power Group and the Heating Group.

Reporting third-quarter results for WICOR's two subsidiaries, Tisdale said operating revenues at Sta-Rite were $62.4 million, compared with $65.9 million for the period last year. He cited the continuing softness of key markets, slowed by sluggish real estate activity and the overall downturn in the economy, as the reason for the decline in sales. As a result, earnings for the quarter were $0.7 million, compared with $1.5 million for the period last year.

At Wisconsin Gas Company, third-quarter operating revenues were $50.4 million, compared with $48.9 million in 1989. The company reported a quarterly loss of $8.7 million vs. a loss of $6.9 million for the period last year.

Increases in other operating expenses, depreciation and interest expense accounted for the remainder of the earnings decrease this quarter.

The WICOR board of directors Tuesday declared a regular quarterly dividend of 36 cents per share of common stock. The annual rate is $1.44. The dividend is payable Nov. 30 to shareholders of record Nov. 9.

WICOR is a Milwaukee-based holding company. Its primary subsidiaries are Wisconsin Gas Company, the state's largest natural gas distributor, and Sta-Rite Industries, a manufacturer of pumps and other fluids-handling equipment and controls.

#90297p9208 10/24/1990 ~PR Newswire

LONG BEACH, CA (OCT. 24) PR NEWSWIRE - KLM Royal Dutch Airlines today announced that it has taken options on five additional McDonnell Douglas (NYSE: MD) MD-11 long-range trijet transports.

In the first quarter of this year, the Netherlands' national carrier placed firm orders for 10 aircraft, with options for another five. The carrier now has a total of 10 firm orders and 10 options for the MD-11. With a value estimated at $1.3 billion for the 10 firm bookings plus spare parts and

services, it was the largest single purchase ever made by KLM.

If exercised, deliveries of the five additional options are scheduled for 1998 and 1999. KLM plans to accept its first MD-11 in December 1993 with deliveries of the other firm orders continuing through November 1995.

Russell L. Ray Jr., vice president commercial marketing for Douglas Aircraft Co. said the deal "confirms that the MD-11's particular size and range provide operators such as KLM with a dependable workhorse for today's tough market.

"KLM chose the MD-11's three-engine economy after a long and intensive competition with the twin jet Boeing 767 and the four- engined Airbus A340," he said.

KLM's MD-11s will seat 270 passengers in a three-class arrangement that includes a large business section. The airline plans to use the MD-11 on its long-range routes and to develop service to new destinations.

The MD-11 offers a wider passenger cabin that allows KLM to emphasize passenger comfort and quality in service. The new trijet also features an advanced, two-person cockpit, flexible interiors designed for quick cabin rearrangement, and other advanced features enhancing maintenance support. With 6,850 cubic feet (194 cu m) of lower-deck cargo space, the MD-11 also provides significantly more room than any other aircraft for loading revenue freight after passengers' bags are stowed -- a feature particularly important in KLM's planned operations.

In addition, the McDonnell Douglas trijet family concept allows airlines advantages in commonality when considering ways to expand revenue cargo business. An MD-11 combi, which carries passengers and cargo on the main deck and freighter versions are also being built.

As of Sept. 30, 1990, McDonnell Douglas had received 375 commitments from 32 customers for its MD-11 trijets.

LONG BEACH, CALIF. (OCT. 24) PR NEWSWIRE - The massive tooling surrounding the first U.S. Air Force-McDonnell Douglas (NYSE: MD) C-17 production airlifter has been rolled back, and the aircraft is now moving forward on its own landing gear.

Workers at the Douglas Aircraft Co. facility in Long Beach moved the first production airlifter out of the specially constructed, laser-controlled fuselage alignment tool, and on to its landing gear.

The second aircraft in the C-17 production line will be part of the C-17 ground and flight test program before being delivered to the Military Airlift Command. The milestone event took place just three weeks after successful pressure testing of the first C-17, the flight test airlifter, destined to fly by June 1991.

The C-17 is designed to carry large Army and Marine Corps. combat equipment, troops and cargo and humanitarian aid directly from the United States to small austere airfields overseas.

#90297p9215 10/24/1990 ~PR Newswire

LOS ANGELES (OCT. 24) PR NEWSWIRE - Maurice J. DeWald, managing partner of KPMG Peat Marwick in Los Angeles, today announced his retirement from the firm effective the latter part of 1991. He is succeeded by Clarence T. Schmitz, current partner-in-charge of the audit practice in Los Angeles. DeWald will remain in a senior advisory role to assist through the transition. A new partner-in- charge of audit in Los Angeles will be announced at a later date.

Management changes in Los Angeles coincide with a nationwide organizational restructuring of the firm, aimed at effectively responding to the needs of the

marketplace in the 1990s.

At the annual partners' meeting earlier this month, the firm's 1,850 partners approved changes in the bylaws to separate governance of the partnership from daily management of the firm's operations. As part of these changes, the partners approved the creation of a board of directors which will be responsible for policy, planning and oversight of the partnership's affairs. Subsequently, the new board decided to create a management committee, which comprises 13 area partners responsible for the business operations of Peat Marwick and implementing the board's policies.

"The area partner concept represents a very progressive step for professional services firms," stated DeWald. He went on to explain, "Peat Marwick has essentially created a new, flatter organizational structure that encourages a team approach and translates into improved service delivery for our clients."

In light of these changes, DeWald, 50, has chosen to take early retirement in order to pursue other interests. "This represents the completion of a very rewarding 28-year career for me with an outstanding organization. I believe the time is right for me to pursue other business opportunities and devote more time to my commitments in the Los Angeles community," stated DeWald.

DeWald served in the Chicago and San Jose offices of Peat Marwick after graduating from the University of Notre Dame in 1962. He later served as managing partner of the Orange County office for nine years and subsequently relocated to Chicago to head that office. In 1986, DeWald was named managing partner of the Los Angeles office, the third largest Peat Marwick office in the nation.

"During his career, DeWald has served a wide range of clients including high technology, financial institutions and multinational companies. Under his leadership the size of the Los Angeles practice has nearly doubled during the past four years. It will be a challenge to maintain the momentum created by Maury DeWald," commented Schmitz.

The Los Angeles area practice of KPMG Peat Marwick encompasses downtown Los Angeles and offices in Long Beach, Century City, Woodland Hills, Ventura and Las Vegas. The firm provides accounting, auditing, tax and management consulting services to clients of all sizes through 135 offices throughout the United States.

MIAMI, (OCT. 24) PR NEWSWIRE - Hotelecopy, Inc. (NASDAQ-NMS: FAXM) has filed a claim seeking recovery of $5.25 million invested in its joint venture FaxMail program with the U.S. Postal Service. The Miami-based firm cited Postal Service non-compliance with its contractual obligations to provide merchandising and awareness support. Hotelecopy and the Postal Service, nevertheless, are continuing their joint venture, going forward with the FaxMail program.

"The filing of our claim does not in itself terminate our joint venture contract," W. Edd Helms Jr., Hotelecopy chairman and chief executive officer emphasized. "The year-long test program, initiated in November, 1989, has been extended by the Postal Service to run from Nov. 1, 1990 to Oct. 31, 1991. We have pledged to continue the program and are optimistic that recovery of our $5.25 million investment will add impetus to our combined effort."

Helms pointed out that the Postal Service has made "another positive move indicating, as they have in the past, that they will commit marketing support to insure the success of our joint venture. Hotelecopy, however, is maintaining a status-quo attitude as to whether these statements of commitment translate into reality."

In explaining the joint venture relationship with the U.S. Postal Service, Helms said the contract called for Hotelecoy to install, at its own expense, highly sophisticated credit card-operated, self-service FaxMail terminals costing upwards of $10,000 each, in 265 post office locations nationwide. "We absorbed costs for installing, supplying and maintaining these units and agreed to pay the Postal Service a rental fee of $200 per machine, in addition to a revenue-sharing percentage based on consumer usage.

"This was a no-lose situation for the Postal Service," Helms declared,

"allowing them, at no cost, to build critically needed revenue, while simultaneously using the allure and convenience of FaxMail to attract the large numbers of consumers who have left the Post Office in recent years for the proliferating number of private postal facilities.

Joint Venture a Two-Way Street "A joint venture is a two-way street that calls for obligations each partner must carry out," said Helms. "Hotelecopy conformed with its contractual commitments, but the Postal Service has not." According to Helms, the joint venture contract obligated the United States Postal Service to support the FaxMail program with a sustained marketing effort, including a national print and direct mail campaign.

"Indicative of their non-compliance," said Helms, "is the fact that while our first FaxMail units went on line Nov. 7, 1989, it wasn't until June 19, 1990 -- more than seven months later -- that they finally agreed to participate in a press conference formally introducing the program."

Helms also cited the appearance of a Postal Service advertisement in the Wall Street Journal and USA Today on Sept. 27, 1990, more than ten months following installation of Hotelcopy's first units, "as yet another example of 'too little, too late.' " This ad was hurriedly put together," Helms remarked, "obviously with little thought given to its creativity, layout or the audiences for whom it was intended. We were never consulted, as we should have been, in helping to make this a more effective piece.

"Our contractual agreement guaranteed a full-scale marketing effort on the part of the Postal Service, designed to assure the program's success. Without the promised marketing support most consumers are unaware that FaxMail is available in selected post office locations, and it follows that usage is scant.

"As stated, Hotelecopy continues to honor its contractual obligations of this joint venture, but as a publicly held company we are committed to protecting our shareholders," Helms advised. "It would be imprudent to allow this current situation to indefinitely hamper our company's overall progress and jeopardize our shareholders' investments.

"The absence of marketing impacted negatively on our $5.25 million investment, our revenues and our stock price. We are left with no alternative other than the claim we've filed," he said. Under the Government Disputes Act, the Postal Service has 60 initial days in which to respond to this claim, Helms noted.

Ray of Light "The bright ray of light," said Helms, "is that the Postal Service has now recommitted to an aggressive national marketing campaign. We are hopeful that they will begin meeting their marketing obligations to allow the post office FaxMail program to achieve the same level of success for the Postal Service as FaxMail has achieved in hotels for Hotelecopy.

"Lending truth to our own research, the Postal Service has just confirmed an 82 percent consumer satisfaction ratio, based on responses from consumers queried in a recent U.S. Postal Service survey on FaxMail," Helms added.

"We see this response as a demand from the public that the Postal Service continue to provide FaxMail service to its customers."

HARTFORD, CONN. (OCT. 24) PR NEWSWIRE - Kathryn Scott Fuller, president and chief executive officer of World Wildlife Fund and The Conservation Foundation has been elected to the Northeast Utilities Board of Trustees.

Northeast Utilities (NYSE: NU) is New England's largest electric utility system, serving about 1.25 million customers in Connecticut and western Massachusetts.

World Wildlife Fund supports over 3,000 projects in over 140 countries and is the largest private conservation organization working worldwide to conserve nature.

Fuller became president of World Wildlife Fund in February 1989, replacing William K. Reilly, who became administrator of the United States Environmental Protection Agency. Reilly served as an NU trustee from 1986 until 1989.

Fuller joined World Wildlife Fund in 1982 and served as the organization's executive vice president, general counsel, and director of public policy and TRAFFIC (USA), World Wildlife Fund's wildlife trade monitoring unit, before being named president. Previously, Fuller had been a trial attorney and chief of the Wildlife and Marine Resources Section of the United States Justice Department.

"Kathryn Fuller will help us greatly in understanding and fulfilling the responsibilities we have in conducting our business," said William B. Ellis, NU chairman and chief executive officer. "She is and excellent addition to our board."

Fuller received her bachelor's degree from Brown University and her law degree from the University of Texas. She pursued graduate studies in Marine, Estuarine and Environmental Science from the University of Maryland and is a recipient of the United Nations Environment Programme's Global 500 Award.

MINNEAPOLIS (OCT. 24) PR NEWSWIRE - Munsingwear, Inc. (NYSE: MUN) today announced that it has executed a definitive agreement to sell its Leroi Princeton Division to DJS Industries, Inc., a Delaware corporation, formed for the purpose of acquiring LeRoi Princeton. DJS Industries is controlled by NCO Investors, L.P., an investment partnership formed by the principals of Nagelvoort & Company Inc., New York, and David J. Skidmore. The transaction is scheduled to close in early November.

It was also announced that during the transition period, Skidmore, formerly president of the Gold Toe Hosiery Division of Cluett, Peabody & Co., will participate and assist in the general management of the business. He will have particular involvement in the sales and marketing aspects of the business. Skidmore will be headquartered in the Division's New York sales office and will report directly to Charles J. Campbell, CEO of Munsingwear, in Minneapolis.

The LeRoi Princeton Division of Munsingwear manufactures and markets children's hosiery, sleepwear and playwear. The Division has production facilities in Princeton, Ky.

LOS ANGELES (OCT. 24) PR NEWSWIRE - Peter Faiman and Wayne Young, the director and associate producer of "Crocodile Dundee," have joined forces with Twentieth Century Fox and Interscope Communications to bring to the screen the animated musical fantasy "FernGully: The Last Rainforest," it was announced today (Oct. 24) by Roger Birnbaum, president, worldwide production for Twentieth Century Fox.

Inspired by the mystery and beauty of the rain forest, "FernGully: The Last Rainforest" traverses the borders of fantasy, magic and reality. The film tells a moving story of the forest's inhabitants, and how their world and "web of life" are put into jeopardy by the forces of destruction and ignorance.

Roger Birnbaum commented: "Twentieth Century Fox is excited to be involved in this collaboration of so many talented people to create a wondrous animated entertainment for audiences of all ages. We are also very proud to be involved with a project which addresses an issue of vital concern to the entire world."

"FernGully: The Last Rainforest" is produced by Young and Faiman, with Ted Field and Robert W. Cort of Interscope as executive producers. Jeff Dowd and Jaime Willet are co-executive producers. The film is directed by Bill Kroyer. The screenplay is written by Jim Cox, who scripted "Oliver & Co." and the upcoming animated features "Rescuers Down Under" and "Beauty and The Beast," and is based on a children's book by Diana Young. Cox also serves as co-producer. The film is set for release in November 1991, in the United States and Canada by Twentieth Century Fox.

Wayne Young said: "'FernGully' is a piece of modern mythology based on some very real concerns of our time. The film not only creates wonder and excitement, but tells a story of great importance."

As part of the preparation, the entire creative team traveled from Los Angeles to the Australian rain forest in February 1990 for an extended visit. Faiman wanted to ensure that everyone involved in making the film had first-hand experience of being in the rain forest. He said, "We want to capture the breath of the forest -- the light, the shade, the color, the sounds. We intend to bring this wonder into every frame of 'FernGully.'"

"FernGully: The Last Rainforest" is directed by Bill Kroyer, who was nominated for an Academy Award for Best Achievement in Short Films for his 1989 film "Technological Threat," the first film ever to combine hand-drawn and computer-generated characters. Disney- trained in the classic school of hand-drawn character animation, Kroyer drew characters for Disney's "Pete's Dragon" and "The Fox and the Hound," and directed sequences of computer-animated graphics for "Tron." He directed and animated the title sequence of Jim Henson's "Labyrinth" and recently directed the animated titles for "Honey, I Shrunk the Kids" and "National Lampoon's Christmas Vacation." The animation production for "FernGully: The Last Rainforest" will be done by

Kroyer Films Inc.

Twentieth Century Fox is primarily engaged in the financing, development, production, distribution and marketing of motion pictures throughout the world and is a unit of Fox Inc.

#90297p9239 10/24/1990 ~PR Newswire

BURLINGTON, NJ (OCT. 24) PR NEWSWIRE - FMS Financial Corp. (NASDAQ: FMCO) today reported a net loss of $211,000 for the three months ended Sept. 30, 1990, as compared to net income of $454,000 for the comparable period in 1989.

Earnings for the six months ended Sept. 30, 1990, was a net loss of $1.1 million, compared to net income of $1.2 million for the previous year.

The decline in earnings for the nine months, and the three months ended Sept. 30, 1990, is due to the inclusion of the following: a specific loss reserve of $686,000 made to a below-investment-grade corporate bond; second mortgage loan loss of $74,000, net of $46,000 in loan reserves; a land loss reserve of $360,000 related to real estate owned by the bank's land development subsidiary; an $825,000 reserve on a single construction loan; and the loss on the sale of Bank of New England bonds of $549,000.

The corporation holds two additional corporate bonds which, subsequent to the quarter ended Sept. 30, 1990, have fallen below investment grade, and at the date of this release, are classified by the corporation as substandard assets. The market values of these securities are derived from independent sources and vary, based on indicated trading of such securities. Management is presently analyzing the realizable value of these securities in order to establish the proper amount of loss reserves. Management estimates that additional loss reserves, ranging from $972,000 to $1.2 million, will be required.

Core earnings from operations for the nine months and three months ended Sept. 30, 1990, increased over its comparable period in 1989, as evidenced by an increase in net interest income. For the nine months ended Sept. 30, 1990, net interest and dividend income, before provision for loan losses, increased $348,000 from $6.2 million at Sept. 30, 1989, to $6.5 million at Sept. 30, 1990. For three months ended Sept. 30, 1990, net interest and dividend income before provision for loan losses, increased by $472,000 from $1.8 million at Sept. 30, 1989, to $2.2 million at Sept. 30, 1990.

In addition, the corporation realized a growth in miscellaneous operating income of $440,000, increasing from $242,000 for the nine months ended Sept. 30, 1989, to $682,000 for the nine months ended Sept. 30, 1990. For the three

months ended Sept. 30, 1990, and the same period in 1989, miscellaneous operating income increased $268,000 from $41,000 to $309,000. The increase is due in part to activities related to the corporation's subsidiaries, FMS Financial Services, which began operations in 1989, and Land Financial Services Inc.

Provision for loan losses for the nine months ended, and the three months ended Sept. 30, 1990, were $1.1 million, and $147,000 respectively. There were no provisions for loan losses in the comparable period for 1989.

For the three and nine months ended Sept. 30, 1990, and the comparable periods in 1989, total operating expenses increased by $129,000 and $354,000, respectively, due to increased costs for health coverage, federal insurance premiums, occupancy and equipment and marketing.

During the third quarter, deposits increased by $13.4 million, from $319.6 million at June 30, 1990, to $333.0 million at Sept. 30, 1990. The increase was primarily attributed to the successful introduction of the bank's new product, the Best Bet Certificates of Deposit. Total assets at Sept. 30, 1990, were $359.4 million, compared to $357.3 million reported at year end, Dec. 31, 1989.

FMS Financial Corp. continues to remain strong with a net worth of $21.9 million, which exceeds all current capital requirements.

FMS Financial Corp. is the holding company for Farmers' and Mechanics' Savings Bank S.L.A., headquartered in Burlington Township, N.J., and operating seven retail branches throughout Burlington County.

#90297p9240 10/24/1990 ~PR Newswire

LONDON (OCT. 24) PR NEWSWIRE - A second record-setting long-range flight with a simulated airline payload in as many days has been completed successfully by a McDonnell Douglas (NYSE: MD) MD-11 as part of its certification flight test program.

Bucking strong head winds of up to 100 knots, the big trijet landed at Gatwick Airport here at 5:03 p.m. local time after a trip of 13 hours and 24 minutes that began at Seoul, Korea. Total distance covered was 7005 miles (11,273 km).

On board were 37 passengers and crew and ballast to equal the total weight of 281 passengers and bags. McDonnell Douglas has asked the U.S. National Aeronautic Association to register the flight with the F.A.I. (International Federation of Aeronautics) as an official point-to-point world speed record between Seoul and London.

Yesterday the MD-11 completed a similar flight from Dallas, Texas to Seoul of 7266 miles (11,693 km) in 14 hours and 50 minutes.

Purpose of the long flights is to demonstrate operations for U.S. and European regulatory authorities under typical airline operating conditions, to very

accurately measure the aircraft's fuel consumption and to evaluate cockpit crew workload.

George G. Field, MD-11/DC-10 general manager of product definition, design and test, said, "Completion of these runs with significant payloads confirms the MD-11's ability to fly the long routes for which it was designed. The adverse winds at this time of year also provide a realistic picture of airline-type flying in worst case conditions."

The MD-11 landed with enough reserve fuel remaining to meet regulatory agency and airline margins for flying to an alternate airport if necessary. Three General Electric CF6-80C2 engines provided power.

Among those on board were McDonnell Douglas engineers, mechanics and others, and U.S Federal Aviation Administration (FAA) representatives, as well as two senior flight operations executives from Korean Air, one of 32 MD-11 customers.

At the controls were FAA evaluation pilot James Richmond and McDonnell Douglas engineering pilot Paul Shall. Also flying a portion of the flight was McDonnell Douglas pilot Bob McGill.

The route carried the MD-11 northward from Seoul, over the Sea of Japan, on a northwest path over the Soviet Union, across northern Scandinavia and south into London.

This was the first time a McDonnell Douglas flight test aircraft has received permission to use Soviet air space. Last month, however, an MD-80 twin jet built by the company participated in an air show at Moscow and performed flight demonstrations for airline officials and news media.

The MD-11 is nearing the end of a 2,000-hour flight test program that began last Jan. 10 and has involved five aircraft, including the one completing today's flight.

#90297p9249 10/24/1990 ~PR Newswire

HOUSTON (OCT. 24) PR NEWSWIRE - Transco Energy Co. (NYSE: E) President and Chief Executive Officer George S. Slocum said today that the company will delay release of third quarter results pending Federal Energy Regulatory Commission (FERC) action on the request for a stay of refunds pending the FERC's review of its order in Transcontinental Gas Pipe Line Corp.'s (TGPL) "Transition Cost Proceeding". Slocum also noted that the company expects earnings for the third quarter to be lower than those of a year ago due primarily to a charge to earnings of approxiamtely $11 million, after-tax, related to additional producer settlement costs.

Slocum said that if a stay of the refund obligation is not granted, TGPL will be required to make cash refunds to customers totaling approximately $112 million and forego recovery of an additional $26 million in gas costs, resulting in a charge to earnings of approximately $138 million, or $92 million after tax. Transco is pursuing rehearing of the order and will seek court review of the FERC's decision if necessary. Slocum said that the gas costs in question were previously found to be reasonable and should be recoverable. Transco steadfastly believes that the actions taken by TGPL and its affiliates in 1985-86 did not violate either the letter or the spirit of the law or the FERC's regulations, and were entirely consistent with the Commission's policies of increasing customer access to market responsive gas supplies. He also noted that the refunds would be payable on Nov. 12, unless the request for stay is granted, and that Transco will issue third qurater results as soon as the request is addressed.

In addressing earnings, Slocum noted that net income for the third quarter of 1990 is expected to be approximately $3-5 million, or 10-15 cents per share, before unusual charges to earnings. Third quarter 1989 results of $1.20 per share included a gain of $2.42 per share on the initial liquidating distribution of Transco Exploration Partners Ltd., offset in part by charges of 90 cents per share related primarily to the effects and timing of the approval of TGPL's customer settlement. Excluding the items described above, Transco reported a net loss of 32 cents per share for the third quarter of 1989.

Slocum said that progress in settling remaining contract disputes with producers has resulted in payments or commitments to pay an additional $48 million, bringing the cumulative total of such payments or commitments to $1.098 billion. TGPL's customer settlement agreement places a limitation of $1.098 billion on producer settlement costs for which TGPL customers will share financial responsibility. Slocum said that while no assurances can be given, remaining litigation should be resolved without further materially adverse financial consequences to Transco.

In addressing Transco's common stock dividend, Slocum reiterated the company's policy of paying a reasonable portion of earnings and cash flow to common stockholders conistent with its other capital requirements. He noted that while business fundamentals continue to improve, consideration would be given to a change in the dividend rate when, among other things, the uncertainty created by remaining FERC issues is clarified.

HOUSTON (OCT. 24) PR NEWSWIRE - Minority business owners awarded General Motors Corp. (NYSE: GM) the prestigious "Corporation of the Year Award" in recognition of its generous support of minority business. Today, every General Motors vehicle produced in the United States contains parts and materials produced by minority-owned and operated firms.

According to Harriet Michel, president of the National Minority Supplier Development Council, last year General Motors spent more than $1.15 billion dollars with minority venders. This figure represents 4 percent of General Motor's total outside purchasing.

The award, presented at the closing of the National Minority Supplier

Development Council's Annual Conference, is regarded as the most significant honor awarded an American company in the field of minority development. The council is a non-profit organization chartered in 1972 to expand business opportunities for minority-owned businesses; the council acts as a match-maker between corporations and minority vendors.

In accepting the award, Donald A. Pais, General Motor's vice president in charge of the Materials Management Staff, said, "I am proud of the commitment of the men and women of General Motors and their efforts to make our Minority Supplier Development Program the success that it is."

He also said he was proud of the tremendous effort of the minority suppliers who do business with general Motors -- "suppliers who work hard every single day to help General Motors build high quality cars and trucks."

The awards ceremony, held at the Hyatt Regency Hotel in Houston, recognized three minority enterprises with the "Supplier of the Year Award." The recipients were Oscar Robertson, president of Orchem Inc. of Cincinnati, Ohio; Lewis Tapia, president of Matrix Exhibits of Brentwood, Tenn.; and Tim Yu, president of CKY Inc., Environmental Services of Torrance, Calif.

#90297u0084 10/24/1990 ~United Press International
ITHACA, NY (OCT. 24) UPI - A Cornell University student who slipped from a rain-slick trail and fell more than 75 feet into a gorge escaped major injury when she made a relatively cushy landing atop a soft, plump racoon.

Lisa Nelson was walking on the wet Cascadilla Gorge trail that separates the Ivy League school from Ithaca's Collegetown neighborhood when she slipped Monday.

Ithaca Police said the 20-year-old student plummeted more than 75 feet into the steep, rocky gorge, but suffered only a broken wrist and other minor injuries after landing on the masked critter.

Police said they believe the raccoon saved the woman's life.

Police Capt. David Barnes said rescue workers found the student and the hapless raccoon laying side by side at the bottom of the gorge.

''She was on the bottom and there was an injured raccoon next to her, '' he said.

Nelson was reported in satisfactory condition Tuesday afternoon at Tompkins County Hospital.

The raccoon was recovering at a local animal shelter.

#90297u0162 10/24/1990 ~United Press International
TOKYO (OCT. 24) UPI - Korean Air Lines has agreed to pay compensation to the families of seven Japanese passengers killed when a Soviet fighter shot down KAL Flight 007 in 1983, a Japanese newspaper reported Wednesday.

The South Korean passenger plane bound for Seoul from Anchorage, Alaska, was shot down Sept. 1, 1983, by a Soviet fighter off the coast of Sakhalin, killing all 269 people aboard.

Tokyo District Court officials said the families had agreed to accept a payment from KAL, the Mainichi Daily News reported.

The amount of the settlement was not announced, but the sixteen families members had demanded a total of $7 million in payments, the newspaper said.

The lawyers of the family members maintained the airline's decision to pay the settlement was an apparent acknowlegment of professional negligence in the shooting.

The KAL Boeing 747 strayed hundreds of miles off course into Soviet air space before it was shot down. Soviets officials said at the time they believed the plane was on a reconnaissance mission while the American officials said the Soviets shot it down even though they knew it was a passenger jet.

Twenty-seven Japanese were killed in the shooting.

The families of seven Japanese victims filed a suit against KAL in the Tokyo District Court in December 1984, and the court recommended they seek an out-of-court settlement.

The payment to the families of the seven victims is the first by KAL to Japanese involved in the incident.

The families of the other 20 Japanese victims have filed suits in Japanese and foreign courts that are pending.

#90297u0167 10/24/1990 ~United Press International

(OCT. 24) UPI - Only 37 Britons returned to London Wednesday night aboard a Virgin Airways Boeing 747. Earlier reports said 50 British hostages were being released by Iraq. 14 Americans also were freed. The reduced number of former hostages indicates Baghdad was freeing only those who were elderly or in need of medical treatment.

Senate backers of the Civil Rights Act of 1990 hope to override President Bush's veto of the legislation in Wednesday's showdown between the White House and Congress on the issue. The outlook is NOT considered good for lawmakers, who passed the act with less than the two-thirds majority needed to override.

A Bush adminstration official says Labor Secretary Elizabeth Dole will announce her resignation Wednesday. But President Bush and Dole's husband, Senator Robert Dole, did NOT confirm the report. Both said reporters must wait. Secretary Dole... the highest ranking woman in the Bush administration... was NOT available for comment.

Philippine police say the situation in the capital is normal Wednesday after the start of a general strike called by leftist trade unions seeking greater pay. But armed men, some of whom claimed to be communist guerrillas, set fire to half-a-dozen vehicles. Authorities also arrested four people armed with tiny homemade bombs and six others linked to a jeep loaded with explosives.

The already dirty campaign for Cook County sheriff in Illinois turned violent Tuesday... with a campaign worker left hospitalized in critical condition. Irving Bell was shot three times while hanging campaign posters in Chicago for Democratic challenger Michael Sheahan. Sheahan called on Republican Sheriff Jim O'Grady to- quote- ''call off his goons and thugs.''

F-B-I investigators in Chicago are busy trying to solve three bank heists and one attempted bank robbery- which all occurred Tuesday within a three-hour time span. An F-B-I spokesman speculates the would-be robber in the failed hold-up could be the same person responsible for a later robbery downtown. The other heists were conducted by separate suspects.

#90297u0190 10/24/1990 ~United Press International

SEOUL, South Korea (OCT. 24) UPI - South Korea informed North Korea Wednesday that it is not approving a proposed meeting of students at the truce village of Panmunjom to prepare for a series of joint Korean gatherings in Seoul.

Kim Sang-hyup, president of the South Korean Red Cross, telephoned his Northern counterpart Li Song-ho to relay the Seoul government decision.

''Our government authorities did not permit the proposed contact because the planned academic debates are not helpful in achieving mutual understanding and harmony and could adversely affect the ongoing dialogue and other planned exchanges between the South and the North,'' Kim said in his message.

''I inform you this decision at the request of our government, and hope you will convey this information to the student committee of your side.''

Student assocations of Hankuk University of Foreign Studies, Hanyang University and Kyunghee University, all in Seoul, sought government approval Tuesday, hoping to contact North Korean students at the truce village 35 miles to the north.

North Korea followed with a telephone message that five of its students will be coming to the truce site for a contact Wednesday morning.

Seoul officials said the government decided not to approve the Panmunjom contact because the proposed South-North students meetings in Seoul under the name of ''academic debates'' would touch on such issues as the abolition of South Korea's National Security Law and the release of certain prisoners, thereby causing social confusion.

#90297u0194 10/24/1990 ~United Press International

BANGKOK, Thailand (OCT. 24) UPI - The Vietnamese government has agreed to receive an official Vatican delegation next month in a step toward conciliation between the communist state and the country's best- organized religious minority, the official Vietnam News Agency reported.

''The Vietnamese government has agreed to the Vatican's proposal to send a

delegation to Vietnam in early November this year to discuss with the Vietnamese authorities issues of mutual concern,'' the agency said in a dispatch dated Tuesday.

It said the government, in a meeting with Catholic church leaders on Friday, also agreed to allow a delegation of senior Vietnamese priests to visit the Vatican for a papal audience. The government has often forbidden such visits or prevented individual church leaders from making them.

The agency quoted Bishop Nguyen Minh Nhat, president of the Catholic Episcopal Council, as thanking the government for ''its concern and assistance to the Catholic Church.''

The agreements were seen as moves toward healing relations that have been repeatedly injured since 1975 when communist forces captured southern Vietnam where most Catholics were staunchly anti-communist.

The communist regime has frequently accused Catholics of supporting anti-government groups and resisting government authority in its system of tightly-knit church communities.

The Vatican has complained about limitations on the building of new churches, harassment of worshipers, the arrests of some Catholics for anti-government activity and restrictions on the movements of some church leaders.

The church and the state also quarreled over canonization of 117 Catholic ''martyrs'' in 1989. The government argued that many of those canonized were not religious martyrs but people justly executed for working with French colonial forces to overthrow the indigenous government in the 18th and 19th centuries.

With an estimated 5 million adherents the Catholic church is one of the largest and best organized of Vietnam's religious minorities.

#90297u0228 10/24/1990 ~United Press International

SAN FRANCISCO (OCT. 24) UPI - Humphrey, the wrong-way whale who just seems to like the Bay Area, appears to be on his way after once again wandering in from the ocean and getting stuck in the mud.

Humphrey, a 40-ton endangered humpback whale who caught the attention of the world in 1985 when he led would-be rescuers on a 25-day sojourn through Northern California's inland waterways, was freed Tuesday after spending two days stranded in San Francisco Bay.

With a crowd of several thousand people looking on, including entire classes of schoolchildren, Coast Guard boats and volunteers in dinghies slipped a

harness over Humphrey's massive body and - with the help of high tide - pulled him tail-first out of the muddy tidal flat and into deeper water.

But the whale that just seems to like San Francisco played it true to form and headed the wrong way, beaching himself again on a muddy bank.

Peigin Barrett of the nearby Marine Mammal Center said rescue workers teased and prodded Humphrey, even covering his blow hole to irritate him into action. It didn't work.

They used 12-foot boards to try and pry Humphrey from the mud while a boat tried to tug the whale into deeper water using a tow line.

But Humphrey did not cooperate, said Denize Springer of the Marine Mammal Center. ''Usually when an animal is trapped it will coooperate to get out. He didn't.''

At one point, someone suggested that a crane be used, but the idea was scrapped.

At the next high tide Tuesday afternoon, volunteers pumped compressed air into the mud beneath Humphrey, lifting him up far enough so divers could slip the harness over him again. With scientists playing tape recorded whale-feeding songs, Humphrey was finally pulled free by a Coast Guard ship, pointed in the right direction and herded toward the Golden Gate and the open ocean.

A picnic atmosphere prevailed at Candlestick Point. One spectator, Bill Over of Pittsburgh, Pa., said he and a group of friends stayed over to watch the show after attending Sunday's 49ers-Steelers football game.

''I just want to tell my mother I'm watching the whale and not hanging out in a bar,'' he joked.

The mood of Humphrey's would-be rescuers - 18 men and women in wet suits, including a veterinarian, at least two biologists, a medical staff and volunteers - was more serious.

''The sad part is that he's endangered and an adult and capable of making more of them (humpback whales), but that's not what he's interested in,'' Springer said of the 10-year-old animal.

The big humpback, identified as Humphrey by the unique shape and markings on his belly and dorsal fin, was first spotted about daybreak Monday, stranded in 2 1/2 feet of water in the Bay. The sight of a beached humpback created a traffic jam of leviathan proportions as motorists slowed and gawked.

Volunteers sloshed water over Humphrey to keep his exposed skin wet. During the course of the day, the giant creature was draped with large towels that

were constantly soaked with water to keep him wet and his body temperature down.

A blood test showed Humphrey was healthy, but without the buoyancy of deep water, a creature so huge could suffocate under its own weight.

Humphrey became a world celebrity five years ago when he wandered through San Francisco Bay and into the shallow Sacramento River Delta, swimming to within 25 miles of the state capital. He was finally lured back out to sea by recorded whale songs.

This time, he left his group - or pod - along the coast and wandered into the Bay, perhaps looking for herring, according to whale researcher Kenneth Balcomb.

''Humphrey has a different way,'' Balcomb said. ''He is always odd man out.''

#90297u0271 10/24/1990 ~United Press International

(OCT. 24) UPI - Around the world, around the clock, the latest news from U-P-I...

.

Congressional Republican leaders held a late-night strategy session at the White House with President Bush, trying to work out a deficit reduction plan. Negotiators face a midnight deadline tonight... when a stopgap funding bill expires, possibly bringing on another government shutdown.

A Bush administration official who did NOT want to be identified says Elizabeth Dole will announce her resignation today. There are reports that the labor secretary plans to leave her post to take a top-level job with the Red Cross. There also is speculation that Dole plans to run for Congress.

Baghdad Radio says Iraq's National Assembly has agreed to free all French nationals, following a request from Iraqi President Saddam Hussein. About 350 French hostages are believed to be in Iraqi custody. The report says the French citizens are now free ''to leave or stay in Iraq.''

Israeli Prime Minister Yitzhak Shamir says a surge in anti-Israeli violence is a temporary phenomenon. Shamir says the bloodshed- in his words- ''will last only a few days.'' Yesterday, two Arabs were killed, one in a possible revenge attack by an Israeli... and four Jews were wounded by Palestinians.

G-O-P officials are calling on Ohio Representative Donald Lukens to resign after new allegations of sexual misconduct. Lukens is to appear today before the House Ethics Committee, which will investigate allegations that the Republican lawmaker made unwanted sexual advances to a congressional employee.

-30- 1738

#90297u0281 10/24/1990 ~United Press International

(OCT. 24) UPI - The shuttle Atlantis will undergo a fuel test this morning at Cape Canaveral. NASA managers say they are confident that the two-BILLION-dollar spaceplane will pass the test considered critical for launch to put a spy satellite in orbit. Atlantis is expected to take off around November 10th.

Philippine officials say heavily armed men killed a policeman and a driver and set 14 vehicles on fire today during a general strike called to demand pay hikes. Defense Secretary Fidel Ramos blamed leftist rebels for the disturbances, but added that the situation in the country is basically normal.

Pakistanis head to the polls today in nationwide elections viewed as a referendum on a presidential decision to dismiss the government of Benazir Bhutto. Voters are choosing 217 National Assembly members to replace the assembly dissolved with Bhutto's departure.

The second trial stemming from last year's brutal beating and rape of a jogger in Central Park continues this morning in New York. Two witnesses were unable to identify one of two defendants yesterday as being part of the gang that attacked joggers and cyclists in the park.

A Cornell University student is hospitalized in satisfactory condition... but has a racoon to thank for NOT being in worse shape. Officials say Lisa Nelson slipped on a rain-slicked trail, falling more than 75 feet into a gorge in Ithaca, New York. Nelson landed on a soft, plump racoon... who is recovering at an animal shelter.

#90297u0313 10/24/1990 ~United Press International

(OCT. 24) UPI - Flooded rivers receded in the Middle Atlantic states Wednesday but the storm that drenched the region pushed north, soaking New York and New England, while fog covered parts of the South.

The Saddle River in north central Pennsylvania reached its banks Wednesday following 2 inches of rain and sections of the Saw Mill and Hutchinson River parkways in New York City's northern suburbs were closed due to flooding in the adjacent rivers.

To the north, a flood warning was in effect for New York's Champlain Valley and for all of Vermont as runoff from extended rains continued to push rivers and streams toward their banks. Fields and basements were flooded by swollen

rivers in western New York state.

Fog was the main problem to the south Wednesday as visibility was cut to near zero in a large part of Kentucky and in Mississippi.

In Kentucky, visibility was near zero in several parts of the state, and was a half mile in Louisville and Fort Knox. Fog also was reported in south central Indiana.

Fog blanketed most of Mississippi except for the delta with visibility in Jackson and Meridian reported down to 1-8 mile or less.

Cool temperatures and clear skies covered the northern Midwest as lows in Chicago dipped into the 30s and highs only were in the 50s. Temperatures only hit the 50s in Ohama, Neb.

High clouds and light winds swept into the Northwest, with temperatures in the 40s.

The nation's hot spots were located in the Southwest and Southern California, where temperatures pushed into the 90s in Los Angeles and in the southwestern deserts.

#90297u0318 10/24/1990 ~United Press International

BEIJING (OCT. 24) UPI - The loosening of the two-year-old austerity program is reviving China's economy, but mounting financial loses continued in industries hobbled by weak markets and inefficiency, the government said Wednesday.

The report by the State Statistics Bureau on the first nine months of 1990 indicated China has slashed last year's record inflation and reversed this year's economic stagnation, but remains unable to solve historic structural problems.

The bureau report said gross national product, the total output of goods and services, was $255 billion between January and September, 2.7 percent higher than the same period last year. Growth for all of 1989 was 3.9 percent.

National industrial production grew 5 percent between July and September over the same period last year, an improved pace on the thin 2.2 percent growth recorded in the first six months. Average growth for the first three quarters was 3.1 percent.

The sweeping austerity imposed in September 1988, which centralized spending authority and slashed credit, virtually stalled industrial output early this year until the government injected funds and rolled back some of the program's

tight controls.

''The national economy is heading toward a more favorable direction,'' said State Statistics Bureau spokesman Zhang Zhongji.

Further, he said, ''after two years of rectification and adjustment, we have made progress in controlling inflation.''

Inflation was 2.3 percent in the first nine months, the report said, the lowest in five years.

The austerity program was designed to trim record price hikes that peaked at nearly 30 percent and to restrain breakneck growth ignited by a decade of free-market economic reforms.

But Zhang acknowledged the austerity's flattening of market demand, combined with long-term inefficiency and poor management of industries, had dramatically trimmed profits and taxes and left the government again in deficit spending.

In the first three quarters, he said, profit tax revenues from state- owned enterprises dropped 21.5 percent and profits plunged 57.9 percent, while deficits run by enterprises increased to leave them awash in red ink.

Zhang said one-third of state enterprises were running at a loss in the first nine months, with the total losses at $4.25 billion, twice that of the same period last year.

Inventories of unsold goods have swollen further, he said.

''Since the beginning of this year, the situation of enterprises running at a loss is quite severe,'' Zhang said, blaming the sluggish market and ''not very good'' management.

The government makes up for such losses through subsidies to the notoriously money-losing state industries and to urban residents in the form of price subsidies.

Total government revenue increased 13.7 percent, but total spending increased more, by 16.8 percent, in the first three quarters, the bureau report said.

Zhang said the government budget deficit would not greatly exceed the target of nearly $2 billion for 1990, possibly rising to $2.12 billion.

TOKYO (OCT. 24) UPI - Japanese soldiers could supply ammunition to U.S.-led

forces in the Gulf if the government's U.N. Peace Cooperation bill passes, legislators were told Wednesday, after opposition parties ended a one-day boycott.

During questioning in a special committee of the House of Representatives, Foreign Ministry officials testified that the bill would permit transport and supplying of any kind of ammunition or weapon, according to televised excerpts.

However, Foreign Minister Taro Nakayama rose to say that the government would not place its forces in a combat zone, so there was no danger of them becoming involved in fighting.

Japanese Socialists, who are leading the drive to defeat the bill, declared themselves unsatisfied with the government's position.

A vote on the bill is expected before the scheduled end of the session on Nov. 10.

TIRANA, Albania (OCT. 24) UPI - Albanian President Ramiz Alia Wednesday urged the Balkan states to bury their age-old differences in opening the first diplomatic conference hosted by Europe's last bastion of orthodox Marxism in a major stride out of 45 years of isolation.

''A new vision is needed, not only for the promotion of ... Balkan cooperation but also for its role in European cooperation, too,'' the communist leader told the foreign ministers of Greece, Yugoslavia, Bulgaria, Romania, Albania and Turkey.

Building on ongoing moves to end Albania's self-imposed isolation since the end of World War II in 1945, Alia said the six nations should work to find common areas of cooperation and resolve long-standing differences through the creation of a zone of ''peace and security.''

He warned unless such steps are taken, ''life has shown that any delay in the solution to these problems entails the evil of their further deepening and exacerbation.''

Alia said it was incumbent upon the nations of Western Europe and the Soviet Union, long involved in fanning Balkan disputes for their own political ends, to help the region overcome its myriad economic and political problems.

''It should be believed that they, whether in the West or in the East, understand that they have much to do towards our peoples,'' he told the meeting, for which his regime granted visas to some 90 foreign correspondents, the most ever allowed since the 1944 communist takeover of the tiny nation of

3.2 million.

The country has never before hosted an international diplomatic conference, signaling the largest opening yet to the outside world.

Uniformed officers and members of the nation's feared secret police were deployed in large numbers around the area.

The two-day meeting is only the second held since 1945 by Greece, Turkey, Albania, Yugoslavia, Romania and Bulgaria, nations that have feuded and fought for hundreds of years, often manipulated by major powers for their own ends.

The foreign ministers were to examine a range of areas in which the Balkan states might cooperate, including transportation, trade, communications, the environment, agriculture and tourism.

They were expected to avoid the deeply contentious problems that have persistently dogged their relations, particularly the thorny issue of national minorities.

Stretching from southeast Europe to Asia, the Balkans are home to 130 million people from almost two dozen ethnic groups and three major religions, and disputes regarding the treatment of each other's minorities exist between most of the states.

The first Balkans cooperation conference was convened in 1988 in Belgrade, a year before the region was shaken by the pro-democracy wave that swept Eastern Europe, unseating governments in Romania and Bulgaria and stoking anti-communist sentiments in Yugoslavia.

The resulting power vacuums have prompted influence-hungry politicians to exploit ethnic divisions, fueling differences between Yugoslavia's Serbian Republic and Albania over Kosovo, Bulgaria, Yugoslavia and Greece over Macedonia, and Bulgaria and Turkey over Sofia's treatment of its Turkish minority.

But the changes in Eastern Europe and the continent's move toward greater cooperation also had a major impact on Albania, with news of the upheaval carried over its barbed wire borders by Italian and Yugoslav radio and television broadcasts.

The regime is also beset by deteriorating economic problems, and in an apparent move to avert domestic unrest, embarked on a series of limited reforms, including easing restrictions on travel and religion and legalizing foreign investments.

Alia has also moved to end Albania's isolation, seeking participation in the Conference on Security and Cooperation in Europe and requesting observer

status in the Helsinki human rights organization.

Last month, Albania resumed diplomatic relations with the Soviet Union severed in 1961 as a result of the Sino-Soviet split. Tirana is negotiating with Washington on establishing diplomatic ties for the first time.

BERN, Switzerland (OCT. 24) UPI - Switzerland reported Wednesday a 3.7 percent year-on-year rise in industrial production in the first half of 1990.

The government said the biggest increase - 9.8 percent - was recorded by the machine industry, followed by rises of 7.2 percent and 5.7 percent in the woodworking and watchmaking sectors, respectively.

Production declined 1.2 percent and 0.8 percent, respectively, in the paper and textile industries, however.

(OCT. 24) UPI - Issues on the Tokyo Stock Exchange ended a seven-day rally Wednesday in what analysts described as an orderly retreat from swiftly scaled heights.

The key Nikkei Average of 225 selected issues, which gained 589.37 points Tuesday, fell 421.42 points - or 1.7 percent - to 24,876.88.

The broader-based Tokyo Stock Exchange Price Index of all listed sahares, which added 1.28 points Tuesday, dipped 18.08 points to 1, 841.48.

Volume continued to ease as an estimated 500 million shares changed hands, compared with 566 million Tuesday.

Elsewhere in Asia, profit taking and losses in New York and Tokyo dragged stock prices lower on the Hong Kong Stock Exchange in heavy trading.

The Hang Seng Index, which gained 65.67 points Tuesday, fell 39.15 points, or 1.27 percent to 3,042.08.

In Singapore, stocks edged higher on the Singapore Stock Exchange as local and foreign investors curbed early profit taking.

The Straits Times Industrial Index, which climbed 36.67 points Tuesday, inched up 1.05 points to 1,210.95 for its eighth successive gain. The broader-based All Singapore Index rose 0.59 points to 334.98.

Volume amounted to around an estimated 53.9 million shares, compared with 88.6 million shares changing hands Tuesday.

In Bangkok, stock prices rose sharply higher in active trading on the Thiland Stock Exchange in reaction to slumping world oil prices.

The Securities Exchange of Thailand Index, which climbed 31.17 points Monday, gained another 26.02 points to 709.35.

Markets in Thailand were closed Tuesday for a national holiday.

Volume amounted to around an estimated 4 billion shares, compared with 3 billion shares changing hands Monday.

Elsewhere around the region, in Seoul, stocks closed higher on the Korean Stock Exchange. The Korean Composite Stock Index, which climbed 32.18 points Tuesday, added another 31.22 points to 796.77 for its seventh consecutive gain.

In Manila, stocks closed higher on the Manila Stock Exchange. The Manila Composite Stock Index of 25 selected issues rose 18.16 points to 573.16.

In Australia, stocks closed slightly lower in moderate trading on the Sydney Sharemarket.

The All Ordinaries Index, which climbed 18.5 points Tuesday, eased 6.4 points to 1,376.7.

Volume amounted to around an estimated 55.3 million shares, compared with 129.5 million shares changing hands Tuesday.

In Wellington, stocks retreated on the New Zealand Stock Exchange in light trading.

#90297u0534 10/24/1990 ~United Press International

WASHINGTON (OCT. 24) UPI - Orders for durable goods plunged a surprising 1.7 percent in September to $124.9 billion for the second straight monthly decline the Commerce Department reported Wednesday.

Most private economists had expected a drop of 0.2 percent in orders, with fewer orders for new cars, trucks and vans held up by strong demand for commercial airliners.

Not counting transportation, orders were up 0.3 percent last month, a government spokesman said.

September's 1.7 percent decline in orders for durable goods - expensive items

made to last three or more years - follows a revised decrease of 0.8 percent in August and an increase of 2.7 percent in July.

The weak demand for new orders for durable goods was across the board in September, with only non-electrical machinery and non-defense capital goods registering gains of 5.4 percent and 6.3 percent, respectively.

Orders for primary metals were off 0.8 percent in September, down 7.7 percent for electrical machinery, off 6.8 percent for transportation equipment and down 9.6 percent for defense capital goods.

Not counting defense hardware, total orders for durable goods were down 1.1 percent last month, the Commerce Department said.

Shipments of durable goods, meanwhile, were off 3 percent in September after gaining 2.8 percent in August and falling 1.7 percent in August, according to the monthly data compiled by the department's Census Bureau.

The category ''motor vehicles and parts, which is quite volatile between months during the third quarter model changeover period, accounted for most of the decrease,'' the government report said.

Unfilled orders were unchanged after slipping 0.3 percent in September and advancing 0.6 percent in July.

#90297u0543 10/24/1990 ~United Press International

BONN, GERMANY (OCT. 24) UPI - Chancellor Helmut Kohl met with party leaders Wednesday to discuss the fate of some 400 Germans being held in Iraq and Kuwait, amid growing criticism that the government is doing little to free the hostages.

After the hourlong meeting, requested by Social Democratic opposition leader Hans-Jochen Vogel, Kohl and members of his center-right coalition agreed to continue discussions next Monday.

In the interim, the chancellor plans to attend a European Community summit in Rome, which will deal in part with the Persian Gulf crisis, said Rudolf Seiters, a senior aide to Kohl.

The politicians also discussed the possibility of former West German Chancellor Willy Brandt meeting with Iraqi President Saddam Hussein, Seiters said, adding that the government would not comment on Brandt's plans until after the EC summit.

But Kohl said in a television interview Tuesday night that he did not approve of private intitiatives in dealing with the hostage crisis.

''I am opposed to any action that would involve stepping out of the international community,'' Kohl said.

Brandt has been asked to go to Baghdad by both Iraqi officials and the approximately 400 Germans held in Iraq and Kuwait since Saddam's Aug. 2 invasion. He met late Monday with the Iraqi ambassador in Bonn, but refused to comment on the content of their discussion.

''We are seeking a high degree of involvement'' in decision-making on these issues, said Oscar Lafontaine, Kohl's Social Democratic challenger in the Dec. 2 national elections.

He said Brandt would make his own decision about going to Iraq, but that the SPD was seeking a common position with the government on the hostage issue.

#90297u0565 10/24/1990 ~United Press International

(OCT. 24) UPI - An administration official says the highest-ranking woman in the Bush cabinet- Labor Secretary Elizabeth Dole- will announce her resignation today. She would be the first person to quit the Bush cabinet. Her husband, Senator Robert Dole, said his wife and President Bush have a meeting scheduled today. There has been speculation that she may run for the Senate. Another report says she will take a job with the Red Cross.

Senate Republican leader Robert Dole and House Republican leader Robert Michel met with President Bush last night to discuss the budget. A plan has to be enacted today or the government will technically go broke tonight. Taxing the rich has been a barrier to agreement. Democrats oppose a Republican plan to raise taxes on the rich by limiting their deductions. The Democrats want a surtax on millionaires' income.

New allegations of sexual misconduct have been made against Ohio Representative Donald Lukens. Fellow Republicans are asking him to resign. He is to appear today before the House Ethics Committee. Lukens, a lame-duck congressman, was convicted last year of having sex with a teen-age girl. The new charges involve making sexual advances to a congressional employee. House Republican leader Robert Michel says Lukens may be expelled and lose his pension if he does NOT resign.

Iraq freed 51 Western hostages yesterday- 37 British and 14 American. Baghdad Radio also says Iraq's National Assembly agreed to free all French citizens. A plane arrived in London's Gatwick Airport this morning with the British freed hostages. The Americans flew into Joradan. An official of a group of Americans of Iraqi origin said Iraqi President Saddam Hussein will free all the Americans if President Bush promises NOT to attack.

#90297u0567 10/24/1990 ~United Press International

(OCT. 24) UPI - Ethnic violence has been spreading in Israel. Two Arabs were killed yesterday, one near the Gaza Strip by a gunman in a car. An anonymous caller later said the killing was in revenge for Sunday's killings of three Israelis by an Arab. Trying to stop the violence, Defense Minister Moshe Arens ordered the West Bank and Gaza Strip sealed off indefinitely.

The Senate has turned down a proposal to save the jobs of northwestern loggers and mill workers who might be thrown out of work by the effort to protect the northern spotted owl. Senator Bob Packwood, an Oregon Republican, offered the measure. It was defeated 62-34. Packwood's proposals would have eased logging restrictions required when the owl was classified as a threatened species.

A strong earthquake jolted northern California and Nevada last night. The quake registered five-point-seven on the Richter scale. There were NO immediate reports of damage. The earthquake was felt in Sacramento, Fresno, San Francisco and Reno, Nevada. In Lake Tahoe, Nevada, casinos gamblers were knocked off their chairs. A sheriff's deputy in Bridgeport, California, said- ''It rolled and it lasted about 45 seconds.''

Humphrey the whale is free again after being stuck for two days in a muddy tidal flat in San Francisco Bay. At high tide yesterday, volunteers pumped compressed air into the mud under him and lifted the whale so divers could slip a harness around him. A Coast Guard ship then pulled him free. In 1985, the same whale become lost in inland waterways of northern California for 25 days.

#90297u0632 10/24/1990 ~United Press International

NEW YORK (OCT. 24) UPI - The dollar was mostly lower Wednesday in moderate trading in New York against key foreign currencies following a worse-than-expected report on U.S. durable goods for September. Gold was mixed.

The Commerce Department reported the new factory orders for U.S. durable goods fell an unexpected seasonally adjusted 1.7 percent in September from the preceding month.

New Factory orders for durable goods plunged to $124.9 billion for the second straight monthly decline, after falling a revised 0.8 percent in August to an adjusted $127.05 billion and rising an unrevised 2.7 percent in July to an adjusted $128.09 billion.

Most economists had expected a drop of 0.2 percent in new orders.

Analysts said the report was worse-than-expected but took second place to the worries over the lack of a concrete U.S. budget package.

Traders in New York quoted the dollar at 1.5169 German marks, down from 1.5180 Tuesday, and at 128.43 Japanese yen, up slightly from 128.15.

In earlier trading in Asia, the dollar ended higher against the Japanese yen closing at 128.38 yen, up 1.25 from 127.13 yen on Tuesday.

Foreign exchange analysts said the dollar rallied on buying triggered by rumors the Federal Reserve Bank of New York had purchased dollars for the yen late Tuesday.

Major investors such as life insurance firms and foreign exchange banks sold the yen to purchase the dollar, the analysts said.

Elsewhere in Asia, the dollar closed lower in Hong Kong at 7.7850 Hong Kong dollars, dwon from 7.7862 while in Singapore, the dollar closed higher at 1.7125 Singapore dollars, up from 1.7000.

In Europe, the dollar began the day lower in Frankfurt at 1.5180 German marks, down from 1.5232 on Tuesday.

In Zurich, the dollar opened lower at 1.2785 Swiss francs, down from 1.2820.

In London, the British pound dropped slightly against the dollar, opening at $1.9445 compared with $1.9460 on Tuesday.

Elsewhere in Europe, the dollar opened unchanged in Paris at 5.0695 French francs.

In Brussels, the dollar opened at 31.2850 Belgian francs, up slightly from 31.24, but eased in Milan to 1,129.30 Italian lire, down from 1, 137.

On the bullion markets, gold opened $2.50 an ounce lower in Zurich at $370 but opened 50 cents higher in London at $372.50.

The London morning gold fixing was $371.10, off 90 cents from Tuesday's close.

In earlier trading in Asia, gold closed at $371.65 on the Hong Kong Bullion Exchange, up $1.10 from Tuesday's close.

Silver opened 5 cents higher in Zurich at $4.25 an ounce and opened 5 cents higher in London at $4.26 an ounce.

In early trading on New York's Comex, a 100-troy-ounce gold futures contract for October delivery opened at $371.90, up 70 cents from Tuesday's close. A 5,000-troy-ounce silver futures contract opened at $4.179, off 4 cents an ounce.

#90297u0681 10/24/1990 ~United Press International

DALLAS (OCT. 24) UPI - Southland Corp. said it filed a bankruptcy petition and reorganization plan Wednesday under Chapter 11 of the U.S. Bankruptcy Code.

The company said the filing was made in the U.S. Bankruptcy Court for the Northern District of Texas, Dallas Division. Southland said it received from its debt holders and equity holders enough votes for the bankruptcy court to confirm a prepackaged reorganization plan.

Also, a syndicate of lenders agreed to provide Southland with up to $400 million in debtor-in-possession, or DIP, financing, the company said. Subject to court approval, Southland intends to use the DIP funds as working capital to purchase necessary inventories and to continue the company's other normal operating activities.

The bankruptcy filing will let Southland reduce its debt on the balance sheet, and also have important cash to put into its stores for remodeling and upgrading inventory, Southland spokeswoman Cecilia Norwood said.

Regarding voting on the prepackaged reorganization plan, Southland said about 89 percent of holders the outstanding principal amount of debt securities and about 90 percent of holders of the outstanding shares of preferred stock decided to accept the plan.

In Chapter 11 bankruptcy cases, confirmation of a prepackaged plan requires acceptance from debt holders constituting at least two-thirds of the dollar amount and a majority in number of those who vote on the plan, and from holders of two-thirds in amount of each class of equity securities who vote,

the company said.

Southland said it asked a bankruptcy court hearing for the confirmation of the prepackaged reorganization plan be scheduled for Dec. 10, 1990.

If confirmed, the plan would give Southland security holders about 25 percent of the company's common stock. Also, Southland bondholders would receive new notes and, in certain cases, cash, the company said.

Current common stockholders would retain about 5 percent of the common stock. The terms of the prepackaged plan, if confirmed by the bankruptcy court, would apply to all Southland security holders.

Southland yesterday said it entered into a new stock purchase agreement with Ito-Yokado Co. and Seven-Eleven Japan Co., its long- standing business partners in Japan.

#90297u0687 10/24/1990 ~United Press International

MOSCOW (OCT. 24) UPI - Argentine President Carlos Saul Menem arrived in Moscow on Wednesday for a working visit to seek ways of further strengthening his country's extensive ties with the Soviet Union.

Foreign Minister Eduard Shevardnadze met Menem at Moscow's Vnukovo Airport, where the red Soviet flag with its hammer-and-sickle emblem and the blue-and-white Argentine banner were displayed.

''Soviet-Argentine relations are on the rise,'' the official Tass news agency said. ''One can express hope that the visit by the Argentine president will help strengthen them still more.''

Menem took office July 1, 1989, following his election triumph over former President Raul Alfonsin, whose defeat was partly caused by an economic crisis including hyperinflation that sparked a week of rioting and forced the government to declare a state of siege.

Argentina is the Soviet Union's largest trading partner in South America and a chief supplier of grain to Moscow, which imports more than two-thirds of all Argentine agricultural products sold abroad. At the same time, Argentina is a major market for Soviet machinery.

The two countries agreed in 1986 to a five-year annual exchange of 4.5 million tons of grain for $500 million worth of Soviet industrial equipment.

The two sides in past years played down strong ideological differences, with Moscow soft-pedaling years of repressive anti- communist rule in Argentina before Alfonsin's 1983 election and Buenos Aires offering muted criticism of

the Soviet invasion of Afghanistan.

Argentina ignored the U.S.-led grain embargo of the Soviet Union in 1980 after the 1979 Soviet invasion of Afghanistan.

PHILADELPHIA (OCT. 24) UPI - Sears, Roebuck & Co. is going ahead with closing its northeast Philadelphia catalog-distribution center despite a dispute with a labor union, it was reported Wednesday.

Sears recently issued pink slips to more than 300 non-union employees who will be out of work Dec. 11, the Philadelphia Inquirer reported. In all, 1,800 jobs out of 2,500 have been eliminated since March.

Sears hoped to convert the landmark, nine-story structure into a retail warehouse that would employ some 700 full- and part-time workers.

But a Pittsburgh arbitrator in July ruled that closing the distribution center violates the Teamsters Local 107 labor contract.

Sears contends that union workers were not laid off at the facility and will be used at the warehouse. But union officials said they weren't hired to do warehouse work.

Sears is appealing the arbitrator's ruling to federal court.

#90297u0710 10/24/1990 ~United Press International

JERUSALEM (OCT. 24) UPI - Authorities closed off the Israeli-occupied West Bank and Gaza Strip Wednesday to halt a wave of attacks on Israelis in a move that kept thousands of Palestinian workers from reaching their jobs in Israel.

Checkpoints were set up outside Jerusalem and along Israel's 1967 borders to turn back Palestinians from the territories. Arab residents of Jerusalem living in outlying neighborhoods also were stopped from entering the center of the city, Palestinian sources said.

The sweeping security measures Wednesday came a day after four Israelis were wounded in attacks by Arabs, and a Palestinian worker, returning to the Gaza Strip, was shot and killed in apparent revenge attack by extremist Israelis.

The upsurge in violence began Sunday when an West Bank Palestinian stabbed to death three Israelis in a quiet neighborhood of Jerusalem. The suspect allegedly said he wanted to avenge the deaths of 20 Palestinians killed by police during Oct. 8 riots on the Temple Mount.

Defense Minister Moshe Arens said the closure, which would last a few days, was intended to force Palestinians to consider how they would suffer if the anti-Israeli violence continued and to allow authorities to find ways of checking the identities of Palestinians entering Israel.

''What prevails among them are the fanatic and brutal drives, the lack of respect for human lives, which is typical not only for some of the Palestinian population in the territories, but also for some of the Arab countries, (and) leaders of Arab countries, like (Iraqi President) Saddam Hussein,'' Arens told Israel Radio.

The defense minister said the wave of violence should be viewed as part of the Arab-Israeli conflict of the last 100 years.

''I don't think that those attacks will stop in the next few months, or even in the next one or two years,'' he said. ''This is a confrontation with which we cope and cope very well. Our situation has greatly improved during those 100 years and will also improve in the next few months.''

The number of security forces in the territories and Israel also were increased. In Jewish settlements in the West Bank, small groups of soldiers were posted at entrances to prevent Arabs from entering.

Since Sunday, three Israelis have been killed and eight wounded in attacks by Palestinians, usually acting alone.

The attacks on Israelis have renewed a longstanding debate on when security forces can open fire at suspects. Police Minister Ronni Milo has instructed officers not to hestitate to open fire when citizens lives are in danger, an order he said conforms he said with standing regulations.

With thousands of Palestinian laborers confined to the territories, Israeli employers have flocked to employment centers to seek replacement workers, Israel Radio reported. Some employers said they were willing to hire recently arrived immigrants. The construction industry is especially dependent on the Arab workers.

In the West Bank refugee camp of Nur Shams, the body of Mahmoud Assaf, 50, a suspected collaborator, was found Wednesday, Palestinian sources said. Assaf, who was stabbed to death, had been missing since Sunday when masked youths took him from his home.

In East Jerusalem, Arab merchants closed their shops in protest following the death of a Palestinian who was shot in the Old City on the day of the Temple Mount riots. Salim Khaldi, 25, was shot near the Christian Quarter, reportedly by an Israeli civilian, Palestinian sources said.

A Jerusalem police spokesman denied that Khaldi had been shot by an Israeli civilian and said he had no details on the death.

#90297u0735 10/24/1990 ~United Press International

PARIS (OCT. 24) UPI - France said Wednesday it was taking all steps to repatriate its estimated 330 hostages in Iraq and Kuwait as soon as possible, again insisting the release was not the result of negotiations with Baghdad.

Foreign Minister Roland Dumas told the weekly Council of Ministers session Iraq's promise to release French hostages was the result of the firm policy followed by France in applying U.N. sanctions against Iraq since the start of the Persian Gulf crisis.

''There has been no negotiation, it is a unilateral decision on the part of Iraq,'' Dumas was quoted as telling the Council of Ministers meeting.

Political analysts in Paris said Dumas' comments were another effort by the government to quash suspicions the hostage release was linked to separate negotiations between Paris and Baghdad.

Earlier Wednesday, the government said it was immediately sending a special Airbus jet to Baghdad to pick up the hostages as part of the effort to force Iraqi authorities to release the captives as soon as possible.

But the Iraqi Ambassador to France, Abdel Razzak al Hachimi, said the French nationals were more likely to be flown back to France in about two days aboard an Iraqi Airways plane.

''There is no obstacle for their return at the moment, it is simply a matter of organization and we are waiting for an official representative of the French government,'' al-Hachemi said.

A French government spokesman, however, said unofficially that no government representative would be sent to Iraq to meet the hostages.

The Iraqi ambassador said extreme right-wing leader Jean-Marie Le Pen, who planned to leave for Iraq Wednesday, ''has not received a visa to go to Iraq and he will not be going to Iraq.''

Le Pen has opposed French involvement in the crisis from the outset, urging the Socialist government to recall the 5,500 ground troops it has deployed in Saudi Arabia and the United Arab Emirates.

The government estimates there are between 327 and 330 French citizens being held against their will in Iraq and Kuwait, including 67 who have been placed near strategic installations as a shield against military attack.

Citing sources in Baghdad, French television reported at midday Wednesday that a certain number of French hostages had indicated they prefer to remain in the Iraqi capital to complete their business affairs.

Tuesday night, Bernard Stasi, a leader of the opposition Social Democratic Party, quoted Prime Minister Michel Rocard as saying France will accept the hostages but will also ''remain faithful to the resolutions voted by the U.N.''

Most of the political opposition echoed Rocard's comments, with former President Valery Giscard d'Estaing saying ''if the French hostages are released so much the better, but we are worried about all the hostages, that is all the hostages from friendly nations.''

#90297u0741 10/24/1990 ~United Press International

CHICAGO (OCT. 24) UPI - USG Corp. said it will make significant reductions in its salaried workforce across the country because of deteriorating economic conditions.

The company Tuesday also reported a net loss in the third-quarter of $11 million compared with a profit of $9 million, or 16 cents a share, in the same period last year. Sales in the quarter ended Sept. 4 were down 4 percent to $538 million.

USG, a major producer of building materials, said the decline in sales in the quarter and the first nine months were due mainly to lower prices for gypsum wallboard.

The company employs 14,000 people nationwide, including 650 in its Chicago headquarters.

USG Chairman Eugene Connolly did not say how many people would lose their jobs but said the layoffs would begin immediately.

''The latest restructuring move should greatly strengthen our ability to weather the uncertain economic future all companies in the building industry now face,'' Connolly said.

USG spokesman Matthew Gonring said the move is aimed at improving the company's profitability and cash flow.

''Unfortunately, the restructuring we've announced is related to the earnings situation, but we've been in a restructuring phase since 1988 when we went through a recapitalization,'' Gonring said. ''We've endured downsizing since that time.''

He said the workforce was reduced from 21,000 to 14,000 during the past two years by selling assets and eliminating jobs. Of the 14,000 employees, about 5,000 are salaried workers.

''There will be reductions in Chicago and elsewhere,'' Gonring said. ''It's a difficult decision and we regret having to make it, but it's being brought on by the decline in housing, the savings and loan crisis and more recently the problems in the Mideast.''

He said the outlook for the fourth quarter is difficult to predict because weather and interest rates always are a factor.

(OCT. 24) UPI - Six British soldiers were killed this morning in two bomb explosions in northern Ireland. More than 20 people were wounded and one person is missing. The Irish Republican Army took hostages to force relatives to drive cars with the bombs to British checkpoints. The I-R-A said the drivers had worked for the security forces.

A Washington official says Elizabeth Dole plans to announce today she is resigning as labor secretary. The report can NOT be confirmed. But Dole's husband, Senator Robert Dole, says she and President Bush will meet today. There has been speculation she may run for the Senate or work for the Red Cross.

The House has passed a farm bill that slashes subsidy spending by 25 percent. If the deficit reduction plan is passed, the farm bill reduces subsidy spending to 41-BILLION dollars. But the bill also allows farmers the right to make up for lower subsidies by planting other money-making crops.

The Senate has approved legislation requiring installation at 40 airports of devices to detect plastic explosives. Final House approval is expected today. The devices would detect explosives such as those that blew up a Pan Am plane over Scotland in 1989. The bill was passed under pressure from families of the victims.

Officials say transportation was disrupted in the northern Philippines today on the first day of a general strike. Four bus companies suspended service. In a suburb of Manila, rebels stabbed a killed the driver and conductor of a bus. A rebel was killed in Bulacan province during an attempt to burn a bus.

#90297u0799 10/24/1990 ~United Press International
MOUNT VERNON, IL (OCT. 24) UPI - A slight earthquake measuring 3.5 on the Richter scale rattled Southern Illinois early Wednesday, awakening some residents but causing no major damage or injuries.

Spokeswoman Pat Jorgenson of the U.S. Geological Survey in Golden, Colo., said the epicenter was 10 miles north of Mount Vernon in Jefferson County. The tremor hit about 3:20 a.m., Jorgenson said.

Bob Stout, a sheriff's office dispatcher in Jefferson County, said the quake was strong enough ''to rattle the bars in the jail'' in Mount Vernon.

Stout said the sheriff's office had five calls about the quake and the Mount Vernon police said they received 50 calls.

The quake was felt as far away as the Illinois State Police District 13

headquarters in Du Quoin, said Jefferson County Sheriff's Deputy David Bowers.

''One lady called and said she felt something. Her house was shaking and her dog started barking,'' Bowers said.

The quake is likely to raise fears about a prediction that an earthquake might hit the New Madrid Fault the first week in December. The fault runs from near Marked Tree, Ark., into Southern Illinois and has been responsible for some of the most powerful earthquakes ever to occur in North America.

New Mexico climatologist Iben Browning, who predicted the devastating earthquake that hit the San Francisco Bay area last year, said he thinks there is a 50 percent chance of a major quake along the New Madrid Fault in the first few days of December.

The prediction has prompted many schools to close for that week and many local governments have held earthquake planning sessions for worried residents and canceled vacations for city workers.

#90297u0806 10/24/1990 ~United Press International

CHICAGO (OCT. 24) UPI - The former president of the Glen Ellyn Savings and Loan Association destroyed the tiny thrift by orchestrating a ''five- year white collar fraud scheme,'' a federal prosecutor charged Tuesday.

John Franklin Rosch, 52, is on trial in U.S. District Court for his alleged involvement in a string of multimillion-dollar loan frauds involving the Glen Ellyn thrift and other financial institutions in Illinois, Wisconsin and Texas.

In his opening statements, Assistant U.S. Attorney Steven Miller said the thrift collapsed in 1985 under the weight of bad loans ranging from $1.3 million for a horse farm to $9.6 million for a Florida marina.

''This man, John Franklin Rosch, destroyed a federally insured savings and loan association,'' Miller said. ''John Franklin Rosch presided over a five-year, white-collar fraud scheme.''

Rosch's attorney, however, argued that Congress was to blame for deregulating the thrift industry in 1980, thus forcing savings and loan institutions to turn to speculative real estate ventures to stay afloat.

Defense Attorney Rick Halprin said the government, through deregulation, shouldered the blame for the collapse of savings and loans throughout the United States.

Halprin said Rosch saved the Glen Ellyn thrift from going under during the recession of the early 1980s and its board of directors looked at him as a

savior because of his Florida land deals.

''If we're going to start putting in jail all of the bankers who made loans that went bad, there wouldn't be enough room in the state of Montana if you built a prison on (all of) it,'' Halprin said.

Seven other people indicted along with Rosch have pleaded guilty and are expected to testify against him.

#90297u0826 10/24/1990 ~United Press International

TOKYO (OCT. 24) UPI - Increased oil shipments from Iran and Saudi Arabia more than offset Japan's losses of Iraqi and Kuwaiti oil due to the Persian Gulf crisis with September imports rising 9.9 percent, the government said Wednesday.

''The losses in supply due to a trade embargo on Iraq and Kuwait were completely offset by increases in imports from Iran and Saudi Arabia,'' a spokesman for the Ministry of International Trade and Industry said.

September crude imports were 674.65 million barrels, an increase of 9.9 percent over a year ago, he said.

Iraq and Kuwait accounted for about 12 percent of Japan's oil imports before the U.N. embargo on their exports imposed in the wake of Iraq's Aug. 2 invasion of Kuwait.

The ministry said Saudi Arabia was the largest crude oil supplier in September accounting for 120.24 million barrels, up 36.8 percent over a year ago. Saudi Arabia accounted for 17.8 percent of the total imports, it said.

Imports from Iran surged 51.2 percent to 93.138 million barrels for a 13.8 percent share, up from 7.5 percent in August, the ministry said. Japan depended on the Organization of Petroleum Exporting Countries for 75.4 percent of its crude supply.

The ministry said Japan's refining of fuel oil from crude rose 22.4 percent over a year ago to 97.99 million barrels.

Imports of fuel oil declined 20.1 percent to 20.80 million barrels due to surging prices overseas, the ministry said.

Domestic sales of fuel oil climbed 10.8 percent to 110.59 million barrels, the ministry said.

Japanese companies Tuesday signed an agreement to secure energy imports from another OPEC nation - Indonesia.

Three companies - Tokyo Gas, Osaka Gas and Toho Gas - agreed with Indonesia's state-run Pertamina for imports of liquified natural gas over a 20-year period.

Japanese crude-oil imports in 1989 increased 8.2 percent over the year before

to a record 1.31 billion barrels.

The OPEC oil cartel accounted for 76.5 percent of the nation's total crude-oil imports last year.

#90297u0829 10/24/1990 ~United Press International

CONCORD, NH (OCT. 24) UPI - Most large New Hampshire banks have begun charging customers a transaction fee for the use of automatic teller machines, seeking to recover the costs of offering ATM service, the president of the state Bankers Association said Wednesday.

The fees, typically 75 cents per transaction, are charged by nearly all of the state's major banks when customers use ATM cards at machines other than those operated by their own bank. Transactions at a bank's own machines are still free.

The fees were imposed this year in New Hampshire for the first time. Previously, all ATM transactions were free of charge.

''If there's a cost, then banks have decided that they must charge,'' said Marcel Veilleux, president of the New Hampshire Banks Association. ''They can't afford to eat this stuff.''

New Hampshire's banking industry is in poor health, with all major institutions reporting losses of millions of dollars. Compounding the problem, Veilleux said, are new government regulations and reporting requirements, which drive costs up. He said bankers need income from service charges to offset those costs while remaining competitive with other financial institutions in accepting deposits and making loans.

An executive of one of the banks charging the fees agreed. Fleet Bank, a subsidiary of Fleet Norstar Financial Group of Rhode Island, began charging ATM fees in April.

''The way that the ATM system works today is the banks process transactions through a network,'' said Robert J. Hand, vice president of the marketing division at Fleet Bank. ''Each time a transaction is processed the bank incurs an expense.''

When the fees were first imposed, Hand said, there was ''some negative reaction'' from customers. But he said most customers seem to accept the fees.

One bank that has decided not to impose ATM fees is Dartmouth Bank, which has its headquarters in Hooksett. Dartmouth advertises free ATM use as a means of attracting customers.

#90297u0853 10/24/1990 ~United Press International
(OCT. 24) UPI - American and British nationals freed by Iraq headed home Wednesday but the international community stood firm against Baghdad, with Saudi King Fahd demanding complete withdrawal from occupied Kuwait.

The British Broadcasting Corp. said about 30 of 37 British hostages who flew from Baghdad to Amman, Jordan on Tuesday, arrived in London Wednesday to an emotional homecoming. Accompanying them was former Prime Minister Edward Heath who secured their release after meeting with Iraqi President Saddam Hussein.

Iraq also released 14 Americans and said all French hostages, numbering about 350, were free to leave the country.

By late Wednesday, the 14 Americans had left Jordan en route to the United States, a U.S. official in Amman said. The State Department said the Americans will arrive in New York ''this evening aboard a commercial'' flight, but gave no other details.

At least 1 Texan is among the 14 freed Americans. Houston engineer Lloyd Graham is due to arrive in New York where he will be met by his wife and other relatives, according to Graham's daughter, Stasia Marinelli.

Marinelli said, ''When he called and told us (he was free), that's when I believed it.''
--

Some diplomats and observers said the move by Saddam to free the French was an attempt to divide the Western alliance formed against Iraq following its Aug. 2 invasion of Kuwait.

King Fahd of Saudi Arabia was quoted by the BBC Wednesday as saying his country's stand in the gulf crisis was unchanged, despite remarks over the weekend by the Saudi defense minister that indicated the kingdom would consider a partial withdrawal of Iraq from emirate in order to maintain peace.

''The explicit and decisive stance declared by Saudi Arabia towards the Iraqi criminal aggression against fraternal Kuwait is firm, irrevocable, clear and unambiguous,'' Fahd was quoted as saying.

Defense Minister Sultan Bin Abdul Aziz hinted Monday that Kuwait should give Iraq two strategic gulf islands in return for a withdrawal from the rest of the country. The following day he said his remarks had been misinterpreted.

Fahd said Saudi Arabia, which has allowed hundreds of thousands of foreign troops to be deployed on its soil to counter further Iraqi aggression, demanded a complete and total withdrawal of Iraqi troops from Kuwait.

''The stance is not subject to any change or negotiations,'' he said.

In Tokyo, opposition parties ended a one-day boycott of a Parliamentary debate of a bill that would allow Japanese troops to be deployed overseas for the first time since World War II.

As debate continued, legislators were told Japanese soldiers could supply ammunition to U.S.-led forces under the U.N. Peace Cooperation Bill. Tokyo has pledged billions of dollars to the gulf effort, but has been under pressure to send troops to the region as well.

However, a poll published by a Tokyo newspaper Wednesday indicated only 13 percent of Japanese support the possible deployment of troops overseas.

In another development Wednesday, Egyptian President Hosni Mubarak headed to Qatar and Oman on his surprise tour of the gulf, which took him to Saudi Arabia Tuesday.

The weekly Al Mussawar magazine in Egypt said Mubarak had managed to convince the gulf states to cancel more than $7 billion in Egyptian debt in return for Cairo's strong support of U.S. policy in the gulf crisis.

The weekly said Saudi Arabia alone wrote off $4.2 billion in debt and pledged another $2 billion in developmental aid.

The U.S. Congress is also considering a request by the Bush administration to forgive $7.1 billion in Egyptian military debt, although the measure has yet to be approved.

Also Wednesday, the first group of 17,000 Vietnamese contract workers allowed to leave Iraq flew home via Turkey on flights orgnaized by a Geneva-based aid organization.

#90297u0862 10/24/1990 ~United Press International

WASHINGTON (UPI) President Bush's chief spokesman labeled as ''injudicious'' Wednesday comments by former Reagan political adviser Edward Rollins who advised GOP candidates to feel free to distance themselves from Bush on controversial issues.

Press secretary Marlin Fitzwater also rejected The Washington Post report that Bush was shunned on the New England campaign swing Tuesday by Republican congressional candidates who part company with him on taxes and civil rights.

Bush campaigned in Vermont for Rep. Peter Smith, R-Vt., in New Hampshire for Rep. Robert Smith, R-N.H., and in Connecticut for GOP congressional nominee

Gary Franks, a black city alderman, and Rep. John Rowland, who is running for governor.

Rollins, co-chairman of the National Republican Congressional Committee, has circulated a memo telling GOP candidates not to hesitate to separate themselves from Bush on a range of issues, the Post said.

The Rollins memo noted the ''precipitous'' drop in Bush's standing in the polls and the ''lack of a clear Republican position on taxes and spending.''

He told GOP candidates their failure to reverse the perceptions ''could fatally wound your campaign.''

''That's Ed Rollins,'' Fitzwater said. ''His comments were injudicious.''

Fitzwater insisted Bush ''had a great reception'' during his New England campaign swing.

In New Hampshire, the Manchester Union-leader newspaper greeted Bush with a cartoon on the front page that depicted a cartoon-face saying, ''Read his lips Mr. President. Go home and take your taxes with him.

He said Bush's polls, running 50 percent to 60 percent approval ratings ''were better than any president in the last 30 years.'' A Gallup survey last week showed his approval rating at 56 percent, down by nearly 20 points from a month ago.

''They're (the Republican candidates) are begging him'' to campaign for them, Fitzwater said.

The president embarks on a five-day West Coast campaign tour Thursday with stops in Arizona, California, Oklahoma and Hawaii.

After a couple of days at the White House, he will hit the trail again, winding up in Houston, Texas, on Tuesday, Nov. 6, Election Day, to vote.

#90297u0866 10/24/1990 ~United Press International

(OCT. 24) UPI - Police in Northern Ireland say two Irish Republican Army bombs exploded today, killing six British soldiers. The I-R-A claimed responsibility for the blasts that wounded more than 20 people and left one person missing. The actions were apparently staged to mark the fifth anniversary of the Anglo-Irish pact giving Dublin a greater say in Northern Ireland's affairs.

President Bush appears headed for victory in the final showdown between Congress and White House over the major civil rights bill of the session.

Senate backers of the legislation are hoping to override the president's veto today and send it to the House for a similar effort. But the prospects for overriding Bush's veto are NOT considered good.

NASA is expressing confidence that the shuttle Atlantis will pass a critical test today at Cape Canaveral. Engineers hope to prove that the ship is leak-free and ready for launch... more than four months after Atlantis was grounded by a tiny hydrogen leak. The space agency plans to ready Atlantis for launch around November 10th on a mission to put a spy satellite in orbit.

The giant defense contractor that makes the B-2 Stealth bomber is trying to shoot down a tiny Texas-based business. Northrop Corporation is taking legal steps to end John Hughes' application for a trademark for his business. Hughes is selling red, white and blue condoms in a cardboard package that looks like the Stealth bomber. But Hughes says there is a difference in products. In his words- ''the condoms perform better than the bomber.''

WASHINGTON (OCT. 24) UPI - The International Monetary Fund said Wednesday it has approved a loan of about $64 million to the government of Sri Lanka to help support the government's economic program.

The new loan brings to about $365 million Sri Lanka's outstanding financial obligations to the international lending agency.

CHICAGO (OCT. 24) UPI - Grain and soybean futures were mixed in choppy trading at midmorning Wednesday on the Chicago Board of Trade.

Corn and wheat were supported by follow-through buying in a continuation of Tuesday's late rally.

Wheat had additional support from news that Sri Lanka has been offered 400,000 tons of export bonus wheat, and that Morocco was in the market for 140,000 tons. The wheat basis was higher at the Gulf which contributed to the gains.

Favorable harvest weather limited the gains in corn and pressured soybean prices, along with the prospect of an increase in country movement as farmers run out of on-farm storage.

Traders look for heavy deliveries of November soybeans on Oct. 31, which is the first notice day. Liquidation and the lack of export business also weighed on soybean values.

The midmorning prices:

Corn Dec 2.32 3/4 up 1; Mar 2.42 1/4 up 1 1/4; May 2.48 up 1 1/4.

Soybeans Nov 6.14 off 1/2; Jan 6.29 1/2 up 1/4; Mar 6.43 1/4 off 1/2; May 6.56 off 1/2.

Wheat Dec 2.64 3/4 up 1 1/4; Mar 2.78 3/4 up 3/4; May 2.85 1/4 up 1/4.

Oats Dec 1.24 1/2 up 1/2; Mar 1.34 1/2 unch; May 1.41 1/4 unch.

FORT WAYNE, Ind. (OCT. 24) UPI - Local union leaders said a new furlough at the General Motors Corp. pickup truck plant should not have a major impact on the economy.

GM will shut down the plant for four weeks during the next two months to reduce inventories. A similar closing took place earlier in the year.

Under the labor contract between GM and the United Auto Workers, employees will receive about 95 percent of their regular pay during the layoffs.

''I don't feel it will have a significant impact,'' Randy Schmidt, president of UAW Local 2209, said Tuesday.

The factory has a $100 million annual payroll, employing 3,000 people overall, including 2,700 hourly workers.

PROVIDENCE, R.I. (OCT. 24) UPI - The Electric Boat division of General Dynamics appears to have a 50-50 shot at beating out a Virginia shipyard for the next Seawolf submarine contract, Sen. Claiborne Pell, D-R.I., said.

As recently as last week, it looked as though the contract would go automatically to the Newport News (Va.) Shipbuilding and Dry Dock Co. because of the efforts of its representatives in Congress.

But Pell, chairman of the Foreign Relations Committee, said Tuesday that a House-Senate Conference on U.S. defense spending has superceded those efforts by approving a provision that gives no preference to EB or Newport News in the contract award.

''EB should now be able to have at least an even chance of landing the second Seawolf contract,'' he said.

Competition for the Seawolf contract comes at a time when Electric Boat is scaling back its work force because of the sagging defense industry.

Nearly 600 employees received layoff notices this month and the company has warned that it may, at worst, have to halve its 23,000- member workforce by 1995.

Electric Boat has its headquarters in Groton, Conn., and maintains a plant at Quonset Point, R.I. About 7,500 Rhode Islanders are employed at the two facilities.

While the latest congressional action gives Electric Boat hope for snagging the contract, and saving local jobs, Pell said it does not give EB the competitive advantage that the company had hoped for.

EB had been seen by Rhode Island congressional members as more likely to receive the contract if it was bid competitively because it is building the first Seawolf and has already absorbed various start-up costs for the sub program.

But a stipulation was added to the defense authorization bill that negated the advantage, Pell said.

''My own view is that lower cost should be the paramount factor in the procurement,'' the senator said. ''But even if weight must be given to other factors, I would hope EB would prevail because of their long- established record of excellence.''

WASHINGTON (OCT. 24) UPI - Rep. Donald ''Buz'' Lukens, convicted of having sex with a teenage girl, resigned his House seat Wednesday rather than face new charges he fondled a Capitol elevator operator.

In a letter to Ohio Gov. Richard Celeste, Lukens, R-Ohio, said he was resigning ''effective immediately, for the good of the Congress and the integrity of the institution.''

Lukens had been ordered to appear Tuesday afternoon before the House Committee on Standards of Official Conduct, but obtained a 24-hour delay to weigh his options.

With his decision to resign, the committee loses jurisdiction over Lukens and does not need to take further action.

The Cleveland Plain Dealer reported Wednesday Lukens had decided to resign

rather than risk being forced out and stripped of his pension and other benefits.

The newspaper said a source close to the investigation said Lukens patted the elevator operator on her buttocks, rubbed her back and shoulders and gave her his business card, listing his home phone number and private office number.

One unidentified source said there may be a witness, a passenger on the elevator.

Another source told The Plain Dealer the woman became so frightened of Lukens last Wednesday that she asked her fiance to act as her bodyguard on the elevator.

''She felt as if she were a hostage in that elevator,'' the source said. ''She was humiliated and afraid because, after all, this was a member of Congress.''

On Tuesday, House Republican leader Robert Michel demanded Lukens resign or face loss of his pension.

The ethics committee, which had conducted a preliminary investigation last year into the sex conviction against Lukens, said in a statement Monday that since that inquiry ''the committee has received additional evidence indicating that Rep. Lukens may have made unwanted and unsolicited sexual advances to a congressional employee.''

The 12-member committee also stripped Lukens, 59, of some of his defense rights under House rules.

The panel voted that ''for the purpose of allowing this committee and the ... House to fully consider all issues before it concerning the conduct of Rep. Lukens, that pursuant to Rule 7, all time-frames provided under the committee's standing rules of procedure that apply to any statement of alleged violation that might be issued are hereby waived.''

Lukens' office issued a statement saying, ''My attorneys have advised me that since little or nothing is known about the new allegations, there will be no comment until we have more information.''

Lukens, who has served in the House from 1967 to 1971 and since 1986, was convicted in May 1989 in Franklin County Juvenile Court in Columbus on a charge of contributing to the unruliness of a minor for having sex with a 16-year-old girl.

Lukens, who did not testify or present any witnesses on his behalf, was sentenced to 30 days in jail, fined $500 and ordered to attend counseling for sex offenders.

The conviction was upheld by an appeals court and is now before the Ohio Supreme Court.

He refused repeated demands from Republican Party leaders that he resign, but he was defeated in a bid for re-election in the primary election in May, finishing a distant third in a four-man race.

In Columbus, Ohio Republican Party Chairman Robert Bennett again called on Lukens to resign.

''I think it's unfortunate that we have now another incident, assuming that to be true, and this is the first I've heard of it. I think that is unfortunate and I would again encourage Buz Lukens to resign his office.''

Lukens, a hardline conservative from Middletown in southwest Ohio, was once one of the brightest stars in the Republican Party.

As a young conservative, Lukens teamed with Rep. John Ashbrook of Ohio, William Rusher, editor of the National Review, Tennessee businessman William Brock, F. Clifton White of New York and other arch-conservatives to defeat the moderate wing of the Republican Party and nominate Barry Goldwater for president in 1964.

Lukens's 10-year marriage ended in divorce in 1983, and soon thereafter he was battling throat cancer, an ailment that left him scarred at the neck.

#90297u0977 10/24/1990 ~United Press International

NEW YORK (OCT. 24) UPI - A victim of a rampaging pack of toughs in Central Park testified Wednesday in the trial of two youths charged with attacking a woman jogger, identifying his blood-encrusted clothes.

John Loughlin, 43, a public school teacher, testified at the trial of Kharey Wise, 18, and Kevin Richardson, 16, but was not able to identify either Wise or Richardon as his attacker.

Robert Garner, a Briton, also testified that he was a victim of the ''wilding'' mob.

Wise and Richardon are accused of raping, beating and leaving for dead a 28-year-old investment banker in the upper reaches of the park on April 19, 1989.

Loughlin identified for the prosecution blood-encrusted army fatigue clothing he wore while jogging around the reservoir in the park, along with 11 glossy photographs of head injuries suffered at the hands of the gang.

Loughlin testified that he was running when he noticed the youths beating a person on the ground. He said one of the attackers shouted to him, ''What are you, some kind of vigilante? What are you looking at?''

Loughlin said it was the last thing he remembered before he was struck on the head with a hard object and awakened later covered with blood.

Two other victims of teen-aged marauders Tuesday were unable to identify the defendants as their attackers.

Investment banker David Lewis, 32, testified on Tuesday that he was jogging around the reservoir about 9:20 p.m. when a group of youths threw a rock past him and then struck him on the arm.

Lewis was asked by Wise's lawyer, Colin Moore, to look over at the short, muscular defendant on trial on 13 criminal counts stemming from the one-hour rampage.

Moore then asked Lewis if he could identify Wise as one of his attackers.

Lewis said he could not, explaining that he did not take time to study his attackers' faces.

Earlier Tuesday Moore posed the same question to Michael Vigna, 31, an advertising executive who was riding his bicycle through the park when he was confronted by a gang of teens, one of whom swung a fist at him.

Vigna also was unable to identify Wise as one of his attackers.

#90297u0990 10/24/1990 ~United Press International

(OCT. 24) UPI - Labor Secretary Elizabeth Dole, the highest-ranking woman in both the Bush and Reagan administrations, has a very long resume, including federal service under six presidents, two Cabinet posts, several other high-level jobs and active membership in both the Republican and Democratic parties.

Her tenure as secretary of labor in the Bush administration has also paralleled a critical era for organized workers as the labor movement in the United States moved to reassert itself after nearly a decade of Reagan-era anti-union sentiment.

An activist secretary, Dole received high marks for her efforts to settle the bitter dispute between the Pittston Coal Co. and striking members of the United Mine Workers union and for launching a highly publicized campaign against violations of the child labor law.

But she was unable to bring those same skills to the ongoing strike against Eastern Airline and the violence-marred strike against Greyhound Inc.

Dole resigned as Bush's labor secretary to head up the American Red Cross. There has been speculation that the consummate Washington insider was leaving the administration to prepare for a possible run for the Senate in 1992 from her native North Carolina.

''Secretary Dole brings to this new assignment in the Cabinet a wealth of knowledge that would be hard to match,'' President-elect Bush said when he made the surprise Christmas Eve 1988 announcement.

Just 15 months before, Dole had resigned as secretary of transportation to lend a hand to the presidential campaign of her husband, Sen. Robert Dole, R-Kan., who was locked in a bitter struggle with Bush for the Republican nomination.

"She is the greatest resource we have in our campaign," Dole said at the time.

Together, the Doles are perhaps the best known and most influential husband

and wife team in Washington.

She addressed the Republican National Convention immediately following her husband in August 1984 - one of a series of joint appearances that cast the Doles as a sort of Washington vaudeville team. They trade barbs and alternate in the role of straight man.

And when Bush tagged her for the Cabinet, the Kansas senator remarked wryly, ''It looks like TV dinners for me again, but I'll probably still vote for her confirmation.''

Mrs. Dole, also known for her sense of humor, has been quoted as saying their childless marriage has been enriched by their two careers. ''He boils a good hot dog and he's pretty good at hamburgers,'' she said, but noted he refuses to make anything ''that calls for more than one ingredient.''

Beneath the witty exterior, however, lies what Mrs. Dole's home state newspaper, The Raleigh News & Observer, once described as a ''mythical Southern figure come to life, a steel magnolia.''

Dole's political career began as a Democrat in the administration of Lyndon Johnson, where she served as an assistant to the Commission on Consumer Affairs head Betty Furness. She continued under Richard Nixon's consumer affairs adviser, Virginia Knauer, and in 1973, Nixon apppointed her - the only woman - to the Federal Trade Commission.

''I want to serve because of my professional qualifications, not because I'm a woman,'' she once said. ''I think of myself as a professional first, not 'the woman.'''

Dole was born ''Liddy'' Hanford in Salisbury, N.C., July 29, 1936, the Southern belle daughter of a wealthy florist. At Duke University, she was both Phi Beta Kappa graduate and May Queen. She earned a master's degree and her law degree from Harvard University.

She married Robert Dole in 1975. Eight months after their wedding, Gerald Ford chose Dole as his vice presidential running mate, and Elizabeth Dole took a leave of absence from the FTC to help him campaign.

In 1982, Regan named her transportation secretary.

As secretary she presided over some of the most turbulent years in U.S. aviation history that saw public confidence shaken in airline safety and angry over deteriorating service.

Dole set policy for the nation's aviation, highway, railroad, mass transit and maritime resources and was the first woman to head a branch of the armed services - the Coast Guard.

She also advocated requiring air bags or self-buckling safety belts for new automobiles and got her way in an administration not disposed to more government regulation.

She announced her resignation on Sept. 14, 1987, so that she could devote full time to Sen. Dole's presidential campaign.

#90297u0993 10/24/1990 ~United Press International

BONN, Germany (OCT. 24) UPI - German deputies Wednesday debated the financial dealings of the former East German parties amid allegations the renamed Communist Party had embezzled millions of dollars.

During a heated debate in the Bundestag, the German parliament, the Social Democratic Party urged the government to make public the financial wealth of the East German parties which were once closely allied with the ruling Communist Party.

Social Democratic deputy Herta Daeubler-Gmelin said the government should not only investigate the renamed Communist Party's fortune, but also the accounts of the former Communist satellite parties, including the Christian Democratic Union.

Recent reports alleged the Party for Democratic Socialism, formerly the East German Communist Party, had illegally transferred several million dollars worth of Deutsche marks to foreign accounts, including $66 million to Moscow.

The allegations led to a police raid on the PDS headquarters in Berlin and another party office in Halle last week.

PDS chairman Gregor Gysi had condemned the raids ''as absolutely unjustified'' and filed an official complaint with the Berlin authorities.

He said the PDS considered the payments to be regular party costs, which did not require official permission. Under German law, a party needs to get the permission from an independent commission if it wants to transfer money from its accounts.

Volker Ruehe, Christian Democratic deputy and close aide to Chancellor Helmut Kohl, called it an affront that Gysi portrayed himself as the victim of state prosecution.

''You belong to a party of assailants and cannot be counted as a victim,'' Ruehe said during the debate.

Ruehe sharply rejected Social Democratic allegations that the Christian

Democratic party was using money from the former East German Christian Democratic party to campaign for the Dec. 2 national election.

The East German Christian Democrats had turned from a communist bloc party into a close ally of its West German sister party after the ouster of the Stalinist leadership last fall. The two merged shortly before German unification Oct. 3.

The Social Democratic Party was banned in East Germany until its reestablishment a year ago. The East and West Social Democrats merged into one party a week before unification.

#90297u0999 10/24/1990 ~United Press International

PARIS (OCT. 24) UPI - Designer Yves Saint Laurent, the king of Paris fashion, revived longer skirts, body-hiding fullness and harem bloomers in the Paris ready-to-wear shows Wednesday.

He also confused many spectators.

After the parade under a tent in the Louvre museum courtyard, store buyers and press milled around arguing about the YSL parade that closed the eight-day fashion festival.

Harper's Bazaar magazine loved it, a prominent U.S. critic labeled it ''vulgar'' and a puzzled New York newswoman frowned she could not decide.

But spectators were on their feet cheering at the final line-up of staggeringly beautiful silk or chiffon harem pants with gold embroidery, molded brassiere tops or boleros or no tops at all, tons of beaded or metal necklaces, whirling chiffon scarves, fez hats, tassels and multi- colored cord belts. Some models covered bare breasts with their hands.

Backstage, Saint Laurent said the spectacular pants were inspired by the late Russian artist Leon Bakst, who designed for the Ballet Russe. YSL's home in Morocco also furnished ideas of fez hats and the Sheherazade ''One Thousand and One Nights'' mood.

Saint Laurent, who has long suffered from nervous problems, lurched on the runway and spoke backstage with difficulty.

His shows once marched at a dignified pace to dignified music, but heavy metalshook the tent Wednesday as more models than usual crowded onto the runway, some in bosom-baring fashions. One had the feeling Saint Laurent was showing a sharply commercial line to compete with the loud and lively shows of designers such as Karl Lagerfeld.

For happy YSL clients: tons of plenty of pants - trouser suits, cigarette pants with hooded loose jackets, knickers, bloomers both short and long in harem style, shorts, tights above-knee or below-knee bicycle tights - all trends seen in other shows.

The revolutionary numbers were back-wrap jersey or cotton skirts falling to mid-calf, and A-line tent shapes hiding the body. Both trends are likely to shake the current monopoly of short and sexy skin-hugging clothes.

Of the new long numbers, a slim wrap-around white skirt had a short red jacket and black lace blouse. A black midi dress bared one shoulder, a trend repeated often. A white midi dress and blue long skirts were brightened by gold buttons matching up the side.

Saint Laurent repeated the rush in Paris to mix exciting colors. A purple belted jacket topped sky blue pants, pale green trousers set off a pale blue ballooning blouse A lime coat married an orange skirt and mustard top. A pale green linen coat gently sloping over beige linen top and trousers was a dream.

But a curtain should be drawn over his wild red and ruffled fluffy mini dresses. Forget his baseball caps with big visors.

Short evening underslip dresses, popular in other shows, appeared at Saint Laurent cut disastrously too low. He also joined the sequin rage with a long brown sequin sheath and a short black sequinned dress sporting a giant green ball of ostrich feathers bobbing on one shoulder.

Fabrics ranged from cotton pique and linen to light wool, silk and chiffon with lots of lace blouses and edges and one sighed-over lace tailored jacket with white satin lapels over white cotton trousers.

#90297u1019 10/24/1990 ~United Press International

(OCT. 24) UPI - This could be the last day of work for hundreds of thousands of federal employees as the government hurtles toward another budget crisis deadline. It runs out of money at midnight tonight unless Congress comes up with another of its continuing resolutions to keep the money flowing.

The latest budget stumbing block apparently is over the Bush administration plan to get more money from the very wealthy by limiting their deductions. About half of the House Democrats oppose that, saying it would be unfair to those in high tax states like New York or California.

The Bush administration is about to get its first defection. Labor Secretary Elizabeth Dole is reported ready to leave to become the head of the American Red Cross, at a salary well above what she is making now. The wife of Senate Republican leader Robert Dole of Kansas has served in a number of top

government positions before, including transportation secretary in the Reagan era.

Authorities say at least two people were killed and 23 others wounded in election day fighting in Pakistan. The vote is seen as a referendum on the president's decision to fire the government of Benazir Bhutto . The fighting erupted despite tight security that had almost 100-thousand troops on alert nation-wide.

A general strike called by leftist unions in the Philippines failed to paralyze Manila today. But Communist guerrillas torched buses and battled with police and transport drivers. Defense and military officials say the strike disrupted transportation facilities and four major bus companies suspended service to the north region of the country.

Two I-R-A bombs killed six British soldiers and wounded more than 20 other people today in Northern Ireland. At least one person is reported missing in the wake of the blasts, which came as cars were driven into British checkpoints. The missing person was driving one of the cars. The I-R-A claimed responsibility for the bombings. The vehicles were driven by men whose families were held hostage. One driver managed to escape with only a broken leg.

Residents along the California-Nevada border near Yosemite National Park will be checking for any damage this morning following a relatively strong earthquake that rolled through the area late yesterday. The quake measured five-point-seven on the open-ended Richter scale. The epicenter was five miles north of the small town of Lee Vining, California.

#90297u1041 10/24/1990 ~United Press International

CHICAGO (OCT. 24) UPI - The Navy has fished a rare World War II dive bomber from the depths of Lake Michigan and will display it at the National Museum of Naval Aviation in Florida.

The 32-foot SBD Douglas Dauntless, guns still intact, was brought to the surface Tuesday about 16 miles off Chicago's Navy Pier, in 130-feet of water.

Navy officials said the two-seat, single-engine plane is rare find because there are fewer than 10 around.

The plane sank on Nov. 23, 1943, after the pilot came in for a landing on the converted aircraft carrier Wolverine during a training mission. The landing was awkward and the plane flipped over the vessel's left side and sank. The pilot was not injured.

Officials estimate the plane was one of up to 200 World War II aircraft at the

bottom of the lake because of similar mishaps.

The plane was missing its left wing and part of the tail section. It will be dismantled and shipped to the museum in Pensacola, Fla., for restoration.

#90297u1044 10/24/1990 ~United Press International

DECATUR, Ill. (OCT. 24) UPI - Caterpillar Inc. plans to lay off 40 hourly workers at the company's Decatur plant on Nov. 5, partially because of slow sales of heavy equipment produced at the facility.

Caterpillar spokesman Charles Hippler said Tuesday the sales of wheel-tractor scrapers used for highway construction and land contracting is ''soft.'' He also said some painting operations for the company will be shifted from Decatur to a plant in East Peoria to create floor space for further plant modernization, prompting some of the layoffs.

Despite near-record and record sales, Caterpillar reported lower earnings for the second and third quarters of 1990. In the third quarter, the company said it had earnings of just 54 cents a share, despite sales of $2.79 billion.

Caterpillar's Construction and Mining Products Division has facilities in Decatur, East Peoria and Aurora, all in Illinois.

#90297u1045 10/24/1990 ~United Press International

MANILA, PHILIPPINES (OCT. 24) UPI - Communist guerrillas supporting a general strike called by leftist unions demanding pay raises set fire to buses and clashed with police and transport drivers Wednesday, but the violence that left three people dead failed to paralyze the capital.

Armed forces chief Gen. Renato de Villa said a bus driver and his conductor were fatally stabbed in Dasmarinas town outside Manila by guerrilla strike enforcers and three policemen were wounded in clashes with the rebels in the city.

And in Bulacan province north of Manila, officials said one guerrilla was killed and three troopers were wounded when soldiers tried to foil a rebel attempt to burn a bus in San Miguel town.

Defense and military officials said the strike stopped much public transportation in the capital and four major bus companies suspended services to outlying provinces.

But in the capital, the military brought in 200 trucks to ferry thousands of stranded commuters to work. They also provided escorts on buses, which

remained on their routes.

Adolf Azcuna, spokesman for President Corazon Aquino, said the president ''noted the fact that this strike really failed to paralyze the nation.''

Transport Secretary Oscar Orbos said 30 to 40 percent of public transportation in the capital was stopped by the strike.

Labor Secretary Ruben Torres said ''token'' delegations of workers in 246 of the 16,000 companies nationwide joined the strike. He said of the striking workers, about 2,000 held a rally at a downtown square and later at the Senate.

Strike organizers said their 485 unions paralyzed operations in factories in the capital, where schools were ordered closed for a second day on Thursday.

At least 15 passenger buses, a taxi and a 10-wheeler truck were burned by guerrillas of the communist New Peoples Army, which earlier sent letters and black ribbons to police, government and private offices warning them against interfering in the strike, police officials said.

The 19,000-member NPA has been trying to set up a Marxist state in the Philippines for 21 years.

Police said 30 people were arrested for carrying Molotov cocktails and steel spikes, burning used tires and barricading main streets in the capital. Among those arrested was transport union leader Medardo Roda.

''This is no longer a people's strike, but a strike by the left against the people,'' said Defense Secretary Fidel Ramos.

He said the 150,000-member armed forces would remain on full alert until the situation was fully stabilized.

Crispin Beltran, leader of the striking May 1st Movement denied his men were involved in violence and said the strike will continue until demands for a $1.48 increase in the minimum daily wage of $3.46 were granted.

Aquino, who has authorized a 66-cent increase to compensate for a 29 percent increase in petroleum prices triggered by the Persian Gulf crisis, has refused to grant the union demand. She said many companies cannot afford the raise.

Aquino Wednesday signed into law a bill raising the penalty for rebellion from 12 years to life imprisonment and makes it a non-bailable offense. The measure also makes a coup d'etat attempt a crime, punishable by life in prison. The crime is non-bailable.

Aquino has crushed seven military rebellions in her 4 1/2 years as president.

Maj. Gen. Rodolfo Biazon, deputy armed forces chief, said authorities were watching to see if rebel soldiers would join in the destabilization effort by the communists, noting a report the mutineers had forged an alliance with the NPA.

Despite the strike, the Manila Stock Exchange remained bouyant Wednesday. The composite price index surged for the second straight day to 573.16, up 18.16 points or 3.27 percent, mainly because of drop in world oil prices.

Aquino, facing a huge budget deficit that has forced her government to resort to massive domestic borrowings, has refused to grant the increase. Her government also is grappling with a $26 billion foreign debt.

The killing of two moderate labor leaders on Monday and the bombing of two oil companies Tuesday set the tone for the general strike.

#90297u1052 10/24/1990 ~United Press International

WASHINGTON (OCT. 24) UPI - One week after leaders worked out a possible solution, a key senator said a bill to improve scrutiny of the futures industry ''appears for all practical purposes dead'' due to an unending fight over stock index futures.

Spurred by revelations of an undercover FBI investigation of trading practices at the nation's two largest commodity exchanges, Congress started work two years ago on ways to put more teeth into the Commodity Futures Trading Commission.

Action has been stalemated for nearly a year, however, by an acrimonious fight over which federal agency should control stock index futures. The Bush administration wants to put the Securities and Exchange Commission in charge, a proposal the futures industry and farm- state congressmen regard as a power grab that would not result in better regulation.

Senate Agriculture Committee Chairman Patrick Leahy, D-Vt., during a floor speech Tuesday night, said the bill to reform the CTFC ''appears for all practical purposes dead for this Congress'' because the bill had become a hostage to the fight over stock index futures.

Other senators involved in efforts to get the CFTC bill moving were unavailable for comment about prospects for the bill. However, two staff workers said the bill was blocked from debate because of ''holds'' - objections raised by senators.

Last week, leaders of the Agriculture and Banking committees, the panels with jurisdiction over the CFTC and the SEC, proposed a compromise. Leahy said it proved impossible to arrange debate on the compromise or even a bill that

would revamp the CFTC for one year - a tack that would have guaranteed a vehicle for the stock index issue next year.

''Senators are elected to make decisions, not to duck behind parliamentary holds or other maneuvers,'' Leahy said.

The compromise would have given the Federal Reserve Board the authority to decide the size of so-called margins on stock index trading but letting CFTC to keep control of the instrument. However, there also would have been a vote over transferring futures to the SEC.

Members of the Agriculture Committee voted 19-0 last Nov. 2 for a bill that would ban for one year the practice of ''dual trading,'' under which traders can execute customer orders and make deals for themselves, and direct CFTC to develop ''new generation'' technology to keep closer track of trading.

The House approved, 420-0, last Sept. 13 a bill to ban dual trading, make the CFTC a permanent agency and toughen its scrutiny of trading.

Both bills would authorize a sizable increase in funding for CFTC.

#90297u1063 10/24/1990 ~United Press International

RANGOON, BURMA (OCT. 24) UPI - Burma's military government widened a crackdown on its opponents Wednesday, raiding the offices of the leading political party and detaining Buddhist monks, according to political leaders and diplomats.

''Troops are still going into the temples and arresting monks in Mandalay,'' said a Rangoon-based diplomat contacted from Bangkok. ''At least 40 monks are in custody.''

Burmese sources said 32 monasteries of two large monastic estates were raided on Tuesday and Wednesday, with troops seizing anti- government pamphlets, copying machines and typewriters.

The government newspaper Working People's Daily said the pamphlets were the work of the outlawed Communist Party.

Sources in Mandalay, the center of the Buddhist religion in Burma, said troops were blockading nine more monastic estates housing about 10, 000 of Burma's nearly 300,000 monks.

The troops are using what is described as the ''four-cuts strategy'' used by the army against insurgents in cutting off food supplies, information, contacts with people and contacts with comrades.

The arrests and raids on Buddhist monasteries began on Monday in an effort to crush a religious boycott in which monks refused to perform rites such as weddings and funerals for military personnel and their families. The Burmese military seized direct power in 1988, killing more than 500 people and suppressing a nationwide democracy movement.

The military earlier issued a decree dissolving all Buddhist organizations supporting the boycott.

''This seems to be a political mistake. The Burmese people can forgive political arrests and beatings, but this attack on their religion may push them too far,'' said a European diplomat. ''Maybe the military feels repression is the only way they can hold onto power - that is their top priority.''

Troops were posted at several monasteries in Rangoon, but there were no reports of action against them so far.

Security forces instead raided the headquarters of the main opposition party, the National League for Democracy, political sources said.

About a dozen party leaders, including four members of the party central executive committee, have been detained by the authorities following these raids, the sources said.

A diplomat said NLD offices in the countryside were also searched by security forces.

Officials declined to comment on the reports.

The NLD won 80 percent of the seats in national elections in May, but the military has refused to allow the legislature to convene.

Men believed to be security police also arrested Ne Win, a Burmese reporter working for the Japanese newspaper Asahi Shimbun, diplomats and an Asahi Shimbun official said.

The official in Bangkok said Ne Win's family told him that 10 men dressed like members of the National Investigation Bureau took the reporter away from his home at 5 a.m. along with copies of his stories.

Ne Win, who is no relation to former President Ne Win, is the father of an NLD candidate who was elected to a seat in Parliament in May.

The arrests and raids came only 10 days before a scheduled visit to Rangoon by an official from the U.N. human rights commission.

A diplomat said the government was rushing to improve conditions at Insein

Prison north of Rangoon where most political prisoners are held.

''They are whitewashing the walls, and handing out mosquito nets and mattresses,'' the diplomat said.

''They seem to be creating what we could call a Potemkin prison,'' the diplomat said in a reference to the 18th century Russian statesman who created special villages to impress visitors.

#90297u1079 10/24/1990 ~United Press International

PHILADELPHIA (OCT. 24) UPI - Health Department officials tried to save some money by buying discount Japanese condoms for public distribution but users say they are uncomfortable and defective.

Users of the condoms, which cost about a half-cent less than the city's regular brand, are reporting they are too tight, too thin and too easily torn.

The condoms, known as Crowns, are manufactured by Okamoto Industries of Tokyo and were supplied to the city through a branch office in Connecticut.

The city, responding to its budget crisis, opted for the Crown condoms when the price of its customary condoms rose to 5.5 cents apiece.

City officials recently approved payment for shipment of 625,000 Crowns at 5.1 cents apiece.

David Fair, former director of the city's AIDS Activities Coordination Office, said city officials probably were just looking for a good deal.

Fair, who resigned in February, said the condoms were not ordered according to his specifications, as the ageny's current head claims.

Some private health agencies have said they will no longer dispense the condoms.

The condoms are distributed to some 30 health agencies for distribution to lower-income residents for the prevention of syphillis, AIDS and other sexually transmitted diseases.

#90297u1093 10/24/1990 ~United Press International

ST. PAUL, Minn. (UPI) Northwest Airlines plans to cancel nine daily flights out of Detroit and three from Memphis, Tenn., as part of its cost-cutting program.

The airline said Tuesday the Detroit flights are to Kalamazoo, Mich., Boston, Columbus, Ohio, Milwaukee, Chicago's Midway Airport, Pittsburgh, San Diego and Seattle-Tacoma. Mesaba Aviation, Northwest's commuter partner will assume service for Kalamazoo, Columbus and Lansing.

The Memphis flights to be canceled beginning Nov. 1 are to San Diego, Seattle and St. Louis.

Northwest intends to eliminate 25 to 30 flights, or about 2 percent of its 1,400 scheduled daily flights. Northwest previously announced plans to reduce five flights out of the Twin Cities and three between Seattle and Spokane, Wash.

The Twin Cities-based airline also is going to reduce its work force and raise fares by nearly 6 percent.

#90297u1104 10/24/1990 ~United Press International

MOSCOW (OCT. 24) UPI - The Soviet Union is jeopardizing its security by observing a unilateral moratorium on nuclear weapons testing while the United States continues such tests, a senior official said Wednesday.

Viktor Mikhailov, deputy minister of atomic energy, said the Soviet government has not conducted an underground explosion to test its nuclear arsenal for nearly a year despite Washington's refusal to stop its own atomic blasts.

''Is this political risk justified in our time?'' Mikhailov told the Communist Party newspaper Pravda. ''The Soviet Union's unilateral nuclear disarmament can only lead to a U.S. monopoly.''

Mikhailov's equation of a test ban with ''nuclear disarmament'' appeared to support U.S. claims that such explosions are necessary to ensure the reliability of atomic weapons, an assertion long refuted by Moscow.

Mikhailov accused the United States and its NATO allies of continuing to modernize their nuclear weapons, citing efforts to make their multiple-warhead rockets more precise and create weapons less vulnerable to anti-missile defenses.

The Western military alliance has also refused to follow the Soviet Union's pledge not to be the first to use nuclear arms in any confrontation, Mikhailov said.

''Is it reasonable for Soviet nuclear testing grounds to lie idle under these conditions?'' he asked.

The deputy minister said the United States has conducted seven nuclear

explosions, France has conducted four and China two this year during the latest of several self-imposed Soviet testing bans.

The United States has conducted a total of 26 nuclear tests over the past five years while the Soviets were observing moratoriums, Mikhailov said.

His comments appeared to reflect the undercurrent of criticism in some Soviet military circles of President Mikhail Gorbachev's foreign policy of ''new thinking'' and its more concialatory stance toward the West.

Mikhailov's remarks also may indicate the new demands on the once- sancrosant Soviet military-industrial establishment to compete for government funding under growing pressure to reduce the budget deficit.

The United States, the Soviet Union and Britain signed a treaty in 1963 banning atmospheric nuclear tests, and the two superpowers later agreed to restrict the size of underground explosions.

Mikhailov repeated Moscow's longstanding call for a complete international ban on all nuclear tests.

The Soviet government has encountered growing public opposition from residents in Semipalatinsk, the city in the Central Asian republic of Kazakhstan where the main Soviet nuclear test site is located. The local government banned further tests at the site Oct. 1 in a symbolic decree it cannot enforce.

The U.S. government has also faced widespread opposition from people living near its main test site in Nevada.

Recent U.S-Soviet progress on reducing the number of nuclear weapons has slowed the movement for a test ban.

President Reagan and Gorbachev signed an agreement in December 1987 eliminating all medium-range and shorter-range nuclear missiles, and the two superpowers are nearing completion of an accord cutting long-range strategic arms by about one-third.

#90297u1118 10/24/1990 ~United Press International

LONDON (OCT. 24) UPI - Stocks prices closed lower Wednesday in light trading on the London International Stock Exchange, driven down by reports of the widening recession in the British economy and renewed tensions in the Persian Gulf.

Stocks also ended lower in Frankfurt, Paris, Zurich and Madrid.

London's blue chip Financial Times 100-stock index, which climbed 25.0 points

Tuesday, fell 16.5 points to 2,110.5. The narrower top 30 industrial average lost 15.8 points to 1,638.9.

Volume amounted to around 468 million shares compared with 375 million shares changing hands Tuesday.

Analysts said stocks fell amid a combination of factors including higher global oil prices, some profit taking and indications interest rates will not fall in the near term.

Market watchers said stocks fell as oil prices resumed their climb after President George Bush warned there would be no compromise with Iraq.

The higher costs of crude sent prices in most industrial issues lower, analysts said.

A British Chamber of Commerce report warning of a deepening recession and British Chancellor of the Exchequer John Major's statement that the government won't cut interest rates again ''until it is prudent to do so,'' combined to take some of the shine from blue chip stocks, market watchers added.

Among the active issues, British Airways fell 14 cents to $2.80. Late Tuesday United Airlines announced a $400 million deal to acquire Pan American World Airways' rights to fly between five U.S. cities and London's Heathrow Airport in a move that will triple its European flights.

Analysts saw the acquisition as a possible threat to British Airways, which was rebuffed earlier this year by U.S. regulators over its plan to take a 20 percent stake in UAL.

British Airways, which depends heavily on the London-New York route and has a commercial agreement on routes with UAL said in a statement said it did not see the announcement affecting its marketing agreement with United Airlines under which the two carriers share reservations codes, connect with each other's flights and cooperate in marketing other travel products.

''In general, we do not see the arrangement as affecting the marketing agreement between British Airways and United Airlines,'' the statement said.

Elsewhere, chemicals conglomerate Imperial Chemical Industries slipped 8 cents to $16.01 as investors speculated the company will report lower-than-expected third quarter earnings Thursday.

Eurotunnel, the company building the British segment of the Channel tunnel between France and England, climbed 66 cents to $9.12 on news the company would sign a loan agreement Thursday for an estimated $2.85 billion in fresh financing for the project.

Retalier Marks and Spencers fell 21 cents to $4.38 with a cautious trading statement expected next week.

Drugs group Glaxo fell 32 cents to $14.72 amid reports that its ulcer drug, Zantac, was not selling as well as expected.

Meanwhile, stocks closed broadly lower in active trading on the Frankfurt Stock Exchange.

The key 30-stock German Stock Index, which climbed 39.83 points Tuesday, fell 20.52 points to 1,493.82 as declines overpowered advances by about a 6-to-1 ratio.

Analysts said stocks lost ground amid some speculation that the Deutsche Bank Ag would report a sharp drop in its latest earnings.

Elsewhere around Europe, in Paris, the CAC-40 Index fell 8.93 points to 1,667.24, in Madrid, the General Index lost 0.92 point to 240.16 and in Zurich the Swiss Market Index slipped 4.3 points to 1,494.8.

-30- 3792

#90297u1129 10/24/1990 ~United Press International

ISLAMABAD, PAKISTAN (OCT. 24) UPI - Pakistanis chose a new government Wednesday in violence-marred elections to determine whether ousted Prime Minister Benazir Bhutto would be returned to power.

Gunbattles between rival supporters left at least seven people dead and 56 wounded. A Bhutto ally also charged that gunmen took over a polling station and seized ballot papers.

Tight security was in force for the voting, with almost 100,000 troops on alert nationwide, about half of them in violence-torn southern Sind Province.

About 48 million people were eligible to vote.

At stake were 214 seats in the 217-member National Assembly. Three independent candidates were elected unopposed and polling was postponed in one constituency where a candidate was shot and killed on Monday.

Pakistani reporters said the turnout appeared lower than in the 1988 elections when 43 percent of voters cast ballots.

In the Sind capital of Karachi, more troops were visible than voters at many polling stations, and the streets were largely deserted except for military armored personnel carriers. Reports from Punjab, the country's most populous province, indicated a slightly higher turnout than in other provinces.

Six international teams were in Pakistan to observe the elections, including a 40-member delegation from the U.S.-based National Democratic Institute.

Bhutto voted in her hometown of Larkana in Sind, from where she stood as a candidate. She later prayed at the grave of her father, the executed Prime Minister Zulfikar Ali Bhutto.

Police said seven people were killed and 56 wounded in gunbattles between rival supporters in 12 areas in Punjab, Sind and Northwest Frontier provinces.

Commenting on the incidents, President Ishaq Khan said ''violence ... is quite common in the Indian subcontinent, and therefore the law and order situation was satisfactory.''

''All those killed were from one party, while those accused were from another party,'' he added, without elaboration.

It was Khan's decision to sack the Bhutto government on charges of corruption and nepotism last Aug. 6 that brought about the Wednesday referendum.

Asghar Khan, head of the Tehrik-e-Istiqlal, a minor party allied with the PPP, alleged that gunmen had occupied a polling booth in the northeastern city of Lahore where he is standing as a candidate against Nawaz Sharif, head of Islamic Democratic Alliance and Bhutto's chief rival.

Khan charged the gunmen had seized ballot papers and stamped them themselves before escaping.

Pakistani newsmen in Sind also rreported three incidents of ballot- snatching in rural villages.

Most analysts predict the PPP will emerge as the single largest party from Wednesday's vote ahead of the IDA, a disparate army-backed grouping of anti-PPP parties headed by Nawaz Sharif, Bhutto's chief rival.

But they say the PPP is unlikely to get an outright majority and that the Islamic Democratic Alliance should be able to cobble together a coalition government with the help of minor parties and independents.

However, most commentators say an IDA coalition government, founded largely on opposition to Bhutto, may not survive long and that the country could again be going to the polls within a year.

In Bhutto's former constituency, the Karachi slum district of Lyari, voters lined up from early in the morning to cast their ballots. Lyari is being contested this time by Bhutto's husband, Asif Ali Zardari, who is in jail facing charges of kidnapping and extortion.

Ishaq Khan, in a broadcast address to the nation Tuesday evening, issued a veiled appeal to voters to reject Bhutto's party at the polls.

''It happens that the masses first lovingly bring some people to power and then, within a short period, turn against them,'' the president said in an apparent reference to Bhutto's ousted 20-month administration.

''The reason for the gradual withdrawal of their support is either that the rulers disregard their mandate or that the people make an initial error of judgment in the choice of their representatives,'' he said. ''So representatives should be carefully selected on the basis of their character and abilities.''

He appointed Ghulam Mustafa Jatoi to head an interim government until the elections.

The president also set up special disqualification courts to try Bhutto and members of her administration on corruption charges in what observers believe was a bid to bar her from the elections.

#90297u1142 10/24/1990 ~United Press International

BRUSSELS, BELGIUM (OCT. 24) UPI - The Soviet military chief of staff, Gen. Mikhail Moiseyev, arrived Wednesday for a three-day visit that includes talks with NATO's European commander and other top alliance officials.

''Relations between NATO and the Warsaw Pact are now being built on a new basis,'' Moiseyev told the official Soviet news agency Tass before leaving Moscow on the flight to Brussels.

Moiseyev was greeted at a military airport by the chief of staff of Belgium's armed forces and was taken to the Belgian Supreme Royal Defense Institute for a speech.

On Thursday, the four-star general planned to meet with NATO chiefs of staff at Western alliance headquarters, and also was to hold talks with NATO Secretary-General Manfred Woerner.

Moiseyev planned to meet Friday with NATO's European commander, Gen. John R. Galvin, at Supreme Headquarters for the Allied Powers in Europe, located in the western Belgian town of Mons.

The Soviet general said the Soviet Union has cut back on its military exercises and that NATO should reciprocate.

''This is most important at a time when confrontation is being replaced by the policy of cooperation and mutual understanding, including in the military

sphere,'' he said.

NATO announced at its landmark London summit in July that it would scale back the readiness and availability of its forces.

Moscow already has reduced its armed forces by 370,000 of the half million troop reduction pledged by Soviet President Mikhail Gorbachev at the United Nations in December 1988, Moiseyev said.

''The entire structure of the Soviet armed forces is being changed in line with a defensive military doctrine,'' he said.

Shortly after the London summit, Woerner visited Moscow and announced that Gorbachev had accepted an invitation to visit NATO headquarters.

NATO officials hoped Gorbachev could visit late this year, but an early 1991 date now is considered more likely.

#90297u1160 10/24/1990 ~United Press International

(OCT. 24) UPI - American and British nationals freed by Iraq headed home Wednesday and the international community stood firm against Baghdad, with King Fahd of Saudi Arabia reaffirming his demand for a complete withdrawal from occupied Kuwait.

As the Pentagon reportedly considered increasing U.S. forces in the Persian Gulf, Japanese lawmakers debated a bill that would deploy Japanese troops to the region and a senior Soviet envoy again raised hopes for a peaceful solution to the crisis.

By late Wednesday, 14 Americans freed by Iraq had left Jordan for the United States, a U.S. official in Amman said. The State Department said the Americans will arrive in New York ''this evening aboard a commercial'' flight, but gave no other details.

At least one Texan is among the freed Americans. Houston engineer Lloyd Graham is due to arrive in New York where he will be met by his wife and other relatives, according to Graham's daughter, Stasia Marinelli.

Forty British hostages celebrated their arrival in Britain Wednesday after nearly three months of captivity in Baghdad, but Foreign Secretary Douglas Hurd said he found it ''grisly and repulsive'' that Iraq had released only sick and old people.

Accompanying them was former Prime Minister Edward Heath, who secured their release after meeting with Saddam Hussein.

''I find it grisly and repulsive that the Iraqis should set about deciding who is so sick, who is so old, that they should be released from the position in which no human being should ever be placed,'' said Hurd, to murmurs of approval from members.

In addition to the British and Americans, Iraq said all French hostages, numbering about 330, were free to leave the country.

France said it was taking all steps to repatriate its nationals in Iraq and Kuwait as soon as possible, again insisting the release was not the result of negotiations with Baghdad.

French Foreign Minister Roland Dumas told the weekly Council of Ministers session the release of the hostages was the result of the firm policy followed by France in applying U.N. sanctions against Iraq.

Some diplomats and observers said the move by Saddam to free the French was an attempt to divide the Western alliance formed against Iraq.

King Fahd was quoted by the BBC as saying his country's stand in the crisis was unchanged, despite remarks over the weekend by the Saudi defense minister that indicated the kingdom would consider a partial withdrawal of Iraq from emirate in order to maintain peace.

''The explicit and decisive stance declared by Saudi Arabia towards the Iraqi criminal aggression against fraternal Kuwait is firm, irrevocable, clear and unambiguous,'' Fahd was quoted as saying.

''The stance is not subject to any change or negotiations,'' he said.

Saudi Defense Minister Sultan Bin Abdul Aziz hinted Monday that Kuwait should give Iraq two strategic gulf islands in return for a withdrawal from the rest of the country. The following day he said his remarks had been misinterpreted.

The New York Times said a Pentagon spokesman told reporters in Washington that Gen. Colin Powell, chairman of the Joint Chiefs of Staff, discussed increasing U.S. forces in the gulf with Gen. H. Norman Schwarzkopf, commander of troops in the region, during Powell's visit to Saudi Arabia this week.

Defense Secretary Dick Cheney will decide whether more troops should be sent after he meets with Powell following the general's return to Washington, the newspaper said. The Times said a major increase in U.S. troops in the gulf could signal preparation for possible offensive military action.

A senior envoy of Soviet President Mikhail Gorbachev, meanwhile, arrived in Cairo for talks with Egyptian officials on efforts to solve the crisis peacefully, and again raised hopes by repeatedly saying he believes the crisis can be solved without a war.

''We have not yet exhausted all chances available to acheive a peacful solution to the crisis,'' the envoy Yevgeny Primakov told reporters in Cairo. ''My talks during this tour have been positive.''

Primakov, who met with Iraqi leader Saddam Hussein, is expected to brief Egyptian President Hosni Mubark on the outcome of his visits to Rome, Paris, Washington and Baghdad when Mubarak returns from a tour of the Gulf states this week.

A Soviet news agency reported recently Primakov was attempting to strike a deal by which Iraq would withdraw from Kuwait in exchange for two strategic Gulf islands, but the Soviets and Iraq denied a compromise was in the works.

-Japanese opposition parties ended a one-day boycott of a parliamentary debate of a bill that would allow Japanese troops to be deployed overseas for the first time since World War II. As debate continued, legislators were told Japanese soldiers could supply ammunition to U.S.-led forces under the U.N. Peace Cooperation Bill. Tokyo has pledged billions of dollars to the gulf effort, but has been under pressure to send troops to the region as well.

-The weekly Al Mussawar magazine in Egypt said Mubarak had managed to convince the gulf states to cancel more than $7 billion in Egyptian debt in return for Cairo's strong support of U.S. policy in the gulf crisis. The weekly said Saudi Arabia alone wrote off $4.2 billion in debt and pledged another $2 billion in developmental aid. The U.S. Congress is also considering a request by the Bush administration to forgive $7.1 billion in Egyptian military debt, although the measure has yet to be approved.

-The first group of 17,000 Vietnamese contract workers allowed to leave Iraq flew home via Turkey on flights orgnaized by a Geneva-based aid organization.

-German Chancellor Helmut Kohl met with party leaders to discuss the fate of the 400 Germans being held in Iraq and Kuwait, and former West German Chancellor Willy Brandt decided against earlier considerations to go to Baghdad.

-Switzerland decided against sending a parliamentary delegation to Iraq to seek the release of the 80 Swiss nationals trapped since the crisis began.

#90297u1179 10/24/1990 ~United Press International

MOSCOW (OCT. 24) UPI - The Soviet Parliament declared Wednesday that national laws supercede local measures, an attempt to counteract sovereignty declarations asserting the supremacy of local laws in most of the country's republics.

A new law passed by the central Supreme Soviet, or Parliament, ''reaffirms the supremacy of federal legislation over republican legal acts within the center's sphere of responsibility,'' the official news agency Tass said.

The law declares invalid measures by the republics declaring the supremacy of local laws over national ones.

Thirteen of the 15 Soviet republics have declared sovereignty since the beginning of the year, and many of them - including the huge Russian republic and the independence-minded Baltics - have declared their laws supercede national ones.

In addition to the republican declarations of sovereignty, autonomous regions and even cities within the republics have declared their own authority is supreme. Ten of the 16 ''autonomous republics'' within the Russian republic have declared sovereignty.

The law passed by the Supreme Soviet Wednesday says if a republic opposes its clauses, it can appeal to the Supreme Soviet or its larger legislature, the Congress of Peoples Deputies.

''We are neither declaring war on republics nor bringing pressure to bear on them,'' said Yuri Kalmykov, chairman of the Supreme Soviet committee on legislation. ''The republics should understand that this legal act is in the interests of all.''

(OCT. 24) UPI - Thousands of Palestinians are staying home in the occupied territories today. Israel closed checkpoints along its 1967 borders with the West Bank and Gaza Strip in an effort to halt a wave of attacks against Jews following the Temple Mount killings of at least 20 Palestinians in Jerusalem two weeks ago.

30 British hostages released by Iraq arrived in London today as 14 Americans also freed yesterday prepared to fly home from Jordan. France says it is taking steps to repatriate an estimated 330 French hostages who also are being freed. France says it did NOT negotiate the release with Baghdad.

In other gulf news, the New York Times reports that the Pentagon is considering sending more American troops to the region, a move that could signal plans for possible offensive military action. Defense Secretary Cheney will make the final decision on whether to deploy more U-S forces.

With budget talks stymied, all but essential federal services may shut down tomorrow if Congress does NOT come up with another continuing resolution to keep the government funded beyond midnight. President Bush, when asked if he

would sign the funding resolution, answered- ''I don't know.''

The Commerce Department reports a one-point-seven percent drop in durable goods orders last month. But the figures may NOT be what they seem. Most of the drop came on fewer orders for automobiles at model- year change-over time. If they are left out, durable orders were up three-tenths of one percent.

Ohio Republican Congressman Donald Lukens is mulling over his options this morning as he faces possible questions about charges that he allegedly fondled a Capitol elevator operator. Lukens was convicted last year on a separate charge of having sex with a minor. There are reports he may resign.

NASA has the rabbit feet out today. Engineers this afternoon begin a make-or-break fueling test for the repaired shuttle Atlantis, which has been plagued by tiny hydrogen leaks. If all goes well, Atlantis will blast off on a long-delayed military mission around November 10th.

Southland Corporation, the parent of the nation's 69-hundred 7-Eleven convenience stores, has filed for Chapter 11 bankruptcy. Southland lost more than one-BILLION dollars in 1989 and this spring announced a Japanese buy-out.

Part of the nation's war-time history surfaced on Lake Michigan off Chicago yesterday, almost 47 years to the day that it disappeared. Divers recovered a two-seat, single-engine Douglas Dauntless dive bomber that crashed during a training mission landing on a converted aircraft carrier. The pilot escaped injury.

#90297u1196 10/24/1990 ~United Press International

BOSTON (OCT. 24) UPI - The Boston Red Sox announced Wednesday they will not pick up veteran outfielder Dwight Evans' contract for next season.

''Dwight has been a tremendous competitor for the Red Sox for the past 18 years and certainly ranks among the greatest players in Red Sox history. It was a very difficult decision to decide not to renew his contract,'' said Boston General Manager Lou Gorman.

The Red Sox had had until Nov. 1 to pick up the option year on the contract, and Evans has requested they make a decision soon so that he could begin making plans for the future.

Team officials did not elaborate on their decision, but it seems likely the Red Sox want to make room for younger players.

Evans, who would have been paid $1.6 million if the contract had been picked up, reportedly had asked Boston for a 10-year contract that would involve him in the operation after his playing career ended.

The Red Sox did not say whether their plans included such an association and Evans was not immediately availbable for comment.

Evans recently had minor knee surgery and had hoped to have a bone spur removed from his back so that he could play next season, but team physician Dr. Arthur Pappas had not committed to the surgery.

#90297u1200 10/24/1990 ~United Press International

World oil prices were up $1 a barrel in early afternoon trading Wednesday after a key U.S. senator said the Persian Gulf crisis was headed toward conflict.

The U.S. benchmark West Texas Intermediate crude for December delivery had risen $1.03 over Tuesday to $30.40 a barrel in afternoon trading on the New York Mercantile Exchange after being up as much as $2.23 a barrel.

Comments by Sen. Richard Lugar, R-Ind., and King Fahd of Saudi Arabia were ''probably a factor'' in the rise,'' said Robert Baker, senior energy analyst at Prudential-Bache Securities, Inc. in New York.

''The fact is that we are headed toward conflict because (Iraqi President) Saddam Hussein is reinforcing his forces in Kuwait, shows no signs whatsoever of giving up anything, and the United Nations is on a collision course to make sure he does,'' Lugar said.

A member and former chairman of the Senate Foreign Relations Committee with access to U.S. intelligence assessments, Lugar made his comments on NBC's ''Today'' television show during discussion of the crisis triggered by Iraq's Aug. 2 invasion of oil-rich Kuwait and the U.N. embargo on Iraqi and Kuwaiti exports

Oil prices plunged a record $5 a barrel Monday after Saudi Arabia's Defense Minister Sultan Bin Abdul Aziz hinted Sunday that Kuwait should give Iraq two strategic gulf islands in return for a withdrawal from the rest of the country. He later said his remarks had been misinterpreted.

Saudi King Fahd was quoted by the BBC Wednesday as saying his country's stand in the gulf crisis was unchanged, despite the defense minister's remarks.

''The explicit and decisive stance declared by Saudi Arabia towards the Iraqi criminal aggression against fraternal Kuwait is firm, irrevocable, clear and unambiguous,'' Fahd was quoted as saying.

Fahd said Saudi Arabia, which has allowed hundreds of thousands of foreign troops to be deployed on its soil to counter further Iraqi aggression,

demanded a complete and total withdrawal of Iraqi troops from Kuwait.

Lugar said, ''I think the (Saudi defense minister's) remarks were unfortunate for two reasons: First of all, they gave an impression to world markets that peace was at hand. Secondly, (they) raised questions as to how fragile the coalition of all the forces trying to (support) the United Nations may be.''

On the European spot market, Britain's widely traded North Sea Brent was up $1.90 to $30.70 a barrel.

The United Arab Emirates' Dubai Light, the key OPEC crude from the Middle East shipped mainly to the Far East, had gained $1.80 to $26.65 a barrel.

On the Merc, home heating oil for November delivery was up 1.84 cents over Monday to 82.9 cents a gallon while November unleaded gasoline was 4.1 cents higher at 84 cents a gallon.

#90297u1216 10/24/1990 ~United Press International

BEIJING (OCT. 24) UPI - Premier Li Peng exuded confidence Wednesday as he outlined China's economic outlook to a forum of foreign business leaders, wooing his guests with a conspicuously non-ideological call for ''drastic'' economic reforms.

''There was not one word about socialism in his whole presentation and Mr. Li spoke for more than an hour,'' said one participant in the World Economic Forum meeting, which was closed to reporters. ''He never said 'socialism,' just that social needs would be fulfilled.

''This was so different from last year,'' the participant said on the condition of anonymity. ''Last year we met with (Communist Party chief) Jiang Zemin and almost every word was ideological. This year it was down to earth, very businesslike.''

The Swiss foundation's 1989 meeting came just months after Beijing crushed the nationwide pro-democracy movement, a brutal crackdown that prompted tough Western economic and political sanctions against China.

The hard-line premier's extemporaneous presentation was described as far more upbeat than that of the State Statistics Bureau, which earlier Wednesday reported on China's battered economy.

Bureau officials said the loosening of a 2-year-old austerity program is reviving China's economy, but acknowledged sharply mounting financial losses in industries still hobbled by a slack market and long-term inefficiency.

Li spoke briefly of economic woes, particularly inflation and the imbalance

between supply and demand, but said prices had stabilized and that bold reforms in pricing and other areas were being planned.

''He said China now wants to go on with drastic reforms,'' the participant said. ''He used the word 'drastic' several times.''

Li said two-thirds of all prices eventually would be set by market forces, with one-third fixed by the government, but cautioned that market prices would be subject to official ceilings.

He also said new emphasis would be placed on industrial quality, noting that Chinese consumers eagerly pay a premium for high-quality merchandise - especially televisions and other electronic goods.

Li urged his guests - most of them Asian and many from Taiwan - to invest with confidence in China and lauded the European Community for its partial lifting this week of sanctions imposed last year.

The report by the State Statistics Bureau on the first nine months of 1990 indicated China has slashed last year's record inflation and reversed this year's economic stagnation, but remains unable to solve historic structural problems.

The bureau report said gross national product, the total output of goods and services, was $255 billion between January and September, 2.7 percent higher than the same period last year. Growth for all of 1989 was 3.9 percent.

National industrial production grew 5 percent between July and September over the same period last year, an improved pace on the thin 2.2 percent growth recorded in the first six months. Average growth for the first three quarters was 3.1 percent.

The sweeping austerity imposed in September 1988, which centralized spending authority and slashed credit, virtually stalled industrial output early this year until the government injected funds and rolled back some of the program's tight controls.

''The national economy is heading toward a more favorable direction,'' said State Statistics Bureau spokesman Zhang Zhongji.

Further, he said, ''after two years of rectification and adjustment, we have made progress in controlling inflation.''

Inflation was 2.3 percent in the first nine months, the report said, the lowest in five years.

The austerity program was designed to trim record price hikes that peaked at nearly 30 percent and to restrain breakneck growth ignited by a decade of

free-market economic reforms.

#90297u1240 10/24/1990 ~United Press International
WASHINGTON (OCT. 24) UPI - On the eve of another threatened government shutdown, Congress and President Bush appeared close to a budget deal Wednesday in which Democrats would drop their demand for a surtax on millionaires.

House Democratic leaders were expected to present to a party caucus a new compromise deficit reduction plan to raise income tax rates for the richest Americans to 31 percent, limit their itemized deductions and phase out personal exemptions for the wealthy.

The government was due to run out of spending authority at midnight Wednesday when the third short-term funding bill since Sept. 30 was to expire.

Congress was expected to pass another short-term funding bill Wednesday. But Bush had not said by midday whether he would sign the measure or veto it and force a government shutdown to keep pressure on Congress to complete work on a budget plan Bush can accept.

Critical to any budget deal, apparently, was the decision by Democrats to drop an earlier demand for an income tax surtax on millionaires - something Bush and Republicans had bitterly resisted.

In its place, Democrats were apparently ready to accept an alternative package to help bring the deficit down.

First, the deal would raise income tax rates on the wealthiest Americans from the current 28 percent to 31 percent while at the same time lowering the tax rate on middle to upper income Americans from the current 33 percent to 31 percent.

That move would flatten out the so-called bubble in the tax code in which the richest Americans paid a lower tax rate than those less well off.

The plan also would limit the deductions that wealthy Americans could claim. It was not immediately clear at what income level the deduction limits would kick in, although $100,000 a year was a possibility.

The plan, modeled after one drafted by Rep. Donald Pease, D-Ohio, would prohibit the wealthy from claiming itemized deductions in an amount equal to 3 percent of the income they have in excess of $100,000 or more a year.

Finally, the plan would prohibit the wealthy from using the personal exemptions that help lower taxes for most others. It was unclear at what

income level the phase-out might begin.

Part of the compromise would have the current 9 cents-a-gallon federal gasoline tax increase by a nickel a gallon, a figure Foley said was ''not a bad guess.''

Congress has been working for weeks to reach an agreement on a package of spending cuts and tax increases representing the major portion of a $500 billion reduction in the federal budget deficit over the next five years, with about $40 billion in savings in fiscal year 1991, which began Oct. 1.

#90297u1257 10/24/1990 ~United Press International

LEE VINING, Calif. (OCT. 24) UPI - Two roads leading into Yosemite National Park were blocked off Wednesday by rockslides triggered by an overnight earthquake that jolted much of Northern California, causing other minor damage but resulting in no injuries.

The quake, measuring 5.7 on the Richter scale, struck at 11:15 p.m. Tuesday and was centered 5 miles north of Lee Vining, a hamlet between Mono Lake and the east side of Yosemite, about 170 miles east of San Francisco.

''It was probably one of the most widely felt earthquakes reported in California,'' said Pat Jorgenson, a spokeswoman for the U.S. Geological Survey in Menlo Park.

Residents across the region reported feeling the quake, from west to San Francisco, north to Sacramento, south to Fresno and east to Reno, Nev.

Jim Drago, a spokesman for the California Department of Transportation, said rocks jolted loose by the shaker tumbled onto two roads, Highways 120 and 140, both of which feed into entrances to Yosemite.

Both roads could be reopened by later Wednesday in areas outside the park but Drago said the closures may remain in effect inside Yosemite until Thursday, as crews work to clear boulders blocking the routes.

Highway 120 was closed 5 miles west of where it intesects with Highway 395 on the eastern side of Yosemite. Highway 140 was closed at its juncture with Highway 120 on the western edge of the park.

''We've got our crews up their now,'' Drago said. ''They've got bulldozers and all kinds of equipment to clear things up and hoping to get those roads open soon.''

There was concern that a short Highway 120 bridge that spans a dry wash on the eastern side of the park was weakened by the quake, but engineers surveyed the

structure and cleared it for traffic.

Meanwhile, Yosemite officials advised visitors to enter the park on State Route 41, the park's southern entrance.

Other damage from the temblor was limited to bottles breaking as they were knocked off shelves and pictures tossed off the walls.

Barbara Williams, 58, was sitting nearly on top of the epicenter when the earthquake struck. Williams and her husband, Henry, own the Mono Inn, a 70-year-old three-story building 5 miles north of Lee Vining.

''It felt like the worst earthquake I had ever felt,'' said Williams, who has lived in earthquake-prone California for more than 40 years.

The temblor shook pictures off the walls and dumped the contents of cupboards and cabinets onto the floor, she said.

''We had a lot of broken glass, pictures off the wall and things out of the cupboards,'' Williams said.

The quake broke nearly all the glassware in the restaurant's bar on the first floor, she said.

The Mono County Sheriff's Department reported getting about 75 calls about the quake, but no reports of injuries or serious damage.

''It rolled and it lasted about 45 seconds,'' said sheriff's Deputy Suzanne Sturdivant, who was in a Sheriff's Department facility in Bridgeport, about 20 miles north of the epicenter.

''Everybody ran for the doorways.''

Gamblers in Lake Tahoe, Nev., reportedly were knocked off their chairs, but no damage was reported to casinos.

#90297u1260 10/24/1990 ~United Press International

MIAMI (OCT. 24) UPI - A 10-week, 32-state manhunt to track down and capture drug fugitives resulted in 3,743 arrests and $12.8 million in seizures of property, weapons and cash, U.S. Attorney General Dick Thornburgh said Wednesday.

Among those apprehended were 11 people facing murder charges and 355 drug fugitives who had been at large for at least a year, including one person who had been a fugitive for 27 years, Thornburgh said. Five cities were targeted for the operation, but arrests were made in 32 states, he said.

''Tracking down fugitives can be a time-consuming process and requires the constant attention of criminal investigators over an extended period of time '' he said. ''Moreover, criminals who become fugitives do not necessarily stay in the city or county where they are wanted by the authorities.''

The operation concentrated on drug defendants who either evaded arrest or jumped bond to continue running their illegal activities, Thornburgh said. The police operation involved 38 local and state law enforcement agencies along with the U.S. Marshall's Service in Miami, Houston, San Antonio, San Diego and Los Angeles.

He said those five cities were targeted for the project, dubbed Operation Southern Star, because they have been designated by President George Bush as high intensity drug-trafficking areas in the administration's National Drug Control Safety program.

Thornburgh made the announcement at a joint news conference attended by U.S. Marshals Service Director K. Michael Moore, Gov. Bob Martinez and several other local and federal law enforcement authorities.

Moore said the project put a priority on seizing cash and other property and the fugitives ended up financing their own arrests. He said the operation cost less than $3 million, about $742 per arrest, and at least four times that amount in cash and property was seized.

''Traffickers put money in banks, buy businesses, acquire real estate and spend large sums on cars, jewelry and other items,'' he said. ''The government's job is to find it.''

Martinez also said he felt Southern Star had made a significant dent in drug-trafficking networks, but bristled when asked if he felt the announcement was timed to help his re-election campaign.

''Government doesn't stand still during an election,'' he said. ''It continues to serve the people during an election.''

Thornburgh said there was really no way to determine how much of an effect Operation Southern Star had on the illicit drug trade. He did say that while law enforcement was applying ''greater pressure on the importation of cocaine'' officials were finding evidence that heroin importation was on the rise.

He said there also appears to be a change in values concerning the acceptance of drugs in America.

''A change in values and the reduction in demand isn't going to change overnight,'' he said. ''But there are indications that progress has been

made.''

Fugitives arrested included Floyd Wilson, who had been a fugitive for 27 years on cocaine charges in San Antonio.

Richard Joseph Lynn, a prison escapee serving a life sentence, led investigators on a chase through Alabama, Georgia, Louisiana, Mexico and Guatemala before he was arrested at a restaurant on Gulfport, Miss.

Operation Southern Star investigators in Miami found nearly 250 pounds of cocaine worth about $2.3 million in shipments of fish and books brought into Miami International Airport from South America.

Charles Bryant, who is wanted by authorities in New Zealand for cocaine smuggling and conspiracy to supply LSD, was arrested in Los Angeles. He currently is awaiting extradition to New Zealand.

#90297u1265 10/24/1990 ~United Press International

HOUSTON (OCT. 24) UPI - Standard & Poor's Corp. lowered debt ratings of Continental Airlines and its parent company Wednesday, despite Continental's vehement denial of reports it had considered filing for bankruptcy protection.

''What we're looking at is an industry situation,'' a Continental spokesman said, noting most major airlines are experiencing financial difficulties and implementing cost-cutting measures in the light of rising fuel prices.

S&P lowered the rating on $379 million of holding company Continental Airlines Holdings Inc.'s senior debt to triple-C-plus from single-B- minus.

Any S&P rating of double-B or lower is below investment grade, the level at which the risk of default by the issuer is considered minimal.

In addition, ratings on the airline's senior secured debt, senior unsecured debt and subordinated debt were all lowered. These downgrades cover $918 million of debt issued by the troubled airline.

All debt issues remain on S&P's CreditWatch with negative implications, meaning further downgrades are possible. CreditWatch is the list of corporate debt issues that analysts for the New York-based S&P examine closely.

''The downgrades reflect a heavy debt maturity schedule, with over $1 billion due through 1994, and the impact of higher fuel prices and weakening demand over the near term,'' the credit rating agency said in a release.

Continental Airlines Tuesday announced its president and four senior vice presidents would leave the company as a cost-cutting measure. On Wednesday, it

denied published reports that the parent company's attorneys had prepared during the weekend to file for Chapter 11 federal bankruptcy protection from creditors.

''This company has no intent to seek protection. ... We have streamlined our management and, like the rest of the industry, are considering other prudent business steps to assist during the fuel crisis. However, Chapter 11 is not one of the means we intend to take,'' a spokesman said Wednesday.

#90297u1314 10/24/1990 ~United Press International
(OCT. 24) UPI - Labor Secretary Elizabeth Dole resigned from the Cabinet today. The highest-ranking woman in the Bush administration is leaving government to head the American Red Cross. President Bush accepted her resignation with ''real deep regret.'' Elizabeth Dole, the wife of Senate Minority Leader Robert Dole of Kansas, has held a number of high-level federal jobs over the years, including transportation secretary during the Reagan administration. She is the first member of the Bush Cabinet to resign.

Standing at the president's side today, Dole denied reports that she was leaving because she felt shutout in the male-dominated Cabinet. She also is playing down speculation that she may run for governor of North Carolina in 1992.

A Cuba passenger plane with 31 people aboard crashed 540 miles east of Havana today. The official Cuban news agency says the Yak-48 plane carried 24 passengers and a crew of seven when it went down near the airport of the town of Santiago de Cuba. There's NO immediate word on deaths or injuries.

The Commerce Department reports that orders for durable goods dropped one-point-seven percent last month. And economists point to that as another sign of a slowing economy. Durable goods are those designed to stay around three or more years. Their orders keep major factories humming. The September decline follows a revised drop of eight-tenths of one percent for durable goods orders in August.

Most of the 37 British hostages freed by Iraq yesterday are back in London for an emotional homecoming. Former British Prime Minister Edward Heath accompanied them on the flight. It was Heath who secured their release after meeting with Iraqi President Saddam Hussein. The 14 Americans released yesterday are expected to land in New York City later today aboard a commercial airline flight. Iraq also says all 350 French hostages it holds are now free to leave or stay.

NASA engineers this afternoon begin pumping super-cold liquid hydrogen into the big external fuel tank of Atlantis in a critical test to prove that the shuttle is leak-free. The tests were ordered after tiny fuel leaks grounded both Atlantis and Columbia four months ago. Managers are confident that Atlantis will pass the test and be ready for launch on a classifed military mission around November 10th.

There are NO reports of major damage or injuries after an earthquake rolled

through southern Illinois early today. The quake measured three-point-five on the Richter scale and was strong enough to rattle the bars at the jail in Mount Vernon, Illinois. The quake raises additional fears because of predictions of a major quake in December along the New Madrid Fault running from Arkansas into Illinois and Missouri.

A heavy police presence in Pakistan failed to prevent election day violence between supporters of fired Prime Minister Benazir Bhutto and the rival Islamic Democratic Alliance. Gunbattles in Punjab province left two people dead and two wounded. 21 others were wounded in violence-torn southern Sind province. About 48- Million of Pakistan's 110-Million people are eligible to vote in elections seen as a referendum on the president's decision to sack Bhutto's two-year-old government.

#90297u1319 10/24/1990 ~United Press International

NEW YORK (OCT. 24) UPI - A defense lawyer who has vowed to grill the Central Park rape victim about her sex life gave what could be a preview of his tactics Wednesday when he taunted a male jogger who was hospitalized after being beaten by the teen gang.

John Loughlin, 42, was jogging around the park's moonlit reservoir track on April 19, 1989, when he noticed a dozen teens surrounding and beating a victim he testified at the trial of two youths.

He said he stopped and a youth about five feet away asked him, ''What are you - some kind of vigilante?''

The next thing he knew he was on the ground being throttled on the head, torso and legs by the gang, blood gushing over his body, Loughlin testified.

The New York City junior high school teacher required stitches to close his head wounds, was hospitalized for two days and doctors told him his injuries were ''life-threatening,'' he testified.

A police officer who assisted Loughlin testified during a pre-trial hearing that he looked as though he had been ''dipped in a bucket of blood.''

Kharey Wise, 18, and Kevin Richardson, 16, are on trial at state Supreme Court in Manhattan on 13 criminal counts stemming from the ''wilding'' rampage, including the assault of Loughlin and the rape and attempted murder of the woman jogger.

The Wall Street banker was found naked but for a jogging bra, unconscious and bleeding in a muddy gully off the 102nd Street Transverse. She suffered two head fractures, brain damage and severe memory loss.

The 30-year-old woman from Upper St. Clair, Pa., testified for the prosecution at the first trial in the case last summer but was unable to remember a single detail about the attack.

Because she was unable to identify any of her attackers, the defense chose not to cross-examine her because it could have created juror sympathy for the victim.

Moore, however, has said he plans a different tactic when the woman jogger takes the witness stand sometime in the next few weeks. He has vowed to vigorously question her about her sex life in an effort to prove she was never raped but had a sexual tryst at her apartment before going jogging.

The jury viewed 11 photographs of the wounds inflicted on Loughlin, who still has head pain and knee trouble some 18 months after the attack.

But under cross-examination, Wise's lawyer, Colin Moore, ridiculed Loughlin about his victimization and the seriousness of his injuries.

Moore held up one of the photographs, depicting a leg injury.

''Look at this picture, Mr. Loughlin. That little nick was life threatening?!'' Moore scoffed.

''No,'' answered the former Marine as the youths' supporters snickered from the back of the courtroom.

Moore also asked the 6-foot 4-inch tall, 190-pound man, ''How did you feel when they called you a vigilante?''

''Perplexed,'' Loughlin answered, looking over at the prosecutor's table to a pile of blood-soaked clothing he was wearing the night of the attack.

''Only perplexed? But if you were scared, you could have run away. But you chose not to - didn't you?'' Moore pressed, again eliciting laughter from the crowd.

Later, under questioning by Assistant District Attorney Elizabeth Lederer, Loughlin testified that he was, ''Perplexed, and I feared for my life.''

#90297u1325 10/24/1990 ~United Press International

CAPE CANAVERAL, FL (OCT. 24) UPI - The repaired shuttle Atlantis sailed through a make-or-break fueling test Wednesday with no significant hydrogen leaks, clearing the way for launch around Nov. 10 to put a spy satellite in orbit.

"We conducted a very successful test today," said Forrest McCartney, director of the Kennedy Space Center. ''We saw exactly what we expected to see, a good, tight system both externally and internally. I think we're ready to fly.''

Relieved NASA managers plan to hold a two-day flight readiness review Monday and Tuesday to discuss the status of launch processing and to set an official launch date for the 37th shuttle mission.

At the same time, engineers at launch pad 39B plan to conduct yet another fueling test to pinpoint an elusive hydrogen leak, one of at least two, that have grounded the shuttle Columbia since May. If all goes well, the veteran spaceplane could be ready for another launch try in early December.

Atlantis has been grounded for more than four months because of a tiny hydrogen leak that was detected during a fueling test June 29. But with the successful test Wednesday, ''it appears we have licked the problem ... and it appears we have a very clean vehicle,'' said NASA spokesman Bruce Buckingham.

As usual with such military missions, the exact launch time will remain classified until nine minutes before liftoff. But sources who requested anonymity said takeoff is planned for 6:47 p.m. EST on Nov. 10, possibly as early as Nov. 9 if work at launch pad 39A continues to go well.

In any case, NASA next week is expected to announce a launch day and a four-hour launch period beginning at 6:30 p.m.

The goal of the flight, the fifth so far this year, is the deployment of a giant photo-reconnaissance spy satellite into an orbit that will repeatedly carry it over the Persian Gulf, according to Aviation Week & Space Technology magazine.

The duration of the flight also is classified, but sources told United Press International the mission will last three days, 23 hours and 55 minutes, resulting in a landing at Edwards Air Force Base, Calif., at 3:42 p.m. PST on Nov. 14.

Launch originally was scheduled for mid July, but the flight was put on hold when sensors detected explosive hydrogen gas in the area where fuel lines from the external tank enter the belly of the orbiter.

That test was conducted after Columbia was grounded the night before a planned May 30 liftoff because of a similar leak.

But Columbia also showed signs of leakage inside its engine room and NASA officials now believe the spaceplane was the victim of two separate leaks, one of which has yet to be pinpointed. Another fueling test for Columbia is planned next week and in the meantime, the ship remains grounded.

Atlantis's problem was traced to damaged seals inside a 17-inch-wide ''disconnect'' fitting that allows the external tank to be jettisoned in space. The seals were replaced and NASA managers were confident Atlantis was ready for flight.

To make sure, yet another fueling test was conducted Wednesday - Atlantis's fourth - to prove the ship was leak free.

Engineers began pumping supercold liquid hydrogen rocket fuel through Atlantis's engine room plumbing shortly after 1 p.m. EDT Wednesday, six hours late because of concern about a small dent in a fuel line and a broken electrical component.

At 1:24 p.m., high-speed hydrogen loading began. It was at this point during three previous fueling tests that explosive hydrogen gas was detected near the disconnect fitting.

But this time around, no significant leaks were detected externally around the fuel line fittings and concentrations in Atlantis's engine room amounted to just 175 parts per million, well below NASA's conservative redline of 500 parts per million. The test ended about 1:50 p.m.

''We seem to have a very tight vehicle at the pad this afternoon,'' Buckingham said. ''We have just very minor indications of liquid hydrogen seeping into the aft compartment near our sensors, but it's well within limitations.''

With Atlantis's test out of the way, engineers at nearby pad 39B are gearing up to pump hydrogen fuel back aboard Columbia next week in an ongoing series of tests to pinpoint the location of an internal leak that continues to ground NASA's oldest shuttle.

''It's always nice to have a successful test under your belt and that just leaves one more to go, and that's Columbia,'' said launch director Robert Sieck. ''We think we've got that one (solved). We'll know for sure about the middle of next week. The proof of the pudding will be a tanking test.''

#90297u1336 10/24/1990 ~United Press International

WASHINGTON (OCT. 24) UPI - Undaunted by the blockade of their compound by Iraqi troops, the eight diplomatic personnel holed up in the U.S. Embassy in occupied Kuwait subsist on limited supplies and recently unrolled a weapon of defiance: clean cars.

In a telephone call on Wednesday, Secretary of State James Baker commended Ambassador Nathaniel Howell and his staff for their courage and perseverance in the face of Saddam Hussein's orders to close all embassies in the tiny, oil-rich nation overrun by Iraqi troops on Aug. 2.

According to State Department spokeswoman Margaret Tutwiler, Howell told Baker: ''We're hanging in there.''

Troops began their blockade on Aug. 24 when Saddam ordered all 60 foreign embassies in Kuwait closed. Only the United States, Britain, France and Italy have defied the directive from Baghdad.

Life is rugged in the embassy as the staff lives on canned food that was shipped to the compound before the blockade and has boiled pool water under a fire fueled by furniture.

Recently the staff dug a well inside the embassy, which is located near the sea, and struck water. The water was slightly brackish, but suitable for ''long overdue baths,'' said Tutwiler.

And, in a display of spirit, the staff washed the embassy's cars using water from the newly dug well. The cars have not been used since the blockade took effect.

#90297u1342 10/24/1990 ~United Press International

BELFAST, NORTHERN IRELAND (OCT. 24) UPI - The Irish Republican Army staged three bombings against British forces Wednesday, killing six soldiers and one civilian and wounding more than 20 people in the worst terrorist actions in two years, police said.

Both blasts went off around 4 a.m., and involved proxy bombers forced to drive car-bombs into British checkpoints because their families were being held hostage by the extremists.

The IRA claimed responsibility for the attacks and said the civilians who drove the bombs had been chosen because they were in the construction industry and had worked for the security forces.

''This morning's military operation again devastates the myth of containment '' the IRA said in a statement released through the Republican Press Center. ''Until the British government ends its war in Ireland, attacks such this morning will continue.''

The blasts inflicted the highest death toll since a 1988 attack on a bus, in which eight soldiers died.

They apparently were timed for Thursday's fifth anniversary of the signing of the Anglo-Irish agreement giving Dublin a greater say in the affairs of Northern Ireland. It has been vigorously opposed by the IRA.

In London, Prime Minister Margaret Thatcher described the bombings as ''an appalling outrage,'' and declared her sympathy for families of the victims.

Northern Ireland Secretary of State Peter Brooke said the attacks would not advance the IRA's aim of ending British rule in Northern Ireland, and that the government remained resolved in its fight against terrorism.

worked for the security forces.

Of the wounded in Londonderry, three were soldiers in critical condition after surgery at the nearby Altnagelvim Hospital.

About a dozen homes were damaged, with windows and doors blown in and roofs blasted off.

''I was in bed with my daughter,'' said Sarah Mc Veigh, who lived close to the checkpoint. ''We were wakened by the bang. It was a massive explosion. My whole house shook and the window was blown in on top of the bed. We were both very lucky we were not killed.''

At Nawry, a 65-year-old pensioner who had been forced to drive the bomb into the search bay area of a checkpoint managed to shout a warning to the troops and jump out of the vehicle before the bomb exploded.

Aside from one soldier who was killed, the 13 wounded included two police officers. The pensioner sustained a broken leg.

#90297u1359 10/24/1990 ~United Press International

WASHINGTON (OCT. 24) UPI - The Senate approved Wednesday a $15.5 billion foreign aid appropriations bill that cuts in half military aid to El Salvador and forgives Egypt's $6.7 billion military aid debt.

The bill was approved 76-23 and sent to conference where negotiators for the Senate and House will work out a compromise bill. The House passed a $15.6 billion bill in June.

The legislation would cap military aid to El Salvador in fiscal 1991 at $85 million - $5 million less than the administration requested - but only half would be sent in an effort to press the the government to seek a ceasefire and a political settlement under U.N. auspices.

The government of El Salvador would get the second half of the allocation if the rebel forces in the 10-year-old civil war refuse a ceasefire or political settlement.

The bill provides $3 billion in military and economic aid to Israel, with permission to shift $200 million from economic to military needs, and $700 million in military equipment taken from U.S. forces in Europe.

Egypt, which has sent troops to Saudi Arabia help U.S. forces facing off against Iraq, would get $2.1 billion in economic and military aid in addition to the forgiveness of the $6.7 million in loans.

Morocco, which has sent military forces to Saudi Arabia, and Turkey, which has cut its oil pipeline to Iraq, would get more aid in fiscal 1991 than last year reflecting its efforts to isolate Iraq.

Morocco's aid was increased from $43 million to $52 million and Turkey's from $545 million from $497 million.

The bill also bars aid to any country that does not comply with the sanctions against Iraq.

#90297u1401 10/24/1990 ~United Press International
MIAMI (OCT. 24) UPI - A pilot on leave from Eastern Airlines was elected Wednesday as president of the Air Line Pilots Association, the national union said.

J. Randolph Babbitt, 44, the union's executive administrator since 1985, will replace Henry A. Duffy, a pilot from Delta Airlines who held the leadership

post since 1983.

Babbitt, who joined Eastern in 1966, was elected at the union's biennial board of directors meeting.

ALPA pilots at Eastern walked off the job in March 1986 in sympathy with striking co-workers from the International Association of Machinists.

Pilots voted in November to return to work, but many have not been recalled, since Eastern reduced operations and recruited replacements in their absence.

Babbitt of Oakton, Va., will begin his four-year term on Jan. 1.

The union represents 42,000 pilots at 50 U.S. airlines.

-30- 1057

#90297u1423 10/24/1990 ~United Press International

WASHINGTON (OCT. 24) UPI - The Senate upheld by a single vote Wednesday President Bush's veto of the major civil rights legislation of 1990, and supporters of the bill vowed to return next year with an even stronger anti-discrimination measure.

The Senate voted 66-34 - one vote short of the necessary two-thirds majority - to sustain Bush's rejection of the bill. The president has vetoed 16 bills and Congress has failed to override any of them.

All 55 Democrats and 11 Republicans voted to override the veto. Thirty-four Republicans voted to sustain.

Sen. Arlen Specter, R-Pa., said the administration and the bill's backers were still ''very, very close'' to agreeing on a substitute measure, and Senate Republican leader Robert Dole promised a White House Rose Garden signing ceremony this week if Congress adopts the administration alternative.

The White House welcomed the outcome of the veto override attempt and urged Congress ''to take immediate action on the president's alternative proposals so that we may have a true civil rights bill to protect the civil rights of all Americans.''

But Sen. Edward Kennedy, D-Mass., said the issue was dead for the year and and predicted Congress next year will pass a ''stronger bill'' and will have the votes to override a veto by Bush.

Asked if something could be worked out on the administration alternative bill, Kennedy said, ''You can't compromise on discrimination and that's what the president was trying to do.''

The debate prompted a scathing personal denunciation of Bush by Kennedy, D-Mass., who accused the president of taking ''the low road on civil rights.''

Kennedy said the veto ''contravenes the basic principles for which George Bush has stood'' during his long career, adding, however, ''When the chips are down President Bush - like candidate Bush - is willing to divide the nation for narrow or partisan advantage.

''It is bad enough to resort to such disgraceful tactics in a political campaign,'' Kennedy said.

''But it is far more serious when a president of the United States, who is supposed to be president of all the people, dishonors his high office, abuses the noble cause of civil rights and stoops to divisive appeals to prejudice and resentment.''

President Arthur Kropp of People for the American Way, which pushes civil rights, said the bill was the ''casualty of an unrelenting White House smear campaign,'' but Kirk Fordice of the Associated General Contractors of America, said, ''I fervently hope that today's action will be the first of many to rid our society of other quota-inducing laws and regulations.''

The legislation, approved by overwhelming majorities in the Senate and House, would have overturned a series of Supreme Court decisions that made it more difficult for women and minorities to prove discrimination in hiring, promotions and job-related actities.

Among those in the chamber were Jesse Jackson, members of the Congressional Black Caucus, and David Duke, former leader of the Ku Klux Klan who recently was beaten in Louisiana's Senate race.

Bush vetoed the bill on the advice of Attorney General Dick Thornburgh and C. Boyden Grey, chief White House counsel, and over the objection of many of his advisers who feared a political setback for Republican efforts to enlist black voters.

After lengthy agonizing, Bush vetoed the measure Monday, saying, ''I deeply regret having to take this action ... especially since it contains certain provisions that I strongly endorse.''

But he said, ''When our efforts, however well intentioned, result in quotas, equal opportunity is not advanced but thwarted.''

On Tuesday, Bush said he thought the veto sent a signal that ''we are for civil rights and against quotas. ... I am strongly for civil rights and I will continue to oppose something that inevitably leads to quotas.''

Senate Democratic leader George Mitchell said that with the veto Bush ''has

turned his back on working men and women, white and black.''

''The bill does not reuire quotas. Indeed the bill explicitly rejects quotas '' he said. ''It simply requires that everyone gets a fair chance.''

Specter, closely involved in the negotiations with the White House, also rejected Bush's argument that the bill would lead to quotas.

Specter, who recounted the problems he had in attending college and getting a job after law school because he is Jewish, said, ''If Arlen Specter accepted the bill, it wasn't a quota bill. I abhor quotas. This is not a set-aside bill and it is not a quota bill.''

#90297u1436 10/24/1990 ~United Press International

LAS VEGAS, NE (OCT. 24) UPI - The heavyweight title Buster Douglas wants to prove he deserves and Evander Holyfield waited so long to fight for will be on the line Thursday night.

Douglas, 30-4-1, makes the first defense of the championship he won with a stunning 10th-round knockout of Mike Tyson Feb. 11 in Tokyo. Holyfield, 24-0, finally challenges for the title after spending 20 months as the top-rated challenger.

The fight, scheduled for 12 rounds, will take place at The Mirage's 16,350-seat outdoor arena and can be seen on pay-per-view TV throughout the country and 121 nations around the world.

Douglas is still looking to prove his victory over Tyson was not luck, as the former champion has claimed. Douglas enters the fight a 13- 10 underdog.

''Beating Mike Tyson, and then coming back to beat Evander Holyfield is a magnificent feat,'' Douglas said. ''It will put me in the same category as the great champions.

''It is a goal of mine to go down in history right alongside Muhammad Ali, Rocky Marciano, Joe Louis and Joe Frazier and other great champions.''

Holyfield, a 1984 Olympic light heavyweight medalist and former undisputed cruiserweight champion, said he has looked forward to fighting for the heavyweight championship since he started boxing when he was 10.

''This is payoff time, where everything comes to an end,'' Holyfield said. ''Where either you pass the test or not. I've been trying to get here for 18 years, now I'll see if I'm ready for the test. I feel I am.''

Douglas's condition has been a major topic leading up to the bout. But he says he is in as good shape as when he lifted the title from Tyson in one of the biggest upsets on sports history.

The weigh-in was scheduled for 7 p.m. EDT Wednesday night. Douglas expected to weigh between 230 and 235, while Holyfield predicted he would weigh around 212.

''I compare my conditioning and the way I feel overall going into the two fights, and I am comfortable with the way I am,'' Douglas said. ''I feel stronger.

''Beating Evander will prove once and for all the fight with Mike Tyson wasn't a fluke. I'm still the underdog. Therefore, I still have something to prove.''

Holyfield's conditioning is never a problem. He is one of the most impressively built boxers in the sport. But many doubt he is big enough to

handle a large heavyweight like Douglas. At 6-foot-4 with an 83-inch reach, Douglas has advantages of 1 1/2 inches in height and 5 1/2 inches in reach. Douglas, Columbus, Ohio, is 30 and Holyfield, Atlanta, 28.

''I've been small all my life,'' Holyfield said of his size disadvantage, ''and I've never had no problem.''

Douglas has not fought since the Tyson fight, mostly because of his legal battle with promoter Don King - which was settled out of court. Holyfield's previous bout was a fourth-round knockout of Seamus McDonagh June 1. When Douglas fought Tyson, Holyfield had a signed $12 million to challenge Tyson in June.

''When you want something as bad as I did and waited all these years ... I stayed focused because I know how good it's going to be when I win it,'' Holyfield said.

Douglas will earn a record $24 million to Holyfield's $8 million. Mirage owner Steve Wynn, the fight's promoter, forecasts a million pay- per-view subscriptions will be sold for the bout. He also expects a live gate in excess of $10 million.

If Douglas wins, he has signed to fight a rematch with Tyson at The Mirage. Holyfield plans to fight 42-year-old former champion George Foreman next if he wins.

The bout is scheduled to start around 10:30 p.m. EDT.

NEW YORK (OCT. 24) UPI - Prodigy Services Co. said Wednesday it was making move-by-move coverage of the World Chess Championship available to chess aficionados who have a home computer.

Prodigy, a joint venture between International Business Machines Corp. and Sears Roebuck & Co., is an on-line computer service which allows its 500,000 subscribers to access a wide range of information networks, from weather to travel, shopping and news.

Prodigy has stored each match of the championship, so that subscribers can relive the game and study every move made by Anatoly Karpov and Gary Kasparov. Commentaries are displayed simultaneously on the screen by chess wizards such as former U.S. champion John Grefe.

Prodigy's coverage of the championship will include all 12 U.S. matches as well as the 12 matches being played in Lyon, France.

Membership to Prodigy costs $9.95 a month.

NEW YORK (OCT. 24) UPI - A plea for an usher to seat a comedian's bride minutes before a radio broadcast 50 years ago started a one-liner institution when Henny Youngman asked, ''Take my wife, please?'' the king of one-liners recalled Wednesday.

''Truck drivers shout it out and people in the street walk up and say it to me '' the 84-year-old Youngman said. ''It's become a logo.''

Youngman claims never to write jokes, only to buy them, but when his wife showed up with eight friends 10 minutes before a CBS radio ''Kate Smith Show'' in 1940 on which he regularly appeared his most famous line of all was born.

Youngman asked an usher to her off his hands.

''I gave him $2,'' he said with a grin.

The 50th anniversary of the joke was marked at Bruce Ho's midtown restaurant by a gathering of comics and a cake topped with a candle for every year the line has been bandied about.

Ho is fellow member of the Friar's Club, a fraternity of entertainers.

Youngman, 84, sat at the head of the table, a pink napkin tucked into the collar of his shirt, his coffee, scrambled eggs and French fries getting cold.

On his left was Professor Irwin Corey - ''the world's most foremost authority'' - and his wife, Frances.

''If we don't change direction soon we'll end up where we're going,'' warned Corey, who referred to Youngman as the ''Ambassador from Brooklyn.''

On Youngman's right, his daughter Marilyn Kelly, Paula Goldin, his secretary and ''friend of 50 years,'' and Mickey Freeman, ''Zimmerman'' on the 1950s television hit ''Sgt. Bilko.''

''My wife's so ugly she goes to the beauty parlor by ambulance,'' Freeman said.

Comedian Milton Berle sent congratulations from California, saying he's celebrating the joke's anniverary ''because I stole it from Henny 50 years ago.''

George Burns also wired his regrets, but claimed it really was nothing to celebrate since he has jokes he's been using 90 years.

''George Burns is so old when he orders a 3-minute egg they ask him to pay up front,'' cracked Youngman.

Youngman's wife of 59 years, Sadie, died in 1987.

Now that she's gone, Youngman said, he's coming out with a new book in January that will carry all the anecdotes he left out of his first one 16 years ago, because he ''thought it would scare her,'' about working clubs run by ''mobsters.''

''I had a boss who used to stab me good night,'' he said. ''The checkroom girl's name was Rocco.''

Still active, he was featured in the movie ''Goodfellas,'' has two current television commercials and appears at banquets, sales meetings and roasts.

''My rates are reasonable,'' he said.

''We just roasted Zsa Zsa Gabor,'' Youngman said. ''She's been married eight times. She has rice marks on her face.''

#90297u1446 10/24/1990 ~United Press International

UNITED NATIONS (OCT. 24) UPI - Oil, forests, fish and land all are at risk of exhaustion but the United States is lagging in world efforts to save the environment, the United Nations Association of the U.S.A. said in a report Wednesday.

The report, unveiled by former Secretary of State Edmund Muskie on the 45th U.N. Day, was based on thousands of interviews with people in 60 communities in the United States.

''Millions of citizens are concerned,'' it said.

''They are now showing their determination to rescue our battered planet, but our leaders are not doing enough,'' said Russel Peterson, former chairman of the U.S. Council on Environmental Quality.

The report proposed an environmental blueprint for the United States and the United Nations. It called for immediate international negotiations to limit the greenhouse effect, a trade surcharge on goods that harm the environment, and a curb on consumption of non-renewable resources and population growth.

Entitled ''Uniting Nations for the Earth,'' the report was sponsored by the United Nations Association of the U.S.A., an organization dedicated to enhancing the U.S.-U.N. relationship, and the Sierra Club, a grass-roots

environment group.

''Citizen groups are especially concerned about Washington's seeming lethargy in meeting the looming crises of today,'' the report stated.

Muskie, who chaired the project on global environment in anticipation of the 1992 U.N. Conference on Environment and Development in Brazil, said it was ''critical'' that the United States allocate more funds to environmental preservation.

Muskie said environmental issues were emerging as the dominant political issue of the 1990s because of broad mobilization of public concern. Wary political leaders will be forced to take action, he said.

''Earthquakes have a way of influencing politicians,'' Muskie said.

#90297u1471 10/24/1990 ~United Press International

BUENOS AIRES, Argentina (OCT. 24) UPI - The proposed sale of the state telephone company Entel to two European consortiums is in jeopardy because of a last-minute dispute over phone rates, according to both the government and private investors.

Luis Bustamante, a Telefonica de Espana executive, one of the two European groups slated to acquire Entel, told a group of foreign journalists Wednesday that talks between the government and private investors have been stalled since Sunday.

Newspapers, apparently inspired by an official leak, reported the government would halt the privatization process if a deal could not be reached by Thursday.

But Bustamante said he ''got no notification'' of a 48-hour ultimatum that reports said was issued by the government Tuesday. ''I hope it's not true,'' he said.

The Spanish phone company, heading a group of overseas and Argentine investors and a second consortium led by State of Italy and France Cables and Radio were scheduled to take over Entel Nov. 8.

''If the transfer doesn't take place by Nov. 8, Telefonica will no longer be interested in the purchase,'' Bustamante said.

Representatives of the Italian and French companies were not immediately available for comment, but in published reports over the weekend executives of that consortium also expressed irritation at an effort by the government to require a phone rate much lower than what they had expected.

The sale of the Argentine telephone company is considered a test case of the government's seriousness in privatizing state companies.

Telefonica de Espana and the Italian-French consortium offered a total of $5 billion in Argentine debt paper and $600 million in cash for Entel, a money-losing operation with debt estimated at $2.1 billion.

Bustamante said Telefonica de Espana executives, in a formal ceremony with government officials, promised before a notary public to agree to a contract that had been drawn up and was ready for signing that specified ownership terms for Entel.

#90297u1488 10/24/1990 ~United Press International

NEW YORK (OCT. 24) UPI - Moody's Investors Service Wednesday downgraded longterm debt of the Ford Motor Co., Ford Motor Credit Co. and subsidiaries, citing a soft automobile market and the heavy demands of Ford's debt burden.

The credit rating agency said about $45 billion of long-term debt of the two companies and their guaranteed subsidiaries was affected. The debt rating was downgraded to Aa3 from Aa2, still an investment-grade ranking.

Moody's said U.S. economic deterioration, the drain of buyer incentive programs in North America, a poor European market outlook and higher gasoline prices all ''heighten the uncertainty'' as to Ford's earnings and cash flow.

''Moreover,'' it said, ''the increasingly competitive environment throughout the product spectrum may lead to further market share erosion in North America '' Moody's said. It also cited tough Japanese moves into Europe.

Another factor in the downgrade was Ford subsidiary First Nationwide Bank, a San Francisco-based institution. Moody's said the bank ''represents a potential drain in the form of additional capital infusions.''

But Moody's added that Ford ''retains substantial financial flexibility in the face of a recessionary environment.''

It said Ford was better off now than before the 1981-82 recession for several reasons: lower running costs, a broader product range, higher quality and ''solid overall'' U.S. and European market positions.

WARSAW, POLAND (OCT. 24) UPI - Solidarity leader Lech Walesa was officially registered Wednesday as the second presidential candidate after Prime Minister Tadeusz Mazowiecki with 500,000 signatures backing his candidacy.

Jacek Merkel, head of Walesa's electoral committee, Tuesday filed mail sacks and suitcases filled with lists of more than 500,000 signatures supporting Walesa's candidacy.

The National Electoral Commission, after counting the first 100,000 signatures that are required, officially registered Walesa as candidate Wednesday, one week after registering Mazowiecki who collected 141,000 signatures.

Registration documents must be filed by midnight Thursday and Gazeta Wyborcza said six more candidates were expected to have the required number of signatures.

Early presidential elections were called for Nov. 25, after Gen. Wojciech Jaruzelski, a former communist and author of martial law imposed in Poland in 1981, yielded to pressure and agreed to step down one year into his five-year term.

Walesa has openly criticized Mazowiecki's government for leniency towards former communists and the slow pace and high social costs of economic and political reforms currently being implemented.

In order to put pressure on the government, Walesa last month said he would run for president. He was later challenged by Mazowiecki, who said he would go into opposition if Walesa was elected.

An opinion poll ordered by Walesa showed 45 percent of eligible voters will support him in the elections while Mazowiecki can count on 31 percent.

Jaroslaw Kaczynski, head of the Center Alliance supporting Walesa's bid, told Polish Radio that Finance Minister Leszek Balcerowicz was considered a ''serious candidate'' for prime minister under Walesa's presidency.

Balcerowicz is the author of an economic reform that stifled inflation in Poland, but which Walesa criticized sharply for causing widespread unemployment and lowering the standard of living.

Unemployment in Poland is estimated at about 800,000 people while living standards have been cut by about 30 percent since January.

The two men have markedly different campaign styles. Walesa has tried to rally support from blue-collar workers with an ambitious tour of industrial centers, while Mazowiecki has concentrated on fulfilling his duties as prime minister.

Mazowiecki has tentatively agreed to appear with Walesa on television to answer questions from journalists. Neither details nor a date have been set.

Fourteen candidates have circulated petitions backing them for president, but the individual farmers' and Green Party's candidates withdrew and ceded their support to Walesa.

Roman Bartoszcze, the Peasant Party's candidate, and left-wing candidate Wlodzimierz Cimoszewicz met the signature requirement and requested registration, the official news agency PAP said.

Kaczynski said Bartoszcze's candidacy ''is a serious loss'' for Walesa who would be supported by all farmers if the Peasant Party did not have its own candidate.

#90297u1520 10/24/1990 ~United Press International

KANSAS CITY, MO (OCT. 24) UPI - Trans World Airlines Inc. is considering buying Eastern Airlines' operation in Atlanta, a newspaper said Wednesday.

The transaction would include about 50 gates and 100 airplanes, the Kansas City Star said.

TWA Chairman Carl Icahn told the newspaper that Eastern, currently operating under Chapter 11 bankruptcy protection, had invited TWA to bid for the Atlanta hub, one of Eastern's largest operations.

Icahn could not be reached for comment Wednesday.

The TWA chairman did not place a value on the transaction, but said Eastern's north-south routes out of Atlanta would complement TWA's east- west service, based at its hub in St. Louis.

Icahn told the newspaper he was to meet with TWA officials to discuss the transaction and that a decision was expected during the next few days.

He declined to say how much it would cost to buy the Atlanta hub, but said TWA has reserves of about $1 billion. TWA lost $300 million last year and paid $366 million in interest expenses on debt of $2.5 billion.

Eastern has operated in bankruptcy for 19 months. Its creditors reportedly have solicited bids for Eastern assets, although no airline is thought to have bid for the Atlanta hub.

Icahn reportedly was asked by Eastern's unsecured creditors in April to make an offer for the airline. But he reportedly declined, industry sources said, because he considered Eastern ''too far gone'' to restore.

Eastern's parent, Continental Airlines Holdings Inc., prepared during the weekend to file for bankruptcy protection, but decided against the move at the last minute, according to Wednesday's New York Times.

Standard & Poor's Corp. lowered debt ratings of the holding company and Continental Airlines Wednesday, despite Continental's vehement denial that it had considered filing for Chapter 11.

Continental, which had nearly $500 million in cash reserves in June, reportedly suffered unexpected losses this summer - normally the industry's most prosperous season - and has been hit hard by fuel prices that have more than doubled since the Iraqi invasion of Kuwait Aug 2.

Continental Airlines Holdings was known as Texas Air Corp. before June.

NEW YORK (OCT. 24) UPI - Average yields for money-market mutual funds were higher or unchanged in the latest reporting week, while rates at competing savings and loan institutions were mixed, organizations that track the information said Wednesday.

The Donoghue Organization, of Holliston, Mass., said average seven- day simple yields were 7.45 percent, up from 7.44 the previous week, and 30-day simple yields were unchanged at 7.46 percent.

The average maturity of fund portfolios rose to 46 days from 45.

The Bank Rate Monitor, of North Palm Beach, Fla., gave average rates as follows: money-market deposit accounts, 5.86 percent, unchanged; Super-Now accounts, 4.94 percent, unchanged; six-month certificates of deposit, 7.46 percent, down from 7.47 percent; 1-year CDs, 7.55 percent, down from 7.57 percent; 2 1/2-year CDs, 7.66 percent, up from 7.65 percent; and five-year CDs 7.79 percent, down from 7.80 percent.

The average rate for a one-year, adjustable-rate mortgage was 8.20 percent, off from 8.25 percent the previous week.

The average rate on a 15-year, fixed-rate mortgage fell in the latest week to 9.76 percent from 9.80 percent, while the average rate for a 30- year, fixed-rate mortgage eased to 10.09 percent from 10.12 percent.

The average rate for a four-year automobile loan fell to 12.11 percent from 12.13 percent last week.

(OCT. 24) UPI - The Senate today voted to uphold President Bush's veto of the major civil rights bill of 1990 by one vote. Senate Republican leader Robert Dole said the veto was a ''tough'' decision for Bush. Dole promised that if Congress adopts an alternative bill, there would be a ''signing in the Rose Garden'' next week.

Another deadline is looming for federal budget negotiations in Washington. Unless President Bush signs a new temporary spending bill... the government will run out of money at midnight. White House Chief of Staff John Sununu complains that negotiations have drifted away from spending cuts to increasing taxes.

Transportation Secretary Elizabeth Dole is resigning her post with the Bush administration, effective November 23rd, to become president of the American Red Cross. Dole, the wife of G-O-P Senator Robert Dole, has served two presidents as a Cabinet member. President Bush accepted the resignation with regret.

New charges of sexual misconduct have prompted Ohio Representative Donald Lukens to resign his House seat rather than face an ethics committee probe. A published report quoted a source as saying that Lukens patted a Capitol elevator operator on her buttocks and rubbed her back.

In Bonn, Germany's Social Democratic Party wants the government to make public the financial wealth of the East German political parties that once were allied closely with the ruling Communist Party. There are allegations that the former Communist Party embezzled Millions of dollars.

Another victim of the gang of teen-aged youths accused of attacking and gang-raping a New York City woman as she jogged through Central Park in 1989 was unable to identify his attackers today in court. Two other victims of the gang yesterday also were unable to identify the defendants as their attackers.

A fairly powerful earthquake rumbled through northern California late last night... measuring five-point-seven on the Richter scale. An owner of an inn on top of the epicenter of the quake near Mono Lake in Yosemite National Park

said the quake broke nearly all the glass at her bar.

One economist says the manufacturing industry is ''hanging on for dear life'' to avoid a recession. That observation is prompted by today's Commerce Department report on orders for durable goods, which plunged a surprising one-point-seven percent in September. That's the second decline in a row.

The parent company of the 7-Eleven convenience store chain filed for bankruptcy today in Dallas. The Southland Corporation is trying to get out from under a mountain of debt that the Thompson family incurred when it went private in a leveraged buy-out three years ago. Southland announced a Japanese buy-out offer this spring.

Humphrey the wrong-way whale is swimming freely near Alcatraz Island but appears to be in NO hurry to escape San Francisco Bay. Rescuers freed Humphrey from shallow water in a mud flat yesterday. Specialists will herd the humpback in the right direction if he veers off course again.

NEW YORK (OCT. 24) UPI - Standard & Poor's Corp. Wednesday lowered senior debt ratings of Chemical Banking Corp., the sixth-largest U.S. bank holding

company, and its main New York and Texas subsidiaries.

The credit rating agency said it expected ''further moderate deterioration'' in the bank's troubled loan portfolios in a trying economic environment. But nonperforming loan levels ''should remain manageable,'' S&P said.

S&P said that high costs of making provisions against loan losses over the medium term were likely to depress earnings but that Chemical ''has the liquidity and financial flexibility to deal with the expected loan problems.''

About $5 billion in corporate debt was affected as the senior debt rating was lowered to triple-B-plus from single-A-minus for the bank holding company and its two main bank subsidiaries, among other downgrading actions. The two subsidiaries are Texas Commerce Bancshares and Chemical New York N.V.

S&P downgraded Chemical Banking's subordinated debt to triple-B from triple-B-plus and preferred stock to triple-B-minus from triple-B. Also lowered were ratings on certificates of deposit issued by Chemical banking units.

''While the bank is significantly exposed to commercial real estate both in Texas and in the Northeast, expected deterioration in the East should have a muted effect on Chemical's portfolio as it is mature and relatively conservatively managed,'' S&P said.

In the lLonger term, ''the bank's acquisition of regional banks in Texas and New Jersey, together with its strong New York middle-market commercial lending business, should contribute to earnings and financial stability stemming from increased diversification,'' the agency said.

S&P said Chemical's recent cut of its dividend should help shore up eroded capital. Chemical lost $43.7 million in the third quarter of 1990 and slashed the quarterly dividend paid on common stock to 25 cents from 68 cents.

The chief cause of its losses in the period was a $250 addition maid to reserves against losses on real estate and other loans. Nonperforming assets rose by $186 million in the quarter, to $3.19 billion.

WASHINGTON (OCT. 24) UPI - Environmentalists urged President Bush Wednesday to sign clean air legislation now awaiting final passage in Congress, saying a new study shows that - contrary to dire predictions by industry - costs to Americans will be relatively modest.

The National Clean Air Coalition, an umbrella organization for the nation's major environmental groups, released a study that found the bill would cost the average American household an additional $8.40 per month by 1995, primarily due to higher utility bills and car and gasoline costs.

For the long term, the study cited Bush administration estimates that each household would pay roughly an extra $20 a month by 2005 because of the bill's new controls on acid rain emissions from power plants and toxic and smog-causing emissions from industry and cars.

It said the relatively modest nature of those costs was demonstrated by estimates that the average American household in 1990 will spend $29 a month for movies and $51 for alcohol.

The study said its ''per household'' figures were based on projections that the clean air bill would cost the nation $9.8 billion per year in 1995 and $20.9 billion in 2005.

Those figures are slightly lower than the Bush administration cost estimates of $11.8 billion to $11.9 billion per year in 1995 and $25.4 billion in 2005. Those estimates were for the separate but similar clean air bills passed by the House and Senate earlier this year.

House and Senate negotiators reached final agreement Monday on a slightly different consensus bill that is expected to be approved by Congress and sent to Bush by the end of this week.

The environmentalists' study said that compromise bill will reduce costs by $4 billion to $5 billion from earlier estimates for the House and Senate versions.

The new study was prepared for the clean air coalition by E.H. Pechan & Associates Inc., a Springfield, Va., environmental consulting firm that also has done clean air cost studies for the EPA.

The Pechan study follows studies commissioned by industry lobbies, such as the Clean Air Working Group and the Business Roundtable, that have put the cost of clean air legislation at $51 billion a year over the long term.

William Fay, head of the Clean Air Working Group, said the Pechan study was flawed in that it tracked the administration's estimates, which he said far understated the cost of the bills developed on Capitol Hill.

Fay noted the administration had estimated the cost of President Bush's initial clean air proposal at about $19 billion. But he said lawmakers had added major new pollution control requirements that pushed up costs far above the administration's $25.4 billion estimate for the House and Senate bills.

Fay said the administration was deliberately under-estimating costs for political reasons: Bush was on record as saying he would veto any clean air bill that exceeded the cost of his proposal by more than 10 percent.

In order to allow Bush to sign the pending bill, Fay said: ''The administration has sugarcoated some of these figures.''

Richard Ayres, chairman of the clean air coalition, said the Pechan study clearly refuted claims by industry that the bill would deliver a devastating blow to the already sinking U.S. economy.

Ayres maintained the bill gave industry - particularly automakers - more than enough time to develop innovative pollution control technology that would minimize costs.

He said environmentalists felt the clean air legislation went too easy on the auto industry and would hinder the nation's efforts to achieve Bush's goal of eliminating unhealthy smog levels in most cities by 2000.

Still, he said the bill would make major strides in reducing toxic and cancer-causing emissions from factories, acid rain emissions from coal-burning power plants and the use of ozone-depleting chemicals by industry.

''The skies literally will be bluer and people's lungs healthier as a result of this bill,'' Ayres said.

#90297u1681 10/24/1990 ~United Press International

WASHINGTON (OCT. 24) UPI - President Bush has asked Israel to reconsider its decision and permit a U.N. team to investigate the Oct. 8 killing of 20 Palestinians in East Jerusalem by Israeli forces, the White House said Wednesday.

Press secretary Marlin Fitzwater said Bush sent a letter Tuesday to Israeli Prime Minister Yitzhak Shamir. Fitzwater said Bush has not yet received a written response or any ''indication of any change in their attitude.''

Shamir has denied the U.N. team entry. He claims there is no need for a U.N. investigation into the bloody clash on Jerusalem's Temple Mount between police and demonstrators.

Since the incident, there have been numerous acts of violence and Wednesday

authorities closed off the Israeli-occupied West Bank and Gaza Strip to halt a wave of attacks.

Fitzwater said Bush, in his letter to Shamir, offered condolences for the death of the Israelis and urged him to permit the U.N. team to investigate the Oct. 8 clash. He also said Bush restated U.S. support for Israel.

The U.N. Security Council on Oct. 13 unanimously passed a resolution condemning Israel's action, and authorized the U.N. secretary-general to dispatch a fact-finding team.

SAN BERNARDINO, CA (OCT. 24) UPI - A 12-year-old girl was allegedly kept locked in closets for as long as 10 years by her parents, who apparently singled her out from their six other children for abuse, police said Wednesday.

An anonymous tip to the city's Child Abuse Hotline about an injured child brought officers to a small home in San Bernardino's lower-income central district Monday evening, when they found the girl locked inside a 4-by-5-foot bedroom closet.

The girl, barefoot and wearing a dirty sweat shirt and pants, showed no signs of outward trauma, but apparently spent all of her time in the cockroach-infested closet, which was littered with convenience store food wrappers and reeked of urine and excrement, police said.

''She spoke OK, she talked to the officers, but she appears to be the size of a 7-year-old,'' Sgt. Jennifer Kauffman, a Police Department spokeswoman, said.

The closet in the home had served as the girl's living quarters for about four months, or since the family had moved into the house.

But from conversations with her, her family and relatives, police determined that she has spent the past 10 years locked in closets in the family's various home throughout the San Bernardino area.

Officers arrested Joseph Peter Sauceda, 33, and Sandra Sauceda, 31, the girl's natural parents, on suspicion of felony child abuse and false imprisonment.

Six of the couple's other children, aged 2 months to 15 years, were also at the home. All six, however, appeared to be fed and clothed in normal fashion, though they had not recently attended school.

In an interview with the San Bernadino Sun, Joseph Sauceda said he had become disabled several years ago, forcing the children to stop going to school as

the family moved continuously.

''They haven't went since last year,'' Saucedo told the newspaper. ''We've been going from house to house.''

Saucedo, denying the allegations, also blamed his daughter's imprisonment on another child.

''My other girl was playing with her and I guess she locked it accidentally,'' Sauceda said.

Kauffman said the singling out of one child is not atypical behavior for abusive parents.

''For whatever reason, she was it,'' Kauffman said. ''The other children don't do anything because they don't want to be in the closet and they assume that the parents are just, well, parenting.

''The first thing the little girl did when she was let out was run to her parents. She just hung on to them for a while.''

Kauffman said authorities had apparently been called previously to the family's home by concerned neighbors and relatives, but apparently never found the child. On Monday evening, however, both parents were outside on the front porch.

''The police just never located her in the closet before,'' Kauffman said. ''This time, because they were outside, the officers were able to get in first.''

Joseph and Sandra Saucedo were held on $10,000 bail each pending the formal filing of charges against them later Wednesday. Kauffman said authorities were planning to ask a judge to increase their bails at their arraignments, expected Thursday.

#90297u1801 10/24/1990 ~United Press International
WASHINGTON (OCT. 24) UPI - The Senate passed and sent to the White House Wednesday legislation requiring universities and colleges to disclose to students, employees and prospective undergraduates statistics on campus crime and graduation rates.

The bill, approved by voice vote, covers all universities and colleges that get federal financial assistance.

One part of the bill, originally proposed by Sen. Arlen Specter, R- Pa., would require colleges and universities to report campus crime statistics and all security policies and send them to current students, prospective students and employees.

The statistic would cover the occurence of violent crimes against students, such as murder, rape, robbery and aggravated assault, as well as drug and liquor violations.

Specter said that campus security officials now may be hesistant to reveal the scope of crime, adding, ''This bill will ensure that all colleges disclose this crucial information, forcing those institutions with poor records to improve their performance.

''In addition, I believe that public awareness of campus crime will help awaken parents and students to the reality of modern campus life,'' Specter said. ''This awareness, in turn, will help students to be more careful in observing security precautions.''

The second major part of the bill, sponsored by Sen. Bill Bradley, D- N.J., requires colleges and universities to disclose their graduation rates to all students but is aimed primarily at scholarship athletes choosing a school.

''The choice of which college or university to attend is likely to be one of the most important decisions of a young person's life,'' Bradley said.

He added, ''A potential student-athlete and his or her family are entitled to a direct and valid answer to the question: 'If I enter your college or university as a freshman on an athletic scholarship in my sport, what are my chances that I will graduate within a year or two of those entering my class.'''

''Education is the passport to a productive and rewarding life in our society '' Bradley said. ''The challenge of an education should not simply be 'making the team' or becoming an all-star, but preparing to be a good citizen, friend and family member.''

The National Collegiate Athletic Association earlier this year adopted requirements similiar to those included in the Bradley proposal.

#90297u1867 10/24/1990 ~United Press International
BUENOS AIRES (OCT. 24) UPI - U.S. Secretary of Agriculture Clayton Yeutter promised a subsidies war Wednesday if the European Economic Community refused to agree to reduce farm supports in international negotiations.

Yeutter said in a news conference in Buenos Aires that if the negotiations of the General Agreement on Tariffs and Trade, slated to end in December, were unsuccessful, and Europe retained its current agriculture subsidies, ''we will

have a war of subsidies.''

''Without an agreement in the Uruguay Round (of the GATT), it is inevitable,'' Yeutter said.

''We do not have any choice. Without a confrontation on our part, they are going to buy all the markets in the world,'' he said of the European Economic Community.

Yeutter said that under recent budget cuts passed by congress Tuesday, subsidies to U.S. farmers will be reduced by $13 billion over a five year period, including $2 billion cut each year in price supports.

The agriculture secretary said the cuts meant a 20 percent reduction in U.S. government supports of agriculture prices.

''I think that the United States has offered perhaps the best example of reducing subsidies in the world'' in passing this legislation, Yeutter said.

He warned, however, that if Europe decided to continue subsidizing its farm industry without reductions, he would be authorized under the legislation passed Tuesday to increase U.S. subsidies by $1 billion a year.

''We are going to protect our interests in the international market,'' Yeutter said.

Yeutter was winding up a three-day visit to Buenos Aires in which he said he consolidated strategy with Argentine representatives for the final GATT negotiations in Geneva in November and early December.

Aregentina is among 14 member-nations of the CAIRN group, a bloc of agriculture exporting nations, including Australia, Canada and New Zealand, that wish to drastically reduce agricultural subsidies.

BEIRUT, LEBANON (OCT. 24) UPI - Israeli aircraft raided Palestinian guerrilla bases near the port city of Tyre in southern Lebanon late Wednesday, said the Israeli Army and Moslem-run Voice of the Nation radio station.

No casualties were immediately reported.

The radio said the strike targeted the camp of Rashidiyeh on the southern outskirts of Tyre, 46 miles south of Beirut. Rashidiyeh was a main base for followers of Yasser Arafat, the chief of the Palestine Liberation Organization.

A Palestinian source said the air strike occured after nightfall.

The Israeli army said the targets served as bases for launching ''terrorist attacks.''

#90297u1908 10/24/1990 ~United Press International
NEW YORK (OCT. 24) UPI - Stocks closed higher Wednesday on a late spurt of buying sparked by the possibility that a budget accord may be reached by the midnight deadline.

The Dow Jones industrial average, which lost 22.03 Tuesday, rose 10.15 to close at 2504.21.

Among broader market gauges, the New York Stock Exchange composite index edged up 0.10 to 170.60 and Standard & Poor's 500-stock index added 0.24 to 312.60. The price of an average share rose 2 cents.

Advances led declines 757-714 among the 1,965 issues crossing the NYSE tape. Big Board volume totaled 149,290,000 shares, up from 146,300, 000 traded Tuesday.

The two driving forces in the market over the last two months - the Mideast crisis and the budget wrangling in Washington - pulled the market in opposite directions Wednesday.

Stocks were higher at mid-afternoon, bolstered by apparent progress toward a deficit-cutting accord.

On the eve of another threatened government shutdown, Congress and President Bush appeared close to a budget deal Wednesday in which Democrats would drop their demand for a surtax on millionaires. The government's spending authority extended by a stopgap measure signed by President Bush Friday, lapses at midnight.

Democratic leaders were convinced that the opposition within their own party had diminished as pressure built to end the 101st Congress and go home to campaign for re-election.

Federal Reserve Chairman Alan Greenspan has said that a ''credible'' deficit-cutting plan could lead to lower interest rates. Traders reasoned that if an accord is reached by midnight tonight, the market could rally Thursday on the news.

Thus there was a spurt of buying late in the day as traders covered themselves for any short-selling they had done in anticipation of a market decline - which on Wall Street is known as short-covering.

''There was some short-covering at the end of the day,'' said James Andrews, first vice president in charge of institutional trading at Janney Montgomery Scott Inc. in Philadelphia. ''Everyone wanted to go out flat because of the

possibility of a budget settlement tonight and the best way to go out flat is to cover your short positions.''

But before the burst of buying near the close, stocks lost all their modest gains in the afternoon after reports that Israeli air force jets bombed a guerrilla target in southern Lebanon and returned safely after hitting their targets, according to a military command communique.

The news of further unrest in the oil-rich Mideast sent oil prices up sharply. Crude oil prices closed up $1.71 a barrel to $31.08.

''We had a nice market going but then the plane attack in Israel sent us down '' Andrews said. He added that while the market recouped all its gains late in the day ''there were no real big players in the market making any new commitments. And volume of 150 million shares was not bad but it wasn't very good either.''

On the trading floor, two big banks paced the actives. Chase Manhattan was down 3/8 to 11 7/8 in dividend-related trading, the most active issue on 5.5 million shares after two big block trades.

Citicorp followed, down 3/4 to 11 7/8. The bank has had trouble attracting interest in its auction-rate preferred stock and raised the dividend rate on the issue it auctioned Wednesday in a bid to lure investors.

The higher rate meant Citicorp had to pay more to raise money through the sale of the issue and indicates concern among investors about the health of the banking sector.

General Electric was third, down 1 7/8 to 52.

Two high-technology companies were also high on the actives list, surging after unexpectedly good earnings reports. Computer Associates International jumped 3/4 to 7 1/8 after reporting second-quarter earnings jumped 200 percent to 15 cents a share. And Compaq Computer surged 4 1/8 to 47 1/2 in heavy trading after reporting third-quarter earnings soared 42 percent.

Among the other blue chips, AT&T rose 3/8 to 33 3/8, IBM gained 1 7/8 to 108 5/8, Merck rose 1/2 to 81 7/8, Woolworth lost 7/8 to 26 1/2 and Coca-Cola added 5/8 to 45 5/8.

Elsewhere, MCA plummeted after reports that Matsushita Electric Industrial Co. wanted to take a break from its buyout talks with MCA. MCA said it had no comment on the reports but Matsushita denied them late in the day. Trading was halted with the stock down 8 3/4 to 50 and did not resume.

Prices closed mixed in light trading on the American Stock Exchange.

The Amex Market Value index slipped 0.28 to close at 292.69. Advances led declines 258-246 among the 745 issues traded. The price of an average share lost 1 cent. Volume totaled 9,450,000 shares vs. 11,890, 000 traded Tuesday.

Continental Airlines Holdings led the Amex issues, plunging 1 5/8 to 4 as it denied reports that because of the surge in fuel costs, it may file for Chapter 11 bankruptcy protection.

The National Association of Securities Dealers composite index fell 0.11 to close at 340.98.

#90297u1939 10/24/1990 ~United Press International

BUFFALO, N.Y. (OCT. 24) UPI - The chemical company blamed for dumping toxic waste at Love Canal in one of the nation's worst environmental disasters was portrayed in court Wednesday as a reckless firm that failed to protect the community from known dangers.

The state of New York opened its case against Occidental Chemical Corp., seeking $665 million in damages for dumping 21,800 tons of toxins - including deadly dioxin - at Love Canal in the 1940s and 1950s.

Assistant State Attorney General Eugene Martin-Leff said in his opening statement that Hooker Electrochemical Corp., purchased by Occidental in 1968, was aware as early as 1945 that toxins buried in barrels at Love Canal in the early 1940s had seeped from the site.

Thomas Truitt, a Washington-based attorney representing Occidental, countered, telling the packed courtroom that while the firm ''deeply regrets'' what occurred at Love Canal, decisions made at the time ''by responsible executive and staff advisers'' were ''based on what was believed to be balanced judgment.''

Curtin already has found Occidental liable for creating a public nuisance at Love Canal, a 16-acre site that was sealed with a clay cap and sold for $1 to the Niagara Falls Board of Education in 1953.

Houses and a school were later built atop the landfill, and the buried chemicals began oozing from the ground.

Residents complained that oozing chemicals were the cause of higher than normal instances of cancer, liver and kidney ailments, as well as birth defects in children.

The state and federal governments declared a state of emergency at Love Canal in August 1978, leading to the immediate, permanent relocation of 237 families living along the canal and the evacuation of 1,000 more families from the surrounding area over a three-year period.

Government officials recently declared the area safe from toxic contamination and the first handful of about 200 homes in an area surrounding the dump site were put up for resale in August. None of the homes have been sold.

The opening of the trial was attended by Occidental President Roger Hirl, who traveled from the firm's Dallas headquarters, and state Attorney General Robert Abrams, who called the opening of the trial ''the day of reckoning.''

Martin-Leff said a company memorandum noted the leakage of buried chemicals from the site and ''warned of possibile future legal responsibility'' and liability.

He said Hooker decided to sell the landfill to the Niagara Falls School Board ''provided we (Hooker) would not be held responsible.''

''There is a clause in the deed attempting to relieve the company of any liability to anyone who might be injured,'' Martin-Leff said in his nearly hour-long opening.

He said Hooker's actions were a ''reckless and a complete failure to protect the community.''

In a trial that is expected to last from six-months to a year, the state is seeking $250 million from Occidental as punishment for the chemical dumping, $250 million in reimbursement for destruction of natural resources in the Niagara Falls area, and $165 million for creating a ''private nuisance'' and to cover the costs of cleaning up the site.

Truitt told the court that many of the key players in the case, including Hooker executives and members of the school board, have since died, and that the environmental concerns of today ''must not be applied to the 40s and the 50s.''

''I believe we must not fall into the trap of back to the future,'' he said.

Martin-Leff likened Hooker's selling the land to the School Board to ''leaving a vicious dog with a person who does not know how to control it.''

#90297u1998 10/24/1990 ~United Press International

MINNEAPOLIS (OCT. 24) UPI - Honeywell Inc. said Wednesday Jerome J. Meyer has resigned as president of Honeywell's industrial business to become president and chief executive officer of Tektronix Inc.

Meyer's resignation is effective Nov. 6.

Meyer joined Honeywell in 1979 and in 1983 was named group vice presidemt pf the company's information systems group. He left the company in 1984, but returned two years later as corporate vice president and staff executive.

Later, he was named president and chief executive officer of Honeywell Bull, now called Bull HN Information Systems Inc.

Meyer rejoined Honeywell in August 1988 as president of the industrial business.

Tektronix, based in Beaverton, Ore., is a manufacturer of electronic products and systems in the areas of test and measurement, computer graphics and communications. Sales in fiscal 1990 totaled $1.4 billion.

Honeywell is a global controls company. Its 1989 sales were $6.1 billion.

#90297u2012 10/24/1990 ~United Press International

WASHINGTON (OCT. 24) UPI - The House, after a raucous debate that included hoots about ''surf and turf'' fights, voted to expand federal seafood inspection efforts Wednesday but chances appeared slim for the plan to become reality.

Action was spurred by the boom in popularity for seafood among consumers looking for low-fat and lower cost food. Americans ate an average of 15.9 pounds of seafood last year, up 24 percent from 1980.

Only a fraction of the nearly 4 billion pounds of seafood eaten each year by Americans is inspected under the voluntary system now in place.

The plan approved on a 277-153 vote would implement a mandatory shellfish inspection program now and give the administration 18 months to suggest what to do about other seafood.

Senators approved a sharply different plan a few weeks ago. Leaders offered to try to work out differences with the House but a Senate aide, who asked not to be identified, said there was not enough time left before Congress would adjourn.

''Fish (inspection) is now dead for the year,'' the aide said.

In adopting a plan written by leaders of the House Merchant Marine and House Energy and Commerce committees, the House rejected a slightly modified version of the Senate bill. The administration supported the substitute and threatened to veto the Senate bill.

Rep. Gerry Studds, D-Mass., an author of the successful plan, said most seafood was safe and the only risk came from raw molluscan shellfish. Studies suggested the chance of illness was 1 in 250 for raw shellfish, compared to 1 in 25,000 with chicken.

''The experts are unanimous we should respond to what is a limited (risk),'' Studds said in arguing his plan would be more effective than the ''more general'' Senate bill.

The Senate bill would split responsibility for seafood safety among three federal entities. The Agriculture Department would conduct the inspections, the Food and Drug Administration would set residue limits and the Commerce Department would regulate fishing grounds to prevent harvesting of tainted seafood.

Backers said the Senate bill would draw on the expertise of the three agencies. While some consumer groups supported the Senate plan, other groups and labor unions preferred the House plan, partly because it would put FDA in charge and they trusted FDA more.

''This bill puts the program where it belongs - at the FDA, the agency with a mandate to protect public health,'' the group Public Citizen said after the vote.

Rep. Edward Madigan, R-Ill., said the House plan ''would delay the overdue decision as to whether even to begin seafood inspection.''

Debate centered as much on a sharp-edged tussle over control over inspections as it did on the need for a mandatory inspection program or how it should be structured. Committee leaders jealously guard their jurisdiction over federal agencies and the programs they operate.

Chairman John Dingell, D-Mich. of the Energy and Commerce Committee, one of the most skilled parliamentary fighters in the House, called it ''a bald-faced raid'' to put seafood under Agriculture Department control.

In the same vein, Rep. Jim Saxton, R-N.J., spoke of ''the moo cow fish inspection act'' and Rep. Silvio Conte, R-Mass., suggested tongue in cheek that Agriculture Department inspection was part of a plot to drive up the cost of seafood and sell more meat.

Agriculture Committee Chairman Kika de la Garza, D-Texas, said it was ''the normal, natural step'' for the department, which operates meat and poultry inspection, to be given the job of inspecting fish plants.

''A chicken is not a fish. It's not even a crawfish,'' said Rep. Billy Tauzin, D-La., who contended the Agriculture Department lacked the experience to handle fish.

WASHINGTON (OCT. 24) UPI - A government panel Wednesday approved a plan

intended to speed up the sale of assets of failed savings and loans seized by thrift regulators.

The measure, approved by the Oversight Board of the Resolution Trust Corp., will permit the RTC to securitize financial assets and expand the agency's policy for seller financing of real estate.

Securitization is the pooling of financial assets to serve as collateral for securities sold on the open market.

''The oversight board recognizes the importance of seller financing and the use of the private sector to accelerate the sale of RTC assets and reduce the costs to the taxpayer,'' said Peter Monroe, president of the panel.

''We will keep a close eye on how the RTC implements the policies and will continue to examine additional financing techniques that may help the RTC accomplish asset sales,'' Monroe said.

#90297u2033 10/24/1990 ~United Press International

NEW YORK (OCT. 24) UPI - A Brooklyn judge Wednesday found a 14-year-old boy guilty of kidnapping and attempted murder for the torching of David Opont, the schoolboy whose plight captured headlines nationwide.

In releasing his decision on the juvenile defendant - identified only as ''G.S.'' - Brooklyn Family Court Judge Joseph Esquirol said Opont ''will never be able to participate in some of the things that young people do.''

G.S. was charged with confronting Opont on his way to school last March 7 and forcing the 12-year-old Haitian immigrant into an empty basement, where he set fire to the soft-spoken child, causing burns over half his body.

Opont, who was not present in the courtroom for the verdict, told police he had been set on fire because he had refused to smoke what he believed was crack.

The severity of his injuries and the nature of the attack prompted an outpouring of sympathy from the public, and a series of visits from high-profile politicians and celebrities, including former President Reagan.

The young defendant had faced a total of 12 counts that related to both the robbery of Opont and four friends last March 6 as well as the kidnapping and burning of Opont the following day - one day before his 12th birthday.

He faces a maximum of three years in detention with possible extensions after that up until the time he is 21 years old. The judge set sentencing for Nov. 16.

The young defendant, wearing a blue and white shirt over tweed pants, stared without emotion straight ahead or off to the side during the hour-long proceeding.

Opont's attorney, Melody Glover, had no immediate comment on the decision.

The judge dismissed four counts, including charges of menacing, criminal possession of a weapon - a knife or a baseball bat - but convicted G.S. of the most serious of the charges, including attempted second-degree murder, kidnapping, and assault.

The youngster also was convicted on a number of attempted robbery and robbery charges for holding up Opont and several friends on both days.

Esquirol called the evidence presented in the non-jury hearing, held instead of a trial because the defendant is a juvenile, both ''persuasive'' and ''remarkably consistent.''

He noted that David's burn injuries caused him permanent skin disfigurement.

The judge, in summarizing the evidence, gave the following description of the two-day sequence of events last spring:

Opont suffered burns over 50 percent of his body and has undergone many painful operations, and is subject to extensive rehabilitation.

During the days immediately following the attack, a host of famous well-wishers flocked to the hospital room of the frail young victim. Visitors included former President Reagan, Jesse Jackson, ballplayer Dwight Gooden and comedian Bill Cosby.

#90297u2042 10/24/1990 ~United Press International

LOS ANGELES (OCT. 24) UPI - The price of MCA Inc. common stock plunged by more than 15 percent Wednesday following a report out of Japan that the company's buyout talks with Matsushita Electric Industrial Co. had been suspended.

MCA fell $8.625 a share to $50.25 on heavy volume on the New York Stock Exchange before trading was halted early in the stock, while the price of Matshushita's American Depositary Receipts declined $3 to $141. MCA was the 10th most active NYSE issue, with more than 1.6 million shares traded.

The unconfirmed report from a Japanese wire service said that talks between MCA and Matsushita over a possible $8 billion takeover bid for the U.S. entertainment company had been suspended until mid-November.

Matsushita issued a statement from its home office in Osaka, Japan, denying the talks have broken off.

Masahiko Hirata, executive vice president of Matsushita, said: ''Discussions with MCA Inc. are proceeding in an orderly fashion and there are no new developments to announce. Any reports to the contrary are erroneous.''

MCA, which imposed a news blackout on the talks earlier this month, continued to offer no comment on the report.

Merrill Lynch analyst Harold Vogel, who tracks the entertainment industry, said that Wall Street was rife with speculation about the pending deal collapsing during the trading session. ''There were rumors flying all over the place,'' he said.

But Vogel predicted the denial of the report will do little to calm skittish investors. ''I think people will stay nervous about this,'' he said.

As to whether the deal will still go through, Vogel responded: ''It's a mystery to me. You have to wonder, though.''

Kidder Peabody entertainment analyst Christopher Dixon said that such a report was clearly enough to unnerve investors, but he added that he thought the deal is still highly probable.

''There are still going to be questions as to how to structure the transaction but I think that it's inevitable that the transaction will go through,'' Dixon said. ''Matsushita is clearly willing to pay the price for MCA's software.''

The key issue, Dixon said, may be how to structure the deal in order to limit the tax liability of major MCA shareholders.

Dixon noted that the negotiations are the first time that MCA has ''seriously entertained'' an offer. ''That, in itself, is a strong indication about the likelihood of a deal,'' he said.

He also said MCA's stock is likely to move upward as the deal moves toward closing.

In late September, MCA's stock jumped more than $26 a share in the two days following the initial disclosure that it was considering a buyout, and the stock has been volatile since then as reports have emerged of the final terms of the deal.

Analysts, who generally valued the company at about $85 a share, believe that Matsushita may not want to buy MCA's movie studio theme parks in California

and Florida. The Florida theme park, which opened earlier this year, has been troubled by rides that have broken down and competition from Walt Disney Co.'s attractions in the area.

Reports have also emerged that Matsushita, one of the world's largest consumer electronics firms, wants to pay no more than $65 a share.

Besides the theme parks, MCA's key assets include Universal Studios, several record labels and book publishers, huge film and television libraries, 420 acres of real estate in Hollywood and interests in the USA Network cable channel and the Cineplex Odeon theater chain.

If the deal does go through, MCA would have to find another buyer for its WWOR television station in New Jersey since federal regulations would prohibit a foreign owner of a broadcast outlet.

#90297u2053 10/24/1990 ~United Press International

(OCT. 24) UPI - Democrats are expected to drop their demand for a surtax on the rich... paving the way for a federal budget agreement. Party leaders say they don't know if a deal will be ready before the government runs out of money again at midnight tonight.

NASA says the shuttle Atlantis passed its fueling test today withOUT any significant leaks. That clears the shuttle for launch next month, reportedly to put a spy satellite in orbit over the Persian Gulf.

Sources in Congress say the names of two women are being floated to replace Labor Secretary Elizabeth Dole... who resigned today to head the Red Cross. Early candidates are Office of Personnel Management director Constance Newman and Republican Representative Lynn Martin of Illinois.

A U-S representative previously convicted of having sex with a 16- year-old girl resigned today in the face of new charges that he fondled a Capitol elevator operator. Republican Donald ''Buz'' Lukens of Ohio says he's resigning for the integrity of Congress.

The Senate voted 66-34 today to sustain President Bush's veto of the major civil rights legislation of 1990. The vote was one shy of the two- thirds needed for an over-ride. Supporters of the bill say they will try to pass a stronger measure next year.

The Soviet Union has resumed nuclear testing. Tass says an underground nuclear blast was conducted at a test site near the Arctic Circle today, ending Moscow's unilateral moratorium on nuclear explosions.

A wave of I-R-A bombings left three soldiers and one civilian dead and more

than 20 people wounded in Northern Ireland today. Two bombs exploded at British army checkpoints.

The Senate has approved a 15-point-five-BILLION-dollar foreign aid appropriations bill. The measure cuts military aid to El Salvador in half, to 85-Million dollars- and forgives nearly seven-BILLION dollars owed by Egypt. The measure must be reconciled with a similar House-passed bill.

-30- 2120

#90297u2108 10/24/1990 ~United Press International

WASHINGTON (OCT. 24) UPI - Virtually every food item on the nation's grocery shelves, including fresh produce and seafood, would have to carry accurate nutrition labeling under legislation approved by the Senate Wednesday.

Approved on a voice vote, the bill would require labeling of processed foods, raw agriculture products and raw seafood to disclose a full slate of nutritional information.

In addition, the Food and Drug Administration would be required to develop definitions for commonly used labeling terms such as ''light,'' ''lowfat'' and ''reduced calorie.''

''For too long, consumers who want a healthier diet have been besieged by misleading, inaccurate nutrition claims about the foods they buy,'' said Sen. Howard Metzenbaum, D-Ohio, who sponsored the bill.

''Now they can be secure in the knowledge that a bold health claim on the front label of a food package won't be contradicted by the fine print on the back label.''

Under the Senate bill, the exact amount of cholesterol, fat, saturated fat, sodium, sugars, protein, carbohydrates and fiber would have to appear on food labels, along with information on the total amount of important vitamins and minerals and the percentage of fruit or vegetable juice contained in beverages.

The House has already voted for a similar bill but still must approve Senate changes before the legislation is sent to President Bush for his signature.

Metzenbaum said providing nutrition information on labels would make Americans ''healthier and even save their lives. ... This bill is a direct assault on the nation's two leading killers - cardiovascular disease and cancer.''

The Center for Science in the Public Interest, a consumer advocacy group that has pushed for food-labeling reform, had qualified praise for the Senate measure.

Bruce Silverglade, the group's legal director, said the bill would ''ensure

that labels provide the nutrition facts consumers need to choose healthy foods instead of the misleading nutrition hype that has been so prevalent.''

But Charles Mitchell, the assistant legal affairs director, added the food labeling reform should be extended to meat and poultry products regulated by the Department of Agriculture.

The group also expressed ''serious reservations'' about provisions in the bill that prevent state and local governments from passing laws that exceed federal requirements.

The FDA has already begun work on reforming food-labeling regulations, and recently the National Academy of Sciences completed a report recommending mandatory nutritional labeling for all foods, including fresh meats and poultry.

#90297u2117 10/24/1990 ~United Press International

MIAMI (OCT. 24) UPI - The government of Panama filed a $6.5 billion lawsuit Wednesday against deposed dictator Manuel Noriega that accuses him of looting the country's treasury of at least $500 million.

The civil suit, filed in U.S. District Court in Miami, said Panama seeks restoration of that money back as well as billions in punitive and compensatory damages from Noriega, who is being held pending his trial on charges of drug trafficking and racketeering.

Washington lawyer Gregory Craig, whose firm is representing the Panamanian government, cited ''10 years of thievery and thuggery that Gen. Noriega presided over, damaging the people of Panama.''

Noriega's lead defense lawyer, Frank Rubino, said he felt the suit had been filed merely to ensure that Noriega did not have the funds to defend himself. ''The government of Panama has stooped lower than I ever expected them to do '' he said. ''The purpose of this is blatantly obvious.''

Noriega's lawyers have asked prosecutors to help them retrieve up to $6 million from money frozen in foreign bank accounts so they can finance his defense. The money was frozen at the federal government's request.

''The suit was filed in Miami and the general has no assets here, nor were any purported to be here in Miami other than the lawyers' money,'' Rubino said. ''And I wouldn't be surprised if the U.S. government is in complicity with (the Panamanian government).''

U.S. Attorney Dexter Lehtinen said he felt the civil suit may cause further delays in bringing Noriega to trial, but should not have any impact on his

criminal defense.

''I would think that it would be unusual for the civil suit to interfere with the criminal case, that the criminal case not be given first priority,'' he said.

Rubino said prosecutors had agreed to help unfreeze some assets that were tied up at their request, but now they have ''another excuse to withhold funds. The wolf is at the door and the excuses come up.''

Lehtinen also said it was unlikely that Noriega's criminal trial would begin on Jan. 28 as scheduled. Along with Wednesday's suit, the delay in getting defense funds probably would push the date back, he said.

Noriega surrendered Jan. 3 during the U.S. occupation of Panama and was brought to Miami early the next day for a trial that has been delayed several times since then.

''In a trial this size it would not be unusual, in fact it would be common, for any drug case of this size - whether it involved a head of state or not - to take much longer than it has to be tried,'' Lehtinen said.

''We expect the defense to request another continuance and we expect (U.S. District Judge William) Hoeveler to allow them the time they need to prepare an adequate defense,'' the U.S. attorney said. ''I must emphasize, however, that these are merely projections on our part and we will be prepared to go to trial in January.''

Hoeveler has said he may be forced to consider a motion by Noriega's lawyers to withdraw from the case if they are unable to find adequate funds.

Noriega and several defendants were indicted in 1988 by a federal grand juriy in Miami on charges of providing a drug trafficking and money laundering sanctuary for members of Colombia's Medellin Cartel. A simultaneous indictment in Tampa accuses him of conspiring with a smuggler to import more than a million pounds of marijuana.

Recent reports also indicate that the government plans to consolidate additional evidence against Noriega in a new indictment that will strengthen and build on the cocaine trafficking charges he faces. Defense lawyers have said that too would delay the case.

#90297u2127 10/24/1990 ~United Press International

WASHINGTON (OCT. 24) UPI - A key House member said Wednesday that the administration might launch an attack against Iraq in response to a provocation and consult with Congress only afterward.

Rep. Les Aspin, D-Wis., chairman of the House Armed Services Committee, made the comment following a status report to House members by Secretary of State James Baker and Defense Secretary Dick Cheney on the no war, no peace Persian Gulf situation.

Aspin said they were told the 82nd Airborne Division may be rotated home from Saudi Arabia and replaced with more heavily armed forces.

A rotation home of the 82nd had been expected since the lightly armed paratroopers are designed as a first-in contingency force, not a heavy fighting unit such as armored or mechanized infantry forces.

Baker and Cheney separately briefed members of the House and Senate behind closed doors on the U.S.-led face-off against Iraq but gave no indication whether the U.S. military buildup has been completed.

''I am satisfied that we have a range of options available to the president if there is a provocation'' by Iraq, Cheney said in response to whether there are sufficient U.S. forces in place to launch an offensive against Iraq.

Several House members polled after the meeting said they learned little that was new and that Baker and Cheney did not spill any secrets.

Congress has been jittery about the prospects the administration would launch an all-out attack against Iraq after it adjourned for the year, without a formal declaration of war.

To ensure Congress will not be excluded from the war-making decision process, House Speaker Thomas Foley, D-Wash., said that members of the House and Senate will form joint bipartisan committees ''to make themselves available as a group for regular consultation with the president'' after adjournment. Congress is expected to adjourn this week.

''We believe that regular consultation is necessary and useful, particularly given recent developments in the Persian Gulf,'' Foley said in a statement.

Aspin, highly respected for his knowledge of defense issues, said neither Baker nor Cheney would answer questions about whether President Bush would decide to use the military option against Iraq if the 2- month-long economic embargo fails to force Iraqi President Saddam Hussein to withdraw from Kuwait.

''The most difficult problem for them (the administration) is if they use military force in response to a provocation,'' Aspin said. ''My sense is that they would do that (use force) and consult (with Congress) after.''

He posed another scenario in which the administration might impose a deadline on Saddam if the economic sanctions fail and launches military action.

''If you go at it that way, how do you avoid the question of a declaration of war?'' Aspin said rhetorically.

(OCT. 24) UPI - Democrats apparently have given in to Republican pressure against a surtax on Millionaires. Democratic leaders are expected to ask party members to sign onto a compromise deficit-reduction plan. Instead of the surtax... Republicans want to phase out personal exemptions for the wealthy and boost their tax rate to 31 percent. House Democratic leader Richard Gephardt says that may be the outcome... but he calls a budget consensus ''a big boat to move in the water.''

Democratic Senator Edward Kennedy says the civil rights bill vetoed by President Bush is dead for the year. The Senate today fell one vote short of over-riding the veto. But Republican Senator Arlen Specter of Pennsylvania maintains that a substitute measure is still- as he put it- ''very, very close.''

NASA pronounced the shuttle Atlantis ship-shape today after a critical fueling operation failed to turn up more hydrogen leaks aboard the spaceplane. Atlantis is scheduled for launch around November 10th on a secret military mission.

Elizabeth Dole resigned as labor secretary today to take over the American Red

Cross. Dole served during strikes at Eastern Airlines and Greyhound... and last year helped resolve a dispute between Pittston Company and striking coal miners. As Reagan administration transportation secretary... she sought to require air bags or self- buckling safety belts for cars.

Ohio Republican Representative Donald Lukens resigned today amid allegations he fondled an elevator operator at the Capitol. Lukens was convicted last year of contributing to the unruliness of a minor for having sex with a 16-year-old girl. The resignation allows him to keep his pension and other benfits.

It was a bad day for Bozo. Joey D'Auria... the actor who plays the popular cartoon clown in Chicago... left the set of the nationally syndicated show suffering from chest pains. A spokesman says D'Auria did NOT have a heart attack and may have a respiratory problem.

#90297u2232 10/24/1990 ~United Press International

ANCHORAGE, Alaska (OCT. 24) UPI - Thousands of tons of cancer-causing chemicals are spewed into the air during tanker loadings at the nation's largest crude oil terminal in Valdez, Alaska, a study released Wednesday said.

Some 43,000 tons of hydrocarbons, including 450 tons of benzene, are released at the terminal annually, according to the study, commissioned by Atlantic Richfield Co., British Petroleum, Exxon and the Alyeska Pipeline Service Co., which operates the trans-Alaska pipeline and the Valdez terminal.

The hydrocarbon vapors released in Valdez, a town of 3,000, equal one-tenth of the amount of hydrocarbon vapors from all sources in Los Angeles, a city more than 1,000 times larger, said Jon Sandstedt, an environmental engineer with the state Environmental Conservation Department.

The department has proposed regulations to reduce tanker emissions at the terminal by 95 percent, or 2 pounds of hydrocarbons per 1,000 barrels of oil, but Sandstedt said the industry has balked at complying.

''We're not asking for them to withdraw the regulations,'' Alyeska spokeswoman Marnie Isaacs said. ''But we want something doable by industry.''

Alyeska has asked for more time to respond to the proposed pollution limits.

Sandstedt said the new industry study bolsters concerns about emissions at the terminal. The study confirms a preliminary report based on a single tanker last year showing that emissions were higher than previously thought.

The new emission figures are based on an average daily flow of 1.8 million barrels per day down the pipeline from Prudhoe Bay to Valdez, where about 75 tankers a month load crude destined for U.S. refineries. Oil flow through the

pipeline recently rose to 1.95 million barrels a day.

The oil industry has no quick fix for the problem, Isaacs said, noting that Alyeska was working with tanker operators to figure out what to do.

''It's a joint problem and requires a joint solution,'' she said.

Isaacs noted that an American Petroleum Institute task force has been formed to help figure out what to do. API members could not be reached Wednesday to comment on the study.

The state believes there are solutions that would permit the industry to capture vapors and either incinerate them or return them to crude oil stocks, Sandstedt said. But he noted construction costs could top $150 million.

Moreover, no off-the-shelf vapor recovery system exists, Isaacs said.

She also said there were no known health risks to the residents of Valdez as a result of these emissions. However, face masks were ordered for terminal loading crews after the preliminary results came out last year.

Ongoing tests were measuring air quality in Valdez, Isaacs said. One test involved 60 residents wearing monitoring devices to find out what they were exposed to.

The federal Environmental Protection Agency has estimated the cancer risk to residents of Valdez, as a result of the emissions across the fjord from town, at about one-in-1,000.

The new data ''is not a reason to get hysterical, but it is reason to reduce emissions,'' Standstedt said. ''Alyeska would like us to wait and continue with more monitoring and studying. We don't want to wait until we have a body count.''

Although the same emission problem exists elsewhere, it is worse in Valdez because of a greater volume of oil at the country's largest loading facility and because loading naturally warm Alaska crude onto cold tankers creates more emissions, Isaacs said.

-30- 3753

#90297u2257 10/24/1990 ~United Press International

NEW YORK (OCT. 24) UPI - The U.S. economy will steer clear of recession through this year and the first part of next, the Conference Board management organization asserted in an economic forecast released Wednesday.

The business forum said U.S. gross national product would grow by 1.8 percent in the third quarter - more than many economists expect - and by 1.1 percent

in the last quarter. Growth in 1991 could be at 1.6 percent.

''The U.S. economy is fragile, but not broken, as the present pervasive gloom would indicate,'' said Conference Board chief economist Gail Fosler. ''There are many stabilizers holding the economy on track.''

Fosler said low business inventories, strong growth in other countries which purchase U.S. exports, ''remarkable consumer resilience'' and relatively low interest rates were counteracting negative influences.

But this optimistic scenario could go out the window if the faceoff in the Gulf turns to warfare. ''Outright war in the Middle East and the corresponding cutoff in oil supplies to the world would bring on a recession of global proportions,'' the economist said.

Consumers ''clearly hold the key'' to sustaining U.S. economic expansion, now in its eighth year. But if consumer confidence has slipped, ''there is no firm evidence that consumer spending has collapsed or that any developing weakness in consumer income growth will trigger a recession,'' Fosler said.

#90297u2268 10/24/1990 ~United Press International

WASHINGTON (OCT. 24) UPI - A man pretending to be a police officer who molested 11 girls in three southern states was added to the FBI's list of America's 10 most wanted fugitives, the agency said Wednesday.

Kenneth Robert Stanton, who turns 52 on Nov. 1, allegedly molested the girls in Alabama, Georgia and Mississippi in June and July of 1989, FBI Director William Sessions said.

Authorities said the suspect went to the homes of the victims and gained their trust by pretending to be a police officer and showing a fake badge.

A federal warrant was issued on Aug. 30, 1989, in Macon, Ga., charging Stanton with interstate flight to avoid prosection, child molestation, burglary and impersonating a police officer.

Stanton, a native of Huntington, Ind., has previously worked as an industrial tools salesman. He's described as a white male, 6-foot tall and 170 pounds with graying brown hair. Authorities said he may have a mustache and wear glasses.

In the 1960s, Stanton was charged with sex crimes involving children and committed to a state hospital in Michigan, from which he escaped, the FBI said. He was later arrested and recommitted.

Stanton is the 431st fugitive to appear on the FBI's list of ''Ten Most Wanted

Fugitives,'' which first appeared 40 years ago.

Authorities said anyone with information on Stanton's whereabouts should contact their local FBI office.

#90297u2321 10/24/1990 ~United Press International

ISLAMABAD, PAKISTAN (OCT. 24) UPI - Former Prime Minister Benazir Bhutto and her party appeared headed for a crushing defeat in parliamentary elections, and she leveled allegations Thursday of ''gross rigging.''

Violence during Wednesday's elections left nine people dead and 60 wounded across the country, state-run Pakistan Television said.

Bhutto told a news conference at her home in Larkana in southern Sind Province that ''rigging has been done on such a large scale that it has passed all previous records.''

At stake were 214 seats in the 217-member National Assembly. With 72 results announced early Thursday, the Islamic Democratic Alliance, Bhutto's main opposition, had 35 seats. Her Pakistan People's Party had won 13 races, IDA allies 13, minor parties two, and independents nine.

However, unofficial results from 158 seats gave the IDA 98, IDA allies 21 and the PPP 39.

The Bhutto government was sacked in August on charges of corruption and nepotism that brought about the Wednesday referendum. A special court has been set up to try Bhutto and members of her administration.

A candidate for the leftist Awami National Party, an IDA ally, defeated Bhutto by a wide margin in one of the constituencies she was contesting in the northwestern city of Peshawar. However, an unofficial result showed Bhutto winning in another constituency in Larkana.

''Gross rigging was committed and the results were manipulated before the official announcement to keep us out of power,'' Bhutto told the news conference.

''In my constituency in Peshawar the situation got so bad that a presiding officer sent his resignation to the chief election commissioner saying that he did not find it possible to discharge his duties in the face of such gross rigging.''

She also alleged her candidates were ''threatened, arrested and harassed to keep them away from the polls. But we will not succumb to these tactics and will finally emerge victorious.''

She said would she would hold a meeting of the executive committee of the PPP to decide whether to launch a movement against the rigging.

An IDA spokesman, Hussain Haqqani, said in response to Bhutto's ''independent observers have seen the fairness of the elections themselves.

''Miss Bhutto's credibility regarding rigging is rather low because she predicted rigging in 1988 and she won. Her allegations this time are also no different. It would be best for democracy and for Bhutto if she accepted the verdict of the people.''

Six international teams are in Pakistan to observe the elections, including a 40-member delegation from the U.S.-based National Democratic Institute.

One NDI member said he had witnessed no incidents Wednesday, but said, ''It's only after the counting is over that we can say whether there's been rigging.''

About 48 million of Pakistan's 110 million people were eligible to vote Wednesday. Two independent candidates were elected unopposed and polling was postponed in one constituency where a candidate was shot and killed earlier.

Tight security was in force, with almost 100,000 troops on alert nationwide, about half of them in violence-torn southern Sind Province.

Pakistani reporters said turnout appeared lower than in the 1988 elections, when 43 percent of voters cast ballots.

Bhutto voted in Larkana and later prayed at the grave of her father, former Prime Minister Zulfikar Ali Bhutto. He was toppled in a 1977 military coup and hanged two years later.

Pakistan Television said nine people were killed Wednesday, including seven IDA supporters, and 60 wounded in election-related violence throughout the country.

Commenting on the incidents, President Ghulam Ishaq Khan told reporters ''violence ... is quite common in the Indian subcontinent, and therefore the law and order situation was satisfactory.

''All those killed were from one party, while those accused were from another party,'' he added, without elaboration.

Most analysts had predicted the PPP would emerge as the single largest party from Wednesday's vote ahead of the IDA, a disparate army- backed grouping of anti-PPP parties.

Ishaq Khan dismissed Bhutto's 20-month-old government on Aug. 6, accusing it

of corruption and nepotism and of failing to control law and order, and dissolved the National Assembly. He appointed opposition leader Ghulam Mustafa Jatoi to head an interim government until elections he set for Wednesday.

The president also set up Special Disqualification Courts to try Bhutto and members of her administration on corruption charges in what observers believed was a bid to bar her from the elections.

Many believe Ishaq Khan's actions were inspired by the army, which has run Pakistan for more than half of its 43-year history and which had been in conflict with Bhutto's democratic government.

Analysts say the attempts to malign Bhutto and keep her from returning to power have evoked a wave of sympathy for her.

Bhutto, 37, drew massive and emotional crowds at rallies across the country in an outpouring of support many observers say exceeded that of the campaign for the November 1988 elections. The PPP won those elections, the first democratic polls in the country since 1977.

But analysts say accusations by IDA leaders that Bhutto was to blame for this month's suspension of U.S. aid and that she is sympathetic to India and Israel may have cost her some support.

#90297u2400 10/24/1990 ~United Press International

WASHINGTON (OCT. 24) UPI - House Democrats embraced a new deficit-reduction plan Wednesday that dropped a surtax on millionaires President Bush has opposed and opted for limiting tax deductions and exemptions for the rich instead.

The compromise plan, crafted on the eve of another threatened government shutdown, won the support of a majority of House Democrats who caucused Wednesday afternoon, said House Speaker Thomas Foley, D- Wash.

Asked if the White House would accept the latest compromise, Foley said: ''I believe it will. I believe we can reach an agreement on this.'' He said the proposal had been discussed with administration officials ''in general terms.''

Congress has been working for weeks to reach an agreement on a package of spending cuts and tax increases representing the major portion of a $500 billion reduction in the federal budget deficit over the next five years, with about $40 billion in savings to be achieved in fiscal year 1991, which began Oct. 1.

Final congressional passage of the deficit bill and Bush's acceptance of it are critical before Congress can adjourn for the year.

Foley said that in the party caucus there was ''a very, very strong consensus toward moving toward an agreement'' that would ''reduce the burden on Medicare beneficiaries'' and make sure rich Americans paid their fair share of deficit reduction.

''We prefer, as a method of doing that, a surcharge (on millionaires),'' Foley said. ''But we are now focused around a mechanism which will achieve the same impact in terms of the fair share of taxes being paid by high-income individuals.

''And it will result in a very strong improvement in the progressivity of this package compared to the (budget) summit, compared to the Senate bill, and we are strongly supporting that provision.''

The long-anticipated deficit-reduction agreement that grew out of ''summit'' negotiations between congressional and administration officials was rejected by the House three weeks ago, sparking most federal operations to shut down Oct. 6-8 before Bush signed a stopgap spending measure.

After the Wednesday caucus, House Democratic leader Richard Gephardt of Missouri said: ''If we can put this package, the last details of it, together tonight, we can have it in front of the Congress in the next two days'' for a vote.

All this occurred as the government was due to run out of spending authority at midnight Wednesday, when the third short-term funding bill since Sept. 30 was to expire. Congress was expected to pass another short-term funding bill late Wednesday.

But Bush had not said if he would sign the measure or veto it and force a government shutdown to keep pressure on Congress to complete work on a budget plan Bush can accept.

The latest plan would raise the current 9 cents-a-gallon gasoline tax by a nickel - a compromise between a House-passed deficit reduction bill, which had no gas tax hike, and the Senate-passed bill, which proposed a 9.5 cent increase.

It would raise Medicare premiums by 25 percent and raise the deductible from the current $75 to $100 - a smaller increase than in the defeated bipartisan budget summit plan or in the Senate bill.

The deal would raise income tax rates on the wealthiest Americans from the current 28 percent to 31 percent while at the same time lowering the tax rate on middle-to-upper-income Americans from the current 33 percent to 31 percent.

That would flatten out the so-called bubble in the tax code in which the

richest Americans benefited from a lower tax rate than those less well off.

#90297u2421 10/24/1990 ~United Press International

LAS VEGAS, NE (OCT. 24) UPI - The heavyweight title Buster Douglas wants to prove he deserves and Evander Holyfield waited so long to fight for will be on the line Thursday night.

Douglas, 30-4-1, makes the first defense of the championship he won with a stunning 10th-round knockout of Mike Tyson Feb. 11 in Tokyo. Holyfield, 24-0, finally challenges for the title after spending 20 months as the top-rated challenger.

The fight, scheduled for 12 rounds, will take place at The Mirage's 16,350-seat outdoor arena and can be seen on pay-per-view TV throughout the country and 121 nations around the world.

Douglas is still looking to prove his victory over Tyson was not luck, as the former champion has claimed. Douglas enters the fight a 13- 10 underdog.

''Beating Mike Tyson, and then coming back to beat Evander Holyfield is a magnificent feat,'' Douglas said. ''It will put me in the same category as the great champions.

''It is a goal of mine to go down in history right alongside Muhammad Ali, Rocky Marciano, Joe Louis and Joe Frazier and other great champions.''

Holyfield, a 1984 Olympic light heavyweight medalist and former undisputed cruiserweight champion, said he has looked forward to fighting for the heavyweight championship since he started boxing when he was 10.

''This is payoff time, where everything comes to an end,'' Holyfield said. ''Where either you pass the test or not.

''I've been trying to get here for 18 years, now I'll see if I'm ready for the test. I feel I am.''

The suspicion Douglas was out of shape was confirmed at Wednesday's weigh-in when the champion stepped on the scale at 246 - 14 1-2 pounds higher than when he fought Tyson. Douglas had said all week he expected to weigh in the low 230s. Holyfield weighed 208, a little lighter than expected.

The challenger will give away 38 pounds, but is the far better conditioned boxer.

''I compare my conditioning and the way I feel overall going into the two fights, and I am comfortable with the way I am,'' Douglas said. ''I feel

stronger.

''Beating Evander will prove once and for all the fight with Mike Tyson wasn't a fluke. I'm still the underdog. Therefore, I still have something to prove.''

Holyfield's conditioning is never a problem. He is one of the most impressively built boxers in the sport. But many doubt he is big enough to handle a large heavyweight like Douglas. At 6-foot-4 with an 83-inch reach, Douglas has advantages of 1 1-2 inches in height and 5 1-2 inches in reach. Douglas, of Columbus, Ohio, is 30 and Holyfield, of Atlanta, 28.

''I've been small all my life,'' Holyfield said of his size disadvantage, ''and I've never had no problem.''

Douglas has not fought since the Tyson fight, mostly because of his legal battle with promoter Don King - which was settled out of court. Holyfield's previous bout was a fourth-round knockout of Seamus McDonagh June 1. When Douglas fought Tyson, Holyfield had a signed $12 million to challenge Tyson in June.

''When you want something as bad as I did and waited all these years ... I stayed focused because I know how good it's going to be when I win it,'' Holyfield said.

Douglas will earn a record $24 million compared to Holyfield's $8 million purse for the Thursday night bout. Mirage owner Steve Wynn, the fight's promoter, forecasts one million pay-per-view subscriptions will be sold for the bout. He also expects a live gate in excess of $10 million.

If Douglas wins, he has signed to fight a rematch with Tyson at The Mirage. Holyfield plans to fight 42-year-old former champin George Foreman next if he wins the title.

The bout is scheduled to start around 10:30 p.m. EDT.

#90297u2431 10/24/1990 ~United Press International

(OCT. 24) UPI - Congress is still working on a budget compromise, racing to beat a midnight deadline or face another government shutdown. Congress and President Bush apparently are close to a deal in which Democrats would drop their demand for a surtax on Millionaires. The new deficit- reduction plan reportedly would raise income tax rates for the wealthy to 31 percent, and would limit their itemized deductions.

The Senate today fell one vote short of overriding the Bush- administration veto of a new civil-rights bill. The vote in the Senate was 66thirds majority needed to override. The White House wants Congress to pass the president's

alternative bill, but Senator Edward Kennedy rejects that path. He says lawmakers will pass a stronger bill next year, and predicts there will be enough votes to override any veto.

The Senate today overhwelmingly defeated a measure that would have denied funding to works of art deemed obscene regardless of their artistic merit. G-O-P Senator Jesse Helms, the bill's sponsor, says he is NOT seeking censorship... and says the issue is one of govenment SPONSORSHIP through the National Endowment for the Arts. The Senate will now consider a measure to recoup funding of any project which the courts find obscene.

Political supporters of former Pakistani Prime Minister Benazir Bhutto cried vote fraud after Bhutto lost one of the two seats she contested in nationwide elections today. Bhutto's main opposition took the lead in early returns in the voting for 214 seats in the National Assembly. State-run television says election violence left at least nine people dead and 60 injured.

#90297u2465 10/24/1990 ~United Press International

(OCT. 24) UPI - Two doctors warned today of a new consumer-products hazard. Doctors from the University of Medicine and Dentistry of New Jersey say people who pop open microwaved popcorn bags should watch out for escaping steam. They say steam that builds up in the bags can burn people's eyes or other parts of their bodies. The physicians caution against opening the bags too quickly. The warning is in a letter published in The New England Journal of Medicine.

Anti-drug chief William Bennett heads to Alaska tomorrow for a two- day campaign to outlaw marijuana in the state. Possession of less than four ounces of cannabis is legal in Alaska. Voters will decide November 6th whether to make marijuana possession a misdemeanor. The leader of the group Alaskans for Recriminalization of Marijuana says- quote- ''If there's a war on drugs... then Alaska's marijuana law has to be the front line.''

Police in California say a 12-year-old girl was kept locked in closets for as long as 10 years by her parents. San Bernardino officers went to the girl's home on a tip received by a Child Abuse Hotline. Police found the girl locked inside a bedroom closet that reeked of human waste and was littered with food wrappers. The girl's father says she must have been locked inside accidentally by a sister. Officers arrested the parents.

#90297u2595 10/24/1990 ~United Press International

(OCT. 24) UPI - A federal budget breakthrough appears close. House Democrats caucused today and embraced a new deficit-reduction plan that drops a surtax on Millionaires that was opposed by President Bush. The plan instead would limit tax deductions and exemptions for the wealthy. House Speaker Thomas

Foley says he thinks the White House will accept the compromise. He says the proposal was discussed with administration officials ''in general terms.''

President Bush maintained his perfect record of UNdefeated vetoes today when the Senate fell one vote short of overriding his veto of a civil rights bill. Bush says the bill would lead to UNdesirable job quotas. But Senator Edward Kennedy blasted the president for the veto. The Massachusetts Democrat says Bush dishonors his office, abuses civil rights and- quote- ''stoops to divisive appeals to prejudice and resentment.''

Israeli warplanes raided alleged Palestinian guerrilla bases late today in southern Lebanon. The attack took place on the outskirts of Tyre, a main base for the followers of Palestine Liberation Organization leader Yasser Arafat. Israeli sources say the bases were used to launch ''terrorist attacks.'' NO casualties were immediately reported.

The renewed rattling of sabres in the Middle East had an immediate effect on world oil prices. Oil prices were already up earlier today because of new UNeasiness about the Persian Gulf crisis, and the report from Israel only fanned the fires. The cost of the U-S benchmark crude was up one-dollar and 71 cents today to 31-oh-eight a barrel.

#90297u2640 10/24/1990 ~United Press International

WASHINGTON (OCT. 24) UPI - Elizabeth Dole resigned as labor secretary Wednesday, effective Nov. 23, to become head of the American Red Cross. Early speculation focused on two other women as possible successors.

Congressional sources said the names of Constance Newman, director of the Office of Personnel Management, and Rep. Lynn Martin, R-Ill, were being floated on Capitol Hill as potential replacements.

Dole, 54, is the first member of the Bush Cabinet to step down. She is the highest-ranking woman in the Bush administration.

''It is with real deep regret that I accept this resignation,'' Bush told reporters at the White House in formally announcing the resignation of Dole, wife of Senate Republican leader Bob Dole of Kansas.

Mrs. Dole, standing beside bush, denied a report that she felt shut out in his male-dominated administration and told the president, ''I thank you for your trust in me and for your friendship.''

She also tried to play down speculation that she might run for governor of North Carolina in 1992. ''I'm going to the Red Cross. I have no plans to run for anything.''

Senate Labor Committee Chairman Edward Kennedy, D-Mass., a frequent White House critic, said Dole ''deserves the nation's gratitude for a job well done. It can't be easy serving as a pro-labor secretary in an anti-labor administration.''

White House officials said a search for Dole's replacement had already begun, but refused to name any names, and declined to say if Bush would wait until after the Nov. 6 congressional election.

Martin may need a job by then. Polls show she is trailing by wide margins in her bid to unseat Sen. Paul Simon, D-Ill.

A spokesman for the congresswoman said, however, that Marin isn't interested in the labor post, at least not now. ''Rep. Martin intends to spend the next six years in the U.S. Senate.''

Traditionally, administrations begin to receive resignations from the Cabinet

secretaries in their second year. There have been sporadic reports that Attorney General Dick Thornburgh and Commerce Secretary Robert Mosbacher might be among those interested in moving on. Education Secretary Lauro Cavazos has weathered complaints that he is ineffective, and seems to have Bush's support to remain as long as he wants.

At the Transportation Department, Dole presided over some of the most turbulent years in U.S. aviation history that saw public confidence shaken in airline safety and public angry over deteriorating service.

She advocated requiring air bags or self-buckling safety belts for new automobiles and got her way in an administration not disposed to more government regulation.

Her tenure also paralleled a critical period for organized labor. Dole served during strikes at Eastern Airlines and Greyhound Inc., and last year she helped resolve a dispute between Pittston Co. and striking members of the United Mine Workers Union.

Bush said as labor secretary Dole helped make ''the workplace safer and healthier and more secure'' and ''you've helped built better labor- management relations.''

The president noted that Lane Kirland, head of the AFL-CIO, had offered ''very supportive comments'' when told of her resignation. ''That was just one more testimonial for the job she has done as secretary of labor.

Bush told her, ''It's been a joy serving with you in the Cabinet. You have done a superb job for this country.''

As head of the American Red Cross, Dole will be in charge of a century-old organization with a staff of 23,000, a billion-dollar budget and more than 1 million volunteers. Her salary will nearly double to about $200,000.

Dole, noting that Bush serves as honary chairman of the congressionally chartered volunteer group, said jokingly, ''I wonder if we couldn't just consider this a transfer?''

''Fine with me,'' Bush replied.

Dole served six presidents in her quarter-century career of public service, which has seen her named by the Gallup Poll as one of the world's 10 most admired women.

A former Democrat turned Republican, Dole was executive director of Lyndon Johnson's Commission for Consumer Affairs and deputy to Richard Nixon's consumer affairs adviser, Virginia Knauer.

She became the only woman member of the Federal Trade Commission in 1973 and in 1982 was named to the Reagan Cabinet as transportation secretary, a post she held for 4 1/2 years, longer than any other in the agency's history.

Dole quit the Reagan Cabinet to help in her husband's unsuccessful bid for the presidency in 1988. Despite a bitter campaign between Bush and her husband, she was one of the president-elect's first choices for his Cabinet.

-30- 4928

#90297u2644 10/24/1990 ~United Press International

LAS VEGAS, NV (OCT. 24) UPI - Heavyweight champion James ''Buster'' Douglas confirmed suspicion he was out of shape Wednesday when he weighed in at 246 pounds for his Thursday night defense against Evander Holyfield.

Douglas weighed 14 1-2 pounds more than when he knocked out Mike Tyson last February. He had predicted he would weigh close to the 231 1- 2 he was against Tyson.

Holyfield weighed 208, several pounds lighter than expected. The former cruiserweight champion will give away 38 pounds in the bout while enjoying a huge conditioning edge.

The weight was the seventh heaviest for Douglas in his 35-bout career. He was 5-0-1 in the previous six, including a second-round knockout of Jesse Clark in 1983 when he was a career-high 260. Douglas fought an 8-round draw with Stefan Tangstadt at 251 in 1982.

Douglas weighed 242 1-2 when he won a 10-round decision over Oliver McCall July 21, 1989 in his last bout before Tyson.

Primo Carnera was the only champion to outweigh Douglas in a title defense. Carnero stopped Jack Sharkey in 1933 at 260 1-2 and lost his title when he was knocked out at 263 1-4 by 209 1-2-pound Max Baer in 1934.

Douglas stepped on the scales first in blue briefs, sucking in his stomach. When the weight was announced, Holyfield's trainer Lou Duva yelled ''We're home'' and the champion quickly stepped off the scale and left the stage at The Mirage ballroom.

When asked if he was worried about the weight, Douglas replied ''No, not at all.''

''They're gonna roll him into the ring and carry him out,'' Duva said. ''How can a fighter come into the ring at 246?''

Douglas's handlers claimed they were not worried about the extra weight.

At first, they claimed his correct weight was 238 but quickly dropped their challenge. Nevada State Athletic Commission officials said they checked the scale after Douglas weighed in.

''If he's 246, we'll prove a lot of people wrong who said he couldn't fight at this weight,'' said John Johnson, the champion's manager. ''James will hit him with about 10 more pounds of power.''

Douglas's trainer J.D. McCauley said he expected the champ to weigh 238. He said they never weighed Douglas during training, however.

''We'll just have to wait and see how it affects him,'' McCauley said. ''He'll have to handle it. I guarantee this: Buster's going to be out there punching.''

The weigh-in was open to the public, and the crowd reacted in stunned silence when the champion's weight was announced. The weight is expected to swing the odds higher in Holyfield's favor. Holyfield opened as a 12- 5 favorite in July but the odds dropped to 13-10 by Wednesday morning. They will likely be higher by the opening bell.

Mirage oddsmaker Jimmy Vaccaro said the weigh-in prompted a mad rush to the sporst book.

''People ran back after the weigh-in,'' Vaccaro said. ''Over $150,000 was bet in one hour, and 90 percent of it was bet on Holyfield.''

As for the challenger, Holyfield was expected to come in between 210 and 212.

''We were shooting for 210,'' Duva said.

Holyfield weighed 208 when he stopped Michael Dokes in 1989 in his best heavyweight performance. He was a career-high 212 against Alex Stewart last November and 210 against Seamus McDonagh in his previous bout June 1.

Douglas camp estimates placed the champion's weight at around 260 when he opened training camp in his Columbus, Ohio, hometown in late August. Douglas blamed his weight problems on depression because of his woes after upsetting Tyson.

Led by promoter Don King, boxing's governing bodies considered overturning Douglas's knockout of Tyson because they claimed he was given a long count during an eighth-round knockdown. Douglas got up to knock out Tyson two rounds later.

The incident in Tokyo sparked a split between Douglas and King, who filed suits against each other which were settled out of court in July.

''I got a little depressed because of the things going on,'' Douglas said.

He reacted by taking to soul food. ''Second and third helpings,'' he said.

#90297u2720 10/24/1990 ~United Press International

LOS ANGELES (OCT. 25) UPI - A shareholders' class-action lawsuit was filed Wednesday against the current and former chief officers of the parent company of California Federal Savings and Loan, alleging they inflated its securities to maintain high market prices.

The suit, filed in U.S. District Court on behalf of Arnold Cohen and others who purchased common stock in CalFed Inc. between Jan. 1, 1987 and Oct. 19, 1990, alleges the company misrepresented its financial condition in annual reports filed between 1986 and 1989 and in reports to the Securities and Exchange Commission.

CalFed reported on Oct. 19 that it would post a net loss of $92.3 million for the third quarter because it was adding $96 million to its loan-loss reserves and recording a loss of $42.8 million in connection with the sale of its subsidiary, Beneficial Standard Life Insurance Co.

The savings and loan touted its underwriting controls and investment management and said CalFed's loan volume had hit a new high, surpassing its previous loan obligations by $500 million, the suit said.

''In fact ... CalFed's reserves for loans, in particular for loans made by CalFed to certain real estate developer-borrowers, were woefully inadequate as well as with respect to investments made by its own real estate development subsidiaries,'' the lawsuit said.

It said CalFed's real-estate assets were ''overstated.''

CalFed's report that it would post a third quarter loss was ''unexpected'' and ''shocked the financial community,'' the suit said.

It alleges CalFed's officers conspired to conceal the company's true financial condition ''to maintain artificially high market prices for the securities.''

The lawsuit, which seeks unspecified damages, names as defendants: Jerry St. Dennis, CalFed's current chairman and chief executive officer; John Torell III chairman and chief executive officer until his resignation in July 1989; William Callender, a former director and president; and Robert Dockson, former chairman emeritus and chairman of the Executive Committee.

#90297u2935 10/24/1990 ~United Press International
(OCT. 24) UPI - There is new optimism that Congress is near agreement on a long- awaited deficit-cutting budget plan. A compromise proposal won the support of House Democrats today. It drops a surtax on Millionaires and instead limits tax deductions and exemptions for the rich. And White House spokesman Marlin Fitzwater is hopeful an agreement will be reached tonight.

The government will run out of money in less than two hours, and Congress is expected to pass a temporary spending bill tonight... whether or NOT a budget agreement is imminent. Fitzwater says President Bush would sign the measure if House and Senate negotiators have at least settled on an agreement.

The Senate today upheld by a single vote the president's veto of a new civil rights bill. The White House urged Congress to pass the president's version of the measure. President Bush says the congressional bill would have led to hiring quotas for women and minorities. Democratic Senator Edward Kennedy accuses Bush of- in his words- taking ''the low road on civil rights.''

The U-N Security Council voted unanimously today to condemn Israel- for the second time this month. The body reprimanded Israel for NOT accepting a U-N investigation into the October 8th massacre of 20 Palestinians at Jerusalem's sacred Temple Mount. The U-S ambassador again joined in condemning Israel. Washington says Israel's rejection of the probe threatens the Arab coalition against Iraq.

(OCT. 24) UPI - The company blamed for dumping toxins at New York's Love Canal development went on trial today in Buffalo. The state of New York is seeking 665-Million dollars in damages from the Occidental Chemical Corporation. A prosecutor said the company's sale of the poisoned land was like selling a vicious dog to someone who caN'T control it. A defense lawyer says the company tried to use ''balanced judgment'' based on its knowledge at the time.

A new study says oil tankers are spoiling the environment in Valdez , Alaska. But it's NOT the shoreline they're looking at this time, it's the air. The study... commissioned by several oil companies... says tankers at the oil port routinely emit one-tenth of the total hydrocarbons found in Los Angeles- a city one-thousand times larger than Valdez. The oil industry balks at new restrictions on tanker emissions.

Whoopi Goldberg was named entertainer of the year today by the N-Double-A-C-P... as the civil-rights group prepared for its annual Image Awards to be announced December 1st. The group released nominations in several entertainment categories- stressing minorities. It also says Goldberg, singer Dionne Warwick and record producers Jimmy Jam and Terry Lewis will receive special awards.

A Houston apartment complex issued new restrictions on U-S flags. The restrictions say the flags canNOT be displayed outside the apartments. Many residents of the Plantation Apartments put the flags up to support the U-S troops in Saudi Arabia. But the apartment manager is now telling residents to take the flags down. Residents say they're confused because the complex encourages Halloween decorations and even has a door- decorating contest at Christmas.

SEATTLE (OCT. 25) BUSINESS WIRE - Lindal Cedar Homes Inc. (NASDAQ:LNDL) Thursday reported net income rose 52% while revenues declined in the third quarter, primarily due to the improvement in the WindowVisions unit.

Net earnings for the quarter ended Sept. 30, 1990, were $1.1 million, or $.42 per share, on total revenues of $13.4 million. Net earnings were $728,000, or $.28 per share, on revenues of $15.6 million in the third quarter of 1989, which was prior to the downsizing of Lindal's WindowVision unit.

For the first nine months of 1990 net earnings were $1.8 million, or $.69 per share, on revenues of $35.0 million. This compares with net income of $844,000, or $.32 per share, on revenues of $38.5 million for the first nine months of 1989. Per share results have been adjusted for 10% stock dividends issued in June 1990 and May 1989.

''Domestic home sales increased both during the quarter and year-to-date, although our Canadian and overseas sales have declined, creating a decrease in home segment revenues for the quarter. Home segment revenues are flat for the year. Revenues were further reduced this year by the planned downsizing of WindowVisions,'' said Robert W. Lindal, president and chief executive officer. ''New orders in the first nine months of 1990 have kept pace with the record levels we experienced in the same period last year, although they have declined in recent months.''

Operations at the window unit have shown further improvement in the third quarter, and the division generated a profit of $45,000, or $.02 per share. ''We have now posted two consecutive quarterly profits for the division, and I believe this shows that we have resolved the operating problems we experienced at WindowVisions last year,'' Lindal said.

''Because home segment revenues have not surpassed the record levels achieved in 1989 and due to the general uncertainty in the economy, we have decided to lower overhead. Staffing levels have been reduced to 1989 levels, primarily through attrition, and we are keeping a close watch on all expenses,'' Lindal added.

Lindal Cedar Homes is the world's largest manufacturer of top-of-the-line, year-round cedar homes and sunrooms which are sold under the trademarks of Lindal Cedar Homes and Justus Log Homes. Over 350 distributors are located in the U.S., Canada, Japan and other foreign countries.

#90298b0006 10/25/1990 ~Business Wire

KENT, WA (OCT. 25) BUSINESS WIRE - FlowMole Corp. (NASDAQ:MOLE), the leader in trenchless tunneling technology for underground utility installation, Thursday reported record revenues and earnings for the second quarter of fiscal 1991.

For the quarter ended Sept. 30, 1990, net income increased 40% to $1,459,000, or $.20 per share, fully diluted, from $1,037,000, or $.15 per share, in last year's second quarter. FlowMole revenues rose 6% to $11.4 million from $10.8 million in the like quarter of fiscal 1989.

For the six months ended Sept. 30, 1990, net income was up 42% to $2.6 million or $.35 per share, from $1.8 million, or $.26 per share, in the first half of last year. Revenues were a record $21.6 million compared to $20.9 million in the first half of fiscal 1991.

''September was the second highest volume month we have ever experienced,'' stated John R. Potter, President and CEO. ''Our crews and equipment are now working almost at capacity, and this strong demand for our services is continuing in the third quarter.''

In the second quarter, FlowMole served 91 customers, of which 63 are utilities and 35 were new. The number of units in operation worldwide has increased by 30% from levels achieved last year at this time. Currently there are 90 FlowMole units operating worldwide, 55 of which are operated by the company in North America. This compares to 69 and 42 units in operation, respectively, a year ago. Many of our existing clients are expanding the scope of our business relationship by placing orders with Revalt, our service that refurbishes and seals underground utility structures.

''We expanded our international business by signing lease agreements with Italian and Japanese companies, and we have started a demonstration project in Spain,'' Potter noted. The company has been successful in its first legal defense of the FlowMole technology against a former lessee in Belgium. ''We now hope to resolve a contract dispute with our German licensee, FlowTex, through arbitration here in the United States,'' Potter stated. Due to foreign currency exchange losses and an increase in our reserves for FlowTex receivables, our European subsidiary posted a small loss for the quarter.

''The upgraded Series E GuideDril system, which was introduced last quarter, significantly improved productivity in its first full-scale project. The Series E GuideDril was able to increase output by almost 50% over the Series C model in limerock conditions in Florida. This new technology includes more sophisticated electronics, automation and power to enhance productivity and to reduce cost in rocky soil and large diameter applications,'' Potter said.

FlowMole Corp. installs and replaces underground utility cables and pipes with minimal surface disruption using proprietary high-pressure fluidjet cutting and electromagnetic guidance techniques to accurately bore small diameter tunnels up to 600 feet in length. The company also provides the Revalt service which refurbishes and seals underground utility structures.

The company uses its proprietary GuideDril system to provide services to

utilities in the United States and Canada through 14 regional sales and service centers. It also conducts operations overseas through its wholly owned subsidiary in the U.K. and through business associates in The Netherlands, Denmark, West Germany, France, Belgium, Austria, Italy, Switzerland, the U.K. and Japan.

DENVER (OCT. 25) BUSINESS WIRE - Cohig & Associates Inc., the Denver-based investment banker, Thursday announced several major changes in its senior management team.

Steven M. Bathgate has been named chairman of the board and chief executive officer, succeeding James C. Cohig in both of those positions.

Steven R. Hinkle, formerly chief operating officer and a board member, will also assume the position of president.

Founded in 1986, Cohig & Associates is a full-service investment banker specializing in capital formation for companies with revenue in the $3 to $50 million range. The firm's particular emphasis is on established public companies that have a need for working capital to fund promising business opportunities or late stage product development. Cohig & Associates has 60

brokers in four Colorado offices.

BEVERLY HILLS, CALIF. (OCT. 25) BUSINESS WIRE - Louis G. Karabochos, chairman president and founder of Space Wif Corp., announced Thursday the appointment of Michael Reagan as a consultant.

Michael Reagan, a popular San Diego radio talk show host and best-selling author of the autobiography, ''On the Outside Looking In,'' is an actor, writer, motivational speaker, athlete and son of the 40th president of the United States, Ronald Reagan, and Academy Award-winning actress Jane Wyman.

Reagan holds many world records in the sport of powerboat racing. He received the Victor Award due to his outstanding sports and humanitarian achievements. Through his racing, he has raised more than $1.5 million for the U.S. Olympic Committee, the Statue of Liberty Restoration Fund and the Cystic Fibrosis and Diabetes foundations.

Prior to his radio show on San Diego's KSDO, Reagan hosted a radio show in Los Angeles and has filled in for the nationally syndicated Michael Jackson. Reagan's reputation as a motivational speaker has kept him busy with continual personal appearances on such television shows as ''Good Morning America,'' ''The Today Show,'' ''Hour Magazine'' and ''The Tonight Show.''

In addition to serving as consultant to the entertainment industry for Space Wif and making special appearances on behalf of the organization, Reagan will also serve on the board of directors for the non-profit Space Wif Foundations, a charitable arm planned for Space Wif Corp.

Space Wif, a Delaware Corp. with headquarters in Beverly Hills, is a publicly held company currently traded over the counter (OTC). The company is engaged in the production of video tapes on the space program, using former astronauts and animated characters called ''Wifs.''

FREMONT, CALIF. (OCT. 25) BUSINESS WIRE - Accton Technology Corp. has added a 12-port concentrator to its 10BASE-T Ethernet line with independent AUI and BNC trunk connectors.

Each EtherHub-12R can connect up to 12 workstations to an 10BASE-T workgroup.

The EtherHub-12R is an active hub that comes with 12 RJ- 45 ports and an array of LEDs to indicate power, busy, collision, and link conditions.

Each port has two LEDs, one to indicate link status and the other to indicate a fault condition that has automatically partitioned that port from the network. The automatic partitioning of bad ports protects against overall network failure.

Unique to the EtherHub's design are the AUI and BNC connectors at the back of the unit. These connectors provide a link to the network backbone without having to sacrifice concentrator ports.

And because these ports work independently, the concentrator's repeater function can be used to connect two different types of cabling media, the BNC connector to thin Ethernet and the 15-pin D-type AUI connector to standard Ethernet.

The EtherHub-12R is ideal for expanding 10BASE-T networks since new nodes can be installed without disturbing the network. Internal bridging isolates each port to prevent network failure should one 10BASE-T segment should fail.

By cascading EtherHubs, additional users or workgroups can be added through additional EtherHubs or 10BASE-T concentrators from other manufacturers.

The EtherHub-12R is scheduled to begin shipping in December. The unit will sell for less than $100 per port.

Accton Technology Corp. manufactures a complete line of connectivity hardware and software. For more information, contact Marshall Behling at Accton, 46750 Fremont Blvd., 104, Fremont, Calif. 94538; telephone 415/226-9800; or Tom Woolf, Media Relations, 415/366-6231.

RENO, NEV. (OCT. 25) BUSINESS WIRE - Sierra Pacific Resources (NYSE:SRP) Thursday reported a net loss for the third quarter of $1.13 per share of common stock, compared with earnings of 43 cents per share for the like quarter in 1989.

The loss per share for the nine months ended Sept. 30, 1990, was 15 cents compared to earnings of $1.48 for the like period a year ago.

The company decided in August 1990 to discontinue its participation in the Thousand Springs Power Project.

This decision resulted in an extraordinary charge of $35,659,000, net of $18,369,000 income tax benefit and was booked in the third quarter of 1990. As a result, net income per share was charged with a loss of $1.57 for the

three months ended Sept. 30, 1990 and $1.58 for the nine months.

Net income per share before the extraordinary charge was $1.43 for the nine month period ended Sept. 30, 1990, a decline of 5 cents as compared to earnings of $1.48 for the like period. Third quarter net income per share before the extraordinary charge was 44 cents as compared to earnings of 43 cents for the like period in 1989.

#90298b0036 10/25/1990 ~Business Wire
HOUSTON (OCT. 25) BUSINESS WIRE - Conoco is the safest U.S. oil company according to 1989 industry safety statistics recently released by the American Petroleum Institute.

Conoco's 1989 lost time accident rate of 0.14, or one lost time accident for every 714 employees, is the best safety performance of the major oil companies submitting safety data to the API.

The company's 1.39 total recordable accident rate, a broader measure of safety performance, is also the lowest among the reporting companies. Recordable accidents are those involving injuries requiring more than first aid treatment.

''The continued recognition of Conoco as the industry leader in safety performance is a credit to our employees and their attention to safety in the work place and is a great source of pride within our company,'' said Constantine S. Nicandros, president and chief executive officer of Conoco. ''The real payoff is so many of our employees returning home safely at the end

of each day's work,'' he added.

Nicandros emphasized that while the company's performance in 1989 was an improvement over the previous year, Conoco's ultimate safety goal had not been reached.

''Our goal is zero accidents,'' he said. ''It is a realistic goal, an achievable goal, but one that requires each employees' continued commitment to the Conoco philosophy that 'Our work is never so urgent or important that we cannot take the time to do it safely,' '' Nicandros added.

Conoco has had the lowest annual lost time accident rate of all the major oil companies for 13 of the last 16 years, according to the API annual survey.

Conoco is a subsidiary of Du Pont.

WASHINGTON (OCT. 25) BUSINESS WIRE - US Sprint Thursday announced the immediate availability of its international VPN(sm) service to Canada, a public network service that offers private telecommunications network features and end-to-end international service.

US Sprint will offer VPN(sm) service to Canada via an agreement with Unitel Communications Inc., Canada's national facilities-based telecommunications carrier.

Through a technological and business partnership unique in international telephony, US Sprint and Unitel will extend the compatibility of their networks beyond simple interchange of transmission facilities to comprehensive joint network planning.

The partnership will jointly develope and implement network operations such as dial administration, signaling, operations methodology and order procedures.

International VPN(sm) is an extension of US Sprint's domestic VPN(sm) service, designed for medium and large customers.

Controlled by computer software in US Sprint's network, the VPN(sm) service allows communications traffic to be carried over shared transmission facilities, providing many of the same services available via dedicated leased channels without the cost of special telecommunications equipment or expensive facility leases.

The service includes operational advanced features such as seven-digit dialing compatible with uniform domestic network numbering for overseas calls.

US Sprint is a unit of United Telecommunications Inc., a diversified international telecommunications company based in Kansas City.

#90298b0049 10/25/1990 ~Business Wire

SUNNYVALE, CALIF. (OCT. 25) BUSINESS WIRE - MOSEL Thursday announced the introduction of their very low-power fast version of the 256K-bit static RAM, the MS62256A.

Organized as 32K x 8, with an access and cycle time as fast as 25 nano seconds these devices are used in high-performance systems and speed-critical applications, such as cache memory. The low-power consumption of this product also makes it ideal for power sensitive applications.

MOSEL's current offerings in the 256K-bit family are now broadened to include speeds of 25 to 55 nano seconds. Manufactured using MOSEL's proprietary high-performance CMOS process technology, both standard power and low-power versions are available. The low-power version features a full standby current of only 200ua (micron amp) maximum at 25 nano seconds.

For applications requiring battery backup, the device also features a low data retention current of only 50ua maximum. ''In addition to the low standby current, which is 50ua typical, our 256K static RAM draws only 125mA typical of operating current,'' said Howard Bogrow, MOSEL's marketing manager for SRAM Products.

''This provides system designers with an attractive choice for systems where power consumption is an important concern, such as the rapidly growing high-performance portable computer market.''
